BEAM CLAY®

Bocce Courts

CHOOSING YOUR BOCCE COURT SURFACE

For very serious bocce players, properly maintained natural clay makes the best playing surface. We make **Beam Clay®** Bocce Court Mix in Red, Orange, Brown, Tan or Grey from natural clays. These install 3" - 4" deep compacted over a firm drainage base. A properly maintained clay court is firm and yet has bounce or "life" to it. However, a clay court takes much work to install and properly maintain.

For those less dedicated to maintaining a bocce court, a stone dust, oyster shell, brick dust or "Fast Dry" court may be preferable as these dry quickly after rain and generally only require a light raking, occasional rolling, and watering. However, stone dust, oyster shell, or brick dust courts are generally softer and indent more easily (and may be too coarse or too dusty) and do not have the "live" feel of a properly maintained clay court.

The option we highly recommend is a **"Fast-Dry"** court. Typically used for tennis court installations, a **"Fast-Dry"** tennis court requires an irrigation system since **"Fast-Dry"** surfaces must be slightly moist to be resilient. However, covering less area, bocce courts can easily be hand watered when needed with a hose. The media refer to these **"Fast-Dry"** courts as "clay" courts; however they are finely crushed green or red aggregates that go thru a heat process with a gypsum binder. When slightly moist, **"Fast-Dry"** surfaces provide a resilient playing surface like natural clay at optimal conditions but are much easier to install and maintain. These install 1" deep compacted over a firm drainage base.

If you want even less maintenance, we also offer **Artificial Turf for Bocce Courts** (pages 16–22) which can be glued to a concrete or asphalt base or loose laid over a compacted aggregate base.

CONSTRUCTING & MAINTAINING A BEAM CLAY® NATURAL CLAY BOCCE COURT

Please see pages 3 - 5.

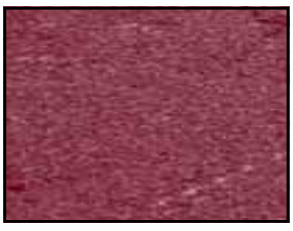

CONSTRUCTING & MAINTAINING A "FAST-DRY" BOCCE COURT

FAST-DRY BOCCE COURT SURFACING comes in 80 lb. bags in **Green** (Grayish Green) or **Red** (Burgundy Red) and only needs to be installed 1-1/4" thick (which compacts to 1" thick) over a firm drainage base of 3/4" minus or 3/8" minus crushed stone (with fines so that it compacts to a firm base yet drains well) covered by 1/2" of stone screenings. Do not use all one size "clean" stone which will not provide a firm enough base and will allow the playing surface to gradually sink into the voids. If you do use "clean" stone, cover with a geotextile fabric to prevent the surface material from sinking into the voids. With a geotextile fabric you can eliminate the 1/2" of stone dust layer. To install **Fast-Dry Bocce Court Surfacing**: spread, screed or rake level, thoroughly moisten, roll with a hand roller filled with water and broom smooth. Ready for play. Be sure to install "weep holes" in your frame at the court surface to allow excess water to drain off quickly.

To maintain **Fast-Dry Bocce Court Surfacing**: moisten, roll, rake or broom when needed. Each spring (in northern climates) or once a year (in southern climates), lightly scarify surface (1/4" - 1/2" deep) to keep surface well blended. If necessary, add 400 lbs. of Fast-Dry Bocce Court Surfacing per 1,000 s.f. to freshen court surface. Then same as before: screed, drag, or rake level, uniformly moisten, roll with hand roller filled with water and broom smooth. Ready for play.

BEAM CLAY®

Bocce Courts

BOCCE BALL COURT LAYOUT

RECOMMENDED AREA

Ground space is 1,824 square feet to 2,816 square feet.

SIZE AND DIMENSION

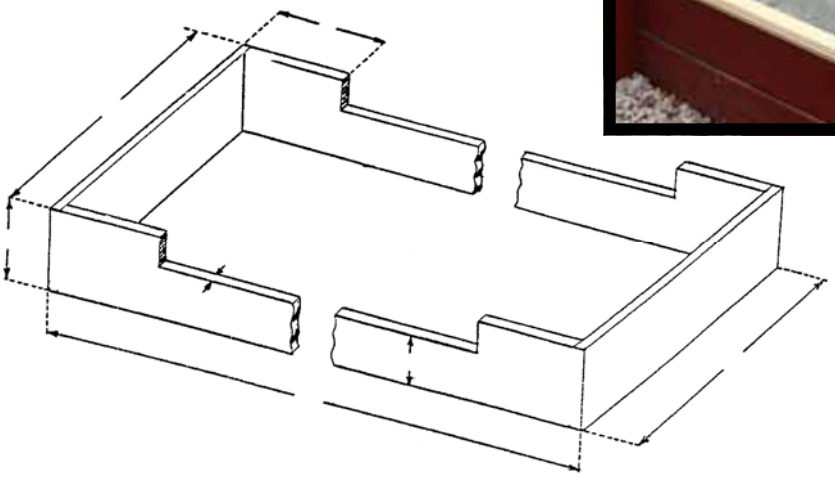

Overall court dimensions are 13'-0" to 19'-6" W by 78'-0" to 92'-0" L, although residential courts are often 10' x 60' or smaller. Additional space of at least 3'-0" on each side and 9'-0" on each end is recommended.

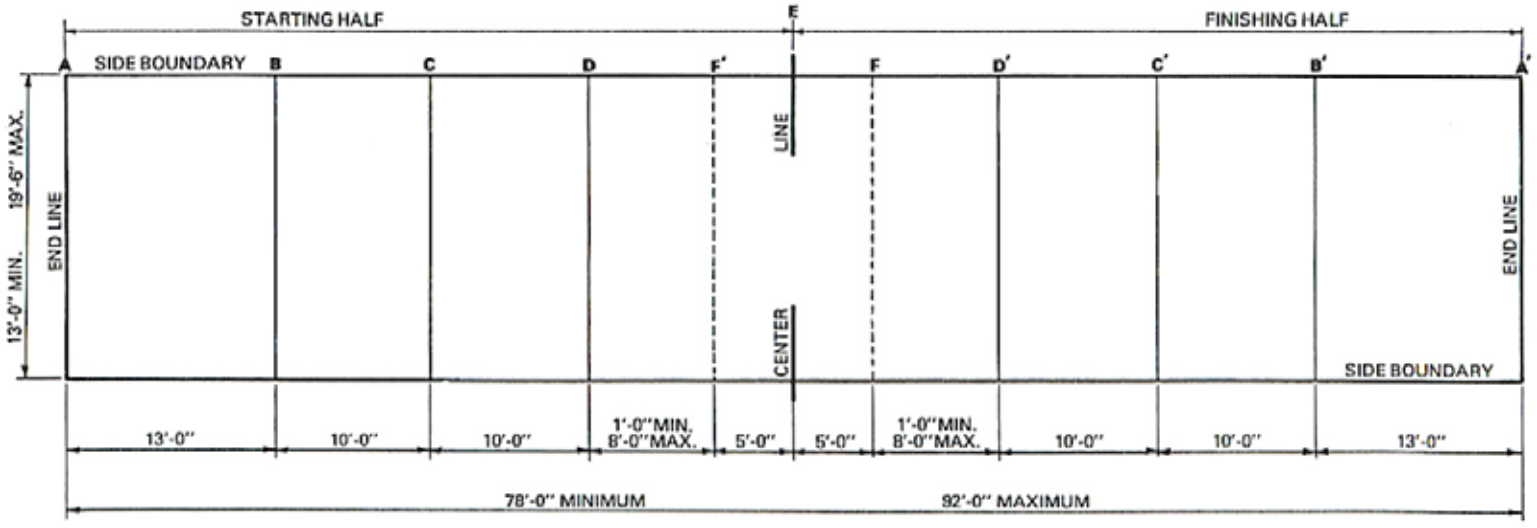

ORIENTATION

Preferred orientation is for the long axis to be north-south although it is of minor importance.

SPECIAL CONSIDERATIONS

Optional low wooden barrier should be provided at each end and/or side of court.

COURT LAYOUT

BEAM CLAY®

Bocce Courts

RECOMMENDATIONS FOR CONSTRUCTING & MAINTAINING A BEAM CLAY® - NATURAL CLAY BOCCE COURT

1. Make frame of 2 x 8's on bottom with additional 2 x 6's on ends.

2. Place entire frame on a level drainage bed of 3/8" minus or 3/4" minus stone (with fines so that it compacts firmly yet drains) a minimum of 3" deep compacted depending on site conditions. Drainage bed should be larger than frame by at least one foot all around and have a drainage outlet if native ground drains poorly. **IMPORTANT** - Apply stone first with frame on top.

3. Apply 1/2" layer of stone dust over drainage base within frame.

4. Apply 3-4" of **BEAM CLAY® - Bocce Court Mix** and screed to a uniform grade. It is generally best to construct a wood screed to pull across a level frame to maintain even grade. A Z-shaped screed of 2 x 4's or a rigid metal drag mat are also useful tools for leveling surfaces.

5. After a natural wetting by rain, check for low spots; fill with **BEAM CLAY® - Bocce Court Mix**; thoroughly saturate filled low spots. Remember to drill drainage holes in frame at court surface to allow for surface drainage.

6. When court has dried to sufficient moisture content, compact with water-filled roller, hand tamper or vibratory compactor. After drying further, surface will crack and continue to crack until sufficiently compacted. After another wetting by rain and drying to proper moisture content, rework surface as above.

7. PLEASE NOTE: Clay courts will crack at first and must be rolled and broomed until cracks get smaller and smaller and disappear. A clay court that cracks the first year will in later years have a long useful life; but a court that doesn't crack at first is too sandy, will wear our prematurely, and will require more maintenance in later years.

8. Once cracking becomes sufficiently small (hair-line cracks) apply approximately 200 lbs. of top-dressing and thoroughly broom. If top-dressing is applied too soon, it will fill the cracks but (by working into the clay) shorten the long-term life of the court.

9. After applying and brooming top-dressing, apply 50 lbs. of calcium chloride. After approximately 12 hours, re-broom and roll court. Ready for play.

10. After rain, re-broom and roll court when surface has dried. Reapply top-dressing and calcium chloride as needed.

11. For northern climates, in the fall, we suggest removing top-dressing from court. This will protect your **BEAM CLAY®** surface from being diminished by blending in of top-dressing. In the spring, scarify and smooth court surface, then reapply top-dressing.

RECOMMENDATIONS FOR RESURFACING EXISTING BOCCE COURTS WITH BEAM CLAY®

If resurfacing an existing clay bocce court, remove top-dressing from clay surface, scarify surface approximately 1/2" in depth, and work in 1"+ **BEAM CLAY® - Bocce Court Mix**, then follow above recommendations.

Remember to drill drainage holes in frame at court surface to allow for surface drainage.

BEAM CLAY®

Bocce Courts

RECOMMENDATIONS FOR RECONDITIONING NATURAL CLAY BOCCE COURTS AFTER WINTER SEASON

1. Sweep or blow top-dressing from court.
2. Scarify court with drag mat. Then thoroughly broom.
3. After natural wetting by rain, check for low spots; fill with **BEAM CLAY® - Bocce Court Mix**, working into the existing surface for good bonding. Thoroughly saturate filled areas.
4. Apply approximately 200 lbs. of top-dressing, while court is still damp. Broom in both directions.
5. Apply 50 lbs. of calcium chloride (flakes). After calcium chloride thoroughly dissolves and court reaches proper moisture content (12 to 24 hours), court should be re-broomed and compacted (rolled). Ready for play.
6. After rain, re-broom and roll court when surface has dried. Apply top-dressing and calcium chloride as need during season. Normally, 3-4 applications are sufficient for season.

RECOMMENDATIONS FOR RESURFACING NATURAL CLAY BOCCE COURTS

1. Sweep or blow top-dressing from court.
2. Scarify court approximately 1/2" in depth.
3. Apply 1"+ of **BEAM CLAY® - Bocce Court Mix**.
4. Re-scarify to blend **BEAM CLAY®** with existing surface. Then drag mat entire court.
5. After a natural wetting by rain, check for low spots; fill with **BEAM CLAY® - Bocce Court Mix**. Thoroughly saturate filled areas.
6. When court has dried to sufficient moisture content, compact with water-filled roller, hand tamper or vibratory compactor.
7. PLEASE NOTE: Clay courts will crack at first and must be rolled and broomed until cracks get smaller and smaller and disappear. A clay court that cracks the first year will in later years have a long useful life; but a court that doesn't crack at first is too sandy, will wear out prematurely, and will require more maintenance in later years.
8. Rework surface as above, until cracking becomes sufficiently small (hair-line cracks) apply approximately 200 lbs. of top-dressing and thoroughly broom, If top-dressing is applied too soon, it will fill the cracks but (by working into the clay) shorten the long-term life of the court.
9. After applying and brooming top-dressing, apply 50 lbs. of calcium chloride (flakes). After calcium chloride thoroughly dissolves and court reaches proper moisture content (12 to 24 hours), court should be re-broomed and rolled. Ready for play.
10. After rain, re-broom and roll court when surface has dried. Apply top-dressing and calcium chloride as needed during season. Normally, 3-4 applications are sufficient for season.

BEAM CLAY®

Bocce Court Surfaces: Rubber Curbing

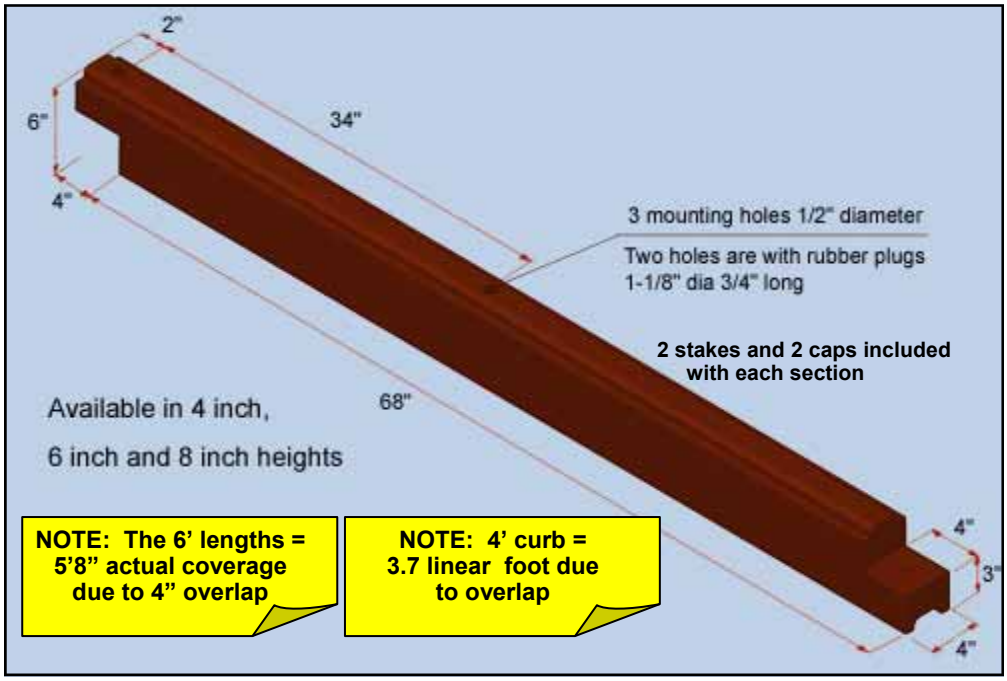

WHOLESALE PRICE LIST
EFFECTIVE: JUNE 1, 2022

RUBBER CURBING

		PER PIECE
4" High x 4” Wide x 6' Long (30 lbs./piece, up to 99 pieces/pallet)	#RC-4X4X6	$45
6" High x 4” Wide x 6' Long (45 lbs./piece, up to 63 pieces/pallet)	#RC-6X4X6	$77
8" High x 4” Wide x 6' Long (70 lbs./piece, up to 45 pieces/pallet)	#RC-8X4X6	$110
4" High x 3” Wide x 6' Long (20 lbs./piece, up to 100 pieces/pallet)	#RC-4X3X6	$40
4" High x 3” Wide x 4' Long (13 lbs./piece, up to 140 pieces/pallet)	#RC-4X3X4	$28

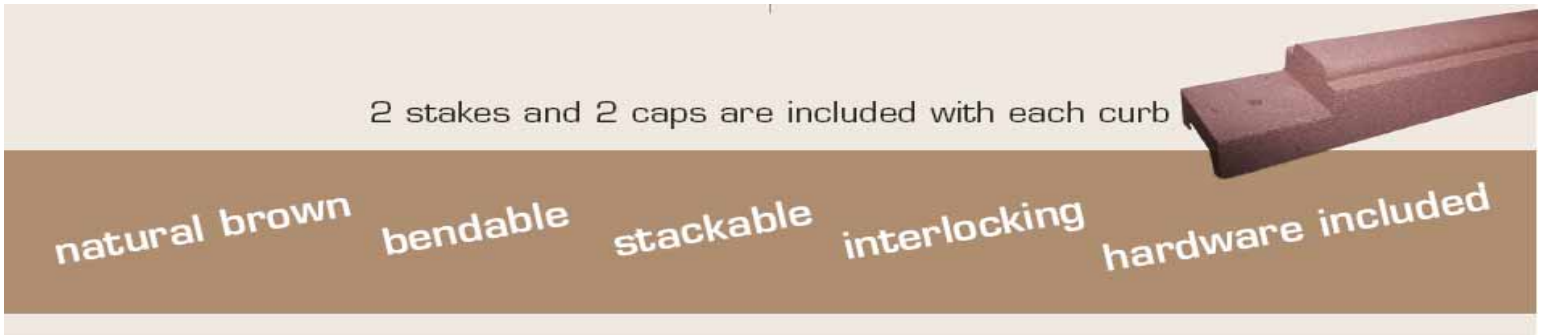

*Please note: The 4” wide sections are grooved and can be stacked to create desired height,. However, the 3” W is not stackable. 3” W lengths of curbing are **not** **grooved for stacking.***

- More resilient than wood
- No warping or discoloring
- No splinters
- Non toxic
- Will not rot
- Stackable
- Interlocking
- Available in 4 ft lengths and 4” or 6 ft lengths and 4", 6" and 8" heights
- No CCA or other harmful chemicals
- Easy to install with pre drilled holes
- Made from 100% recycled tires
- Flexible with rounded edges
- Will not breed ticks, termites or other insects
- Maintenance free
- Hardware & Caps included
- Neutral brown tone-compatible with any surface color

Rubber Curbing
For Bocce Courts

Product Specifications

Product Description:

1. Material: compression molded composite of the 100% recycled rubber and polyurethane prepolymer

2. Physical properties of the rubber composite:
   a) Density 0.6 oz/cu in (ASTM C642)
   b) Durometer Hardness 65A ± 7 (ASTM D2240)
   c) Tensile Strength* minimum 125 psi (ASTM D412)
      (* main structural areas)
   d) Compression deformation 10% at 70psi, 68°F (ASTM D575)
   e) Brittleness at Low temperature: -40°F (ASTM D746)
   f) Freeze and thaw when exposed (ASTM C672)
      to deicing chemicals no loss after 50 cycles
   g) Coefficient of thermal expansion: 8 x10^{-5} in/in/°F (ASTM C531)
   h) Weathering 70 hours at 158°F (ASTM D573)
      - hardness retained 100% (± 5%)
      - compressive strength 100% (± 5%)
      - tensile strength 100% (± 5%)
      - elongation retained 100% (± 5%)

3. Available models:
   a) 4”W x 4”H x 72”L with weight of 30 lbs.
   b) 4”W x 6”H x 72”L with weight of 45 lbs.
   c) 4”W x 8”H x 72”L with weight of 70 lbs.
   d) 3”W x 4”H x 72”L with weight of 20 lbs.
   e) 3”W x 4”H x 48”L with weight of 13 lbs.

4. Finishing color: dark brown

Installation methods:

a) with 2 spikes 18” long x 3/8” diameter provided for each 4” high piece
b) with 2 spikes 24” long x 3/8” diameter provided for each 6” high or 8” high piece

Note: The mounting holes can be closed after installation with the rubber plugs 1-1/8 diameter and ¾” long, supplied with the product.

Components:

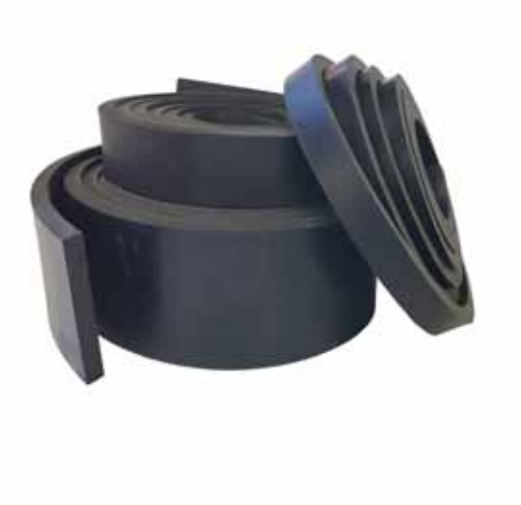

a) 100% recycled rubber from car and truck tires (NR, SBR)
b) polyurethane prepolymer for rubber granules
c) brown pigment

BEAM CLAY®

Bocce Court Grooming Tools—Brooms

7’ WIDE MAHOGANY BOCCE COURT BROOM WITH 3 ROWS OF 7” FIBER BRISTLES & 2 STEEL HANDLES

This is the traditional court broom made the same way for over 75 years. The solid mahogany block is aesthetically pleasing and unaffected by water and severe temperature changes. Three full rows of 7" long bassine fiber absorb moisture and help dry the court. Two heavy gauge steel handles are included. The handles are reversible to prolong broom life. The broom provides an even sweep 7' wide.

#311-7

$510

7’ WIDE ALUMINUM BOCCE COURT BROOM WITH 3 ROWS OF 5-1/2” GREEN POLYPRO BRISTLES & TWO 4’ ALUMINUM HANDLES WITH 20” CROSS PIECE

This is the ultimate bocce court broom. The aluminum back brush is "dynamically weighted" to provide a one time pass 7' wide. It is the fullest brush on the market with 3 rows stiff polypropylene bristles 5.5" long epoxy set into the aluminum block. Bristles are inert to the elements. The broom is sold complete with two 4' aluminum handles joined by a 20" PVC cross piece. The handles are reversible for added broom life. The broom can be flipped over and used as a scraper. Two hooks are provided for hanging up.

#411-7

$520

BEAM CLAY®

WHOLESALE PRICE LIST
EFFECTIVE: MAY 1, 2022

Bocce Court Grooming Tools - Brooms

MIDWEST™ 7' WIDE MONSTER BROOM

Heavy-duty aluminum construction. Available with two or three rows of 4-1/2" bristles. Bristles are removable for easy replacement or for adjusting the broom's stiffness.

#82084	Monster Drag Broom (Two-Row Bristles)	$260.95
#83084	Monster Drag Broom (Three-Row Bristles)	$295.95
#SP50067	7' Replacement Bristles (One Row)	$51.95

BOCCE COURT SCARIFIER BROOM

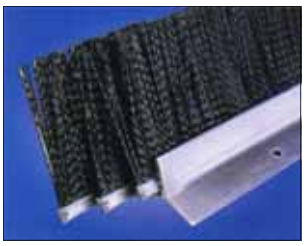

Identical to the two-row Monster Broom, except with scarifying edge.

#82384	7' Scarifier Broom (Two-Row Bristles)	$333.95
#SP50067	7' Replacement Bristles (One Row)	$51.95

MIDWEST™ 28" MAXIMUM-DUTY BROOM

Made from the same heavy-duty extrusion as the 7' Monster Broom, this broom is one of the heaviest built brooms on the market. By flipping the broom over, you have a scraping edge. The 28" head is available with two-row or three-row bristles. Available with the innovative 60" bent powder-coated aluminum handle, excellent for eliminating back strain. Bristles are removable for easy replacement or for adjusting the broom's stiffness.

#82928	28" Maximum-Duty Broom (Two-Row Bristles)	$107.95
#83928	28" Maximum-Duty Broom (Three-Row Bristles)	$120.95
#SP50068	28" Replacement Bristles (One Row)	$15.95

28" SCARIFIER BROOM

With scarifying edge.

#82328	28" Scarifier Broom (Two-Row Bristles)	$153.95
#SP50068	28" Replacement Bristles (One Row)	$15.95

24" GENERAL-PURPOSE BROOM

This 24" general-purpose broom is an excellent choice for the garage or shop, and is also used for base path and infield dressing. Professional grounds keepers flip the broom over for a final dressing of base paths. Available with either a 60" ergonomic bent powder-coated aluminum handle or a 60" straight powder-coated aluminum handle.

#82924	24" General-Purpose Broom, Bent Handle	$78.95
#82925	24" General-Purpose Broom, Straight Handle	$78.95

BEAM CLAY®

Bocce Court Resurfacing/Scarification Tools

WHOLESALE PRICE LIST
EFFECTIVE: JULY 1, 2022

COURT DEVIL SCARIFIERS

Great for loosening & scarifying your bocce court surfaces.

#146-3409 COURT DEVIL —Weight 105 lbs., width 48”.	**$1,725**
#146-3408 COURT DEVIL JR—Weight 85 lbs., width 16”.	**$1,350**

TRU-FLOW TOP-DRESSERS

This top-dresser offers unmatched performance in distributing Fast-Dry Bocce Court Surfacing.

Tru-Flow spreaders handle the toughest of conditions. For top-dressing to be effective, it needs to be applied as uniformly as possible. Tru-Flow’s unique 8” dispersal drum is encased in expanded metal. Conventional drop spreaders rely on gravity to help release the Fast-Dry from its hopper, but the Tru-Flow pulls the surface out of the hopper and on to the court with unmatched consistency.

24” Hand Spreader holds up to four 80 lb. bags. Simply bolt on the handle and you are ready to start your pre-season renovation.

#124-3069 - 24” Hand Spreader	**$1,300**
#124-3065 - 36” Tow Spreader	**$3,525**
#124-3066 - 54” Tow Spreader	**$4,375**

BEAM CLAY®

Bocce Court Shoe Brushes

WHOLESALE PRICE LIST
EFFECTIVE: JULY 1, 2022

BOCCE COURT SHOE BRUSH

Two foam plastic blocks with blue plastic bristles on steel frame with steel scraper bar. Simple & Effective! (6 lbs.)

#4042414		$76.95
#4042514	- Repl. Brush (two per Cleat Brush) each	$15.95

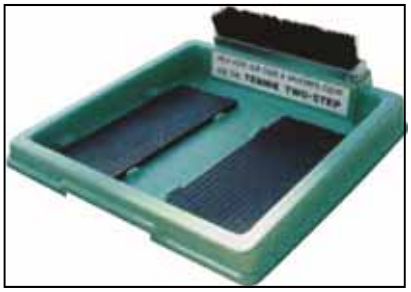

THE TREAD BLASTER

The Tread Blaster is uniquely designed to remove dirt and grit from your shoes without getting the tops of your shoes wet. A necessity for all facilities with clay courts. Easy to install, all you need is access to water and a hose with a spigot that provides a pressure of 30 to 60 psi. You'll be happy you made the investment.

#147-4000		$560

TENNIE TWO-STEP

The Tennie Two-Step keeps carpets, players' shoes and walkways cleaner. The Tennie Two-Step is simplicity in itself. It is a UV-resistant polyethylene water-holding basin containing two patented perforated rubber panels designed to force water into the soles of your shoes while you rock back and forth on your feet. The results are noticeable everywhere. Clean shoes mean no more Fast-Dry in the house, on walkways, or in your car. Tennie Two-Step is available in its classic form, or with a newly designed shoe brush attached to the frame for more aggressive cleaning needs. You can also upgrade your existing units by installing a brush. Installation is simple and requires two holes to be drilled and two bolts to be tightened. All the appropriate hardware is included.

#147-3012	SHOTTSWB	- Tennie Two-Step with Brush	$280
#147-3046	SHOTTS	- Tennie Two-Step (without Brush)	$220
#147-3011	SHOTTSBR	- Brush attachment	$75

COURT MAID

Court Maid's powder-coated, all-aluminum frame is designed to be installed at the entrance and exit points of your bocce court for cleaning shoes and trapping clay or Fast-Dry within its collection basin. The brush unit on top lifts off for easy removal of the accumulated Fast-Dry. Simply hose off to clean.

#147-3576	SHOCMJ	- Black 14 3/4" x 20" x 4"	$410

HAR-TRU SHOE BRUSH

The Har-Tru "Scrusher" shoe brush can be attached to the sidewalk or left free standing. The softer upper bristles dust off the upper portion of the shoe while the stiffer lower bristles scrape topping from the soles. The base is made of heavy-duty carbon steel. The shoe brush is easily cleaned with a hose or soap and water.

#147-3601	SHOSBR		$105
#147-3602	SHOSBRBB	Replacement Bottom Brush	$9.25
#147-3603	SHOSBRSB	Replacement Side Brush (each)	$24

BEAM CLAY®

Synthetic Turf for Bocce Courts

WHOLESALE PRICE LIST
EFFECTIVE: JULY 1, 2022

BOCCE TURF™ - SYNTHETIC TURF FOR BOCCE COURTS

Can be installed over crushed aggregate base (3/4" minus) or glued to concrete or asphalt. Tape and glue needed for seams, if installing over crushed aggregate. 1/2" of fine stone dust recommended over crushed aggregate base for a smooth compacted surface. Permeable turf not recommended—can cause wash out in base. Perimeter drainage best—weep holes in frame if above ground at surface of turf, perimeter drains if below ground (3/4-1" plastic pipe at both sides of center line or at corners connected to drain will work. Foam backing recommended—helps lessen bounce and helps prevent dimples forming in the aggregate base. Scrim over foam backing recommended for glue down, without scrim over aggregate base (less curling). Turf (over aggregate base) can be nailed to pressure treated 2x4's installed vertically around perimeter and/or a bounce board can be added to frame to hold turf down to prevent edges from curling—up but not so tightly to prevent drainage unless there are weep holes. Perforated not recommended — can cause wash out in base and uneven play.

