

Helping Every Nebraska Student Read, Learn, and Explore

PebbleGo is a K-5+ digital learning platform that helps students grow literacy skills while building knowledge in science and social studies. PebbleGo supports schools in accelerating literacy, strengthening content knowledge, and ensuring equitable access to high-quality instruction through kid-friendly nonfiction articles, easy-to-use navigation and built-in supports.

“ If you want a resource that engages all students in independent learning and has them saying how much they love using it at home and at school, then there is no better option out there for K-3. ”

Jennifer Sturge, Calvert County Public Schools

Through the Nebraska ESU Marketplace, your school has access to discounted PebbleGo.