Here are some guidelines for choosing turf:

Most Popular - Bocce 25 oz. Nylon and 24 oz. Polypro with shorter and denser fibers and 5mm foam backing are the most popular, followed by 36 oz. Polypro and 36 oz. Nylon.

Bounce - 5mm foam backing gives less bounce. 1mm rubber gives more bounce. Bounce has a lot to do with the face of the turf as well: more turf in the face (greater pile height and density) will cushion the bounce more. Adding round sand will decrease bounce. Adding angular or sub-angular sand will increase bounce.

Speed - 24 oz. Polypro is the fastest surface, followed by 36 oz. Polypro. Speed can be increased by adding either sand and adjusted on any except 24 oz. Polypro, which is too dense and short. Adding up to 2 lbs. sand per square foot allows you to get the speed and bounce you prefer.

Memory - Nylon turf DOES NOT have "memory" Polypropylene does. What this means is if you walk on Polypropylene turf every day for a year or more, eventually it will mat down. It "remembers" being mashed down and eventually doesn't come back up. However, Nylon turf will look the same after each use — it doesn't remember being mashed down and goes back to its original state after each use. However, this come with a price. Nylon is more expensive.

25 oz. NYLON stadium grade synthetic turf with 5mm foam backing with or without scrim in Turf Green or Verde. No infill. 15' Stock Rolls	**PL30615W5MM**	**$4.85/sf**
36 oz. NYLON stadium grade synthetic turf with 1mm rubber backing in Turf Green or Verde. 15' Stock Rolls	**PL30815W1MM**	**$4.55/sf**
48 oz. NYLON stadium grade synthetic turf with 1mm rubber backing in Turf Green, 2-3 lbs./sf dry 70 mesh sand or smaller sand recommended. 15' Stock Rolls	**PL30715W1MM**	**$5.35/sf**
24 oz. POLYPROPYLENE synthetic turf with 5mm foam backing with or without scrim - Pine Green. 15' Stock Rolls	**PL35715W5MM**	**$3.65/sf**
24 oz. POLYPROPYLENE synthetic turf with SilverBack™ Polyurethane, Pine Green. 15' Stock Rolls	**PL35715WSB**	**$2.25/sf**
36 oz. POLYPROPYLENE synthetic turf. Available in 14 colors.		
15' wide, spring green or pine, 5mm foam	**PL70515W5MM**	**$4.50/SF**
15' wide, spring green or pine, SilverBack™ polyurethane	**PL70515WSB**	**$3.25/SF**
15' wide, pine or clay, 1 mm rubber	**PL70515W1MM**	**$3.25/SF**
15' wide, clay, red, white, blue, orange, yellow, black, tan, or brown, 5mm foam	**PL70515WC5MM**	**$4.85/SF**
15' wide, clay, red, white, blue, orange, yellow, black, tan or brown SilverBack™ polyurethane	**PL70515WCSB**	**$3.65/SF**
15' wide, purple, vegas gold, crimson, maroon, silver, navy, light blue, or carolina blue 5mm foam	**PL705L15WC5MM**	**$4.85/SF**
15' wide, purple, vegas gold, crimson, maroon, silver, navy, light blue, or carolina blue SilverBack™ polyurethane	**PL705L15WCSB**	**$3.65/SF**

PLEASE NOTE: Synthetic Turf is normally rolled face out. No charge to "reverse roll" cut pieces with turf faced in—which makes it easier to install—doesn't need to be flipped over.

There is a $2 per linear foot charge (**#CPTCUT**) to cut the width (there is a 1/4" tolerance) and/or pre-trim (**#CPTTRIM**) the scrim fabric along edge with a $100 minimum charge. Pre-trimming scrim can be done on site with scissors.

If gluing to concrete, use Robert's 6700 glue from Home Depot if 65° or warmer, Turf Claw™ if 55°+, or Nordot 34-G if 50°+. If installing over compacted aggregate, you need to spike perimeter and tape (12" w) & glue seams. Turf Claw™ can be shipped with your turf order. Check current pricing for tape & glue per quantity needed. If installing over macadam, be sure glue is compatible with macadam or loose lay with 2-3 lbs. sand to weigh the turf down, plus tape & glue seams. If gluing SilverBack™ polyurethane backing, make sure glue is polyurethane compatible.

INSTALLING BOCCE TURF™ ON CONCRETE

Floor Preparation

Concrete should be cured, clean and dry. Concrete shall be free of paint, dirt, grease, oil curing or parting agents, and other contaminants, including sealers, that may interfere with the bonding of the adhesive. Whenever a powdery or porous surface is encountered, a primer compatible with the adhesive shall be used to provide a suitable surface for the glue-down installation. Patching of cracks and depressions shall be made with an appropriate and compatible latex or polymer fortified patching compound. Do not exceed manufacturer's recommendations for patch thickness. Large patched areas must be primed.

Recommended Glues

Nordot 34G for 50°F and up. Buy direct from Synthetic Surfaces Inc. at 908-233-6803.

Turf Claw for 55°F and up available shipped with turf.

Robert's 6700 Indoor/Outdoor for over 60°F available at Home Depot or Lowes.

Turf Installation

Unroll in place to be sure fit is correct.

Roll up section at one end and apply glue to concrete. Unroll over glue.

Roll up from other end. Apply glue to concrete. Unroll over glue.

Roll with 100 pound roller. Re-roll 5-6 hours later.

Cure times will vary and will be affected if overnight temperatures drop below 60°F.

Make sure glue has 24 hours to dry by covering with plastic if wet weather is projected within 24 hours.

General Maintenance

OUTDOOR USE

Sweep the synthetic turf as needed frequently with a broom to remove surface soil, and hose down occasionally with water. Do not use a rotary brush machine.

INDOOR USE

Vacuum the grass like carpeting as you would any other type of carpeting to pick up surface soil.

STAIN REMOVAL

Synthetic turf is resistant to stains. However, spills do occur, and the resulting stains should be removed as soon as possible. In most cases, they can be removed with either detergent suds or a solvent-based cleaning agent. Follow the **STAIN REMOVAL CHART** for specifics.

Stain Removal Chart

WATER-BORNE AND MISCELLANEOUS STAINS

Acid, Alcohol, Animal Urine, Alkali, Blood, Coffee, Tea, Cola, Soot, Chocolate, Dye, Glue, Fruit Juice, Ice Cream, Latex Paint, Milk, Mustard, Rust, Water Colors

REMEDY

Sponge with detergent suds and cold water. This method will be effective even after 24 hours. Note: It is important to use just enough fluid to irrigate solid particles out of fabric. Too much fluid will leave a "ring." Clean from outside of stain in toward center so as not to leave a ring.

PERSISTANT STAINS	REMEDY
Chewing Gum	Spray with Freon Aerosol and Scrape
Crayon	Sponge with dry cleaning solvent
Nail Polish	Sponge with acetone.
Lipstick	Sponge with dry cleaning solvent
Metal Polish	Sponge with dry cleaning solvent
Furniture Stain	Sponge with dry cleaning solvent
Tar	Scrape Excess, Sponge with dry Cleaning Solvent
Oil Paints	Blot Immediately, Sponge with turpentine or paint remover. Blot with detergent and water. Re-sponge with cold water to remove detergent

EMULSIFIED STAINS	REMEDY
Cosmetics, Ink, Shoe Polish	Sponge with detergent and cold water. Apply solvent. Clean solvent residue with soap and water. Re-sponge with cold water to remove detergent

Note: in some cases it may be necessary to repeat any of the above procedures to insure thorough cleaning

BEAM CLAY®

Stabilizer® Conditioner & Stalok Fibers for Horse Arenas

WHOLESALE PRICE LIST
EFFECTIVE: JANUARY 1, 2022

CONDITIONER FOR EQUESTRIAN TRACKS & ARENAS

STABILIZER®

Adds firmness, resilience and dust control by helping maintain consistent moisture content to sand-based equestrian surfaces. Incorporate 1 lb. per 15 SF of sand 2-1/2" deep, or 5 lbs./ton of sand. Recommended to make 2 passes with roto-tiller to incorporate well.

40 lb. Bags, up to 50/Pallet

F.O.B. AZ **#STAB-AZ** — **$130**

Also available in 200 lb. Bulk Bags (up to 75/pallet), 1,000 lb. bulk bags (up to 2/pallet), and 2,000 lb. bulk bag (1/pallet)

F.O.B. NJ **#STAB-NJ** — **$140**

SYNTHETIC REINFORCEMENT FIBERS FOR EQUESTRIAN TRACKS & ARENAS

STALOK® G400 (SPORTS GRIDS/TURF GRIDS)

1/2" - 3/4" tan or green polypropylene fibers to mix into sand-based equestrian surfaces with **STABILIZER®** to dramatically increase resilience, load bearing, and sheer strength of the mix (more cushion and less cupping). Incorporate 1 lb. per 15 SF of sand 2-1/2" deep, or blend 5 lbs./ton of sand. Recommended to make 4-5 passes with roto-tiller to incorporate.

30 lb. Bag (up to 17 Bags/Pallet) **#STALOKG400BG** — **$3.90/lb. $117/Bag**

20 (30 lb.) Bags/Box (1 Box/Pallet) **#STALOKG400BX** — **$3.90/lb. $2,340/Box**

STALOK® G2600 (SPORTS GRIDS/TURF GRIDS)

1-1/2" green polypropylene fibers to mix into rootzone to reinforce turf. Incorporate 1 lb. per 12 SF 3-4" deep.

30 lb. Bag (up to 17 Bags/Pallet) **#STALOKG2600BG** — **$3.90/lb. $117/Bag**

20 (30 lb.) Bags/Box (1 Box/Pallet) **#STALOKG2600BX** — **$3.90/lb. $2,340/Box**

STALOK® GC200

Shredded carpet fibers to mix into sand-based equestrian surfaces with **STABILIZER®** to dramatically increase resilience, load bearing, and sheer strength of the mix (more cushion and less cupping). Incorporate 5-10 lbs. per 15 SF of sand 2-1/2' deep or blend 25-50 lbs./ton of sand. Recommended to make 3 passes with roto-tiller to incorporate.

500 lb.+ Bulk Bags, 1/Pallet **#STALOKG200** — **Call for Price and Availability**

STALOK® G30-EUROPEAN FELT

Shredded white or light green pieces of felt from Germany to mix into sand based equestrian surfaces with Stabilizer to dramatically increase resilience, load bearing, and sheer strength of the mix (more cushion and less cupping). Incorporate 1/4 lb. per one SF, 2-1/2' deep, or blend18-20 lbs./ton of sand.

300 lb. Bales, 6 Bales/Pallet **#STALOKG30** — **Call for Price and Availabilitiy**

Stabilizer®

Organic powder that stabilizes soil by binding soil particles

Is your arena out of control? At the first drop of rain, an ordinary arena turns into a muddy mess, or, a dusty brick during a long hot day. If the arena is inconsistent, it leads to an unpredictable footing and more injuries. But when your arena has just the right amount of moisture, its perfect! **You can strengthen your arena's weaknesses.** Stabilize your arena by binding it's soil particles with **Stabilizer®, the Original Natural Binder** developed over 26 years ago.

Stabilizer helps you keep perfect arena consistency during weather extremes. It maintains the bond between soil particles, absorbing excess water within the soil. The surface remains firm enough to get on quickly after a rain. During drought, Stabilizer holds onto moisture longer, reducing dust and keeping the surface consistent. It saves you in the extremes, but it really helps you with daily maintenance. As soil particles dry out, Stabilizer® releases the right moisture back into the arena. **Stabilizer® uses water more efficiently to reach the ideal arena consistency and to increase cohesion.** When a 1200 lb horse digs into the arena, the hoof needs to dig in without slipping. Cohesive soil particles increase the arena's shear strength, reducing slippage. **Stabilizer® helps you control moisture, dust, maintenance and cohesion on your arena.**

Mix Stabilizer yourself or get it **premixed** with a customized arena blend. Stabilizer provides moisture control and cohesion for your arena, but it works even better in conjunction with **StaLok Fiber**.

Features

- Organic powder from crushed seed hulls- 100% natural
- Binds soil particles for arena
- Retains moisture for maintenance
- Greatly reduces dust, mud, and erosion
- Maintains firmness when wet
- Increases arena's cohesion
- Increases arena's shear strength
- Available in 40 lb. bags or 1 ton bulk bags

StaLok® Fiber
Synthetic fiber that stabilizes soil by imitating root network

Natural turf is the best surface for a horse to run or jump on. How can an arena attain a natural turf consistency using the existing soil? You can get pretty close by adding grass roots. **StaLok® Fiber is a synthetic fiber that mimics a natural grass root.** Once blended into the arena, StaLok® Fiber creates a network structure, similar to a turf root zone. With the fiber's flexible strength multiplied across the network, impact can be spread- increasing **the arena's load bearing capacity.**

StaLok® Fiber maintains the **network structure** despite rain or drought, and provides resistance to the surface where impact occurs. Its like a cushion that makes the arena safer and easier for the horse no matter what the weather throws at it. Cushion is crucial with the world's greatest athletes digging into the arena. A horse can jump higher or run quicker on a hard surface like concrete, but it won't last long. Conversely, a soft surface not only slows the horse, but has long term damaging effects. The right cushion provides the horse with the right amount of firmness to jump or run on, without becoming too hard- **just like natural turf.**

Mix StaLok® Fiber yourself or get it **premixed** with a customized track blend. StaLok® Fiber provides cushion and load bearing strength to your arena, but works even better in conjunction with Stabilizer®.

Features

- Synthetic fiber that mimics root network
- Stabilizes soil by network structure
- Increases arena's load bearing capacity
- Provides cushion
- Available in 30 lb. bags, or 700 lbs. to 1,000 lb. boxes

StaLok® All Weather
Sand and fiber mix enhanced with polymer

Water can be an arena's best friend, or worst enemy. The right amount of water makes your arena consistent, perfect for the horse to run or jump on. Problems occur when you have too much water- your arena turns into a muddy mess. Too little, and it turns into a dusty brick. Just take water out of the equation. **StaLok® All Weather is natural sand and fiber enhanced with polymer.** The polymer binds the sand, keeping it stable, and provides **protection from the elements: rain, snow, drought.**

The polymer, combined with **StaLok® Fiber**, provides resistance to the surface where impact occurs- **creating high load bearing capacity and shear strength.** Its like a **cushion** that makes the arena safer and easier for the horse no matter what the weather throws at it. The right cushion provides the horse with the right amount of firmness to jump or run on, without becoming too hard- **just like natural turf.**

Features

- Sand and fiber enhanced with polymer
- Never needs water
- No dust, no mud, no freezing
- High load bearing capacity
- High shear strength
- Provides cushion
- Available in bulk or 1-ton bags

BEAM CLAY®

Stabilizer®

Organic powder that stabilizes soil by binding soil particles

Can a natural dirt track perform like a synthetic? Natural dirt tracks just need a little help with control. At the first drop of rain, an ordinary track turns into a muddy mess, or, a dusty brick during a long hot race. The track is inconsistent, leading to more unpredictable races and injuries. But when your track has just the right amount of moisture, its perfect! Why get rid of it when you can **strengthen the track's weaknesses?** You can stabilize your dirt track by binding it's soil particles with **Stabilizer®, the Original Natural Binder** developed over 26 years ago.

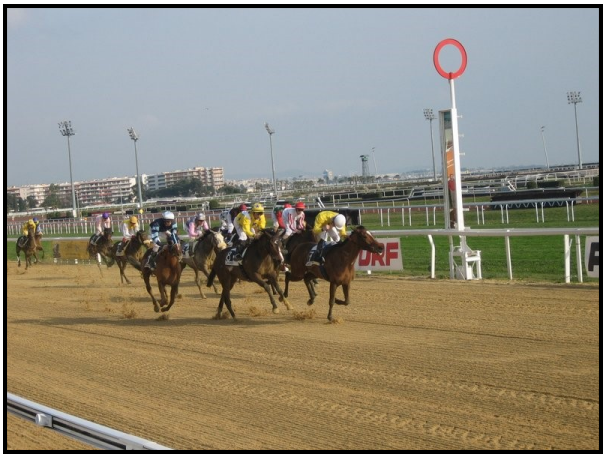

Stabilizer® helps you keep perfect track consistency during weather extremes. It maintains the bond between soil particles, while absorbing excess water within the soil. The surface remains firm enough to race after a rain, and helps you seal the track during a heavy downpour— **so you can race even sooner.** During drought, Stabilizer® holds onto moisture longer, reducing dust and keeping the surface consistent. It saves you in the extremes, but it really helps you with daily maintenance. As soil particles dry out, Stabilizer® releases the right moisture back into the track. **Stabilizer® uses water more efficiently to reach the ideal racing consistency and to increase cohesion.** When a 1200 lb horse digs into the track at 30 mph, the hoof needs to dig in without slipping. Cohesive soil particles increase the track's shear strength, reducing slippage. **Stabilizer helps you control moisture, dust, maintenance and cohesion on your track.**

Mix Stabilizer®yourself or get it **premixed** with a customized track blend. Stabilizer® provides moisture control and cohesion for your track, but it works even better in conjunction with **StaLok® Fiber** for a dirt track.

Features

- Organic powder from crushed seed hulls- 100% natural
- Binds soil particles for dirt track
- Retains moisture for maintenance
- Greatly reduces dust, mud, and erosion
- Maintains firmness when wet, helps seal track sooner
- Increases track's shear strength
- Increases track's cohesion
- Available in 40 lb. bags or 1-ton bulk bags

StaLok® Fiber

Synthetic fiber that stabilizes soil for turf by imitating root network

Performance of the horse is measured in victories. What about the track? Slippage and injuries are measures of an inconsistent track. How can you make your turf track more consistent and durable over many races? Add more roots. **StaLok® Fiber is a synthetic fiber that mimics a natural grass root.** The fiber stabilizes the root zone underneath, so the turf on top can withstand impact. Many fibers intertwined with grass roots **creates a network.** With the fiber's flexible strength multiplied across the network, impact can be spread- **increasing the turf's load bearing capacity.** With greater load bearing capacity, the turf is durable over many races.

When grass roots grow together with StaLok® Fiber, the roots themselves become stronger. They are less likely to tear out of the ground- **increasing the turf's shear strength.** Increased shear strength reduces slippage- the hoof can dig in without the turf tearing apart. This means fewer divots that can lead to injuries and wear down the track sooner.

The network makes the surface stronger, but will the grass look good? StaLok® Fiber increases strength and pore space. It is like a hammock: strands of rope intertwined can support your weight, even with spaces between the strands. More pore space means reduced compaction, proper drainage and air filled porosity, **so your turf can grow properly and recover from stress quickly.**

Features

- Synthetic fiber that imitates root network
- Stabilizes soil for turf while promoting proper grass growth
- Seamless integration, no visible structures or forms
- Strength increase of 215%, Porosity increase of 7%
- Soil can still be graded and grass can be re sodded
- Available in 30 lb. bags, or 700 lb. to 1,000 lb. boxes

BEAM CLAY®

Equestrian Surfaces for Horse Tracks, Arenas & Horsestalls

WHOLESALE PRICE LIST
EFFECTIVE: JUNE 1, 2022

RUBBER GRANULES FOR HORSE TRACKS & ARENAS

Natural Black		Red		Brown		Green		Blue		Cypress		Black
			BULK PER TON				ONE-TON BULK BAGS				40 LB. BAGS	
BLACK		RMG-B-BL	$375		RMG-BB-BL	$375		RMG-40#-BL	$7.95		
50/50		RMG-B-50	$545		RMG-BB-50	$545			—		
COLORED		RMG-B-C	$615		RMG-BB-C	$615		RMG-40#-C	$12.50		

Easy to install! 3/8" - 3/4" Size. Non-Decomposing and Clean!

WEIGHT: Approximately 26 Lbs./Cubic Foot. 1 Ton = 2.85 Cubic Yards, One 40 lb. bag = 1.54 Cubic Feet

Blend 1" of rubber granules into 1-1/2" - 2" of sand over a firm 4 - 6" compacted drainage base.
1 ton spread 1" deep covers approximately 925 sq. ft

Shock Absorbing
Requires Minimum Maintenance
Quick Drying
Non Staining
Reduces Dust and Mud
Will Not Rot or Mold

RUBBER HORSESTALL & TRAILER MATS

Rubber horsestall mats made from 100% recycled rubber are a proven answer for horse stalls and barn traffic areas. They also make excellent trailer mats.

The diamond tread pattern on top allows for traction in wash rack, breeding areas, or where ever sure footing is required. Or the diamond pattern can be turned down to allow for drainage in concrete stalls.

The mats are four feet x six and a half feet x either 3/4" or 1" thick. At 115 and 155 lbs. each, they are heavy enough to lay flat but allow for removal for a good periodic cleaning. Cutting can be done with a straight edge and utility knife. Mats are black, but custom colors are available.

3/4" Thick x 4' x 6 1/2'	**RHTM-3/4**	**$95**
1" Thick x 4' x 6 1/2'	**RHTM-1**	**$105**

BestCob PREMIUM HORSE BEDDING Made From Corn Cobs

Premium Horse Bedding is made from the lightweight, most absorbent parts of the cobs. They are compacted into pellets using **ONLY** steam and water as binding agents; NO potentially harmful additives or chemicals are used in our process. When you put our Premium Horse Bedding in your horse stalls, your horses will step on the soft pellets and in very short time (approx. 24 hours) break them into a **VERY SOFT** and **EXTREMELY ABSORBENT** horse bedding material.

Mother Nature grows these biodegradable corn cobs which we use in our horse bedding in America's Heartland. Our special formula is 100% all natural, and will compost in as little as 6 months compared to wood shavings which can take up to 2 years! Our continuous quality control assures consistent, top-of-the-line horse bedding for your horse stalls all year round.

The exceptional absorbency, easy cleanup, and biodegradable characteristics of **Premium Horse Bedding** combine to reduce the volume of horse bedding material required.

The advantage of handling less total horse bedding material allows owners and caretakers to decrease the time spent doing "chores" and increase the "quality" time spent with their horses.

Premium Horse Bedding - Know The Facts

Premium Horse Bedding will	Save you money because you will use less bedding material.
Premium Horse Bedding will	Save you time & money by having to make less-frequent horse stall cleanings.
Premium Horse Bedding will	Absorb moisture quicker & provide your horse a softer and drier sleeping area.
Premium Horse Bedding will	Brighten and shine your horse's hooves.
Premium Horse Bedding will	Decompose within 4-6 months when spread in a field or composted.
Premium Horse Bedding will *not*	Stick to your horse's tail or mane.
Premium Horse Bedding will *not*	Pull nitrogen out of your soil, lowering your growing potential.
Premium Horse Bedding will *not*	Contain toxins or chemicals that may be harmful to your horse.

BEAM CLAY®

Horse Bedding

WHOLESALE PRICE LIST
EFFECTIVE: JANUARY 1, 2022

Does Premium Horse Bedding cost more than shavings?

Initially **Premium Horse Bedding** may cost you more to get your stall started with 3 to 5 bags. Thereafter, the average stall then uses just 2 bags per month thereafter versus 3 bags per week of shavings.

Will Premium Horse Bedding harm my horse if he eats it?

Your horses have a natural grazing instinct and may nibble on **Premium Horse Bedding** for the first day or two. They will then realize that **Premium Horse Bedding** is not a food source and usually leave it alone.

You can count on **Premium Horse Bedding** to keep your horse stalls dryer, cleaner and fresher longer. With our absorbent and easy to use horse bedding, you will only have to strip your stalls a few times per year, saving you even more valuable time. Some owners claim they are able to go several months before having to completely strip their horse stalls.

Our horse bedding is environmentally safe renewable horse bedding. It is free of wood dust and pesticide products. With our horse bedding, your horses' stalls will be healthier and more comfortable.

Premium Horse Bedding absorbs 2.5 times more moisture than wood shaving horse bedding. With the absorbency our **Premium Horse Bedding** you will save not only time cleaning horse stalls but you'll save money on horse bedding.

Premium Horse Bedding comes in easy-to-handle 40 pound bags, up to 50 bags per pallet.

Since our horse bedding goes much farther than wood shavings, you'll free up valuable space in your horse stable by having to store less bags of horse bedding.

How does that sound when packing and traveling on your next horse trailer road trip?

Premium Horse Bedding , 40 lb. bags, **F.O.B. IA** *full pallets only*	**#PHB-IA**	**$10.95**
Premium Horse Bedding , 40 lb. bags, **F.O.B. NJ** any quantity up to 50 per pallet	**#PHB-NJ**	**$16.50**

BEAM CLAY®

Horse Bedding

Premium Horse Bedding Advantages

The biggest advantage of **Premium Horse Bedding** is that equine owners who use it will not have to purchase, handle, or dispose of as much product as with some other horse bedding types. The exceptional absorbency, easy cleanup, and bio-degradable characteristics of **Premium Horse Bedding** combine to reduce the volume of horse bedding material required. This minimizes both the direct cost of horse bedding to be paid for and the indirect costs associated with handling, storage, and disposal. The advantage of handling less total horse bedding material allows owners and caretakers to decrease the time spent doing "chores" and increase the "quality" time spent with their horses.

Our horse bedding provides a soft and dry living area which means maximum comfort for horses.

Premium Horse Bedding clumps better than other horse bedding products making for quicker cleanup and less waste.

Our Horse Bedding Absorbs quicker

Premium Horse Bedding does not cling to the horse's tail or mane.

Biodegradability enables **Premium Horse Bedding** to go from bag, to stall, to compost in 6 months. This makes the horse bedding both user and environmentally friendly!

Premium Horse Bedding is made from corn cobs that are often discarded.

Our Horse Bedding is completely renewable resulting in less environmental impact than some horse bedding products.

Our horse bedding is an easy to handle product that generates very little dust. Excessive dust can contribute to respiratory problems in horses.

Premium Horse Bedding is free of splinters and nails that can be harmful to horses.

Premium Horse Bedding is all natural and made in the USA!

How To Use

1. Remove your old horse bedding from your horse's stall and thoroughly clean your horse's stall to remove all of the old horse bedding.

2. Add three to five, 40 pound bags of **Premium Horse Bedding**. Evenly spread the **Premium Horse Bedding** throughout your horse's stall. Please note the **Premium Horse Bedding** will eventually expand to 300% of its original volume, but this can take more than 24 hours to complete. The expansion process can be accelerated by ***LIGHTLY*** sprinkling less than one gallon of water on to the **Premium Horse Bedding**.

3. Remove the clumped manure and wet spots from the **Premium Horse Bedding** in your horse's stall as needed daily.

4. Add more of the **Premium Horse Bedding** to your horse's stall to replenish spots where **Premium Horse Bedding** has been removed.

BEAM CLAY®

Lacrosse Nets

WHOLESALE PRICE LIST
EFFECTIVE: JULY 1, 2022

NETX1™

Seamless One Piece Lacrosse Net

The NETX1™ lacrosse net is the most robust and long-lasting net money can buy. Its one-piece design eliminates the most common points of failure on traditional lacrosse nets: the diagonal seams, while providing a modern aesthetic that truly sets it apart.

The UV/weather stabilized "double-needle" nylon twine has a true 7mm thickness (measured across the depth and width of the twine) with a minimum breaking strength of 770 lbs. The combination of high strength twine and lack of diagonal seams means it will outlast every other net on the market.

The included "body fit" rope adjusts the net on the goal to maintain an appropriate amount of slack so balls remain inside the goal without bouncing back out.

- Meets NCAA and NFHS regulations
- Weather-stabilized 7mm x 1½" sq. knotless nylon with breaking strength of 770 lbs.
- One piece design eliminates diagonal seams (the most common point of failure)
- 1 Year Limited Warranty

"Body fit" rope to adjust net slack/tension

Robust and long lasting

Item #	Goal Type	Size	Color	Weight	Price

BEAM CLAY®

Aer-Flo Huddle Zone™ Sideline Turf Covers

WHOLESALE PRICE LIST
EFFECTIVE: JULY 1, 2022

HUDDLE ZONE™ SPECIAL TEAMS MAT—WIND WEIGHTED

FEWER COSTLY PENALTIES & LOST TIMEOUTS

Gives special teams an exact location to ORGANIZE and CALL PLAYS before entering the game.

Constructed of cleat-proof industrial matrix fabric with a 3' square for each special team player, plus the front section for captain and coach. Entire edge is vinyl wrapped with internal steel chain weighting, making mat WIND-PROOF and easy to install without stakes. Just lay in on turf or over sideline turf protector.

Easily folds and travels with team to away games!

SPECS: Fabric: Vipol™ Matrix Material
Standard color: Light Grey with 3" wide screened-on yellow stripes and yellow vinyl edging.

TESTIMONIALS

Our coaches feel the Huddle Zone™ Mat's convenience has saved them time, giving our kids a central location to meet before going out on the field. It has been easy to maintain and travel with. It also keeps our special teams area clear for our players to meet.
GARY JOSEPH, Head Football Coach, KATY HS; Katy, TX

Each player on our punt team is assigned a box and knows to be in it on 3rd down. It enables us coaches to have players ready if we choose to punt and may have saved us a timeout or penalty. We give some credit to the Huddle Zone™ Mat for one of our better special teams performances this season.
GREG MANTHEI, Special Teams Coordinator, DULLES HS; Sugarland, TX

Champro Soccer Balls

WHOLESALE PRICE LIST
EFFECTIVE: JULY 1, 2022

AURORA

SB1804	Size: 4	$40.59/EA
SB1805	Size: 5	$40.59/EA

The Aurora ball is constructed with thermally bound panels for minimal water retention and expansion which maintains a true round shape and is less prone to flat panels. Combining the PU cover with the exclusive V130 technology, the Aurora ball improves your field of vision during play.

- Ideal for high school and college games
- Thermal-Bonded PU cover
- 3.00mm TPE backing
- Nylon and polyester winding
- Butyl bladder
- Size 5 is NFHS approved
- Color options:

White / Black / Optic Orange
White / Black / Optic Blue

CATALYST

SB1604	Size: 4	$35.69/EA
SB1605	Size: 5	$35.69/EA

This ball is constructed with thermally bound panels for minimal water retention and expansion. The PU cover, combined with a woven carcass, allows for a rounder ball and straighter flight. The foam backing is made from a thermo-plastic elastomer which gives the ball a soft yet responsive feel.

- Ideal for high school and college games
- Thermal-Bonded PU cover
- 3.5 mm EVA foam backing
- Two linings of high strength hybrid polyester cotton
- Nylon wound floating butyl bladder
- Size 5 is NFHS approved
- Color option:

White / Black / Optic Yellow

BEAM CLAY®

Dri-Ball Drying Agent

WHOLESALE PRICE LIST
EFFECTIVE: JULY 1, 2022

DRI-BALL® Within 30 seconds turn any water-soaked ball into a perfectly dry ball! **DRI-BALL®** is quick and easy to use for games and practice! For baseball, softball, football, soccer, tennis, volleyball or any other sport with a ball that gets damp, wet or even soaking wet!

- Simply place the ball into an air-tight container with the **DRI-BALL®** compound.
- Shake the container - 30 seconds later, remove your ball and it will be completely dry and ready to use, and without any residue.
- **DRI-BALL®** also extends the life of balls, which reduces replacement costs.

One **DRI-BALL** kit contains 2 (1¼ lb.) packages of the **DRI-BALL** compound.

One to two kits should last one season, including practices: **#DB-KIT** **$90/Kit**

- For baseball after wet practices, place 8-10 balls in 3-gallon container with 1 package of **DRI-BALL**. Shake for 30 seconds. All of the balls will be dry, will not rot, and will not get heavy. The entire kit should last for a 25-game season if you use **DRI-BALL** 2 to 3 days per week and keep **DRI-BALL** containers air-tight at all times.
- For football & soccer, dunk muddy balls into water to wash off mud. Place in 5-gallon container with 1 package of **DRI-BALL** and shake for 30 seconds. Your ball will be clean and dry! Nothing else is this easy! Keep **DRI-BALL** air-tight at all times.

BEAM CLAY®

Horseshoe & Quoit Pits

RECOMMENDATIONS FOR CONSTRUCTING BEAM CLAY® HORSESHOE PITS

1. Make frame of 2 x 8's.
2. Place entire frame on 3-4" drainage bed of uniform sand, or 3/4" minus stone (with fines) covered with a 1/2" layer of uniform sand. Drainage bed should be larger than frame by at least one foot all around.
   IMPORTANT - Install drainage bed first with frame on top.
3. Apply 8" of **Beam Clay®** Horseshoe Pit Clay, 2" at a time, wetting and compacting each layer.
4. Two (6' x 6') boxes 8" deep require 2-1/2 tons (or 100 bags) of **Beam Clay®** Horseshoe Pit Clay.
   Two (3' x 4') boxes require 1,650 lbs. (or 33 bags).
5. For serious play, we recommend the **Red, Orange, Brown, or Grey** Extra Firm or Medium Firm grades. It is best to cover these when not in use — to keep excess moisture off from rain, yet keep moisture in when dry. When too hard & dry, these should be turned or dug up 4—6" deep and watered.

   For most municipal and residential uses, we recommend the sandier **Soft Orange** grade, which does not need to be covered when not in use and is much easier to water if too dry.

RECOMMENDATIONS FOR RESURFACING EXISTING HORSESHOE PITS WITH BEAM CLAY®

If resurfacing an existing Horseshoe Pit clay surface, scarify surface approximately 1/2" in depth and incorporate 1/2" of **Beam Clay®** Horseshoe Pit Clay into that surface to form a bonding layer of the two materials. Then apply 2" of **Beam Clay®** Horseshoe Pit Clay, wetting and compacting as above.

BEAM CLAY®

Horseshoe & Quoit Pits

HORSESHOE PITCH COURT LAYOUTS

RECOMMENDED AREA

Ground space is 1400 square feet, including clear space.

SIZE AND DIMENSION

Playing court is 10'x 50', plus a recommended 10' minimum unobstructed area on each end and a 5' minimum wide zone on each side.

ORIENTATION

Recommended orientation is for the long axis to be north-south.

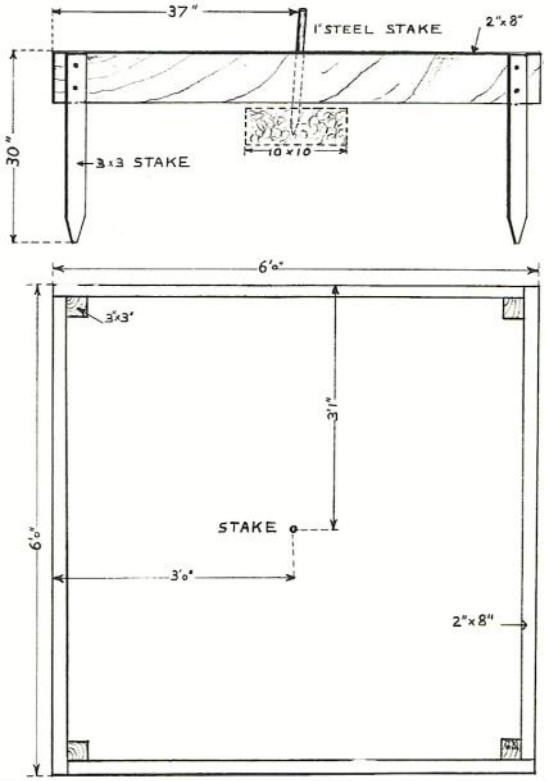

SURFACE AND DRAINAGE

Surface of playing area, except for boxes and optional concrete walkways, should be turf. Area should be pitched to the side at a maximum slope of 2%. Elevation and slant of steel pegs should be between 2" and 3" and equal.

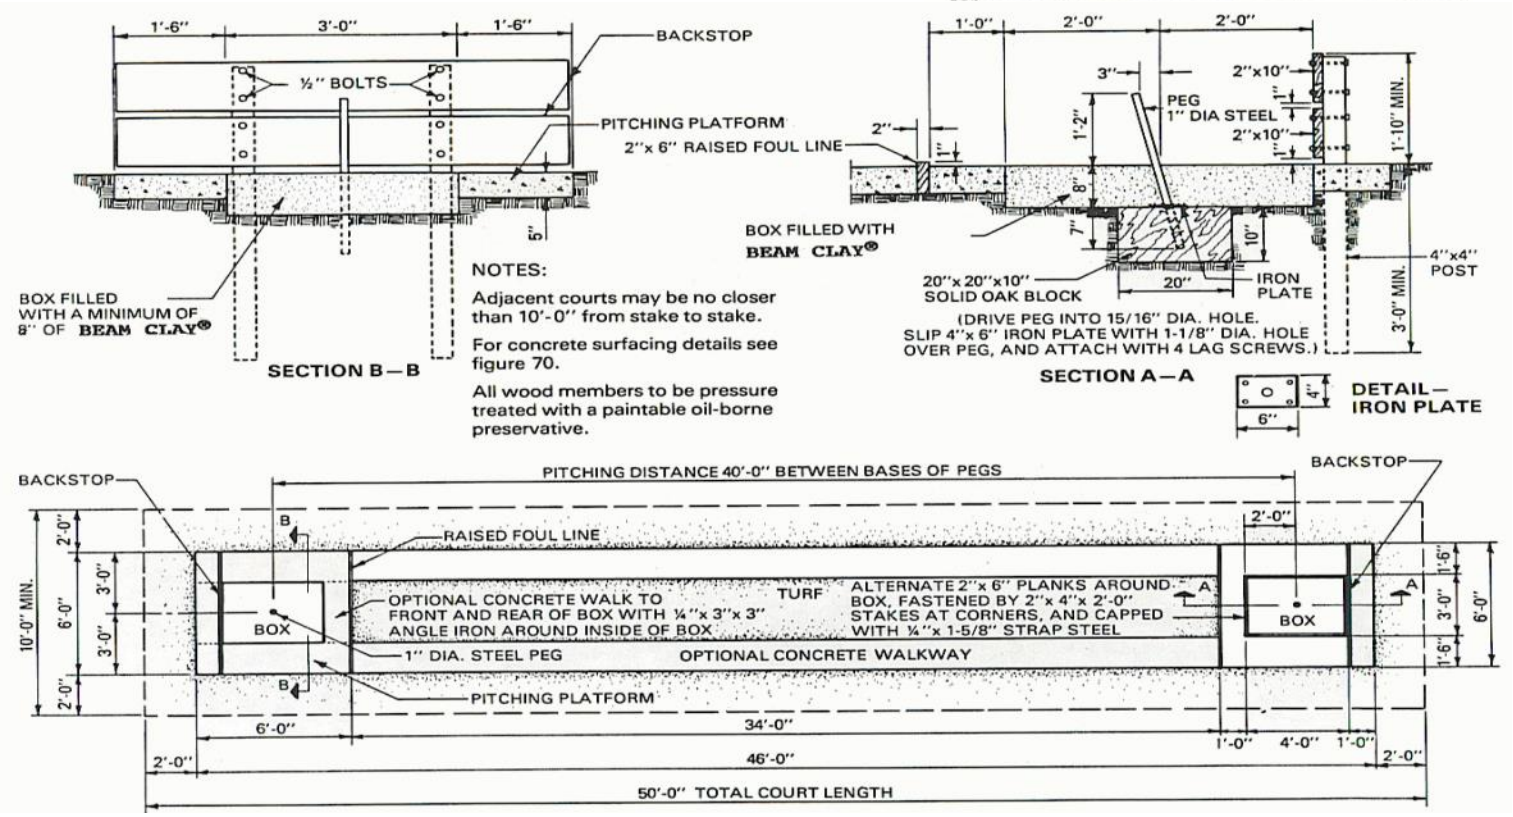

SPECIAL CONSIDERATIONS

Boxes are to be filled with **Beam Clay® Horseshoe Pit Mix**.
SAFETY: A 2' high backstop should be constructed at the end of the box to intercept overthrown or bounding shoes.

8" High x 4" Wide x 6' Long (70 lbs./piece, up to 45 pieces/pallet)	#RC-8X4X6	$110
4" High x 3" Wide x 6' Long (20 lbs./piece, up to 100 pieces/pallet)	#RC-4X3X6	$40
4" High x 3" Wide x 4' Long (13 lbs./piece, up to 140 pieces/pallet)	#RC-4X3X4	$28

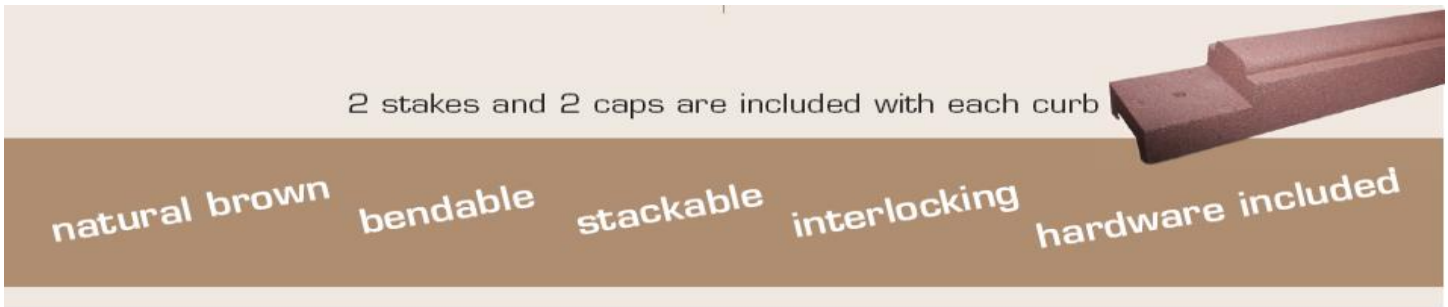

*Please note: The 4" wide sections are grooved and can be stacked to create desired height,. However, the 3" W is not stackable. 3" W lengths of curbing are **not** **grooved for stacking.***

- More resilient than wood
- No warping or discoloring
- No splinters
- Non toxic
- Will not rot
- Stackable
- Interlocking
- Available in 4 ft lengths and 4" or 6 ft lengths and 4", 6" and 8" heights
- No CCA or other harmful chemicals
- Easy to install with pre drilled holes
- Made from 100% recycled tires
- Flexible with rounded edges
- Will not breed ticks, termites or other insects
- Maintenance free
- Hardware & Caps included
- Neutral brown tone-compatible with any surface color

BEAM CLAY®

Horseshoe Pits & Quoit Pits

HORSESHOE PIT RUBBER CURBING

Product Specifications

Product Description:

1. Material: compression molded composite of the 100% recycled rubber and polyurethane prepolymer

2. Physical properties of the rubber composite:
   a) Density 0.6 oz/cu in (ASTM C642)
   b) Durometer Hardness 65A ± 7 (ASTM D2240)
   c) Tensile Strength* minimum 125 psi (ASTM D412)
      (* main structural areas)
   d) Compression deformation 10% at 70psi, 68°F (ASTM D575)
   e) Brittleness at Low temperature: -40°F (ASTM D746)
   f) Freeze and thaw when exposed (ASTM C672)
      to deicing chemicals no loss after 50 cycles
   g) Coefficient of thermal expansion: 8 x10^{-5} in/in/°F (ASTM C531)
   h) Weathering 70 hours at 158°F (ASTM D573)
      - hardness retained 100% (± 5%)
      - compressive strength 100% (± 5%)
      - tensile strength 100% (± 5%)
      - elongation retained 100% (± 5%)

3. Available models:
   a) 4”W x 4”H x 72”L with weight of 30 lbs.
   b) 4”W x 6”H x 72”L with weight of 45 lbs.
   c) 4”W x 8”H x 72”L with weight of 70 lbs.
   d) 3”W x 4”H x 72”L with weight of 20 lbs.
   e) 3”W x 4”H x 48”L with weight of 13 lbs.

4. Finishing color: dark brown

Installation methods:

a) with 2 spikes 18” long x 3/8” diameter provided for each 4” high piece
b) with 2 spikes 24” long x 3/8” diameter provided for each 6” high or 8” high piece

Note: The mounting holes can be closed after installation with the rubber plugs 1-1/8 diameter and ¾” long, supplied with the product.

Components:

a) 100% recycled rubber from car and truck tires (NR, SBR)
b) polyurethane prepolymer for rubber granules
c) brown pigment

BEAM CLAY®
St.Pierre Pitching Horseshoes Sets

WHOLESALE PRICE LIST
EFFECTIVE: JANUARY 1, 2022

Pitching Horseshoes

The St.Pierre family has been forging Authentic Pitching Horseshoes since 1938. They are the only remaining manufacturer of pitching horseshoes still in the USA. Their highly recognizable, trademark designed horseshoes are all **Made in the USA** and forged of solid steel for balance and control. Our horseshoes are coated with a special non-slip finish that is superior to high gloss finishes and helps prevent chipping and corrosion. St.Pierre Sports has been offering customers consistent quality and on-time delivery for more than 75 years.

ROYAL CLASSIC HORSESHOES #RC5

The Royal is our most popular seller and is considered America's favorite backyard horseshoe. Ideal for family and backyard fun, parks, and organizations. Equipment necessary for 2-4 person play, 4 forged steel Royal horseshoes, 2 solid steel stakes (24"), and official rulebook. Comes with our unique, easy to carry, gray plastic tote. NHPA approved.

Features:

- **Proudly Made in the USA**
- Ideal for family and backyard fun, parks, and organizations
- NHPA Approved
- Set contains all the equipment necessary for 2 to 4 person play.
- Includes 4 solid steel horseshoes with a baked-on, non-slip finish that is electrostatically applied
- Finish is more resistant to chipping, corrosion and weathering than other coatings
- Set includes two 24" solid steel stakes, rulebook and an easy-to-carry case
- Approved for Tournament play

Contents:

- 2 blue and 2 red Royal horseshoes
- 2—24" solid steel stakes
- Official rulebook with court layout
- Comes in a unique, easy to carry, gray plastic tote

Product Dimensions (L x W x H) & Weight (lbs.):
26 ¾" x 7 ¾" x 2 3/16" | 16.5 lbs.

RC5

RC5	**Royal Classic Outfit – in Molded Plastic Case** 2 blue shoes, 2 red shoes, 2 solid steel stakes, and official rulebook with court layout in a unique, easy to carry, gray plastic tote box.	**$64.95/EA**
RS2	**Royal Classic SET – 4 Shoes, No Stakes** 2 blue shoes, 2 red shoes, and official rulebook with court layout in a corrugated box.	**$45/SET**
RS1	**Royal Classic PAIR – 2 Shoes, No Stakes** 2 shoes and official rulebook with court layout in a corrugated box.	**$40/PR**

AMERICAN PRESIDENTIAL HORSESHOES #AW5

American Presidential Outfit – in Wood Box 2 hammer-tone bronze shoes, 2 hammer-tone silver shoes, 2 solid steel stakes, and official rulebook with court layout in an old fashioned mahogany stained wood box.

Features:

- **Proudly Made in the USA**
- NHPA Approved for Tournament play
- Ideal for special gifts, leagues, clubs, and serious players.
- More weight forged into the tips for maximum balance and control
- Tapered leading edge that allows the shoe to slide onto the stake
- Longer tips to grab the stake for more ringers
- Ringer breaker to rotate the shoe and lock in ringers
- Finger positioner to help hold the shoe like the Pros
- Set includes two 24" solid steel stakes, rulebook, and Mahogany stained carrying case
- Set contains all the equipment necessary for 2 to 4 person play.

Contents:

- 2 silver and 2 gold American horseshoes
- 2—24" silver stakes
- Rulebook with court layout
- Comes in an old fashioned, attractive pine box with mahogany finish, built in handle, and burnt in logo

Product Dimensions (L x W x H) & Weight (lbs.):
261/2" x 9 1/8" x 2 5/8" | 22 lbs.

AW5	**American Presidential Outfit**	**$99.95/EA**

EAGLE TOURNAMENT HORSESHOES
AVAILABLE FOR ON-LINE SALES ONLY- NO RETAIL PACKAGING

The Eagle Tournament Horseshoe is for players that want the best in order to bring their game to a new level. They are forged with larger tips and have 1" hooks designed to grab the stake and stay on. There is more weight forged into the ends so players have more consistency throughout their swing and can better control where the shoe goes. The ringer breaker helps turn the shoe and the smooth inside curve helps glide the stake down to the larger hooks. Sets are ideal for leagues, clubs, and serious players. Shoes are official size and weight and are NHPA approved for TOURNAMENT PLAY. Made in the USA.

Features:

- Proudly Made in the USA
- NHPA Approved for Tournament play
- Forged steel - forged, not cast, for strength
- More weight in the tips for greater throwing control, balance and accuracy. More controlled/precise throws means more ringers
- Tips are longer from side to side to more easily grab the stake
- Larger 1" round hooks are designed to grab an official 1" stake & stay on
- Angled/exaggerated tapered leading edge that runs from the points to the hook allows shoe to more easily slide past the tip and on to the stake
- Smooth inside curved edge - the rounded inside curve of the shoe allows the shoe to turn smoothly until the hooks can grab the stake
- Ringer breaker - protrusion to turn the shoe so that the hooks can grab the stake
- Shoes will ring when they hit the stake and will not break under normal use
- Forged steel to ring, not break
- Allows for more comfortable grip
- Official size and weight shoes and stakes for tournament play

Contents:

- 2 blue and 2 gray American horseshoes
- 2—24" silver stakes
- Rulebook with court layout
- Sturdy black nylon carry bag

Product Dimensions (L x W x H) & Weight (lbs.):
2" H x 25" W x 10" D | 19 lbs.

EC5	**Eagle Tournament Outfit – in Nylon Bag** 2 blue shoes, 2 gray shoes, 2 solid steel stakes, and official rulebook with court layout in a sturdy black nylon carry bag.	$125/EA
ES2	**Eagle Tournament SET – in Corrugated** 2 blue shoes, 2 gray shoes, and official rulebook with court layout in a corrugated box. Shoes are weighed and balanced at the factory.	$95/SET
ES1	**Eagle Tournament PAIR – in Corrugated** 2 blue shoes and official rulebook with court layout in a corrugated box. Shoes are weighted and balanced at the factory.	$65/PR

Playground Surfaces: Playground/Safety Rubber Mulch Granules

PLAYGROUND/SAFETY™ RUBBER MULCH GRANULES, F.O.B. NJ Plant

		BULK PER TON		ONE-TON BULK BAGS		40 LB. BAGS
BLACK	RMG-B-BL	$375	RMG-BB-BL	$375	RMG-40#-BL	$7.95
50/50	RMG-B-50	$545	RMG-BB-50	$545		—
COLORED	RMG-B-C	$615	RMG-BB-C	$615	RMG-40#-C	$12.50

1 ton = 2.85 cubic yards, One 40 lb. Bag = 1.54 Cubic Feet
13 lbs. covers one square foot at a 6" depth prior to compaction = 12' Fall Height Protection
If installing over natural ground, install over a landscape fabric to prevent weed growth.

Playground/Safety™ Rubber Mulch Granules provide the most shock absorption meet latest CPSC safety guidelines, and ASTM F-1951-08, and F-1292-04.

- ☑ Easy, long lasting & Beautiful!
- ☑ Non-toxic, odorless, minimizes dust on mud
- ☑ Stays in place & quick drying
- ☑ Reduces maintenance, time & expense
- ☑ Not a food sourced for insects or termites
- ☑ ADA approved
- ☑ IPEMA Certified
- ☑ Non staining / Non abrasive
- ☑ Will not freeze
- ☑ Will not rot or mold

PLAYGROUND/SAFETY™ WEARMATS

Wear Mats for high traffic areas; i.e. swings & slides.

Playground/Safety™ Rubber Mulch Granules
Installation Instructions

Site Preparation

Site Analysis

Prior to design of the playground, a certified engineer or landscape architect knowledgeable of area climate and topography should be consulted. The consultant must be familiar with updated versions of applicable ASTM standards, CPSC's *Handbook for Public Playground Safety*, and state and local codes.

Base Preparation

Intended installation area must be cleared of rocks, stumps and other debris, including wood mulch or other surface material. Pre-existing surface material impedes the safety performance of Playground/ Safety™ Rubber Mulch. It is not recommended to install Playground/Safety™ Rubber Mulch Granules over asphalt

or concrete, as these surfaces severely compromise Playground/Safety™ Rubber Mulch's safety performance. Chemicals in asphalt also break down the coloring agent on Playground/Safety™ Rubber Mulch colored mulch.

Grade

Area must be properly graded according to intended playground level, and firmly compacted. For in-ground installation, area must be excavated to a minimum depth of 6". A proper drainage system should be in place as water tends to move towards the lowest point. We do not recommend a recessed installation unless proper drainage is installed.

Retaining Wall

Above-ground installation of Playground/Safety™ Rubber Mulch Granules requires a retaining wall. Playground/

Safety™ Rubber Curbing, available in 6" and 8" heights, are strongly recommended. Specifications may be obtained from the manufacturer. Rubber Curbing effectively contain Playground/Safety™ Rubber Mulch, preventing excessive kick-out of material, thereby minimizing the need for replacement material in the future.

Filter Fabric

A quality geo-textile fabric, properly secured, may be installed beneath Playground/Safety™ Rubber Mulch to prevent weed growth and percolation of foreign materials. Filter fabric will "initially" prevent growth of weeds and grasses. Although the fabrics are permeable, they will collect debris and dirt and may actually promote growth over time**.** Fabric must be cut to fit tightly around all playground structures. All seams should be taped in order to prevent separation during installation and to prevent dirt or debris from mixing with the mulch. Filter fabrics are available in a variety of types, sizes and thicknesses. Individual specifications may be obtained from the manufacturer.

Drainage System

Excessive pooling of water can impair Playground/Safety™ Rubber Mulch's safety performance. To prevent this situation, a drainage system may be necessary. For manufactured drainage system, refer to manufacturer's installation instructions. If drainage stone is used beneath Playground/Safety™ Rubber Mulch, we suggest using a fabric. If it is placed over sand and compacted earth, the owner may opt to not use a filter fabric. For gravel drainage, gravel must be installed below the filter fabric directly beneath Playground/Safety™ Rubber Mulch.

PARTAC PEAT CORPORATION
ONE KELSEY PARK, GREAT MEADOWS, NEW JERSEY 07838

Playground/Safety™ Rubber Mulch Granules
Installation Instructions *continued*

Quantity

Area Coverage

When calculating required amount of mulch, calculation should be based on poundage. Although other manufacturers recommend less, fourteen pounds of Playground/Safety™ Rubber Mulch Granules per square foot is the necessary amount to achieve 6" **prior to compaction** and a safe 12' critical fall height.

Depth

Playground/Safety™ Rubber Mulch Granules must be installed at a minimum depth of 6" / 14 pounds per square foot prior to compaction, in order to maintain safety standards. The critical fall height may allow for variation in the depth of the surface. Some areas may require greater depth, depending upon the height or risk level of playground equipment. Please contact your Playground/Safety™ Rubber Mulch Granules representative to see if lower depths of rubber mulch may meet your critical fall height needs. Manufacturer has test data to support your requirement.

Surface Area

Playground/Safety™ Rubber Mulch Granules must surround play equipment by a minimum use zone of six feet, with the exception of swings, slides and mobile equipment. Current safety guidelines from CPSC / ASTM must be reviewed for these playground fixtures and for periodic updates and / or changes.

Installation

Delivery

Playground/Safety™ Rubber Mulch Granules can be delivered in bulk, in one-ton bulk bags, or in 30 lb. bags. If space is adequate a dump truck/trailer may unload the material directly into the play area. Bulk bags or 30 lb. bags may be transferred to the play area by forklift, bobcat or wheelbarrow.

Colored Mulch

Depending on weather conditions, Playground/Safety™ colored rubber mulch may require two to three days after delivery to sufficiently dry and cure before installation.

Tools

Playground/Safety™ Rubber Mulch Granules may be spread on play area manually, with rake or shovel, or by machine for larger playgrounds. Installer must exercise care not to disturb the geo-textile filter fabric while spreading. A final hand-raking provides a smooth finished playground surface.

Rubber Wear Mats

Playground/Safety™ Rubber mats or equal are strongly recommended to be installed in high traffic areas, such as beneath swings and sliding poles, and at slide exits. The rubber mats are to be laid midway through the rubber mulch, as they minimize displacement of Playground/Safety™ Rubber Mulch. These mats may be used with any loose fill surfacing product. Playground/Safety™ Rubber Mulch Granules rubber wear mats should not be used alone. The maximum critical fall height for each mat is 3 feet. They should only be used in conjunction with Playground/Safety™ Rubber Mulch.

PARTAC PEAT CORPORATION

Playground/Safety™ Rubber Mulch Granules
Installation Instructions *continued*

Maintenance

Benchmark

Immediately following installation and inspection, the level of Playground/Safety™ Rubber Mulch Granules should be marked off on the playground equipment, using a permanent marker or the like. Especially in high traffic areas, Playground/Safety™ Rubber Mulch Granules requires periodic raking to restore the material to its safe and proper depth.

Aesthetic Care

Playground/Safety™ Rubber Mulch Granules may be cleared of foreign objects and debris using rake or leaf blower.

Warranty

Manufacturer guarantees the impact performance of Playground/Safety™ Rubber Mulch Granules for fifty years and provides an eight-year warranty against total color loss. Note: Failure to maintain appropriate depth, as determined according to the highest potential fall height, may void manufacturer warranty and cause permanent injury or harm

Playground/Safety™ Rubber Mulch Granules

Specifications

Playground/Safety™ Rubber Mulch Granules is a unique, environment-friendly safety surface, manufactured from recycled automotive tires. Properly installed, Playground/Safety™ Rubber Mulch Granules provides an enjoyable play area that meets the guidelines set forth by the Consumer Product Safety Commission (CPSC), the American Standard for Testing Materials (ASTM), ADA and the International Playground Equipment Manufacturers Association (IPEMA).

Description

Composition

Playground/Safety™ Rubber Mulch Granules is composed of 100% recycled shredded rubber made from Whole passenger tires. Loose fiber and foreign materials have been systematically removed. Playground/ Safety™ Rubber Mulch is 99.9% free of steel content.

Toxicity

Playground/Safety™ Rubber Mulch Granules is organic, non-hazardous and non-toxic.

Appearance

Playground/Safety™ Rubber Mulch Granules is a loose-fill mixture of 3/8”-3/4” rubber granules and chunks, available in standard black or in a variety of colors.

Certifications

IPEMA certified

Almost twice as effective as other surfacing products, Playground/Safety™ Rubber Mulch Granules

exceeds ASTM Standard F1292-99 for impact attenuation. IPEMA has awarded Playground/Safety™ Rubber Mulch Granules with an independent certification for conformance to this standard. IPEMA works to promote an open market for its members and to increase the quality of children’s play equipment and surfacing.

Flammability

Based on testing conducted by the *“Scrap Tire Management Council”*, rubber mulch is non-flammable, in accordance with the Federal Hazardous Substance Act, 16 CFR 1500.44. A flammable substance ignites and burns with a self sustained flame at a rate that exceeds 0.1 inches per second along its major axis. Recycled rubber burns at a rate of <0.01 inches per second.

ADA compliant

Playground/Safety™ Rubber Mulch, installed at a non-compacted depth of 6” (14 pounds per sq. ft.), is handicap accessible, according to ASTM F1951-99, Standard Specification for Determination of Accessibility of Surface Systems Under and Around Playgrounds. Playground/Safety™ Rubber Mulch Granules must be compacted at 3” and again at 6” using a pneumatic tamper, Bobcat, or similar.

Handbook for Public Playground Safety

The *Handbook*, published by CPSC, ranks rubber mulch the safest surfacing material.

Playground Surfaces: Playground/Safety Rubber Mulch Granules

Playground/Safety™ Rubber Mulch Granules FAQs

How is shock-absorption determined?

The U.S. Consumer Product Safety Commission, the U.S. Testing Company, and the State of Illinois, among numerous state and federal agencies, independent laboratories and licensed testing companies have conducted various tests designed to measure the shock-absorption of various surface materials as they relate to falling objects. Tire rubber chips have been shown to consistently absorb more shock impact than any other standard surface material. This is particularly important because more than 550,000 playground injuries end up in the emergency room every year. That is more than 1,500 visits per day. The majority of those injuries are attributed to falls. Therefore you can't afford to have anything less than the world's safest playground surface: Playground/Safety™ Rubber Mulch Granules.

Is there any steel content in Playground/Safety™ Rubber Mulch Granules?

No. Playground/Safety™ Rubber Mulch 1/2 inch granules are smaller than most others. The smaller the chips, the less likely they are to contain embedded steel wire. To ensure that all wire is removed, Playground/Safety™ Rubber Mulch Granules pass through 4 unique, state of the art magnets during the manufacturing process. This extra attention literally ensures no steel content. In fact, Playground/Safety™ Rubber Mulch Granules is guaranteed to be 99.9% steel-free.

Will Playground/Safety™ Rubber Mulch Granules crumble, disintegrate, or decompose?

No. Playground/Safety™ Rubber Mulch Granules are made from 100% tire rubber. All tires are made of vulcanized rubber. The vulcanizing process makes the rubber literally indestructible.

Is Playground/Safety™ Rubber Mulch Granules ever dusty or slippery?

No. In addition to promoting almost instantaneous drainage, Playground/Safety™ Rubber Mulch Granules retains small amounts of moisture, which is just enough to prevent the accumulation of dust and slipperiness.

How does Playground/Safety™ Rubber Mulch Granules compare with shredded sneakers?

Shredded sneakers contain pieces of leather, which become slippery when wet, and eventually rot and break down.

Does Playground/Safety™ Rubber Mulch Granules blow or wash away?

No. Playground/Safety™ Rubber Mulch Granules are too heavy to be significantly affected by normal high winds or heavy rains.

Does Playground/Safety™ Rubber Mulch Granules come in any color besides black?

Yes. For those who want to make a big visual impact, we offer colored Playground/Safety™ Rubber Mulch Granules to match play equipment or corporate colors at a reasonable price.

How durable is colored Playground/Safety™ Rubber Mulch?

The chips are no less durable than black Playground/Safety™ Rubber Mulch. The highly durable, non-toxic paint for the rubber, should not fade any faster than that of good quality house paint, and may very well last much longer.

How should the play area be prepared?

We recommend the area be prepared ahead of time by clearing the ground of rocks, stumps and other debris, then calculate an area that surrounds the play equipment of 6-8 feet (commonly referred to as the "use" or "fall zone"). We also recommend the use of Playground/Safety™ Rubber Curbing around the entire play area, which will contain the Playground/Safety™ Rubber Mulch, and a filter fabric beneath the rubber to prevent weed growth into the play area. Where Playground/Safety™ Rubber Mulch Granules is replacing some other surface material, it is best to remove the old surfacing material completely. Sand or pebbles, for example, will only work their way to the surface and minimize Playground/Safety™ Rubber Mulch Granules shock-absorption values, and reintroduce abrasiveness to the play area. Wood mulch or chips will continue to attract insects, etc. under the surface and will eventually decompose there as well.

What type of maintenance is required?

Occasional raking.

Playground Surfaces: Playground/Safety Rubber Mulch Granules

Playground/Safety™ Rubber Mulch Granules FAQs *continued*

Is Playground/Safety™ Rubber Mulch Granules toxic?

No. Playground/Safety™ Rubber Mulch Granules is non-toxic (and in the case of colored surfacing chips, only non-toxic paints are used). The chips has no taste appeal, but if they should be accidentally swallowed, test reports show that the chips will simply pass through the digestive tracts of both humans and animals (Maryland Environmental Services, 1994). Will Playground/Safety™ Rubber Mulch Granules stain clothing or the area where it is installed? No. Unlike wood mulch or chips which can bleed when wet, Playground/Safety™ Rubber Mulch Granules does not stain. Do Playground/Safety™ Rubber Mulch Granules smell? No. Some odor may be present at the time of installation, but, similar to installing a new shower curtain, any odor will soon disappear.

Will the DEP (Department of Environmental Protection) bother property owners where Playground/Safety™ Rubber Mulch Granules is installed?

No. The DEP "strongly promotes the use of recycled products since it is essential to the long-term success of local and national recycling programs" and there are no special removal requirements associated with the closing of a play area that has used Playground/Safety™ Rubber Mulch Granules .

Will chips that find their way into clothing end up melting in a clothes dryer?

No. Tire rubber melts at approximately 500 degrees F. Clothes dryers operate at less than 100 degrees F.

What happens to leaves or branches that fall or blow onto Playground/Safety™ Rubber Mulch Granules surfaces?

Those that are not removed by lightly raking the surface will simply drain through the chips and decompose over time.

How does the cost of Playground/Safety™ Rubber Mulch Granules compare to other products?

Initially, Playground/Safety™ Rubber Mulch Granules may cost a little more than some other surfaces, however, Playground/Safety™ Rubber Mulch Granules only needs to be installed once. No annual upgrading or replacement is required. Furthermore, in comparison to wood mulch, Playground/Safety™ Rubber Mulch Granules requires a maximum of six inches in depth, versus 12 inches for wood mulch.

BEAM CLAY®

Rubber Curbing
For Playgrounds

Product Specifications

Product Description:

1. Material: compression molded composite of the 100% recycled rubber and polyurethane prepolymer

2. Physical properties of the rubber composite:
   a) Density 0.6 oz/cu in (ASTM C642)
   b) Durometer Hardness 65A ± 7 (ASTM D2240)
   c) Tensile Strength* minimum 125 psi (ASTM D412)
      (* main structural areas)
   d) Compression deformation 10% at 70psi, 68°F (ASTM D575)
   e) Brittleness at Low temperature: -40°F (ASTM D746)
   f) Freeze and thaw when exposed (ASTM C672)
      to deicing chemicals no loss after 50 cycles
   g) Coefficient of thermal expansion: 8 x10^{-5} in/in/°F (ASTM C531)
   h) Weathering 70 hours at 158°F (ASTM D573)
      - hardness retained 100% (± 5%)
      - compressive strength 100% (± 5%)
      - tensile strength 100% (± 5%)
      - elongation retained 100% (± 5%)

3. Available models:
   aa) 4”W x 4”H x 72”L with weight of 30 lbs.
   b) 4”W x 6”H x 72”L with weight of 45 lbs.
   c) 4”W x 8”H x 72”L with weight of 70 lbs.
   d) 3”W x 4”H x 72”L with weight of 20 lbs.
   e) 3”W x 4”H x 48”L with weight of 13 lbs.

4. Finishing color: dark brown

Installation methods:

a) with 2 spikes 18” long x 3/8” diameter provided for each 4” high piece
b) with 2 spikes 24” long x 3/8” diameter provided for each 6” high or 8” high piece

Note: The mounting holes can be closed after installation with the rubber plugs 1-1/8 diameter and ¾” long, supplied with the product.

Components:

a) 100% recycled rubber from car and truck tires (NR, SBR)
b) polyurethane prepolymer for rubber granules
c) brown pigment

Playground Surfaces: Playground/Safety Rubber Mulch Granules

NuPlay Nugget Rubber Mulch is the ideal groundcover if you are looking for beauty, safety and versatility. With a fall height rating more than 2X that of wood mulch, our 100% recycled rubber mulch is simply the safest playground surface available on the market. Our 12-year color guarantee makes NuPlay Nugget Rubber Mulch the ideal solution to the annual routine of replacing your tired and faded wood mulch. Your landscaping and play areas will look as good as the day you installed it for years to come.

Benefits:

- Made from 100% recycled tires
- Unsurpassed fall height rating (ASTM F1292)
- 12-year color guarantee
- Will not attract harmful insects
- Provides superior drainage
- Inhibits growth of molds and fungi, reducing allergy risk
- No more annual mulching
- Save time and money
- ADA accessible (ASTM F1951)

Applications:

- Parks and recreation departments
- City, state and federal parks
- Municipalities
- Schools and universities
- Military applications
- Golf courses
- Day care facilities
- Commercial landscaping
- Residential
- Walkways and paths

BEAM CLAY®

Simply the Safest

Provides a soft surface to help keep children safe on the playground

Warrantied against fading for up to 12 years

IMC's most affordable rubber mulch groundcover for playgrounds and paths

Maintains beauty even after years of exposure to the elements

Five times heavier than wood mulches, this rubber mulch will not float, absorb water or erode during heavy rain and flooding

Does not attract termites, carpenter ants or other harmful insects

Available in Earthtone, Redwood, Caribbean Blue, Forest Green, Classic Black and a full palette of custom colors

NuPlay Rubber Mulch Nuggets

NuPlay, made from 100% recycled rubber, is the perfect loose-fill rubber mulch groundcover for playgrounds and commercial landscaping applications. Rated as the safest groundcover on the market, NuPlay also provides superior drainage and minimizes dust, keeping children clean while at play.

Installation Guidelines for Playground

The ground area where the playground will lie should either be in location that will not hold water, or have slight grade to allow for proper drainage. In areas where drainage could be an issue; it is recommended to install a drain tile system, with a 3" base of pea gravel or rock to allow for proper drainage.

Heavy duty weed fabric should be installed under NuPlay Mulch to separate the mulch from what lies beneath. Depending on the size of the playground, it is recommended to use large rolls of weed fabric (12' width rolls) to minimize the number seams.

Use landscape stakes to stake down weed fabric seams and corners. Make sure the stakes are completely hammered down.

A border is recommended to enclose the playground to contain the mulch. It is

recommended to have a few inches between the top of the border and the top of the mulch.

It is recommended to loosely compact the mulch to either 3 or 6 inches to achieve the desired fall height rating.

Installation for Landscaping

Install NuPlay Mulch at a 2" depth.

It is not necessary, but recommended to install NuPlay Mulch over a permeable weed fabric. Using a weed fabric will increase coverage per bag/box and decrease risk of weeds. Also, using felt type weed fabric will help keep the mulch in place.

If installing NuPlay Mulch over existing mulch/soil, make sure the ground surface is a compacted material, free of debris and loose objects. NuPlay Mulch will look its best when not mixed in with other debris.

When installing NuPlay Mulch in mulch/plant beds, it is recommended that the beds have a border to help contain the mulch. The border can either be a raised border such as a poured concrete/brick border, or a dug border such as a 2" deep trench around the bed.

To clear leaves and other debris off the top of NuPlay Mulch, use a blower on a low setting. Since NuPlay Mulch is heavier than grass clippings and leaves, it will stay in place while the debris is blown away.

CRITICAL HEIGHTS OF TESTED MATERIALS OF 6" DEPTH

BEAM CLAY®

The Gold Standard of Recycled Rubber

- Designed with engineered drainage ports so water does not pool in flower beds or playgrounds
- Looks great with no maintenance for years to come
- Great for playground and Landscaping applications
- Matches or compliments Rubberific Mulch or NuPlay groundcovers
- Made from 100% recycled rubber
- Easy to install
- Made in the USA
- Long-lasting and durable
- Available in Earthtone, Redwood, Forest Green and Black

Rubberific Timber

Rubberific Timbers are the best border system option for all your landscaping and playground needs. These 92" long Rubberific Timbers come in heights of 4", 6" or 8". With the flexibility of rubber, it can form to virtually any edge desired. The top of the Rubberific Timber is rounded to provide extra safety when used around a playground.

Installation instructions:

Using Rebar Anchors:
Drill a 1/2" hole 8" from each end of the timber and one hole in the middle of the timber. Rebar end must be recessed at least 1" deep from top of timber

Playground Surfaces: Playground/Safety Rubber Mats

Rubberific Mats

The longevity of our Rubberific Mats is second only to its versatility and functionality. Made from 100% recycled rubber, these durable 32" x 54" mats are two inches thick and feature a beveled edge to offer a clean and finished look. One of their primary uses of Rubberific Mats is below swings and slides in the playground where loose-fill mulch is typically kicked out by playful children. These mats stay in place, keep children safer and greatly reduce ongoing maintenance.

• Available in Black, Brown, Green, and Red

BEAM CLAY®

Sandbox Covers

WHOLESALE PRICE LIST
EFFECTIVE: JUNE 1, 2022

WIND WEIGHTED SANDBOX COVERS WITH CHAIN SEWN INTO HEMS—NO NEED FOR SAND BAGS OR STAKES!

One of the best ways to keep bugs and debris out of a sandbox is to keep it covered when the kids aren't digging. In addition to keeping bugs out, a cover will protect the sandbox from the rain, which can lead to moisture build up that attracts mosquitoes, ants and more. Covering the box will also keep the neighborhood cats out.

SANDBOX MAINTENANCE:

Churn the Sand
Regularly turning the sand will keep it fresh and disturb any bugs that have decided to burrow down beneath the surface. Churning the sand often will dissuade bugs from staying in the sand and help you find any that are in the box before they find your kids.

Mix in Cinnamon
Cinnamon is a natural bug repellent that's safe to use around kids. Sprinkle a whole lot of cinnamon into the sand and mix it very well. Repeat this process on a regular basis to keep most bugs from getting in the sandbox.

Tend to the Weeds
If you have a homemade sandbox with sand that sits directly on top of the ground, take the time to weed the area. The more vegetation there is in and around the sandbox the more likely it is that bugs will find a way inside.

Refresh the Sand
You'll want to regularly toss the old sand and replace it with some that's fresh. If you've already got a sandbox bug infestation removing the old sand is definitely something you want to do.

Use Non-toxic bug Repellent Around the Perimeter
A good way to protect the inside of the sandbox is to repel bugs before they even get to it. Use a non-toxic repellent all around the edge of the sandbox. You can also try sprinkling cornstarch around the sandbox to keep ants out.

No Food Rule
Make it a strict rule that there is never to be any food in the sandbox. Dropping delicious crumbs into the sand is the quickest way to attract bugs.

How much sand do I need?

You will need approximately 8 lbs. of sand for every: 1' W x 1' L x 1" D.

White Beach / Playground Sand - Medium	
North Jersey Plant—Double Screened **#NJSAND-DS-M-BG**	**$5.50/50 LB. BAG**

Playground Stencils - Newstripe PolyTough™

WHOLESALE PRICE LIST
EFFECTIVE: JANUARY 1, 2022

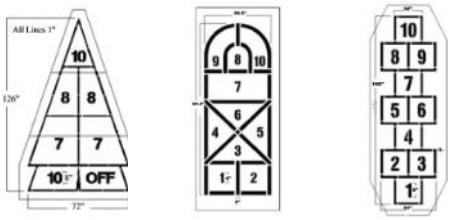

Newstripe's **PolyTough** 1/8" thick stencils are simply the best stencils available and manufactured to be used thousands of times. In fact, they are the only stencils backed with a **LIFETIME WARRANTY**. If they crack, break or tear for any reason Newstripe will gladly replace them free.

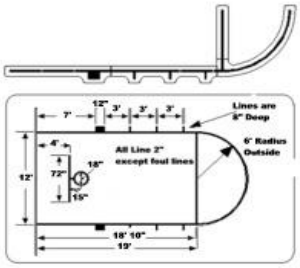

Newstripe **PolyTough** stencils are easy to use. Their heavy weight and flexible characteristics allow them to conform to any surface, smooth or rough. Plus cleanup is a snap. When the paint dries it simply flakes off.

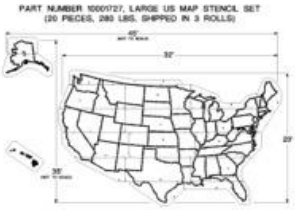

Playground Stencils — Newstripe's playground stencils can keep your playground safe and attractively marked. **HOPSCOTCH, SHUFFLE BOARD, BASKETBALL** and **USA MAPS** are available.

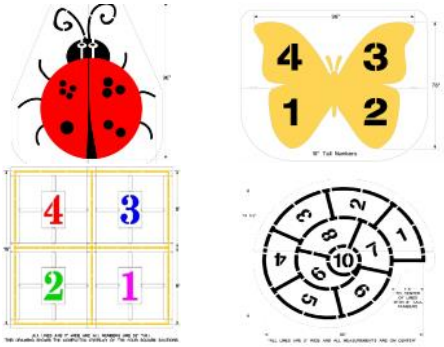

Custom Stencils - Mascots, logos, multicolor, non-English wording…… whatever your special stencil needs are, Newstripe's Custom Stencil Department can fill it. Plus it is quick and easy. Just mail or email your artwork to us and Newstripe will digitally reproduce it in stencil format and cut it using the latest computer technology.

BEAM CLAY®

Clay Tennis Court Surfaces

THE VERDICT ON CLAY COURT SURFACES.

They're fun, healthy, and may determine the future of tennis.

By Pat Hanssen

I believe in tennis. I believe in tennis because it fully engages you physically and mentally. I believe in tennis for the way it forces you to think for yourself, to learn and adapt, and to accept personal responsibility for winning and losing. Yes, I love tennis because it builds more than healthy bodies and active minds. Tennis builds character. And it's one of the few sports that can be played for a lifetime.

For the avid tennis player the game is a part of who they are. They live and breathe the sport; tell stories about the way they play, or the way they used to play. And their love for the game tells a story about them. Tennis is tied to their core values.

I'm convinced that clay court tennis connects more closely with a player's core values than the hard courts that pervade this country's tennis community. Sadly, most of today's U.S. courts are of the hard variety. Rather than keep alive the founding spirit of the game, which championed hard work, patience, strategy and endurance, today's hard court game has become one of power, aggression, speed and instant gratification.

I do not believe this style of tennis resonates with the most passionate of tennis fans and will even go so far as to say that the "new tennis" hurts our sport. It hurts recreational players because they receive the message that they are not strong enough to play. It hurts the seasoned and aging player because the power-speed game can injure the spirit and the body after the age of thirty.

If you have never played on clay, or perhaps only played infrequently, what I am saying may sound foreign to you. A first experience on clay has confounded and exasperated many a player. But those who take the time to familiarize themselves with the intricacies rarely want to go back to harder, faster surfaces.

Clay leaves players more physically and emotionally satisfied than other surfaces. The physical satisfaction comes from playing long points and long matches without over-stressing the knees, back and lower extremities. The emotional satisfaction comes from the thinking, creating and tactical responding that goes into each point and each match.

It is a surface that slows shots down, equalizing levels of play and allowing varying ages and ability levels to have fun playing together.

It is estimated that less than 20% of this nation's tennis courts are constructed of clay. Most of these are not real clay at all, but the easier-to-manage American variety known as **HAR-TRU®.** Clay court tennis has a long and distinguished history, both here and abroad, yet since the U.S. Open shifted from clay to hard courts, our country's focus has drifted from clay court tennis to hard courts and hard hitting. My wish is to preserve the playing of the game as it was originally intended. The future of tennis could very well depend on it.

© 2006 HAR-TRU TENNIS

Clay Courts Reward Players Who Think Before They Act.

Tennis is the ultimate sport. And clay is the ultimate surface for the ultimate sport. I am not sure that those who are after the short-term rewards and success brought on by opponents blasting shots on hard, fast surfaces will ever truly be able to appreciate the sensation of playing on a court that rewards those who are creative, flexible and think before they act.

BEAM CLAY®

Har-Tru® Fast-Dry Tennis Court Surfaces

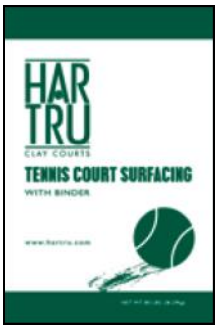

TIP

Fall top-dressing is just as effective as spring top-dressing and can allow a seasonal club to open its courts weeks earlier in the springtime.

HAR-TRU® FAST-DRY TENNIS COURTS

We offer many packaging options for both the contractor and court owner. Most of our products come in 80-lb. bags with the option of getting that product in an Easy-Lift 50-lb. bag as well. The 50-lb. bag option is intended for those of us not used to handling bags all day. Some insurance company requirements in certain areas will dictate using a 50-lb. bag. Both the 80-lb. and the 50-lb. bags can be palletized and stretch wrapped for easy handling and weather protection.

For our contractors, we also stock and load Har-Tru or HydroBlend in bulk bags. These disposable bags are available in 2000-lb., 2500-lb. and 2800-lb. and can be taken right from the truck to the court with a forklift.

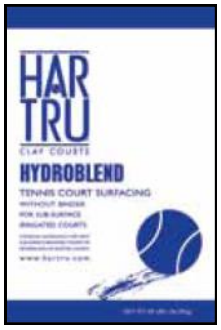

< HAR-TRU®

Tennis court surfacing with binder. For use on Har-Tru courts with sprinkler systems.
Available in:
- 1.0 ton pallet with 80 lb. bags
- 1.4 tons per pallet with 80 lb. bags
- 1.0 ton pallet with 50 lb. bags
- 1.4 tons per pallet with 50 lb. bags
- 2000 lb. bulk bag
- 2500 lb. bulk bag
- 2800 lb. bulk bag

HAR-TRU® COARSE BLEND >

Coarse surface manufactured for indoor and outdoor sub-irrigated courts where extra coarseness and sliding material are needed.
Available only in:
1.3 ton pallet with 75 lb. bags

< HYDROBLEND

Tennis court surfacing material for sub-irrigated tennis courts.
Available in:
- 1.0 ton pallet with 80 lb. bags
- 1.4 tons per pallet with 80 lb. bags
- 2000 lb. bulk bag
- 2500 lb. bulk bag
- 2800 lb. bulk bag

AMERICAN RED CLAY >

Tennis court surfacing material for use on red sub-irrigated tennis courts or for top dressing a variety of natural clay courts.
Available only in:
- 1.4 ton pallet with 70 lb. bags
- 2000 lb. bulk bag

< EUROPEAN RED CLAY

Imported from Europe this rich red brick dust is stunningly beautiful. It can be used for new court construction or top dressing existing red clay courts. It also works beautifully on red ClayTech where it gives the look of European red clay.
Sold by the pallet. Comes in 55 LB bags.

MAGNESIUM/ CALCIUM CHLORIDE

For dust control and moisture retention.
The safest option for the Environment is Magnesium.

Chloride is available in 50-lb. bags.

SOLMAGTCM

Calcium Chloride is available in 50-lb. bags.

BEAM CLAY®

Har-Tru HydroCourt

HAR-TRU HYDRO COURT

HydroCourt is a self-regulating irrigation system that waters the court from below. Each court is constructed with six, fully lined, individually controlled cells. Each cell is monitored by a water control box allowing adjustments to be fine tuned to player preferences. Increasing the water in the control boxes increases the water level in the court. Once the appropriate water level is achieved a float valve and an overflow pipe inside the control box keep the water level constant. It's that simple!

HydroCourt is time tested in great numbers all across the globe. Well over 1,000 courts have been installed since 1985 in the US alone. And the HydroCourt system has been proven in every climate imaginable including countries like Canada, England, France, Japan, Qatar, Spain, Tortola, Turkey and more.

Why do people choose HydroCourt?

1. Perfect Playing Conditions 24/7. HydroCourts stay uniformly wet, smooth and firm for a consistent bounce and exceptional footing.
2. More available court time. HydroCourt technology eliminates midday shut downs and improves drainage. HydroCourts are playable during light rain and dry rapidly after a heavy one.
3. Maintenance is cut in half. Rolling is needed infrequently, brushing is required once a day and watering is completed automatically and uses 40% less.
4. Comfort. With water rising from below, some people feel like HydroCourts are air conditioned; they can be as much as 20 degrees cooler than a hard court.

HydroCourt Brochure
HydroCourt Construction Specifications (Updated)
HydroCourt Owner-Users Manual (Updated)
Maintenance Information

"We needed a top-class surface for pros and members. The reduced amount of maintenance downtime and increased playing season has been an added bonus." *–Peter Elviss, Chief Executive, West Hants Club, Bournemouth, England*

"Our guests expect the very best amenities, service and playing experience and this is why we chose HydroCourt." *–Cliff Drysdale, ABC and ESPN commentator and Director of Tennis at The Ritz Carlton, Key Biscayne, FL*

"HydroCourt is ideal for our southwestern desert climate." *–Tim Bakels, General Manager and Vice President, Desert Highlands Association, Scottsdale, AZ*

"Tennis professionals know the advantage of clay courts, but dread the maintenance that comes with clay courts. HydroCourt has come to the rescue. Once you establish the settings, the court waters itself with no downtime, so members can enjoy playing tennis from morning till night. I highly recommend the HydroCourt system to anyone who is serious about building a clay court." *–Larry Schnall, Tennis Director, Marietta Country Club, Kennesaw, GA*

BEAM CLAY®

BEAM CLAY® HISTORY—ALMOST 100 YEARS!

BEAM CLAY® began in 1922 in preparation for the U.S. Open moving from the Germantown Cricket Club in Philadelphia to the West Side Tennis Club in Forest Hills – to provide red clay for the courts. All the tennis greats of that time played on **BEAM CLAY®**. Natural clay courts throughout the East Coast were constructed with **BEAM CLAY®**, many are still in use nearly 100 years later. We recently resurfaced the six natural clay courts at the Germantown Cricket Club. A natural clay court will outlast any other tennis court surface. It does require more annual maintenance, but natural clay courts and "fast-dry" clay courts provide a softer, more forgiving, surface for all ages and all levels of play.

RECOMMENDATIONS FOR CONSTRUCTING NATURAL CLAY TENNIS COURTS (120' X 60')

SITE PREPARATION:

Clear site of all vegetation and top soil. Length of court, if possible, should be in a north/south position.

GRADING:

Natural clay courts need more slope for proper surface drainage than fast-dry courts, 1" in 20' (after compaction) versus 1" in 30' (after compaction) for fast-dry courts. Grade area on a true plane, preferably from side to side (but from end to end or from corner to corner are acceptable), or in the shortest direction for good drainage/water run-off.

DRAINAGE BED (Base Course):

Drainage bed may vary drastically depending on the existing sub-drainage conditions. Create a firm drainage base, minimum 3" deep (after compaction), of 3/4" minus crushed stone (with fines) maintaining above slope.

PRE-CLAY COURSE:

Apply 1/2" of stone screenings, **true to grade**.

CLAY PLAYING SURFACE:

For Natural Clay Courts

Apply approximately 5-1/4" of **BEAM CLAY® Tennis Court Clay** over court. This will compact to approximately 4". This will require approximately 120 tons of **BEAM CLAY® Tennis Court Clay**. It is generally best to construct a screed system with 2" x 6"'s **true to grade**, installing loose clay between the planks and pulling a board across to maintain even grades.

After clay application, court should have a thorough soaking by rain to insure even distribution of moisture. Check for low spots; fill with **BEAM CLAY® Tennis Court Clay**; thoroughly saturate filled areas.

Once clay has dried enough that it will not adhere to a 1/2 ton roller, roll in both directions several times. Allow court to dry thoroughly and mat with a 6' wide rigid steel drag leveling mat to a powdery surface. Broom court in both directions.

After drying further, court surface will crack and continue to crack until sufficiently compacted.

After another wetting by rain and drying to proper moisture content, rework surface as above.

PLEASE NOTE: Clay courts will crack at first and must be rolled and broomed until cracks get smaller and smaller and disappear. A clay court that cracks the 1st year will in later years have a long useful life; a court that doesn't crack at first is too sandy, will wear out prematurely and will require more maintenance in later years. Natural clay court construction in northern climates is best done in the fall so that courts have a chance over winter to naturally compact.

Once cracking becomes sufficiently small (hair-line cracks) apply 1,000 lbs. of top-dressing and thoroughly broom in both directions. Roll again. If top-dressing is applied too soon, it will fill the cracks but (by working into the clay) shorten the long-term life of the court.

Apply 300 lbs. of magnesium or calcium chloride (flakes). After magnesium or calcium chloride thoroughly dissolves and court reaches proper moisture content (12 to 24 hours), court should be rebroomed and compacted (rolled).

Install marking tape and center pin. Ready for play.

After rain, re-broom and roll court when surface has dried. Apply top-dressing and calcium chloride as needed during season. Normally, 3-4 applications are sufficient for season.

BEAM CLAY®

RECOMMENDATIONS FOR RECONDITIONING NATURAL CLAY COURTS AFTER WINTER SEASON

1. Remove marking tapes and center pin. Sweep or blow top-dressing from court. In northern climates this is best done in the Fall when closing courts.
2. Scarify court with drag mat. Then broom in both directions, north/south and east/west.
3. After natural wetting by rain, check for low spots; fill with **BEAM CLAY® Tennis Court Clay**, working into the existing surface for good bonding. Thoroughly saturate filled areas.
4. When court has dried to sufficient moisture content, compact with 1/2 ton roller in both directions several times. Allow court to dry thoroughly and mat with a 6' wide rigid steel drag leveling mat to a powdery surface. Broom court in both directions.
5. Apply approximately 1,000 lbs. of top-dressing per court. Broom in both directions.
6. Apply 300 lbs. of magnesium or calcium chloride (flakes) per court. After flakes thoroughly dissolve and court reaches proper moisture content (12-24 hours), court should be re-broomed and compacted (rolled).
7. Reapply marking tapes and center pin.
8. After rain, re-broom and roll court when surface has dried. Apply top-dressing and calcium chloride as needed during season. Normally, 3-4 applications are sufficient for season.

RECOMMENDATIONS FOR RESURFACING NATURAL CLAY TENNIS COURTS

1. Remove marking tape and center pin. Sweep or blow top-dressing from court.
2. Scarify court approximately 1/2" in depth.
3. Apply 1"+ of **BEAM CLAY® Tennis Court Clay**.
4. Rescarify to blend **BEAM CLAY®** with existing surface. Then drag mat entire court.
5. After a natural wetting by rain, check for low spots; fill with **BEAM CLAY® Tennis Court Clay**. Thoroughly saturate filled areas.
6. When court has dried to sufficient moisture content, compact with 1/2 ton roller in both directions several times. Allow court to dry thoroughly and mat with a 6' wide rigid steel drag leveling mat to a powdery surface. Broom court in both directions.
7. Court surface will continue to crack until sufficiently compacted. After another wetting by rain and drying to proper moisture content, rework surface as above.
8. PLEASE NOTE: Clay courts will crack at first and must be rolled and broomed until cracks get smaller and smaller and disappear. A clay court that cracks the 1st year will in later years have a long useful life; a court that doesn't crack at first is too sandy, will wear out prematurely, and will require more maintenance in later years.
9. Once cracking becomes sufficiently small (hair-line cracks) apply 1,000 lbs. top-dressing and thoroughly broom in both directions. Roll again.
10. Apply 300 lbs. of magnesium or calcium chloride (flakes) per court. After flakes thoroughly dissolve and court reaches proper moisture content (12 to 24 hours), court should be re-broomed and compacted (rolled).
11. Reapply marking tapes and center pin. Ready for play.
12. After rain, re-broom and roll court when surface has dried. Apply top-dressing and calcium chloride as needed during season. Normally, 3-4 applications are sufficient for season.

BEAM CLAY®

RECOMMENDATIONS FOR CONSTRUCTING & MAINTAINING FAST-DRY TENNIS COURTS

CONSTRUCTION

Careful planning for site selection, orientation and layout will result in the most advantageous use of your court during the entire playing season — depending upon our geographic location. The following are our guidelines for site selection and construction of a typical fast-dry tennis court.

SITE SELECTION AND PREPARATION

Orient your court layout as close to North and South as possible. Select a well drained site. All trees and above surface growth must be cleared as well as sub-surface growth such as root systems. Also, excavate all top soils and other unsuitable soils down to a clay or hardpan base. The excavation must be deep enough to allow the finished surface to be six inches above adjacent grade. If it is impractical to allow any required fill to settle over a winter, then the fill can be built up not more than six inch layers, and compact each layer. Add moisture when compacting extremely dry soils. Ninety-five percent compaction is recommended for the foundation.

GRADING

Allow at least three feet beyond all curb and fence lines. More if a major cut is required. Rough grading should be within plus or minus one inch of finished sub-grade. Grade on a true place, with a slope of one inch in thirty feet, preferably from side to side (but from end to end or from corner to corner also are acceptable), or in the shortest direction for good drainage/water run-off. The court should never be sloped from the net line to the baseline, from the baseline to the netline, from the side to the centerline or from the centerline to the sides.

SPRINKLER SYSTEM

A sprinkler system is recommended instead of watering by hand. Piping and valves should be installed prior to leveling the stone. The standpipes and sprinkler heads should be installed after surface is completed. The system should have adequate sprinklers to provide full coverage of the court area. In some climates, a combination of sprinklers and sub surface irrigation can be used for supplying water to the court. Locations with little rainfall and expensive water costs should consider this combination of sub surface irrigation along with surface sprinklers. Extensive research should be made prior to the final decision on the sprinkler system as to water pressure and the gallons per minute.

PERIMETER EDGING

An edging of brick or block set in cement mortar, treated wood timber or concrete should be installed around the entire perimeter of the court area. The finished curb elevation should be 1/2” below the finished court surface, after compaction, and the court surface should be tapered from approximately 2’ out to meet the top of the edging.

STONE BASE

The base of a fast-dry court must be stable and porous. Avoid materials that shift or crawl when rolled, or that move when subjected to freezing and thawing conditions. The base must be porous to absorb excess water from the surface. This is the fast-drying quality that allows play within a very short time after a rain. Also, the absorbed water is later fed back to the surface, maintaining proper moisture for best play. Too much compacting will create an impervious base, resulting in insufficient moisture penetration and exchange. 3/4” crushed stone with fines is the preferred base material. However, other materials, such as cinders, old slag or crushed pit gravel may be used.

The average thickness of the base is four inches, with the top one-half inch consisting of stone screenings.

COURT SURFACING

On the finished stone base a 1-1/4” (one inch compacted) layer of fast-dry surfacing is installed. The material is laser-graded or spread with rakes and leveled by hand with a straightedge set atop screed strips. Since the base was placed to true grade, the screed strips are checked only for accuracy to assure uniform surface thickness. The dry surfacing is soaked with water and allowed to dry for 15 minutes to set up. Then a 600—1,000 pound roller is used to compact the material to one inch. Once the entire area is covered with surfacing, daily watering and rolling should be done for at least a week to insure proper compaction prior to heavy usage.

NET POSTS

The net posts are positioned according to the U.S.T.A. The post footers should be 30” x 18” x 30” and filled with concrete up to 1” from the surface level (to top of stone base). After the concrete has set, the area is filled with surfacing to conform to the rest of the court.

CENTERGUIDES & PLAYING LINES

Centerguides are galvanized pipe 12” - 18” long, installed in the ground and with a cross pin to attach the centerstrap hasp. The recommended line tapes are two inches wide and held in place with 2-1/2” - 3” nails. Position the lines in accordance with the U.S.T.A.

BEAM CLAY®

Tennis Courts - Maintaining Fast-Dry Tennis Courts

MAINTENANCE

The following suggestions for maintaining a fast-dry tennis court are simply basic guidelines. Local climate, soil conditions and court layout will determine specific maintenance procedures. Each court must establish its own maintenance policy, using our guidelines in conjunction with its own requirements and capabilities.

BRUSHING

Brushing is most important in court maintenance, requiring a minimum amount of time. Brushing keeps the surface level, assuring an even distribution of the surface granules. At the end of each day's play, the court must be brushed. However, if the court is in continuous use, we recommend a mid-day brushing as well. Also, brush the court before rolling. Brush the court lengthwise and crosswise, taking particular care to eliminate accumulations of loose particles. When brushing, pull the brush behind you in a continuous pass, making a turn at the end of each sweep.

WATERING

A fast-dry tennis court plays best when slightly damp, exhibiting its characteristic dark green or red color. A grayish or pink appearing surface indicates that the court needs watering. The amount of water you must apply to dampen the surface to its optimum playing condition depends upon the amount of water retained in the base at this time. In learning to judge the correct application, experience it through trial and error is your surest guide. We do recommend that the court be watered at night after it has been brushed. As noted elsewhere, a sprinkler system is most effective, repaying its cost in labor saved within the first year of use. However, if hand watering, the hose nozzle should not be pointed down toward the surface. Always hold the nozzle at waist level and direct the spray horizontally so the water falls in a shallow arc.

ROLLING

A newly constructed court should receive one or two consecutive rollings — lengthwise and crosswise — each day for a minimum period of a week. Following these initial rollings, the court should be rolled at least once a week and after every appreciable rainfall.

A 600-1,000 pound roller provides the best results.

Rolling is most effective when the court surface is damp or semi-damp. Do not roll an absolutely dry or an extremely wet court. If the court surface adheres to the roller, or tends to shift or move when rolling, the court must be allowed to dry before further rolling.

The more rolling a court receives, the firmer the surface — resulting in a faster playing court.

PATCHING

If a small hole or indentation appears on the surface, it should be repaired immediately, thus avoiding more extensive and difficult repair work later. For example, if a small depression (about 1/2" deep) appears near the base line and does not disappear with ordinary maintenance, then the area must be patched. Using a hand trowel, square end shovel or similar too, cut out the area down to the stone base material. Refill the hole with regular fast-dry surfacing material, applied dry, then compacted and leveled to the surrounding area. The material is easily leveled with a straight-edged piece of wood drawn across the area in a manner similar to concrete floating. After the area is leveled, apply enough water to soak the patch. When the water disappears, roll the patch which should become firm and ready to play on. These instructions apply to all size patches.

ANNUAL MAINTENANCE

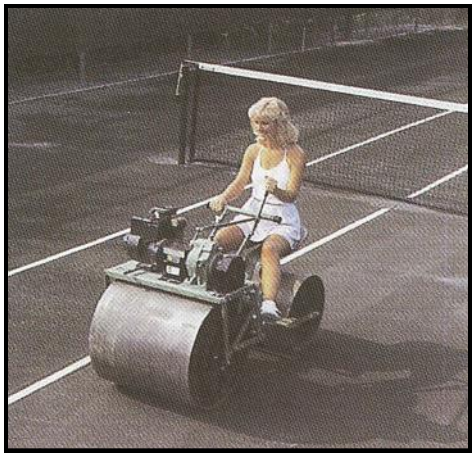

Annual replacement of surfacing is necessary due to weather erosion and player movement. Therefore, it is recommended that one ton minimum (2,000 lbs.) of new surfacing material be placed on the court each year.

Brushing the Court
The courts should be brushed by pulling the drag broom over the entire surface of the court at the end of each day's play or more often as needed.

Sweeping the Lines
The lines should be swept by pushing a rotary line sweeping brush over the lines to remove the surface particles.

Rolling the Court
The rolling of the court is recommended once a week and after each appreciable rain in order to assure proper compaction.

BEAM CLAY®

Tennis Court - Drag Mats

WHOLESALE PRICE LIST
EFFECTIVE: JANUARY 1, 2022

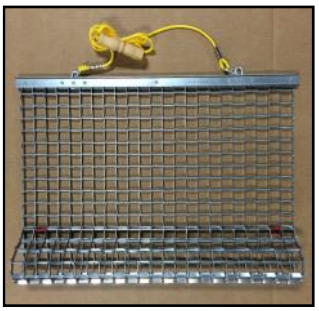

DRAG MATS

For use when building tennis courts or reconditioning in Spring.

RIGID DRAG MATS, HEAVY-DUTY with Rope & Handle.
Use cutting lip down for aggressive leveling, up for normal smoothing.

	Heavy-Duty - Rigid Mat - Does not roll up (from NJ Plant):	
#RIDM3x3-1/2	3' Wide x 3½' Long (27 lbs.)	$250
#RIDM4X3-1/2	4' Wide x 3½' Long (36 lbs.)	$315
#RIDM5X3-1/2	5' Wide x 3½' Long (45 lbs.)	$375
#RIDM6X3-1/2	6' Wide x 3½' Long (54 lbs.)	$395

	Standard-Duty - Rigid Attachment but mat rolls up (from PA Plant):	
#RIDM4X18	4' Wide x 18" Long (24 lbs.)	$145
#RIDM4X2	4' Wide x 2' Long (23 lbs.)	$165
#RIDM4X3	4' Wide x 3' Long (33 lbs.)	$205
#RIDM6X18	6' Wide x 18" Long (35 lbs.)	$205
#RIDM6X2	6' Wide x 2' Long (33 lbs.)	$235
#RIDM6X3	6' Wide x 3' Long (44 lbs.)	$300

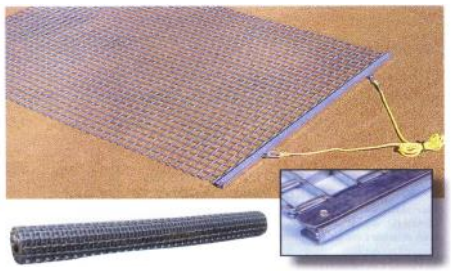

FLEXIBLE DRAG MATS, STANDARD-DUTY 3/8" x .046" galvanized steel with Rope & Handle. Red spacers are placed in the two corners that do not have the attachment. The mat can roll up from left to right with the drag attachment bar on the right. Custom sizes available. Mats are generally rolled and a cardboard sleeve is placed over each end for shipping with additional cardboard around the middle to place shipping labels.

Most Popular Sizes: From PA plant allow 2-3 weeks lead time. Most popular sizes normally in stock from NJ.

		NJ PLANT #	NJ PLANT	PA PLANT

Tennis Court Drag Mats—More

WHOLESALE PRICE LIST
EFFECTIVE: JANUARY 1, 2022

FLEXIBLE DRAG MAT

Same construction as Flexible Drag Mats on preceding page, except includes heavy duty angle iron across front of mat & a heavy duty chain for pulling.

#10500 6'6" Wide x 4' Long (68 lbs.) — **$425**

FLEXIBLE INFIELD DRAG MAT

6' LEVELING BAR

Designed to attach to a 6' wide flexible drag mat to make more effective use on infields. Shave off high spots and fill in the low areas. Bent wings prevent material from spilling over the edges. 6' wide, 3/8" thick, powder coated steel construction. Quick connectors are included for attaching a flexible drag mat. Order drag mat separately (on preceding page).

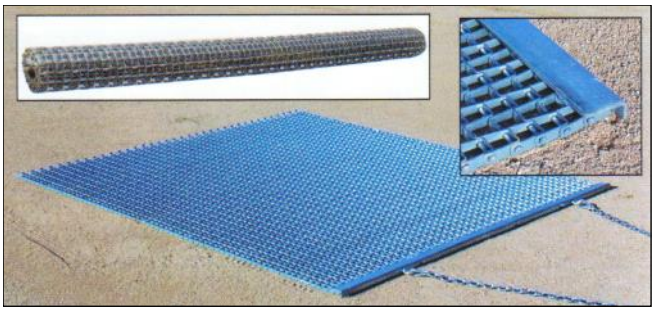

Order drag mat separately (on preceding page).

#1237009 (15 lbs.) — **$185**

HEAVY DUTY FLEXIBLE DRAG MAT

Over 3 times the strength of the standard flexible drag. 1/2" x .062" galvanized steel 1" x 1" 3.5 lbs. per sq. ft. weight. Comes complete with steel drag attachment with forged eye bolts, rope & handle.

HDFDM4X4	4' Wide x 4' Long (64 lbs.)	**$335**

BEAM CLAY®

Tennis Court Resurfacing/Scarification Tools

WHOLESALE PRICE LIST
EFFECTIVE: JULY 1, 2022

COURT DEVIL SCARIFIERS

Great for loosening & scarifying your tennis court surfaces.

#146-3409 COURT DEVIL —Weight 105 lbs., width 48".	**$1,725**
#146-3408 COURT DEVIL JR—Weight 85 lbs., width 16".	**$1,350**

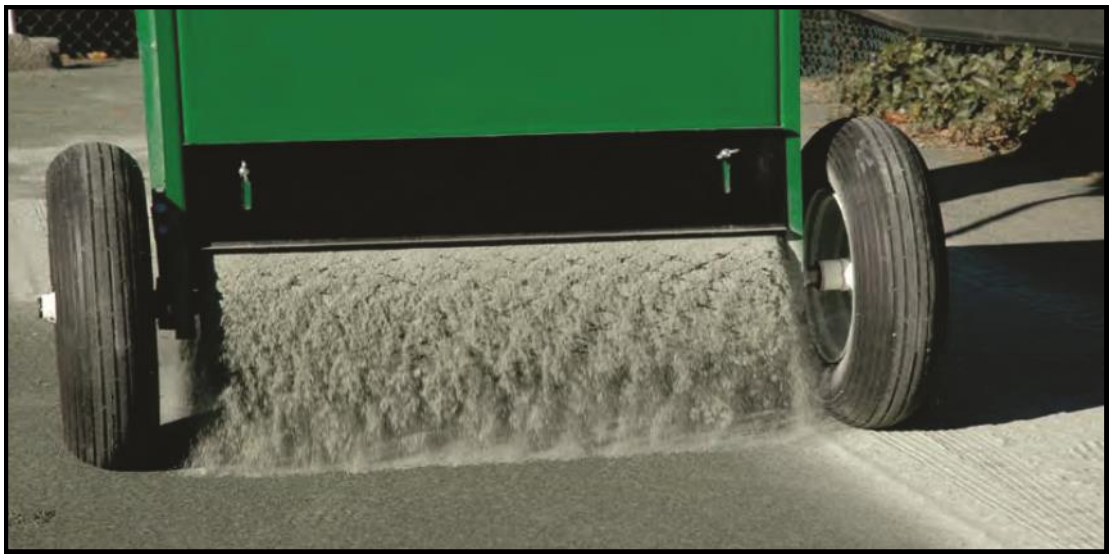

TRU-FLOW TOP-DRESSERS

This top-dresser offers unmatched performance in distributing Fast-Dry Tennis Court Surfacing.

Tru-Flow spreaders handle the toughest of conditions. For top-dressing to be effective, it needs to be applied as uniformly as possible. Tru-Flow's unique 8" dispersal drum is encased in expanded metal. Conventional drop spreaders rely on gravity to help release the Fast-Dry from its hopper, but the Tru-Flow pulls the surface out of the hopper and on to the court with unmatched consistency.

24" Hand Spreader holds up to four 80 lb. bags. Simply bolt on the handle and you are ready to start your pre-season renovation.

#124-3069 - 24" Hand Spreader	**$1,300**
#124-3065 - 36" Tow Spreader	**$3,525**
#124-3066 - 54" Tow Spreader	**$4,375**

MIDWEST™ ROLLER SQUEEGEES

ROLLER SQUEEGEE - Called "The best roller squeegees on the market" by our customers, these roller squeegees are built to outlast and outperform other brands. These squeegees are excellent for rolling water off tennis courts. The heavy-duty aluminum frame construction and stainless steel axles ensure the roller stays secure. Two roller styles are available: Non-Absorbent—excellent for pushing water; and PVA Absorbent—made of superior high-tech polymer designed to soak up incredible amounts of liquid off hard surfaces. Rollers are easily replaceable and interchangeable.

Non-Absorbent Roller Squeegee

54" Powder Coated Curved Aluminum Handle With 6" Vinyl Grip.

70924	24" Wide, 6 lbs.	$195.95

BEAM CLAY®

Midwest™ Tennis Court Squeegees & Brooms

WHOLESALE PRICE LIST
EFFECTIVE: MAY 1, 2022

MIDWEST™ SQUEEGEES

PLEASE NOTE: Midwest Plant will no longer drop ship. Check stock in NJ Warehouse.

A. General Purpose Squeegee
The best on the market. Made with an extra-wide reversible neoprene rubber blade for long-lasting use. Available in 24" and 36" widths, this super flexible squeegee is excellent for pushing and pulling liquids off hard surfaces. Comes with a 66" powder-coated aluminum handle and wrap-around braces. Because the head bolts do not penetrate the rubber, the blade on this squeegee is easily reversible and replaceable.

76924	24" Wide Blade, 5 lbs.	**$88.95**
76936	36" Wide Blade, 6 lbs.	**$100.95**

B. Straight Blade Squeegee
A rugged squeegee, excellent for removing heavier liquids such as mud. The neoprene blade is stiffer than that used on the General Purpose Squeegee, so it scrapes as well as squeegees. Comes with a 66" powder-coated aluminum handle and wrap-around braces for maximum strength. The double-edge design doubles the life of the blade.

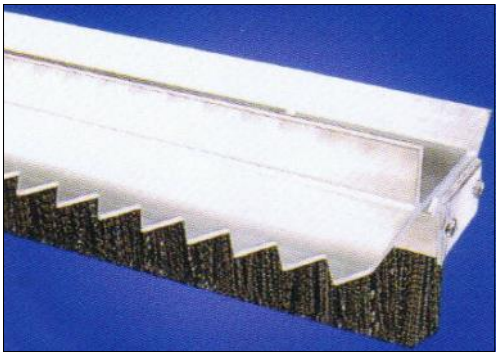

75936	36" Wide Blade, 6 lbs.	**$94.95**

MIDWEST BROOMS

7' WIDE MONSTER BROOM
Drag it on the infield, golf green, tennis or bocce court, push it on the warehouse floor. This broom is powerful and has amazing versatility. Made with heavy-duty aluminum construction. Available with two or three rows of 4-1/2" bristles. Bristles are removable for easy replacement or for adjusting the broom's stiffness.

#82084	Monster Drag Broom (Two-Row Bristles)	**$260.95**
#83084	Monster Drag Broom (Three-Row Bristles)	**$295.95**
#SP50067	7' Replacement Bristles (One Row)	**$51.95**

DOUBLE PLAY MONSTER BROOM
Identical to the two-row Monster Broom, the Double Play Monster Broom comes with an aggressive scarifying edge for breaking up packed soils.

#82384	84" Double Play Scarifier Monster Broom (Two-Row Bristles)	**$333.95**
#SP50067	7' Replacement Bristles (One Row)	**$51.95**

YOUR "*ONE-STOP*" SOURCE FOR AMERICA'S BASEBALL, SOFTBALL & SPORTS SURFACES & SUPPLIES!

BEAM CLAY®

Tennis Court Brooms

7’ WIDE MAHOGANY TENNIS COURT BROOM WITH 3 ROWS OF 7” FIBER BRISTLES & 2 STEEL HANDLES

This is the traditional court broom made the same way for over 75 years. The solid mahogany block is aesthetically pleasing and unaffected by water and severe temperature changes. Three full rows of 7" long bassine fiber absorb moisture and help dry the court. Two heavy gauge steel handles are included. The handles are reversible to prolong broom life. The broom provides an even sweep 7' wide.

#311-7 — **$510**

7’ WIDE ALUMINUM TENNIS COURT BROOM WITH 3 ROWS OF 5-1/2” GREEN POLYPRO BRISTLES & TWO 4’ ALUMINUM HANDLES WITH 20” CROSS PIECE

This is the ultimate bocce court broom. The aluminum back brush is "dynamically weighted" to provide a one time pass 7' wide. It is the fullest brush on the market with 3 rows stiff polypropylene bristles 5.5" long epoxy set into the aluminum block. Bristles are inert to the elements. The broom is sold complete with two 4' aluminum handles joined by a 20" PVC cross piece. The handles are reversible for added broom life. The broom can be flipped over and used as a scraper. Two hooks are provided for hanging up.

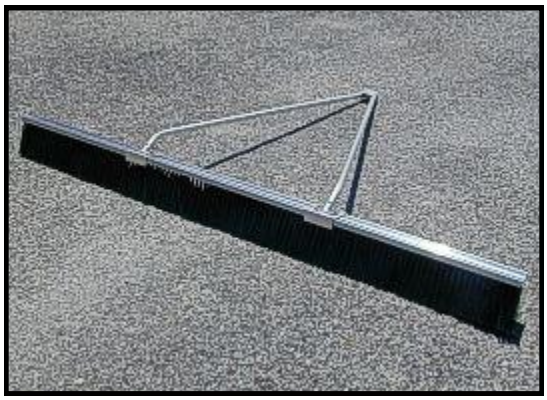

#411-7 — **$520**

CART PULL MODEL

This broom is designed to be pulled by a golf cart. The handle, with a hole to mount to a hitch pin, is at a right angle to pull the broom efficiently. Polypropylene fibers are durable and just the right stiffness to do a great job. The broom is also weighted to do the maximum amount of levelling without moving too much material.

#411T — **$550**

BEAM CLAY®

Dri-Ball Drying Agent

WHOLESALE PRICE LIST
EFFECTIVE: JANUARY 1, 2022

DRI-BALL® Within 30 seconds turn any water-soaked ball into a perfectly dry ball! **DRI-BALL®** is quick and easy to use for games and practice! For baseball, softball, football, soccer, tennis, volleyball or any other sport with a ball that gets damp, wet or even soaking wet!

- Simply place the ball into an air-tight container with the **DRI-BALL®** compound.
- Shake the container - 30 seconds later, remove your ball and it will be completely dry and ready to use, and without any residue.
- **DRI-BALL®** also extends the life of balls, which reduces replacement costs.

One **DRI-BALL** kit contains 2 (1¼ lb.) packages of the **DRI-BALL** compound.

One to two kits should last one season, including practices: **#DB-KIT** **$95/Kit**

- For baseball after wet practices, place 8-10 balls in 3-gallon container with 1 package of **DRI-BALL**. Shake for 30 seconds. All of the balls will be dry, will not rot, and will not get heavy. The entire kit should last for a 25-game season if you use **DRI-BALL** 2 to 3 days per week and keep **DRI-BALL** containers air-tight at all times.
- For football & soccer, dunk muddy balls into water to wash off mud. Place in 5-gallon container with 1 package of **DRI-BALL** and shake for 30 seconds. Your ball will be clean and dry! Nothing else is this easy! Keep **DRI-BALL** air-tight at all times.

BEAM CLAY®

Tennis Court Shoe Brushes

WHOLESALE PRICE LIST
EFFECTIVE: JULY 1, 2022

TENNIS COURT SHOE BRUSH

Two foam plastic blocks with blue plastic bristles on steel frame with steel scraper bar. Simple & Effective! (6 lbs.)

#4042414		**$76.95**
#4042514	- Repl. Brush (two per Cleat Brush) each	**$15.95**

THE TREAD BLASTER

The Tread Blaster is uniquely designed to remove dirt and grit from your shoes without getting the tops of your shoes wet. A necessity for all facilities with clay courts. Easy to install, all you need is access to water and a hose with a spigot that provides a pressure of 30 to 60 psi. You'll be happy you made the investment.

147-4000		**$560**

TENNIE TWO-STEP

The Tennie Two-Step keeps carpets, players' shoes and walkways cleaner. The Tennie Two-Step is simplicity in itself. It is a UV-resistant polyethylene water-holding basin containing two patented perforated rubber panels designed to force water into the soles of your shoes while you rock back and forth on your feet. The results are noticeable everywhere. Clean shoes mean no more Fast-Dry in the house, on walkways, or in your car. Tennie Two-Step is available in its classic form, or with a newly designed shoe brush attached to the frame for more aggressive cleaning needs. You can also upgrade your existing units by installing a brush. Installation is simple and requires two holes to be drilled and two bolts to be tightened. All the appropriate hardware is included.

#147-3012	**SHOTTSWB**	- Tennie Two-Step with Brush	**$280**
#147-3046	**SHOTTS**	- Tennie Two-Step (without Brush)	**$220**
#147-3011	**SHOTTSBR**	- Brush attachment	**$75**

COURT MAID

Court Maid's powder-coated, all-aluminum frame is designed to be installed at the entrance and exit points of your bocce court for cleaning shoes and trapping clay or Fast-Dry within its collection basin. The brush unit on top lifts off for easy removal of the accumulated Fast-Dry. Simply hose off to clean.

#147-3576	**SHOCMJ**	- Black 14 3/4" x 20" x 4"	**$410**

HAR-TRU SHOE BRUSH

The Har-Tru "Scrusher" shoe brush can be attached to the sidewalk or left free standing. The softer upper bristles dust off the upper portion of the shoe while the stiffer lower bristles scrape topping from the soles. The base is made of heavy-duty carbon steel. The shoe brush is easily cleaned with a hose or soap and water.

#147-3601	**SHOSBR**		**$105**
#147-3602	**SHOSBRBB**	Replacement Bottom Brush	**$9.25**
#147-3603	**SHOSBRSB**	Replacement Side Brush (each)	**$24**

BEAM CLAY®
Synthetic Turf for Tennis Courts

WHOLESALE PRICE LIST
EFFECTIVE: JULY 1, 2022

TENNIS TURF™ - SYNTHETIC TURF FOR TENNIS COURTS

A perfect tennis court needs to perform authentically and consistently—our turf does just that. Tennis turf is designed to act like natural grass, reducing the risk of injury to your joints and giving you a fun, reliable court.

Can be installed over crushed aggregate base (3/4" minus) or glued to concrete or asphalt. Tape and glue needed for seams, if installing over crushed aggregate. 1/2" of fine stone dust recommended over crushed aggregate base for a smooth compacted surface. Perforated turf not recommended—can cause wash out in base. Perimeter drainage best.

24 oz. Polypropylene, 15' wide, pine green or clay, SilverBack™ Polyurethane 2" White Lines Available.	**PL35715WSB**	**$2.25/sf**
36 oz. POLYPROPYLENE artificial turf. Available in 14 colors.		
15' wide, pine or spring green, SilverBack™ Polyurethane	**PL70515WSB**	**$4.50/sf**
15' wide, clay, red, white, blue, orange, yellow, black, tan or brown SilverBack™ Polyurethane	**PL70515WCSB**	**$4.85/sf**

PLEASE NOTE: Synthetic Turf is normally rolled face out. No charge to "reverse roll" cut pieces with turf faced in—which makes it easier to install—doesn't need to be flipped over.

There is a $2 per linear foot charge (**#CPTCUT**) to cut the width (there is a 1/4" tolerance) and/or pre-trim (**#CPTTRIM**) the scrim fabric along edge with a $100 minimum charge. Pre-trimming scrim can be done on site with scissors.

If gluing to concrete, use Robert's 6700 glue from Home Depot if 65° or warmer, Turf Claw™ if 55°+, or Nordot 34-G if 50°+. If installing over compacted aggregate, you need to spike perimeter and tape (12" w) & glue seams. Turf Claw™ can be shipped with your turf order. Check current pricing for tape & glue per quantity needed. If installing over macadam, be sure glue is compatible with macadam or loose lay with 2-3 lbs. sand to weigh the turf down, plus tape & glue seams. If gluing SilverBack™ polyurethane backing, make sure glue is polyurethane compatible.

BEAM CLAY®
Running Track Surfaces

WHOLESALE PRICE LIST: F.O.B. GREAT MEADOWS, NJ
EFFECTIVE: MAY 15, 2022

JET TRACK™ RUNNING TRACKS

Economical Alternatives to Synthetic, All-Weather Tracks for New Running Tracks or for Many Years Of Higher Performance from Your Existing Cinder Track!

Jet Track Mixes, which can be applied over your present cinder track, are quality controlled mixes, with natural clay or Stabilizer® Binder blended with 3/16" crushed aggregate, superior to coal cinders as they will not break down and become powdery.

Jet Track Mix makes a firm, smooth surface with great drainage. Available in burgundy red, grey, black, white or tan , with either 20% red, grey, black, white or tan **Beam Clay® Binder** for a smoother surface, or 5% red, grey, black, white or tan **Beam Clay® Binder** for a somewhat "crunchier" surface, or "**STABILIZED"** in red, grey, black, white or tan for a firmer, yet more resilient, surface – each with excellent drainage and resistance to erosion. Excellent natural surfaces for walking paths & jogging trails. Easy to maintain: Recommended maintenance is to scarify and roll each spring. Otherwise, drag mat as needed to maintain smooth surface. Recommended depth for a new track is 3"; for resurfacing a cinder track 1-3". Resurfacing a cinder track can be tapered with 3" on inside lanes out to 1" in outer lanes.

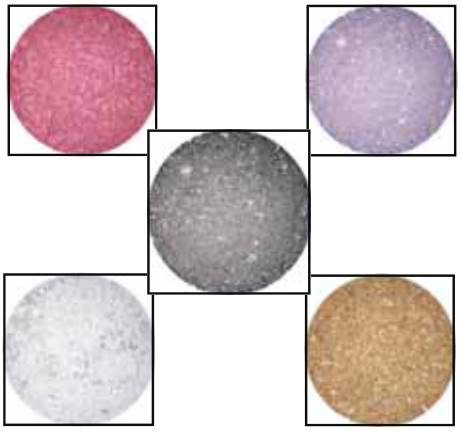

Stabilizer® binds the aggregate together for a firm, yet more resilient, natural running track surface requiring minimal maintenance.

3/16" Red, Grey, Black, White or Tan Jet Track™ with Natural Beam Clay® Binder

One cubic yard weighs approximately 2,700 lbs. in red, approximately 3,240 lbs. in grey, black white or tan, plus add 20% for compaction. Each 1" compacted requires approximately 5 tons per 1,000 square feet for red, 6 tons for grey, black, white or tan. Each 1" compacted over a 400 meter x 32' wide running track with starting area will require approximately 248 tons for red, 298 tons for grey, black, white or tan.

		BULK/TON		50 LB. BAG Up to 50/pallet
Burgundy Red with 5% Beam Clay® Red Binder	JT-R5 BULK	$75	JT-R5 BAG	$7.50
Burgundy Red with 20% Beam Clay® Red Binder	JT-R20 BULK	$105	JT-R20-BAG	$8.50
Grey with 5% Beam Clay® Grey Binder	JT-G5-BULK	$65	JT-G5 BAG	$7.25

Black or White with 20% Beam Clay® Black or White Binder	JT-(B, W)20-BULK	$105	JT-(B, W)20 BAG	$8.50
Tan with 5% Beam Clay® Tan Binder	JT-T5 BULK	$140	JT-T5 BAG	$10
Tan with 20% Beam Clay® Tan Binder	JT-T20 BULK	$170	JT-T20 BAG	$10.75

3/16" Red, Grey, Black, White or Tan Stabilized Jet Track™ with Stabilizer® Binder

For an even firmer yet more resilient surface with even less maintenance: 3/16" crushed aggregate blended with Stabilizer® at the rate of 15 lbs. per ton of aggregate. One cubic yard weighs approximately 2,700 lbs. in red, approximately 3,240 lbs. in grey, black, white or tan plus add 20% for compaction. Each 1" compacted requires approximately 5 tons per 1,000 square feet for red, 6 tons for grey, black, white or tan. Each 1" compacted over a 400 meter x 32' wide running track with starting area will require approximately 248 tons for red, 298 tons for grey, black, white or tan.

		BULK/TON		50 LB. BAG Up to 50/pallet
Burgundy Red with Stabilizer® Binder	JT-RS BULK	$130	JT-RS BAG	$9.75
Grey with Stabilizer® Binder	JT-GS BULK	$120	JT-GS BAG	$9.50
Black or White with Stabilizer® Binder	JT-(B,W)S BULK	$130	JT-(B,W)S BAG	$9.75
Tan with Stabilizer® Binder	JT-TS BULK	$195	JT-TS BAG	$11.25

We have other track surfaces without **BEAM CLAY®** binder or **STABILIZER®** binder. While these will not give the level of performance as the above for running tracks, they do provide excellent surfaces for walking or jogging tracks:

Regional CRUSHED RED STONE TRACK MIXES, RED BRICK TRACK, and RED LAVA TRACK from plants in the East, South, MidwWest, and West Coast.

PALLET & COVER CHARGES: $10.50/PALLET. **#NJ-PALLET**

Rubber Curbing
For Running Tracks

Product Specifications

Product Description:

1. Material: compression molded composite of the 100% recycled rubber and polyurethane prepolymer

2. Physical properties of the rubber composite:
   a) Density 0.6 oz/cu in (ASTM C642)
   b) Durometer Hardness 65A ± 7 (ASTM D2240)
   c) Tensile Strength* minimum 125 psi (ASTM D412)
   (* main structural areas)
   d) Compression deformation 10% at 70psi, 68°F (ASTM D575)
   e) Brittleness at Low temperature: -40°F (ASTM D746)
   f) Freeze and thaw when exposed (ASTM C672)
   to deicing chemicals no loss after 50 cycles
   g) Coefficient of thermal expansion: 8 x10^{-5} in/in/°F (ASTM C531)
   h) Weathering 70 hours at 158°F (ASTM D573)
   - hardness retained 100% (± 5%)
   - compressive strength 100% (± 5%)
   - tensile strength 100% (± 5%)
   - elongation retained 100% (± 5%)

3. Available models:
   a) 4”W x 4”H x 72”L with weight of 30 lbs.
   b) 4”W x 6”H x 72”L with weight of 45 lbs.
   c) 4”W x 8”H x 72”L with weight of 70 lbs.
   d) 3”W x 4”H x 72”L with weight of 20 lbs.
   e) 3”W x 4”H x 48”L with weight of 13 lbs.

4. Finishing color: dark brown

Installation methods:

a) with 2 spikes 18” long x 3/8” diameter provided for each 4” high piece
b) with 2 spikes 24” long x 3/8” diameter provided for each 6” high or 8” high piece

Note: The mounting holes can be closed after installation with the rubber plugs 1-1/8 diameter and ¾” long, supplied with the product.

Components:

a) 100% recycled rubber from car and truck tires (NR, SBR)
b) polyurethane prepolymer for rubber granules
c) brown pigment

BEAM CLAY®

Outdoor Track Aluminum Curbing

WHOLESALE PRICE LIST
EFFECTIVE: MAY 15, 2022

All Weather Track Aluminum Curbing

Aluminum track curbing is designed to save tremendous amounts of labor on installation, last for decades and provide continual functionality. Accurate measurements on-site or drawings required.

- $ Structural aluminum tubing is pre-bent to reduce stress on track surface
- $ Installation only requires from 12 to 24 holes in your track surface, while other systems require literally hundreds of holes to be drilled to keep curb sections in place under tension
- $ Interlocking joints between 20' sections are precision machined for a snug fit requiring no hardware connectors - allows expansion and contraction for stability under all conditions
- $ Welded aluminum drain pads raise curb 1/2" off the track surface and allow water and debris to run off freely
- $ Mill finish is standard or upgrade to the silver anodized finish for extra durability

Aluminum Curbing	#3AC	$21.95/LF
Silver Anodized Option	#3AC-SA	$28/LF

Running Track Aluminum Curbing

- $ Outdoor track curbing composed of structural aluminum 2” x 5” tubing. Pre-bent to proper radius in 20’ sections.
- $ Designed to anchor to poured concrete monuments
- $ Also can be used as shot-put area border

Aluminum Curbing	#5AC	$31/LF

Roll Out Runway

- $ Made to be rolled over existing worn out runways.
- $ Use as a protective surface on all-weather track during football games or other activities.
- $ Made with a black rubber/urethane mix.
- $ 10mm (3/8") thick.
- $ Custom lengths are available.
- $ Minimum order 50'.
- $ 12mm available - call for pricing

32" wide (per linear ft)	TR32	$12.55/LF
36" wide (per linear ft)	TR36	$12.55/LF
42" wide (per linear ft)	TR42	$13.50/LF
48" wide (per linear ft)	TR48	$14.50/LF

BEAM CLAY®
Line Marking Equipment—Dry

WHOLESALE PRICE LIST
EFFECTIVE: JANUARY 1, 2022

Multiple Lane Dry Chalk Track Marker

Makes preparation for a meet a quick job! Two people can lay out a track in 30 minutes. Works on any track. When a curb is present every line will be uniformly accurate to the fraction of an inch. Set-up time for use or storage is five minutes. Each hopper can hold up to 25 lbs. and go 440 yards. Hoppers do not have a shut off, it's free flowing once it starts moving, just adjust speed to obtain desired thickness.

LMLD-440-8	7 hopper 8 lane; '440 yd. capacity; class 65; 192 lbs.	**Call for Price & Availability**

Running Tracks—Weighted Track Protectors

WHOLESALE PRICE LIST
EFFECTIVE: JUNE 20, 2022

BENCH ZONE® SIDELINE TRACK PROTECTOR

WIND WEIGHTED TRACK PROTECTOR
RESISTS & CUSHIONS AGAINST CLEATS, BUT RAIN DRAINS THROUGH.

These track protectors resist and cushion against cleats, shoes, and wheeled equipment … yet allow water to drain through. Made of tough polypropylene geotextile fabric with vinyl edging with steel chain inserted all around for ballast. This keeps Protector down even in high winds without stakes. To reduce weight for easier installation, longer Sideline models have sections that join with hook-and-loop strips. Tarp body is black. Standard edging is choice of white or gold. Also available: 15 other colors of the 18 oz. vinyl edging.

Our sharp multi-color images will outlast other processes. Eliminates the historic problems of digital printing, like weathering, premature fading, scuffing, and unsightly white mesh backside color. Images will last outdoors as long as the fabric, something rarely true with digital imprinting. Also highly spike, cleat, and racquet resistant. Our thick, individually-applied, double coating process literally bonds the image into the vinyl and completely masks the underlying fabric color, so image colors are vivid and true.

Chroma-Bond imprinting is available on our vinyl-surfaced windscreen, cover, padding & sign products.

Weighted Long Jump Pit Covers

WHOLESALE PRICE LIST
EFFECTIVE: JUNE 20, 2022

LANDING ZONE™ BALLASTED PIT COVERS

KEEPS SAND IN and KIDS AND ANIMALS OUT!

Made with our exclusive Vipol® Matrix Mesh Material, the Landing Zone™ Ballasted Pit Covers are tough beyond belief. Your sand stays where it belongs, in the pit, protected from wind, animals, and children. But rain, sun, and air penetrate the material, eliminating water pooling and mold. Also available in reinforced solid vinyl.

Galvanized steel chain is installed in the edge hem all around, providing enough ballast to keep wind from getting under. These covers ***STAY PUT IN HIGH WINDS*** without stakes or sandbags.

LZXVIPOL	LZ Ballasted Pit Cover made with 10 oz. Vipol™ Matrix Mesh—Available in 23 colors!	**$3.40/SF**
LZXVINYL	LZ Ballasted Pit Cover made with 18 oz. Solid Vinyl—Available in 17 colors!	**$3.35/SF**

TAKE-OFF & TOE BOARDS

Tray System

This 8" wide tray system is the most popular tray system for both the college and high school market. The 8" wide board meets all the specifications for college and high school. The weatherproof high-density urethane top surface of the board makes an excellent take off surface. The take-off board is mounted to a steel framework with 6 adjusting bolts so that you can level the board with the runway surface. The heavy-duty tray is made of bright zinc plated steel.

TTSS UPS 75 lbs **$670**

side view

Poly High School Take-Off Board

New problem solving technology poly take-off board eliminates durability and cracking problems often experienced in wood boards. Long lasting poly surface comes with a 5-year warranty. This two part poly board has a softer texture 3/4" top board for better plants. Attached to high density 3/4" grey poly under board to eliminate warping.

TPOLYTB UPS 48 lbs **$340**

Tray for TPOLYTB

For permanent installation in synthetic runways, this 48" x 20" stainless steel tray system works with our TPOLYTB take-off board. Drain holes for all weather conditions.

THSTBT UPS 36 lbs **$470**

A

B

International Take-Off Tray System

Made the same as our TTSS board with the addition of a foul board and cover. Foul board is made of 1/2" plywood and can easily be taken out and plasticine put in for meets. Cover is made of heavy-duty steel.

TTICS UPS 105 lbs **$1,370**

side view

Long Jump/Triple Jump Take-Off Board

This official take-off board is made with the same technology as our TPOLYTB board. 48" long by 8" wide. 3/4" polyurethane top surface on 1 1/2" x 8" plastic underboard.

TLT Ups 24 lbs **$245**

Counter sunk for bolt & washer.

Recessed for ring

Poly Toe Board
Our Poly Toe Board is designed with Linear Low-Density Polyethylene (LLDPE) and UV stabilizer for maximum durability. This design eliminates the potential for rusting, common in metal boards, and its solid construction prevents chipping and cracking often seen with wood or fiberglass boards.

TPTB Ups 15 lbs **$375**

A. Cast Aluminum Toe Board
Cast aluminum construction, meets all rule specifications. Designed for level pads.

TATB For level pad (most common), UPS 24 lbs **$565**
TATB-DP Depressed pad, UPS 24 lbs **$565**

B. All Metal Shot Toe Board
Cannot warp, split, or deteriorate in weather. Radiating lines speed up accurate measurement.

TMTB UPS 25 lbs **$255**

Vault Boxes

Vault Boxes

A. Stainless Steel Vault Box
Smooth finished stainless box made of 12 gauge stainless steel will not rust, crack or split. The preferred box for universities, colleges & high schools where they are looking for a top quality box that will give years of trouble-free use.

TSSVB	UPS 65 lbs. Ships Dimensional	$790

Steel Lid
For TSVB & TSSVB.

TSVBL	UPS 29 lbs. Ships Dimensional	$335

B. Steel Vault Box
Heavy gauge steel featuring a curved front lip which eliminates it as a pole obstacle even when the runway is worn down. Has flared sides and 105 degree angle.

TSVB	UPS 43 lbs. Ships Dimensional	$385

Steel Lid
For TSVB & TSSVB.

TSVBL	UPS 29 lbs. Ships Dimensional	$335

C. Welded Aluminum Vault Box
Thick wall 5052 aluminum welded construction ensures this vault box will last the lifetime of your track. The 1/8" walls and 1/4" bottom and backstop make this the strongest vault box in the industry. Meets all NFHS, NCAA & IAAF Specifications.

TWAVB	UPS 24 lbs. Ships Dimensional	$515

Aluminum Lid
Aluminum lid is 1/4" thick and uses supports in the middle to ensure lid always has flush appearance. Lid sits flush with top of vault box and may be covered with all-weather track material.

TWAVBL	UPS 12 lbs. Ships Dimensional	$485

D. Cast Aluminum Vault Box
This high quality vault box is designed to give years of trouble-free use. The thick walled aluminum casting will not warp, crack or rust. Inside corners are rounded for easy rotation of pole in box. Ideal for universities, colleges & high schools who are looking for a top of the line vault box that meets all IAAF, NCAA & NFHS specifications.

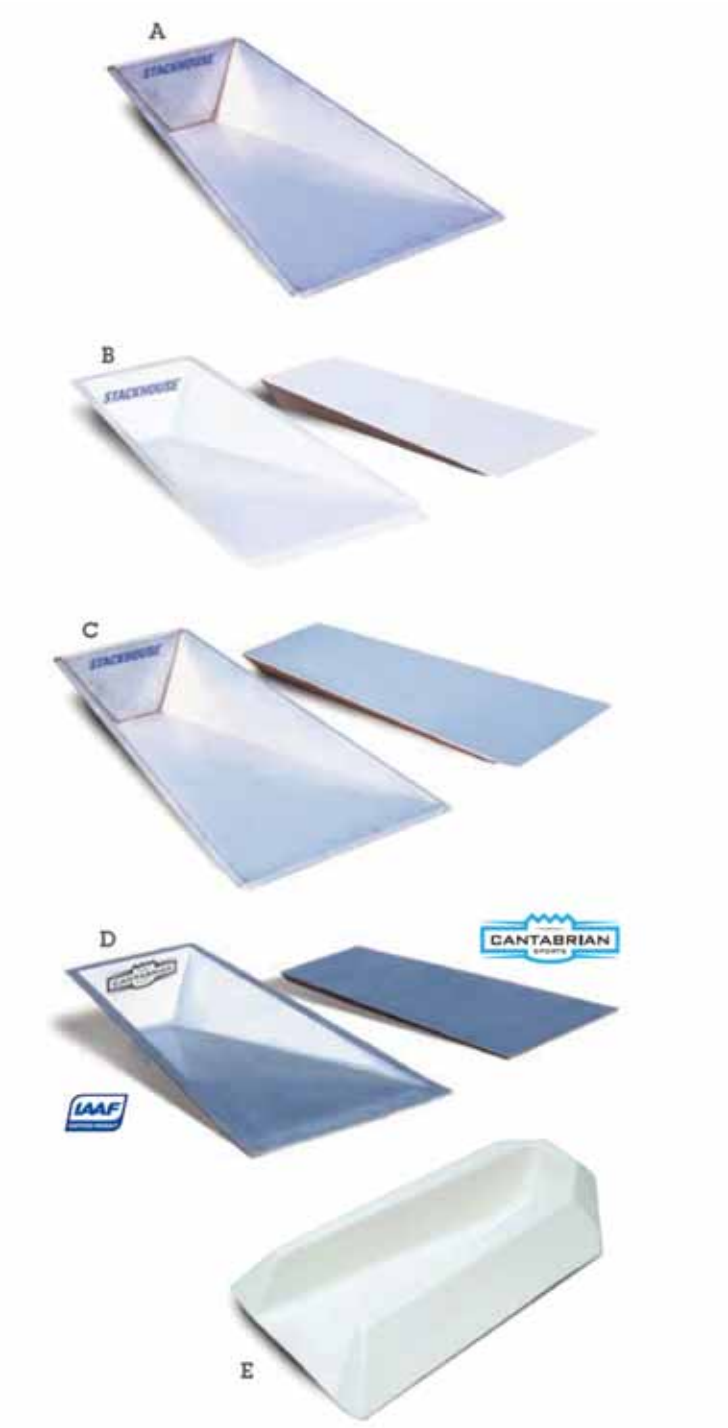

TCAVB	UPS 66 lbs	$825

Cast Aluminum Lid
This lid is designed to give attractive level top surface for when TCAVB is not in use. Lid has textured finish to match look of TCAVB but may also have synthetic surface applied to match runway.

TCAVBL	UPS 33 lbs. Ships Dimensional	$410

E. Pole Vault Slide Box
This lightweight fiberglass slide box is reinforced for years of heavy use. Bright white, it is highly visible and slides straight away. Use indoors or out for fast development of the most crucial part of the vault: the run and plant.

TPVSB	UPS 21 lbs. Ships Dimensional	$490

Value Packs & Pole Accessories

A. Vault Protective Padding
This protective padding is designed to be laid on the outside of your pit and cover any or all hard surfaces that are exposed. Made of 2" high-density foam and heavy 18 oz. yellow vinyl, this mat can be attached to another mat with existing velcro flaps on both ends. Comes in 4' x 8' yellow sections.

TVP 4' x 8, Class 70, 20 lbs $430

B. Vault Box Collar
Meets ASTM F2949-12 standard and is compliant with NCAA/NFHS 2015 rule. In-ground anchor system limits collar slipping. 3" foam covered with heavy 18oz yellow vinyl.

TVC 33" foam, Class 70, 38 lbs. $690

C. Weather Cover Insert
This weather cover insert helps keep rain from puddling on pit. 1" coated steel frame with capped ends for protection.

TWCI UPS 5 lbs. $50

D. H.S. Boy's Throws Value Pack
Boy's package includes:

- 1-THRD 1.6k rubber discus.

BEAM CLAY®

Shot Put Throwing Sector Surfaces

WHOLESALE PRICE LIST
EFFECTIVE: MAY 15, 2022

SHOT PUT THROWING SECTOR SURFACES

Shot Put Throwing Sector Surfaces make a firm, smooth surface with great drainage. Available in burgundy red, grey, black, white or tan with either 20% red, grey, black, white or tan **Beam Clay® Binder** for a smoother surface, or 5% red, grey, black, white or tan **Beam Clay® Binder** for a somewhat "crunchier" surface, or "**STABILIZED"** in red, grey, black, white or tan for a firmer, yet more resilient, surface – each with excellent drainage and resistance to erosion. Recommended depth is 3"-4" over a firm, well-draining base.

3/16" Shot Put Throwing Sector Surfacing with Natural Beam Clay® Binder
One cubic yard weighs approximately 2,700 lbs. in red, approximately 3,240 lbs. in grey, black, white or tan, plus add 20% for compaction. Each 1" compacted requires approximately 5 tons per 1,000 square feet in red or 6 tons per 1,000 square feet in grey, black, white or tan.

		BULK/TON		50 LB. BAG Up to 50/pallet
Burgundy Red with 5% **Beam Clay® Red Binder**	SP-R5 BULK	$75	SP-R5 BAG	$7.50
Burgundy Red with 20% **Beam Clay® Red Binder**	SP-R20 BULK	$105	SP-R20-BAG	$8.50

BEAM CLAY®

Portable Discus Cage & Throwing Platform

WHOLESALE PRICE LIST
EFFECTIVE: JANUARY 1, 2022

Portable Discus Cage

Portable Discus Cage #HSDC-P / #CDC-P
When your throwers need to relocate from time to time, this portable discus cage puts safety on the move. Precisely angled brackets, combined with exact length weighted support braces, allow for a repeatable cage assembly adds stability and eliminates human error.

- All-aluminum posts (4"OD) feature 3' offset to prevent implement deflection - 14'H for HS/17'H for NCAA
- Weather-treated nylon main safety net (14'H for HS/17'H for NCAA) can be set up and taken down with a simple pulley system
- Offset eye-bolts secure bottom of net to base
- Included backup net (7') keeps onlookers at a safer distance from main safety net
- Meet all NFHS/NCAA rules and regulations
- See drawings for specifications, installation instructions and plan/layout recommendations
- Proudly Made in the USA

Premier Outdoor Throwing Platform #POP
This is a versatile outdoor platform designed to be used in conjunction with our Portable Discus Cage.

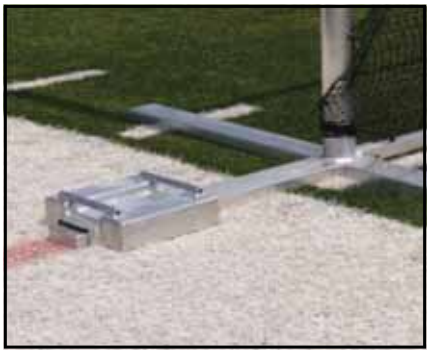

- Versatile outdoor platform designed to be used in conjunction with our Portable Discus Cage
- Nominal Size 9'W x 9'L x 3"H
- Two identical panels, with recessed handles for lifting, bolt together during use via an internal mate, which allows for a seamless alignment and tight fit
- Each panel features a three-layer construction: a structural aluminum inner core; a 3/4" thick grade A plywood surface (chamfered at the seam); and a synthetic rubber top to allow for minimal friction
- Retractable stainless steel handles are ergonomically designed to allow for quick and easy moving of platform
- Add our Model No. HDR-S Conversion Ring and Model No. STBC Toe Board and your ready for the Shot Event
- Proudly Made in the USA

#HSDC-P	**High School Portable Discus Cage**	$16,450
#CDC-P	**Collegiate Portable Discus Cage**	$22,535
#POP	**Premier Outdoor Throwing Platform**	$10,145

Vinyl Sandbags

- Fabricated with 18 oz. vinyl panels measuring 18" x 18" with heavy gauge zipper
- Heavy duty canvas handles attached via Box-X stitch method
- Yellow is standard - also available in white

#VSZ	**Vinyl Sandbags**	$90

Base Weights (80 lbs.)

- Adds further stability to portable products in a more seamless fashion
- Aluminum construction guarantees no rusting
- Optional 3" or 5" wide welded channel to fit

#BW-80	**Base Weights**	$625

BEAM CLAY®

Volleyball

Rubber Curbing
For Volleyball Courts

Product Specifications

Product Description:

1. Material: compression molded composite of the 100% recycled rubber and polyurethane Prepolymer

2. Physical properties of the rubber composite:
   a) Density 0.6 oz/cu in (ASTM C642)
   b) Durometer Hardness 65A ± 7 (ASTM D2240)
   c) Tensile Strength* minimum 125 psi (ASTM D412)
   (* main structural areas)
   d) Compression deformation 10% at 70psi, 68°F (ASTM D575)
   e) Brittleness at Low temperature: -40°F (ASTM D746)
   f) Freeze and thaw when exposed (ASTM C672)
   to deicing chemicals no loss after 50 cycles
   g) Coefficient of thermal expansion: 8 x10^{-5} in/in/°F (ASTM C531)
   h) Weathering 70 hours at 158°F (ASTM D573)
   - hardness retained 100% (± 5%)
   - compressive strength 100% (± 5%)
   - tensile strength 100% (± 5%)
   - elongation retained 100% (± 5%)

3. Available models:
   a) 4”W x 4”H x 72”L with weight of 30 lbs.
   b) 4”W x 6”H x 72”L with weight of 45 lbs.
   c) 4”W x 8”H x 72”L with weight of 70 lbs.
   d) 3”W x 4”H x 72”L with weight of 20 lbs.
   e) 3”W x 4”H x 48”L with weight of 13 lbs.

4. Finishing color: dark brown

Installation methods:

a) with 2 spikes 18” long x 3/8” diameter provided for each 4” high piece
b) with 2 spikes 24” long x 3/8” diameter provided for each 6” high or 8” high piece

Note: The mounting holes can be closed after installation with the rubber plugs 1-1/8 diameter and ¾” long, supplied with the product.

Components:

a) 100% recycled rubber from car and truck tires (NR, SBR)
b) polyurethane prepolymer for rubber granules
c) brown pigment

PVB-75CVR-CP	Chrome Cover 7½"	7 lbs	$330 EA
PVB-85CVR	Brass Cover 8½"	7 lbs	$330 EA

Sleeve Insert Measurement

To ensure proper fit of sleeve inserts, provide the following dimensions of sleeves when ordering.

1. Depth of sleeve itself
2. Depth from bottom of sleeve to playing surface
3. Inside diameter of sleeve (do not measure cover plate)

Sleeve Insert/Adapter

- Makes larger floor sleeve holes smaller
- 3 Year Limited Warranty
- Made in the USA

Depths other than standard 9½" are special order items (non-returnable). Custom sizes (depths) may require longer lead time. Specify current depth and inside diameter when ordering.

PVB-DEP	Sleeve Insert	6 lbs.	$138 EA

BEAM CLAY®

Dri-Ball Drying Agent

WHOLESALE PRICE LIST: F.O.B. GREAT MEADOWS, NJ
EFFECTIVE: JANUARY 1, 2022

DRI-BALL® Within 30 seconds turn any water-soaked ball into a perfectly dry ball! **DRI-BALL®** is quick and easy to use for games and practice! For baseball, softball, football, soccer, tennis, volleyball or any other sport with a ball that gets damp, wet or even soaking wet!

- Simply place the ball into an air-tight container with the **DRI-BALL®** compound.
- Shake the container - 30 seconds later, remove your ball and it will be completely dry and ready to use, and without any residue.
- **DRI-BALL®** also extends the life of balls, which reduces replacement costs.

One **DRI-BALL** kit contains 2 (1¼ lb.) packages of the **DRI-BALL** compound.

One to two kits should last one season, including practices: **#DB-KIT** **$75/Kit**

- For baseball after wet practices, place 8-10 balls in 3-gallon container with 1 package of **DRI-BALL**. Shake for 30 seconds. All of the balls will be dry, will not rot, and will not get heavy. The entire kit should last for a 25-game season if you use **DRI-BALL** 2 to 3 days per week and keep **DRI-BALL** containers air-tight at all times.
- For football & soccer, dunk muddy balls into water to wash off mud. Place in 5-gallon container with 1 package of **DRI-BALL** and shake for 30 seconds. Your ball will be clean and dry! Nothing else is this easy! Keep **DRI-BALL** air-tight at all times.

BEAM CLAY®

WHOLESALE PRICE LIST

Gymnasium - GymGuard® Floor Covers

GymGuard® Floor Covers
ADD YEARS TO THE LIFE OF YOUR GYM FLOOR!

Most gyms are multi-purpose. So your gym floor has to hold up to a lot more than sports - dances, concerts, graduations and other activities. It gets heavy foot traffic, stains, scuffs, impact from furniture and more. **GymGuard®** covers are built tough to protect your investment.

Two people can cover your entire gym floor in 30 minutes!

Features:

- **Ultra-durable, 3-ply fabrics** – PVC coated (on both sides) polyester mesh
- **Fire retardant** to all standard fire codes—NFPA 701, CA Fire Marshal and UL 300
- Available in **15 colors** and **5 weights**
- **Waterproof, rot and mildew resistant, anti-fungal and anti-bacterial**
- **10' wide sections**—seams are strong and lay flat and smooth
- Custom-made to your gym floor dimensions, or
- Available in 10' x 100' sections for quick shipment

Pre-cut 10'x100' floor sections – quick shipment!

- Available in Tan and Royal Blue
- Available in 18 oz., 22 oz., 27 oz. and 32 oz.
- Ships on a roll

WARRANTY — GymGuard Floor Covers have full warranty against fabric and manufacturer's defects. See chart to right.

GymGuard® Plus

Durable gym floor cover protection PLUS a unique raised pattern provides more than 2 times the slip resistance* of standard **GymGuard®** surfaces.

- Advanced slip resistance = enhanced level of safety
- Available in Tan and dark gray colors
- 32 oz. and 27 oz. weights

Cover sizing – the 10-foot solution

GymGuard® covers are constructed in 10' wide sections for easy handling. When figuring the size of the cover you need, we suggest adding 6"-12" for overlapping each section.

(For example, for a 75 x 110' floor, order 8 sections measuring 10' x 110' each.)

How to choose the right cover weight

To recommend the most cost effective **GymGuard®** cover for your application, we need to know:

- Expected frequency of cover use per week/month/year
- Types of functions you will have on the covered floor
- Dimensions of gym floor
- Color preference

WHOLESALE PRICE LIST

Gymnasium GymGuard® Mobile Storage Racks

GymGuard® Mobile Storage Racks

Easy lay-down and roll-up of floor covers.

Our standard rack allows safe, fast and easy covering of the gym's surface. Roll-up and transport to storage area can be done by two people.

Racks are available in 6, 8 and 10-roller models.

Features:

- Four 8" non-marking urethane, swivel-type wheels can support up to 3,600 pounds of cover and rack
- Yellow safety bar and aluminum safety collars – prevent the roller from popping out, side-to-side movement and accidental finger pinching
- Blue vinyl end caps – protect from sharp edges
- Safety brake – placement and design make it easy to lock all wheels in place
- Rollers are 14-gauge galvanized steel and the entire frame is a mig-welded, all steel construction

Included with all racks:

- New rotating grip makes rolling up easier
- 3 fabric clips per roller for securing cover to roller
- Instructions for assembly and operation

Two hand cranks with rotating grips for easy winding

Aluminum safety collars, yellow security bars, blue vinyl end caps

Four 8" non-marking, urethane swivel wheels with safety brake

WARRANTY — Storage Rack warranty: 20-years against defects in material or workmanship.

Storage Rack Specifications	
Sizes	
Standard Rack	34" W x 12'6" L x 67" H for 10' wide covers
Premier Rack	34" W x 14' 2.25" L x 67" H for 10' wide covers
Mini Rack	34" W x 6'4" L x 67" H for 5' wide covers
Capacity	2,800 lbs. of GymGuard fabric
Rollers	2.5" diam., 14 gauge steel, lockable to prevent accidental unwinding
Frame	Mig-welded, all-steel construction
Brackets	Steel with Delrin roller bearings
Wheels	8" non-marking urethane swivel types, all with foot-locks

Premier Mobile Storage Rack

The Premier Rack is an upgraded version of the Standard Rack that includes even more safety features:

- Six 8" diameter wheels reduce risk of damage to floor boards by distributing weight load and allow for easier rack movement
- Safety leg extenders with two 3" wheels provide extra stability
- Storage trays to hold extra rolls of tape or the Power Winder

Premier Features

Storage trays

Six 8" wheels with safety leg extenders

GymGuard™ Frequently Asked Questions

What is the best way to clean my gym floor cover?
Use a mild dish detergent or an industrial strength cleaner found at a home supply store or supermarket, such as Mr. Clean.

Can I play sports on gym floor covers like soccer, baseball, and floor hockey?
While the covers are ADA compliant for slip resistance, they will be more slippery than the wood floor. Gym floor covers are designed for non-athletic events, not for sports activities. Activities played at high speeds with hard foot plants and cuts are not recommended on the GymGuard product.

If I am getting a gym floor cover with custom lettering/ logos, will it wear off due to foot traffic?
TuffPrint is expected to wear the same as the cover itself – eventually, over a period of years, it may wear off, depending on the traffic.

Can gym floor covers be installed on surfaces other than hardwood floor, such as rubberized flooring or carpet?
Yes, it is possible for gym floor covers to be used on carpeted and rubberized floors. The heavier fabric options might work best because they will lay flatter and be less susceptible to movement by foot traffic and tables/chairs. One should know that the tape will work for taping the sections together but may not work for taping the covers to the floor surface.

How do I choose the most suitable weight for my needs?
We usually determine our recommendation based on how many times you will use the covers per year. Of course, budget is a factor as well. The heavier weights are more expensive, while the lighter weights are lower in price.

32oz = 25+ times per year
27oz. = 15 – 24
22oz. = 8 – 14
18oz. = 1 – 8

What are the advantages of using a gym floor cover?
Gym floor covers provide protection, event space opportunity and increased income for your facility. Gymnasiums are often multi-purpose facilities: the setting for dances, registrations, banquets, plays, and commencements, in addition to sporting events. It is worthwhile to maximize the space by hosting activities that can generate incremental revenue, but it's critical to protect the gym floors from damage caused by high heels, chairs, tables, and food and drink. New gym floors can cost $50,000 - $100,000 so it makes sense not to risk damage to this valuable part of your facility. Two people can install a floor covering system over your entire gym floor within 30 minutes, providing you with the assurance that the floor will be safe from potential damage and helping you protect your investment for years to come.

How long will my gym floor cover last?
GymGuard fabrics are made with rugged substrates and durable coatings, ensuring the longest wear possible. The heavier the fabric, the longer the warranty. To increase the life expectancy of the cover, it is best to store the covers properly on a Mobile Storage Rack.

Why is the Mobile Storage Rack the preferred method of floor cover storage, rather than folding them?
Depending on the length and weight of your floor cover, each section can weigh over 100 pounds, which can make moving and storing them extremely laborious. It is safer and easier to use the Mobile Storage Rack for this process. Folding the covers is also not recommended due to creasing of the covers during storage time, which weakens the fabric. In addition, creased covers will not lay as flat, posing tripping hazards for those walking on them.

GymGuard® Floor Covers

WARRANTY

GymGuard covers are warranted to the original purchaser for the following number of years from the date of purchase against defects in the material or workmanship as to the cover components. The word "defects" as used in this warranty, is defined as imperfections which impair the utility of the product. Warranties are pro-rated:

- 32oz. = 17 years
- 27oz. = 15 years
- 22oz. = 10 years
- 18oz. = 8 years
- 10oz. = 3 years

This warranty is expressly limited to the repair or replacement of cover components having defects. If the cover component is defective within the terms of the warranty, CoverSports will repair or furnish a replacement cover component at no cost. No replacement labor is included.

This warranty applies under conditions of normal use, but does not apply to defects that result from intentional damage, negligence, unreasonable use or mishandling. GymGuard covers are designed for indoor use. Warranty does not apply to covers used outdoors.

All implied warranties arising under state law are limited in duration to the period of this warranty. Some states do not allow limitation on how long a limited warranty lasts, so the above limitation may not apply to you.

Liability for incidental or consequential damages is excluded to the extent exclusion is permitted by law. Some states do not allow the exclusion or limitation of incidental or consequential damages, so the above limitation or exclusion may not apply to you.

This warranty gives you specific legal rights, and you may also have other rights which vary from state to state.

GYMGUARD MOBILE STORAGE RACK AND BRUSH ASSEMBLY:
20-year pro-rated warranty against material or workmanship defects.

POWERWINDER™: 1 year warranty for parts & labor

Report cover defects in writing.

BEAM CLAY®

EnviroSafe® Gymnasium Mats

EnviroSafe® Gym Products

OUR FOAM
Our exclusive **EnviroSafe™** Gym mat and padding collection is made of a specialized "green" foam product that is safe for your gymnasts, players and for the environment. A four-part recycling process (shown below) explains how **EnviroSafe™** foam is made.

OUR FABRIC COVERINGS
Nissen **EnviroSafe™** mat and wall padding fabrics are tough! Our PVC-coated fabrics are super tear-resistant, antibacterial, phthalate-free and have high UV and flame resistance. They can take the most rugged indoor and outdoor wear. All indoor mats and wall pad coverings meet fire codes – including NFPA 701, CA Fire Marshal and UL 300. Other vendors use 14 oz. laminated fabrics, which tend to peel after extended use. Our 18 oz./sq. yd. fabrics are coated in one homogeneous layer of PVC and polyester.

EnviroSafe™ Features:
- Made from 60% recycled and 40% virgin polyester fiber
- Excellent cushion resistance
- Varying degrees of firmness
- Safer for environment and end user compared to Urethane, Poly or Rebond foams
- Patented foam technology licensed exclusively to CoverSports by Indratech
- Our wall padding line contributes to LEED credit score

2" Med-Firm EnviroSafe Folding Mat	Number of Plastic Bottles Used
4' x 6'	403
4' x 8'	537
5' x 10'	839
6' x 12'	1208

Density Lbs. per cubic foot. (Example: 1.7 lb. density foam means 1 cubic foot weighs 1.7 lbs.)

IFD, Indention Force Deflection, is a measurement of foam firmness and is independent of foam density. IFD is measured by indenting (compressing) a foam sample to 25% of its original height. The amount of force in lbs. required is its IFD measurement. The more force required, the firmer the foam. IFDs usually range from 10 IFD (super soft) to 100 IFD (very firm).
EnviroSafe Flex-Firm Foam: IFD 100
EnviroSafe Classic Foam: IFD 50

Phthalate-free EnviroSafe™ products do not contain phthalates – chemical plasticizers that are often used to soften plastics. Phthalates are not environmentally friendly.

EnviroSafe™ Is the foam to meet your needs.

BEAM CLAY®

WHOLESALE PRICE LIST

EnviroSafe® Gymnasium Mats

Sport/Application	Recommended Foam Type	Description
Gymnastics-Beginner	2" Flex Firm	Provides soft cushioning for low impact activities. Ideal for teaching basic gym exercises with young children. Provides low shock absorption.
	2.5" Extra-Firm/Flex Firm Combo (Cross-link type/Flex-Firm)	Provides more density and more firmness (less "sinking") than Flex-Firm. Extra-firm bonded to Flex-Firm. Provides firm landing and prevents bottoming out.
	4", 8" or 12" Soft IFD 50 (Safety Landing Mats)	Provides added support and thick cushioning for falls and landings during practice.
Gymnastics-Intermediate	2" Medium-Firm (Bonded type)	Medium-firm foam provides safe cushioning for medium impact activities.
	2.5" Extra-Firm/Flex Firm Combo (Cross-link type/Flex-Firm)	One ply of Extra-firm foam bonded/laminated to one ply of Flex-Firm. Provides semi-soft cushioning, firm landing and stable shock absorption for medium impact activities. Prevents bottoming out.
Gymnastics - Advanced	1.5" Extra-Firm (Cross-link type)	High density offers firm, lightweight shock absorption for top recoil. Provides stable landing surface that won't bottom out. 1.5" Extra-firm foam laminated to Flex-Firm foam. Ideal for high-impact activities and tumbling. Provides significant shock-absorption for gymnasts sticking landings from vault, bars, and balance beam routines.
	5" or 8" Extra-Firm/Flex Firm Combo (Cross-link type/Soft) (Competition Landing Mats)	
Gymnastics - Instructor Mats	2.5" Extra-Firm/Flex Firm Combo (Cross-link type/Flex Firm)	One ply of Extra-firm foam bonded/laminated to one ply of Flex-Firm. Ideal for beginners and for new skill development. Prevents bottoming out so gymnasts of all ages and skill sets can use the mat with confidence.
Martial Arts	1.5" Extra-Firm (Cross-link type)	High density provides firm footing and "street conditions", no sinking.
	2.5" Extra-Firm/Flex Firm Combo (Cross-link type/Flex Firm)	One ply of Extra-firm foam bonded/laminated to one ply of Flex-Firm. Provides firm footing with additional cushion for fall absorption.
Cheerleading	1.5" Extra-Firm (Cross-link type)	High density provides stable landing surface and firm footing for high-impact activities. Won't bottom out.
	2" Medium-Firm (Bonded type)	Medium firm foam provides more soft cushioning than Extra-Firm, for medium impact activities.
	4", 8" or 12" Classic (Safety Landing Mats)	Provides significant cushioning for landings at the end of tumble tracks.
Home Exercise Mat	2" Flex Firm	Provides soft cushioning, comfort and moderate support for low impact, home exercise activities.
Gymnasium Wall Padding	2" Medium-Firm (Bonded type)	Medium firm foam meets ASTM F-2440 for impact resistance.
	2" Flex Firm	More cushion than Medium-Firm, less impact resistance and shock absorption.
	2" Medium-Firm (Bonded type) FR	Meets ASTM E-84-08a for flame retardant and ASTM-2440
	2" Classic Soft IFD 50	Provides extra softness and cushioning for protection against injuries.

The EnviroSafe® Foam Competitive Advantage

	EnviroSafe	Urethane/ Poly Foams

BEAM CLAY®

EnviroSafe® Gymnasium Mats

EnviroSafe® Gym Mats

Our EnviroSafe gym mat collection is safe for gymnastics, martial arts, and the environment. EnviroSafe has a suitable mat for all skill levels – from beginners to advanced – and activities – low and high impact tumbling, landings and movements. The foam choices range from very soft to extra firm to provide the right amount of cushioning and absorption. EnviroSafe gym mats are perfect for your gymnastic or martial arts club, school gymnasium or other athletic facility. They allow for easy handling and storage while not in use.

Folding & Non-folding Mats

EnviroSafe tumbling mats are available in many foam choices, sizes and color combinations.

Safety Landing Mats

4" mats are typically used for elementary ages. 8" and 12" mats are used for training, skill building and safe landing in non-standing positions.

FEATURES:

- 1" color-matched handles on long sides
- Mesh breather strips on long sides
- Soft impact absorption – Classic foam
- 4" Velcro end flaps
- 18 oz. fire retardant PVC coated covering
- Three thicknesses: 4", 8"" or 12"
- Safety landing mats are not EnviroSafe

BEAM CLAY®

EnviroSafe® Gymnasium Indoor Wall Padding, Column & Stage Padding

GYMNASIUM

Make sure your padding meets ASTM standards for flame spread and impact resistance!

Nissen EnviroSafe Wall Padding

THE POWER OF BRANDING

TuffPrint™ can give your gym walls and school spirit a boost!

TuffPrint digital print can add lettering and logos using:

- State-of-the-art machinery – all in-house
- Ultra-durable premium ink with unlimited color selection and gradient shading
- See pg. 36 for full TuffPrint process details

MAKE THE GREEN CHOICE. EnviroSafe is made of recyclable and recycled material. EnviroSafe wall padding costs no more than other standard urethane/poly foam panels. We have foam types that meet ASTM E-84-08a standard ASTM 2440 and Calif. Technical Bulletin #117.

FEATURES:

- 24" width x 60", 72", 84" or 96" heights, 2.5" thickness
  - 2" Medium-Firm foam meets ASTM F-2440 for impact resistance (and option for class A E-84)
  - 1.5" Extra-Firm available
- Phthalate-free and antibacterial covering
- Contributes to LEED credit score

COLORS:

Green, Royal Blue, Red, Navy Blue, Gray, Maroon, Sky Blue, Purple, Yellow, White, Tan, Black, Kelly Green, Orange

Wall Padding Installation

Standard
1" nail margins

Additional
Z-clip mounting attachments for easy removal, repair or replacement of wall panels (no nail margins)

How it's made (cross section)

- 18 oz. tough PVC fire-retardant cover
- EnviroSafe foam cushioning
- 7/16" formaldehyde-free backer boards (1/2" for class A)
- EnviroSafe solvent-free adhesive

Our sharp multi-color images will outlast other processes. Eliminates the historic problems of digital printing, like weathering, premature fading, scuffing, and unsightly white mesh backside color. Images will last outdoors as long as the fabric, something rarely true with digital imprinting. Also highly spike, cleat, and racquet resistant. Our thick, individually-applied, double coating process literally bonds the image into the vinyl and completely masks the underlying fabric color, so image colors are vivid and true.

Chroma-Bond imprinting is available on our vinyl-surfaced windscreen, cover, padding & sign products.

BEAM CLAY®

Pathway Mixes

WHOLESALE PRICE LIST: F.O.B. GREAT MEADOWS, NJ
EFFECTIVE: MAY 15, 2022

PATHWAY MIXES

Available in 3/16" minus Burgundy Red, Grey, Tan or White aggregates blended with either a 20% **Beam Clay® Binder** for smoother surface, or a 5% **Beam Clay® Binder** for a somewhat crunchier surface, or "**Stabilized**" with Stabilizer® a natural organic binder at rate of 15 lbs. per ton for an even firmer, yet more resilient surface—each with excellent drainage and resistance to erosion. Excellent natural surfaces for walking paths, jogging trails, driveways, or patios.

Easy to maintain: Recommended maintenance is to scarify and roll each spring. Otherwise, drag mat as needed to maintain smooth surface. Recommended depth is 1" - 3" depending on your base. If poorly draining soil, stabilize base first with 3/4" minus road stone.

3/16" Red Pathway Mix

One cubic yard weighs approximately 2,700 lbs., plus add 20% for compaction. Each 1" compacted requires approximately 5 tons per 1,000 square feet.

		BULK/TON		50 LB. BAG Up to 50/pallet
Burgundy Red with 5% **Beam Clay® Red Binder**	CPM-RED5-BULK	$75	CPM-RED5-BAG	$7.50
Burgundy Red with 20% **Beam Clay® Red Binder**	CPM-RED20-BULK	$105	CPM-RED20-BAG	$8.50
Burgundy Red with **Stabilizer® Binder**	CPM-REDSTAB-BULK	$130	CPM-REDSTAB-BAG	$9.75

3/16" Grey Pathway Mix

One cubic yard weighs approximately 3,240 lbs., plus add 20% for compaction. Each 1" compacted requires approximately 6 tons per 1,000 square feet.

Grey with 5% **Beam Clay® Grey Binder**	CPM-GREY5-BULK	$65	CPM-GREY5-BAG	$7.25
Grey with 20% **Beam Clay® Grey Binder**	CPM-GREY20-BULK	$95	CPM-GREY20-BAG	$8
Grey with **Stabilizer® Binder**	CPM-GREYSTAB-BULK	$120	CPM-GREYSTAB-BAG	$9.50

3/16" Black Pathway Mix

One cubic yard weighs approximately 3,240 lbs., plus add 20% for compaction. Each 1" compacted requires approximately 6 tons per 1,000 square feet.

Black with 5% **Beam Clay® Black Binder**	CPM-BLK5-BULK	$75	CPM-BLK5-BAG	$7.50

BEAM CLAY®
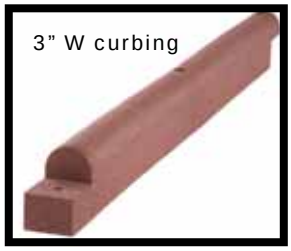

Pathway Rubber Curbing

Rubber Curbing

Product Specifications

Product Description:

1. Material: compression molded composite of the 100% recycled rubber and polyurethane prepolymer

2. Physical properties of the rubber composite:
   a) Density 0.6 oz/cu in (ASTM C642)
   b) Durometer Hardness 65A ± 7 (ASTM D2240)
   c) Tensile Strength* minimum 125 psi (ASTM D412)
      (* main structural areas)
   d) Compression deformation 10% at 70psi, 68°F (ASTM D575)
   e) Brittleness at Low temperature: -40°F (ASTM D746)
   f) Freeze and thaw when exposed (ASTM C672)
      to deicing chemicals no loss after 50 cycles
   g) Coefficient of thermal expansion: 8 x10^{-5} in/in/°F (ASTM C531)
   h) Weathering 70 hours at 158°F (ASTM D573)
      - hardness retained 100% (± 5%)
      - compressive strength 100% (± 5%)
      - tensile strength 100% (± 5%)
      - elongation retained 100% (± 5%)

3. Available models:
   a) 4”W x 4”H x 72”L with weight of 30 lbs.
   b) 4”W x 6”H x 72”L with weight of 45 lbs.
   c) 4”W x 8”H x 72”L with weight of 70 lbs.
   d) 3”W x 4”H x 72”L with weight of 20 lbs.
   e) 3”W x 4”H x 48”L with weight of 13 lbs.

4. Finishing color: dark brown

Installation methods:

a) with 2 spikes 18” long x 3/8” diameter provided for each 4” high piece
b) with 2 spikes 24” long x 3/8” diameter provided for each 6” high or 8” high piece

Note: The mounting holes can be closed after installation with the rubber plugs 1-1/8 diameter and ¾” long, supplied with the product.

Components:

a) 100% recycled rubber from car and truck tires (NR, SBR)
b) polyurethane prepolymer for rubber granules
c) brown pigment

BEAM CLAY®

Dog Park Surfacing

WHOLESALE PRICE LIST: F.O.B. GREAT MEADOWS, NJ
EFFECTIVE: MAY 15, 2022

DOG PARK SURFACING

Available in 3/16" minus Burgundy Red, Grey, Tan or White aggregates blended with either a 20% **Beam Clay® Binder** for smoother surface, or a 5% **Beam Clay® Binder** for a somewhat crunchier surface, or "**Stabilized**" with Stabilizer® a natural organic binder at rate of 15 lbs. per ton for an even firmer, yet more resilient surface—each with excellent drainage and resistance to erosion. Excellent natural surfaces for walking paths, jogging trails, driveways, or patios.

Easy to maintain: Recommended maintenance is to scarify and roll each spring. Otherwise, drag mat as needed to maintain smooth surface. Recommended depth is 1" - 3" depending on your base. If poorly draining soil, stabilize base first with 3/4" minus road stone.

3/16" Red, Grey, Black, White or Tan Dog Park Mix with Natural Beam Clay® Binder

One cubic yard weighs approximately 2,700 lbs. in red, approximately 3,240 lbs. in grey, black white or tan, plus add 20% for compaction. Each 1" compacted requires approximately 5 tons per 1,000 square feet for red, 6 tons for grey, black, white or tan.

		BULK/TON		50 LB. BAG Up to 50/pallet
Burgundy Red with 5% **Beam Clay® Red Binder**	DPM-R5-BULK	$75	DPM-R5-BAG	$7.50
Burgundy Red with 20% **Beam Clay® Red Binder**	DPM-R20-BULK	$105	DPM-R20-BAG	$8.50
Grey with 5% **Beam Clay® Grey Binder**	DPM-G5-BULK	$65	DPM-G5 BAG	$7.25
Grey with 20% **Beam Clay® Grey Binder**	DPM-G20-BULK	$95	DPM-G20 BAG	$8
Black or White with 5% **Beam Clay® Black or White Binder**	DPM-(B, W)5-BULK	$75	DPM-(B, W)5 BAG	$7.50
Black or White with 20% **Beam Clay® Black or White Binder**	DPM-(B, W)20-BULK	$105	DPM-(B, W)20 BAG	$8.50
Tan with 5% **Beam Clay® Tan Binder**	DPM-T5 BULK	$140	DPM-T5 BAG	$10
Tan with 20% **Beam Clay® Tan Binder**	DPM-T20 BULK	$170	DPM-T20 BAG	$10.75

3/16" Red, Grey, Black, White or Tan Stabilized Dog Park Mix with Stabilizer® Binder

For an even firmer yet more resilient surface with even less maintenance: 3/16" crushed aggregate blended with Stabilizer® at the rate of 15 lbs. per ton of aggregate. One cubic yard weighs approximately 2,700 lbs. in red, approximately 3,240 lbs. in grey, black, white or tan plus add 20% for compaction. Each 1" compacted requires approximately 5 tons per 1,000 square feet for red, 6 tons for grey, black, white or tan.

		BULK/TON		50 LB. BAG Up to 50/pallet
Burgundy Red with **Stabilizer® Binder**	DPM-RS BULK	$130	DPM-RS BAG	$9.75
Grey with **Stabilizer® Binder**	DPM-GS BULK	$120	DPM-GS BAG	$9.50
Black or White with **Stabilizer® Binder**	DPM-(B,W)S BULK	$130	DPM-(B,W)S BAG	$9.75
Tan with **Stabilizer® Binder**	DPM-TS BULK	$195	DPM-TS BAG	$11.25

PALLET & COVER CHARGES: $10.50/PALLET.

BEAM CLAY®
Synthetic Turf for Pet Areas

WHOLESALE PRICE LIST
EFFECTIVE: JULY 1, 2022

SYNTHETIC TURF FOR LANDSCAPING, PLAYGROUNDS OR PETS

Can be installed over crushed aggregate base (3/4" minus) or glued to concrete or asphalt.

60 oz. Playground Turf #PL929-CSTM Polyethylene w/texturized polypropylene, 1-1/4" pile, 15' wide, field green, perforated, SilverBack™ polyurethane. **Our most popular turf for playgrounds.**	**$4.35/sf**
#PL929C-CSTM Colors: red, white, blue, yellow, black	**$4.95/sf**
55 oz. Landscape Turf #PL921-CSTM Polyethylene w/texturized polypropylene, 1-3/4" pile, 15' wide, field or olive, perforated, SilverBack™ polyurethane.	**$3.65/sf**
71 oz. Fresh Grass #PL906-CSTM Texturized polyethylene, 1-3/4" pile, 15' wide, field green or olive, perforated, SilverBack™ polyurethane.	**$4.75/sf**
62 oz. Pet Turf #PL928-CSTM Polyethylene w/texturized polypropylene, 7/8" pile, 15' wide, forest/olive, perforated, SilverBack™ polyurethane.	**$4.55/sf**

PLEASE NOTE:

Synthetic Turf is normally rolled face out. No charge to "reverse roll" cut pieces with turf faced in—which makes it easier to install—doesn't need to be flipped over.

There is a $2 per linear foot charge (**#CPTCUT**) to cut the width (there is a 1/4" tolerance) and/or pre-trim (**#CPTTRIM**) the scrim fabric along edge with a $100 minimum charge. Pre-trimming scrim can be done on site with scissors.

If gluing to concrete, use Robert's 6700 glue from Home Depot if 65° or warmer, Turf Claw™ if 55°+, or Nordot 34-G if 50°+.

If installing over compacted aggregate, you need to spike perimeter and tape (12" w) & glue seams.

Turf Claw™ can be shipped with your turf order. Check current pricing for tape & glue per quantity needed.

If installing over macadam, be sure glue is compatible with macadam or loose lay with 2-3 lbs. sand to weigh the turf down, plus tape & glue seams.

If gluing SilverBack™ polyurethane backing, make sure glue is polyurethane compatible.

1 mm rubber backing does not expand or contract as much as other backings and is especially used for loose lay applications.

Scrim on foam backing keeps the foam from cracking when stored rolled up in warehouse.

Scrim will not curl if gluing down but will curl if installing over crushed aggregate without securing the perimeter.

Use foam back with scrim for gluing to concrete or asphalt. Use foam without scrim for installing over crushed aggregate unless securing perimeter.

BEAM CLAY®
Synthetic Turf for Pet Areas

WHOLESALE PRICE LIST
EFFECTIVE: JULY 1, 2022

LANDSCAPING/FRINGES/PLAYGROUNDS

56 OZ. NYLON FRESH GRASS
PRODUCT DATA SHEET

Primary/Yarn:	Nylon
Secondary/Thatch Yarn:	Nylon
Yarn Cross Section:	Nylon; Textured Nylon
Backing:	SilverBack™ Polyurethane
Pile Height:	1-1/8”
Roll Width:	12’ Untrimmed
Perforated:	Optional
Recommended Infill:	2-3 lbs. silica sand
Color:	Forest/Olive
Shipping Weight:	83 oz per sq yard

Applications:
This is an excellent landscape/multi-purpose product that offers thatch, which provides added body, reducing the amount of infill needed. The three color blend of this surface provides a truly authentic look and feel that resembles a natural lawn. This product can be installed outdoors or indoors over concrete, asphalt, or compacted aggregate base. Not recommended for pets. Nylon will retain urine odor.

These specifications are standard and may vary slightly due to manufacturing tolerances.

Roll Width:	15’
Perforated:	Yes
Recommended Infill:	2 lbs./sf dry 20/40 or 30/50 sand recommended
Applications:	This product was designed specifically for pet areas. The construction of this style blends itself to high wear applications like kennels. Made with a two color face fiber, it’s utility is not restricted to just pet areas, also works well as a first cut of fringe.

BEAM CLAY®
Synthetic Turf for Pet Areas

WHOLESALE PRICE LIST
EFFECTIVE: JULY 1, 2022

Landscaping/Fringes/Playgrounds or Pets Turf

LANDSCAPE TURF 941

52 OZ. POLYETHYLENE WITH TEXTURIZED POLYPROPYLENE PILE

Secondary Backing:	Silverback™ Polyurethane
Pile Height:	1-1/2”
Roll Width:	15’ Untrimmed
Color Available:	Field/Olive with Olive/Tan Thatch
Perforated:	Yes
Shipping Weight:	79 oz. per square yard
Infill:	2 lbs./sf dry 20/40 or 30/50 sand recommended

Application:

This is an excellent landscape product that offers thatch, which provides added body, reducing the amount of infill needed. The four color blend of this surface provides a truly authentic look and feel that resembles a natural lawn. This product can be used for landscapes, pet areas, fringes, and much more. This product can be installed indoors or outdoors on concrete or a compacted aggregate base.

These specifications are standard and may vary slightly due to manufacturing tolerances.

BEAM CLAY®
Dog Park Equipment

WHOLESALE PRICE LIST
EFFECTIVE: APRIL 19, 2022

Most dogs just want to play... and hang out with you.

The reason most owners take their pets to Dog Parks is to have outdoor fun and enjoy companionship - not to compete in professional dog shows. So we've created a product line that offers maximum enjoyment for everyone.

Me and My Pal Bench

Even outdoors, dogs like to spend time with their human best friends. Introducing the world's first bench designed for people and their canine buddies. Dogs can hop right up the steps and be close to the one they love. This will be a favorite in your next dog park - better get two! **$2,370 #BAR700080-FIELD, #BAR700080-SKY**
(77" L X 22" W X 50" H)

Canine Condo

Dogs are curious. And they love to explore! Our Canine Condo gives dogs everything they love. A shady cove, easy climbing steps, a ramp adventure - topped off with a sheltered perch that dogs will absolutely love! You better bring some treats to get dogs to leave the Canine Condo! **$3,850 #BAR700100-FIELD, #BAR700100-SKY**
(138" L X 33" W X 93" H)

Canine Condo is like a Mini Dog Park all wrapped up in one attractive fixture.

Perfect for small spaces or if you're just getting started.

BMX & MOTORCROSS JUMP & TRACK SURFACING

BEAM CLAY® BMX / Motorcross Jump & Track Mixes are pulverized, blended, and screened.

We can make any ratio you want (using black, grey, red, orange, brown, tan, or white clays blended to your specifications or we can supply less expensive raw clay freshly dug from the pit, but we have found **BEAM CLAY® BMX / Motorcross Track Mix** to be an excellent mix. Freshly dug clay is clumpy, much harder to work with, and will not perform as well as the above mix.

Also, available are our **BEAM CLAY® BMX / Motorcross Jump & Track Mixes** using either red, black, grey, tan or white 3/16" minus crushed aggregate with either a red, black, grey, tan, or white clay binder or **STABILIZER®** binder. The stabilized mix is two steps down from an all-weather track that is very firm yet resilient with excellent drainage yet a loose top surface. We also have polymerized clay that repels water yet stays resilient. The polymerized mix is one step down from an all-weather track that is very firm yet resilient and repels water.

Natural Clay Surfacing 2
Crushed Aggregate Surfacing 3
Infield Mixes 4-5

BEAM CLAY®

BMX / Motorcross Jump & Track Surfaces

WHOLESALE PRICE LIST
EFFECTIVE: MAY 15, 2022

BEAM CLAY® BMX & MOTORCROSS JUMP CRUSHED AGGREGATES

Available in 3/16" minus Burgundy Red, Grey, Tan or White aggregates blended with either a 20% **Beam Clay® Binder** for smoother surface, or a 5% **Beam Clay® Binder** for a somewhat crunchier surface, or "**Stabilized**" with Stabilizer® a natural organic binder at rate of 15 lbs. per ton for an even firmer, yet more resilient surface—each with excellent drainage and resistance to erosion. Excellent natural surfaces for walking paths, jogging trails, driveways, or patios.

Easy to maintain: Recommended maintenance is to scarify and roll each spring. Otherwise, drag mat as needed to maintain smooth surface. Recommended depth is 1" - 3" depending on your base. If poorly draining soil, stabilize base first with 3/4" minus road stone.

3/16" Red, Grey, Black, White or Tan Crushed Aggregates with Natural Beam Clay® Binder

One cubic yard weighs approximately 2,700 lbs. in red, approximately 3,240 lbs. in grey, black white or tan, plus add 20% for compaction. Each 1" compacted requires approximately 5 tons per 1,000 square feet for red, 6 tons for grey, black, white or tan.

		BULK TON		50 LB. BAG Up to 50/pallet
Burgundy Red with 5% **Beam Clay® Red Binder**	BMX-R5-BULK	$75	BMX-R5-BAG	$7.50
Burgundy Red with 20% **Beam Clay® Red Binder**	BMX-R20-BULK	$105	BMX-R20-BAG	$8.50
Grey with 5% **Beam Clay® Grey Binder**	BMX-G5-BULK	$65	BMX-G5 BAG	$7.25
Grey with 20% **Beam Clay® Grey Binder**	BMX-G20-BULK	$95	BMX-G20 BAG	$8
Black or White with 5% **Beam Clay® Black or White Binder**	BMX-(B, W)5-BULK	$75	BMX-(B, W)5 BAG	$7.50
Black or White with 20% **Beam Clay® Black or White Binder**	BMX-(B, W)20-BULK	$105	BMX-(B, W)20 BAG	$8.50
Tan with 5% **Beam Clay® Tan Binder**	BMX-T5 BULK	$140	BMX-T5 BAG	$10
Tan with 20% **Beam Clay® Tan Binder**	BMX-T20 BULK	$170	BMX-T20 BAG	$10.75

3/16" Red, Grey, Black, White or Tan Stabilized Crushed Aggregates with Stabilizer® Binder

For an even firmer yet more resilient surface with even less maintenance: 3/16" crushed aggregate blended with Stabilizer® at the rate of 15 lbs. per ton of aggregate. One cubic yard weighs approximately 2,700 lbs. in red, approximately 3,240 lbs. in grey, black, white or tan plus add 20% for compaction. Each 1" compacted requires approximately 5 tons per 1,000 square feet for red, 6 tons for grey, black, white or tan.

		BULK TON		50 LB. BAG Up to 50/pallet
Burgundy Red with **Stabilizer® Binder**	BMX-RS BULK	$130	BMX-RS BAG	$9.75
Grey with **Stabilizer® Binder**	BMX-GS BULK	$120	BMX-GS BAG	$9.50

BEAM CLAY®

WHOLESALE PRICE LIST
EFFECTIVE: AUGUST 1, 2022

DOUGLAS F-5 FIX SERIES SYSTEMS

The **F5™ Series** is an ideal choice for institutional applications such as neighborhood parks, municipalities, school playgrounds and anywhere else an adjustable system is not desired or needed. The fixed system was designed with safety in mind with a uniquely angled 5' extension arm that allows for the maximum safe-play area minimizing any potential contact with the extension mount.

MAX Clear View 42" x 60" Backboard
Our durable, unobstructed, NBA regulation size "clear view" tempered glass backboard has an aluminum perimeter frame supported by a welded steel back frame. This combination allows for a very rigid playing experience and maximum ball response. Unlike traditional "H Frame" backboard supports, the reinforced galvanized steel extension arms attach directly to the perimeter frame, allowing for the preferred, professional "clear view" appearance. The 655 Model has a 42" x 60" tempered glass board that is a full ½" thick which is the same used at all competitive levels such as the NBA and NCAA. Plus, we've pre-installed black, one-inch thick molded vinyl backboard padding to give you the best playing experience. Ever.

Pressure Flex Breakaway Goal
The stress of heavy, unsupervised play and aggressive dunks are no match for Douglas® F5™ Basketball Systems' durability and performance. Constructed of robust steel with a CSPC compliant powder-coat finish and featuring a 5/8" thick, 18" steel rim, and a double spring pressure flex breakaway mechanism, our recreational breakaway goal attaches to the MAX clear view backboard and directly to the extension arm. Featuring unique hidden net attachment style hooks along the inside of the hoop, our pressure breakaway goal will withstand the weight of even the most aggressive slam dunks. You better believe it.

5' Fixed Extension Arm
The Douglas® F5™ fixed extension arm overhangs 5' providing stability, strength and extra room for lay-ups and fast competitive play. The unique extension mount is angled and completely out of the play area minimizing any potential contact with the extension mount. The corrosion-resistant 5" x 5" reinforced extension arm attaches to the base of the backboard and to the outer perimeter of the frame allowing for the preferred "clear view" style. Upper brace arms are provided for maximum stability.

Galvanized Steel Pole
Constructed from 6" square galvanized steel with a 3/16" wall thickness, the Douglas® F5™ System is built to handle rugged play in the toughest conditions. Through decades of design and testing, we have manufactured our one-piece construction galvanized steel pole, equipped with double welded base gussets, with the optimal specifications to minimize shake and vibration. Every steel pole is finished in an attractive black acrylic powder coat to prevent chipping, rusting and corrosion in virtually any environment from coast to coast. For increased aesthetic appeal and to keep our players safe and free from injury, we have included a durable 2" thick fitted pole and base pad with every Douglas® F5™ Basketball System. Rest assured, your MVPs are protected.

Protective Padding
Form fitted pole and base padding are manufactured with durable black all-weather vinyl that is UV and all weather resistant. Dense foam padding is 2" thick for maximum impact protection. Padding secures in the back with sewn-in overlapping velcro straps. Sleek, molded vinyl backboard padding offers maximum player protection while not interfering with game play. Backboard padding is pre-installed for your convenience.

Easiest Installation Process
A robust anchor system allows for easy and accurate leveling during installation. All systems are set in a structurally sound 4' deep concrete footing providing a safe and steady base you can trust. Not only are our bolts and base completely covered for player safety, our J-bolt anchor system permits you to dismount your basketball system and move to a new location – all you will have to do is install a new anchor system at the new location. Easy. As. Pie.

All Weather, All Season Protection
Blazing summers, drizzly springs, and icy winters are no match for the ultimate weather protection of our Douglas® F5™ Basketball Systems. Our team immerses our steel in a bath of molten zinc to produce a corrosion resistant, multi-layered coating of zinc-iron alloy and zinc metal, preventing rusting and chipping, while providing ultimate weather protection against the elements. All of the fastening hardware is made from stainless steel to ensure your system maintains its structural integrity. Plus, all protective padding is completely weather treated and UV resistant. Rest assured, your system will be protected against the elements, long after the buzzer goes off. We've got you covered.

Douglas® Lifetime Limited Warranty
With over five decades of experience manufacturing elite sports equipment and great customer service to help you identify and solve problems, we stand behind our systems and guarantee a lifetime of dunks. Replacement parts are always readily available, so you never have to miss a minute of playtime. We've got your back and we're here to stay.

WHOLESALE PRICE LIST
EFFECTIVE: JULY 1, 2022

DOUGLAS® PREMIER PPS22-SQ PORTABLE PICKLEBALL NET SYSTEM. #63122
EXPAND YOUR FACILITY - PORTABLE PICKLEBALL NET ON WHEELS.

If you are looking for a portable system that lasts a lifetime and plays like a permanent pickleball net then the PPS-22SQ is for you! These portable pickleball systems raise the bar and are the gold standard and is the closest you can get to a permanent net's durability and quality without having to deal with installing ground sleeves. Unlike other portable units, the PPS-22SQ utilizes a center strap to achieve the proper 34" center net height for regulation play. Read More

These portable pickleball systems raise the bar and are the gold standard when permanent installation is not desired for either indoor or outdoor court applications. What sets this portable pickleball system apart from other portable systems? It is the closest you can get to a permanent net's durability and quality without having to deal with the expense of drilling and pouring concrete. The system boasts all the features of the Douglas® Premier™ Posts and plays like a permanent system. Unlike other portable units, the PPS-22SQ utilizes a center strap to achieve the proper 34" center net height for regulation play.

Easy-to-Assemble Portable PPS-22SQ systems are easy-to-assemble and only a couple tools are needed for assembly. All post and base frame pieces slide into place and are secured with pre-drilled set screws.

Rugged Solid Steel Construction
The 3" square tennis post is constructed from heavy-duty 11-gauge steel. Heavy-duty base frame is also constructed of 11-gauge 3" square steel and 3-1/2" square 3/16" heavy-wall steel. This portable system is supported by unique flat stabilizer legs that offer a greater range of play and increases player safety. Systems are finished with black baked-on polyester powder coat to resist rust and increase durability. The system can be used on both indoor and outdoor surfaces and is completely weather treated for year-round use. It is recommended that you store the system indoors during the off season for prolonged life.

Durable Long Lasting Hardware
Post is internally wound and features a self-locking gear mechanism. Gears are constructed of plated steel and the small gear is case hardened. Gear housings and caps are made of cast aluminum alloy. Gear function is 30:1 to ensure a smooth, easy operation. Flush mounted gear plate cover and removable handle are chrome plated.

Professional Quality Net
Net easily attaches with the top cable and to an eye-bolt on the base frame; no lacing rods are needed. Systems are complete with the PN-30 pickleball net and a velcro center strap. Net is constructed of 3.0 mm polyethylene netting with a white vinyl coated polyester headband. The net tension on typical portable pickleball nets is under 20 pounds. The net tension on the PPS-22SQ system is closer to the true permanent net tension of 400-500 pounds.

Transporter Wheel Assembly
The transporter wheel assembly allows for the systems to be moved on and off the court with ease. The heavy-duty non-scuff wheels are secured to the transporter assembly with smooth swivel casters that make moving the 215 pound system effortless. When its time to set the system in place for game play the transporter bracket simply flips up and out of the way. The non scuff wheels are always resting on the court so there's no need to worry about damaging the court's surface.

Lift Assist Handles
Convenient lift assist handles are included and allow to easily lift each post end to flip the transporter bracket up and out of the way while unit is in play.

PREMIER™ SQ

DOUGLAS® PICKLEBALL PREMIER™ SQUARE SURFACE MOUNT #63080

SQ NET MOUNT TO CONVERT TENNIS COURTS TO PICKLEBALL COURTS

Easily convert existing tennis courts to pickleball courts with these easy-to-install surface mount posts. These 36" high posts boast all the features of the standard Premier™ SQ posts except they offer a heavy-duty bottom welded base plate to secure posts to the playing surface.

DIMENSIONS
36" High, 3" Square

POST AND BASE
The 3" square pickleball post is constructed from heavy-duty 11-gauge steel. Post is welded to a thick base plate to secure posts to the playing surface. Systems are finished with black baked-on polyester powder coat to resist rust and increase durability. Integrated welded steel lacing rods are included for a profession net installation.

HARDWARE
Internally wound featuring a self-locking gear mechanism. Gears are constructed of plated steel and the small gear is case hardened. Gear housings and caps are made of cast aluminum alloy. Gear function is 30:1 to ensure a smooth, easy operation. Flush mounted gear plate cover and removable handle are chrome plated.

COURT DRY ROLLERS

Stop wet weather conditions from interfering with tennis matches or other outdoor court games with the Court Dry. Powder coated stainless-steel frame has a T-socket that securely holds the 36" long roller and handle in place during use. Removable roller can easily be substituted for a replacement roller.

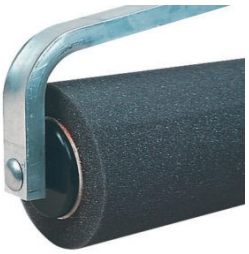

Choose from 2 roller options with a PVC core:

Blue PVA Roller – Made from 5/8" thick tough, durable Polyvinylaldehyde (PVA), this remarkable roller will outperform any other roller. The non-deteriorating foam is molded directly onto the roller core for rapid, streakless drying. Completely interchangeable with all court dry units.

Seamless Foam Roller – Super seamless extra thick construction, resists tears and separation to provide three times more drying power and is ideal for uneven courts.

#34735	Blue PVA Roller	$135
#34734	Seamless Foam Roller	$125

BEAM CLAY®

Cantilever Dugouts

WHOLESALE PRICE LIST
EFFECTIVE: JULY 1, 2022

CANTILEVER DUGOUTS

Cantilever Dugouts for baseball and softball are an affordable option that is both attractive and functional. These pre-assembled structures are manufactured with sturdy powder coated steel support beams and an angled steel or cedar shake shingle roof. The plate mounted design eliminates the need for expensive concrete footing.

PRODUCT OVERVIEW

- Attractive shelter without visual obstruction
- Fully preassembled powder coated steel roof and columns
- Roof, fascia and columns offered in various colors and rear offset differences; 8" or 24"
- Industry exclusive 5-year manufacturer's product warranty
- Custom sizes and designs available upon request

BEAM CLAY®

GameShade® Modular Dugouts

WHOLESALE PRICE LIST
EFFECTIVE: JULY 1, 2022

GAMESHADE® MODULAR DUGOUTS

GameShade® Dugouts are created from sturdy powder coated steel members. Unlike the kit-built versions from other manufacturers, their pre-assembled (welded) roofs and columns minimize on-site construction time while reducing ongoing maintenance. Their plate mounted design eliminates the need for expensive concrete footings. Optional wind screen, vinyl and security panels can be added to create an economical enclosed dugout. Colors, dimensions, wind load designs and columns locations can be varied to suit almost any facility or customer needs.

PRODUCT OVERVIEW

- Sleek, cost effective shelter for all levels of competition
- Fully preassembled powder coated steel roof and columns
- Roof, fascia and columns offered in various colors and enclosure options
- Industry exclusive 5-year manufacturer's product warranty
- Custom sizes and designs available upon request

CSPTS23	23' L	$8,895	$550	$3,000

BENEFITS OF A PORTABLE SHELTER

LONG LASTING—The vinyl side and roof canopy panels protect players from heavy winds, rain, and UV sunlight. while the aluminum frame is lightweight and strong enough to last years!

EASY TO ASSEMBLE—These shelters are shipped disassembled, with all necessary hardware included. Two people at least are recommended for assembly, which will take a couple hours. Once fully assembled, the shelter is most easily stored assembled and tethered or inside.

VARIOUS COLOR & SIZE OPTIONS—Multiple size and color options make your Portable shelter stand out with pride! Choose from our colors or customize with your own!

ALUMINUM FRAME—This welded aluminum frame makes for an extremely durable foundation that withstands the elements while being light enough to move between fields or into storage.

VINYL COVERING—Two sides and a roof panel of solid, weatherproof vinyl, that breathe and shed water.

WHEELS—The dugout sits on 4 or 5 large caster wheels for easy movement between fields.

ANCHOR BAGS—Includes four anchor cases. Simply drop a 50 lb bag of sand into each case, and anchor them to each corner to prevent movement in high winds.

OPTIONAL: SPORTS BENCH—Include a bench for team seating that fits inside the shelter and is equally easy to move.

OPTIONAL: CUSTOM PRINTING—Let us create TuffPrint™ custom wall panels with your team name, logo, or other branding.

BEAM CLAY®

Trenching with Pro's Choice®

IMPROVE DRAINAGE

ELIMINATE RAINOUTS

AVOID RESCHEDULING

SAVE TIME AND MONEY

A WINNING PRODUCT

Professional groundskeepers trust Pro's Choice to deliver top quality, safe playing fields. Pro's Choice can be found on the fields of 21 Major League Baseball teams.

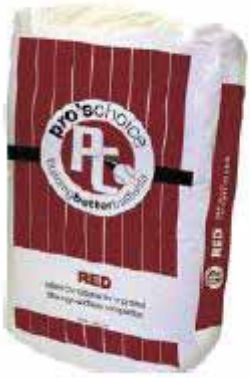

--Trenching--

Your solution to drainage problems.

Traditional solutions to drainage problems often require significant upfront expense and labor to install. Plus, many of them will fail over time as they become clogged or broken through the natural compaction of soil. Pro's Choice® is a lasting solution that requires minimal upfront labor and cost. These products work to reduce compaction and do not break down over time, providing a long-term, economical solution. Professional groundskeepers trust Pro's Choice to manage moisture even in the most adverse weather conditions.

Pro's Choice products have a very high liquid holding capacity due to their superior internal pore volume. When combined with our thermal optimization process that drives moisture out, Pro's Choice is left ready to absorb moisture quickly. The product's natural capillary action quickly wicks water away and holds it, gradually releasing it over time. This technology can be utilized to prevent or solve difficult drainage challenges.

When installed in one larger or a series of smaller landscape drainage trenches, Pro's Choice will quickly absorb excess water and prevent it from collecting on the surface of your field.

How to:
Install a Drainage Trench using Pro's Choice®

Plan Your Trench:

Each 50 lb. bag after compaction = approximately 1.35 cubic feet. Using the example of a 25 foot long x 4" wide trench backfilled with 7 inches of Pro's Choice, use the following calculation to find out how much product is needed:

25 ft (L) x .33 ft (W) x .58 ft (D) = 4.785 cubic feet required

In this case you would need 3.5 bags to fill the 25 ft. trench.

While an outlet is ideal, it is usually not necessary, as the length of the trench usually provides enough volume that an outlet is not critical.

Build Your Trench:

Follow these three easy steps:

Step 1: Determine the number of trenches you will need for your area and mark out placement. Every inch of depth in your trench, water will be pulled from 1 foot on either side of the trench. A 6 inch deep trench would require a trench every 12 feet. However, a trench a few inches in from the grass edge of a skinned infield will provide excellent drainage.

Step 2: Dig or use a walk-behind trencher. The size of your trench can vary. Many of the walk-behinds will cut a trench about 4 inches wide and 8 inches deep.

Step 3: For best results, make sure that the trench has at least a 1% slop from beginning to end. A 25 foot long trench would have a pitch of at least 3 inches (25 feet x .01 = .25 or 3 inches).

Step 4: Backfill all but the top1" inch of your trench(es) with Pro's Choice conditioner. Then add 1 inch of top soil to grade (for turf area) or 2"-3" of infield mix (for skinned area).

Long-Term Benefits:

Eliminate saturated soils and continually absorb excess moisture season after season.

BEAM CLAY®

Diamond Pro® Infield Conditioners, Drying Agent, Mound/Home Plate Clay

DOUBLE PLAY™ is a brand new product in the Diamond Pro family. Introduced (July 2012) in Kansas City prior to the All Star Game. Kansas City Royals Head Groundskeeper, Trevor Vance, among other top industry professionals, have been requesting a blend of these two popular products for years!

DOUBLE PLAY™ is a distinctive blend of Vitrified Red Infield Conditioner and Calcined Clay Professional Conditioner, together in ONE bag. Combining these two products gives you the best of both worlds. The result is an outstanding surface; aesthetically finished, safe, playable, professional infield.

Benefits:
- Improves safety
- Reduces rain delays
- Reduces compaction
- Incorporates well into an infield
- Helps prevent rain-outs
- Improves drainage
- Controls moisture
- Will not compress or stick to cleats
- Gives a richly-colored, professional-quality field

Recommended Use:
- Baseball
- Softball
- Parks & Recreation
- Youth Leagues

Availability & Specifications:
- 50 lb. Bags / 40 bags per pallet
- 1 ton = 40 bags

COVERAGE CHART

Coverage: 2.3 tons will cover approximately 1000 square feet 1" deep

BASEBALL

Field Specifications	Skinned Area Approx. Sq. Footage	I/C = Infield Conditioner 1/4" of I/C	1/2" of I/C
with a GRASS infield	11,500	6.5 tons	13 tons
all SKINNED infield	18,000	10 tons	20 tons
BASEBALL (Professional, College & High School) 90' bases with a 95' arc			

LITTLE LEAGUE

Field Specifications	Skinned Area Approx. Sq. Footage	I/C = Infield Conditioner 1/4" of I/C	1/2" of I/C
with a GRASS infield	3,800	2.25 tons	4.5 tons
all SKINNED infield	6,700	3.75 tons	7.5 tons
LITTLE LEAGUE 60' bases with a 50' arc			

SOFTBALL

Field Specifications	Skinned Area Approx. Sq. Footage	I/C = Infield Conditioner 1/4" of I/C	1/2" of I/C
Men's & Women's Adult Slow Pitch 65' bases with a 65' arc	9,200	5.25 tons	10.5 tons
College & High School Fast Pitch 60' bases with a 60' arc	8,300	4.75 tons	9.5 tons
SOFTBALL (Skinned Infield)			

NOTE: All baseball and softball fields are unique and may be cut differently. The actual material required could vary from this chart, as all square footage and tons are approximate. Please consult a Diamond Pro representative to determine the ideal delivery amount for your fields.

F.O.B. NJ - 40 lb. Bags (up to 50/pallet)	STAB-NJ	$3.50/lb.	$140

stabilizer
THE ORIGINAL NATURAL BINDER

Firms up soft and dusty infields by retaining moisture and resilience in dry weather, yet improving drainage in wet weather!

STABILIZER® INFIELD CONDITIONER INSTALLATION & PRODUCT INFORMATION SHEETS

INSTALLATION INSTRUCTIONS

1. Roto-till infield to a 2"-3" depth using a hand tiller for the mound, home plate, baselines, and a tractor tiller for the infield. For renovation roto-till infield 1-1-½" deep and cut quantities on chart in half.

2. Spread **STABILIZER®** at the recommended rate.

3. Roto-till the **STABILIZER®** thoroughly into the soil and make sure it is mixed to the full depth.

4. Level the infield, baseline and home plate areas. Form the mound.

5. Using a 1000 lb. power roller or 500 lb. hand roller, roll all STABILIZED areas before watering.

6. Saturate STABILIZED areas until standing water appears.

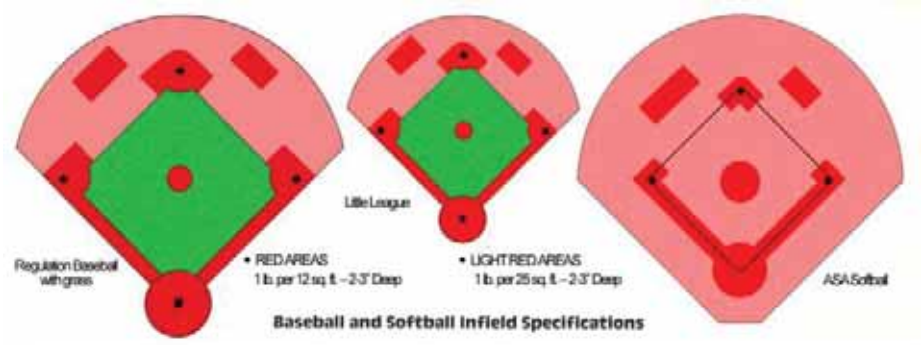

7. Roll field again when surface has dried sufficiently.

8. Lightly spike drag the infield and rake the mound, homeplate areas and baselines to provide top cushion.

9. For final preparation, drag mat the infield.

PLEASE NOTE: It is very important that installation is done properly. Do not try to cut corners. Raking material into the surface is not going to give desired results. Using substantially more or less **STABILIZER®** will not give desired results.

DEMONSTRATION: Place 1" of sand in two cups, add a pinch of **STABILIZER®** to one and mix, moisten both equally and let dry. Notice how the STABILIZER® binds the sand particles together. The sand with **STABILIZER®** is firm yet cushiony, whereas the plain sand is just sandy.

Baseball and Softball Infield Specifications

Stabilizer Quantities	Regulation Baseball	Little League Baseball	Regulation ASA Softball
Skinned Area Quantities	Grass Infield: 400 lbs. All-Skinned: 720 lbs.	Grass Infield: 120 lbs. All-Skinned Infield: 280 lbs.	480 lbs. 60' radius infield from front center of pitcher's plate to outfield grass and 25' from homeplate to backstop & sidelines
Including:			
Pitcher's Mound	15 lbs.		5 lbs.
Home Plate Area	25 lbs.		10 lbs.
Baselines	20 lbs. each		10 lbs. each
Not Included:			
Bullpen Mound & Catcher's Area	1 lb. per 12 sq. ft. 2-3" Deep		
Warning Track & Dug-out Paths	1 lb. per 25 sq. ft. 2-3" Deep		
Batting Cage	1 lb. per 25 sq. ft. 2-3" Deep		

Here's How It Works

STABILIZER® is a natural glue that "binds" your infield soil mix with water to produce a firm, yet resilient, playing surface.
STABILIZER® prevents erosion, controls dust, reduces tackiness in clay, minimizes cleat damage and cuts costly rain cancellations.
STABILIZER'S® compatibility with water allows you to achieve and maintain damp soil consistency-the ultimate goal for an infield mix.
A SMALL AMOUNT GOES A LONG WAY! Comes powered in 40 lb. Bags or 200 lb. sacks.

SYNTHETIC REINFORCEMENT FIBERS FOR NATURAL GRASS ATHLETIC FIELDS

STALOK® G2600 (SPORTS GRIDS/TURF GRIDS)

1-1/2" green polypropylene fibers to mix into rootzone to reinforce natural grass. Incorporate 1 lb. per 12 SF 3-4" deep.

F.O.B. AZ:
30 lb. Bag (up to 17 Bags/Pallet) **#STALOKG2600BG** — **$3.90/lb. $117/Bag**

20 (30 lb.) Bags/Box (1 Box/Pallet) **#STALOKG2600BX** — **$3.90/lb. $2,340/Box**

BEAM CLAY®

WHOLESALE PRICE LIST
EFFECTIVE: JANUARY 1, 2022

Hilltopper® Polymerized Infield Mix, Infield Conditioner, Mound/Home Plate Clay, Red Warn-

HILLTOPPER®

The perfect natural solution for baseball and softball infields and especially on artificial turf infields. Doesn't need water to compact. Dark reddish brown sand/clay mixes that are polymer enhanced which means that each particle is wax coated through a heat process, so it doesn't need water to install or maintain—just spread and compact—ready for play—stays resilient, as if watered—yet repels water and doesn't get muddy—ideal for any climate, especially if very dry or very moist—ideal for artificial turf infields as it greatly reduces tracking on to turf!

HILLTOPPER® Polymerized Mound & Home Plate Clay
Polymer enhanced - Doesn't need water! Just spread and tamp. Ready for play! Especially recommended for artificial turf infields as it greatly reduces tracking of mound clay onto the turf. Hilltopper® is as close as it gets to being an all-weather, "Natural"/Synthetic surface that maintains a firm yet resilient surface in wet or dry weather. 50 lb. Bags, up to 40/pallet. Partial pallets ok.

		BULK PER TON PRICE		PER BAG PRICE
(F.O.B., AZ) 50 LB. BAGS		—	HT-MC-AZ	$19.95
(F.O.B., NJ) 50 LB. BAGS		—	HT-MC-NJ	$29.95

HILLTOPPER® Polymerized Infield Mix & Warning Track Mix
A blend of reddish brown clay and sand coated with a polymer to add cohesion and waterproof each particle. Polymer enhanced to eliminate dustiness and watering. Must be installed 2-1/2"-3" deep over a laser graded, very firm stone base with a 1/2 - 1% slope out from pitcher's mound for drainage. Water will run off surface, but not drain thru, all the while maintaining a firm yet resilient surface in wet or dry weather.

HILLTOPPER® Polymerized Infield Mix

BULK (F.O.B., AZ)	HT-IN-AZ-BULK	$295		—
ONE-TON BULK BAGS (F.O.B., AZ)		—	HT-IN-AZ-BB	$395
ONE-TON BULK BAGS (F.O.B., NJ)		—	HT-IN-NJ-BB	$795

HILLTOPPER® Polymerized Warning Track

BULK (F.O.B., AZ)	HT-WT-AZ-BULK	$275		
ONE-TON BULK BAGS (F.O.B., AZ)		—	HT-WT-AZ-BB	$375
ONE-TON BULK BAGS (F.O.B., NJ)		—	HT-WT-NJ-BB	$775

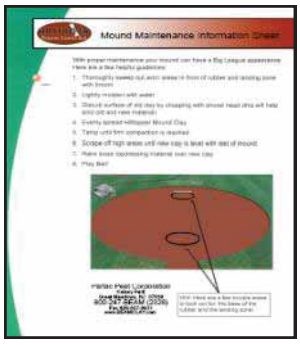

HILLTOPPER® Polymerized Infield Conditioner
One ton per 2,500 - 3,000 SF recommended over Hilltopper® Infield or Warning Track Mix for a looser surface top-dressing. DO NOT use calcined or vitrified clay over Hilltopper® as these will pull out the polymer.

ONE-TON BULK BAGS (F.O.B., AZ)	—	HT-IC-AZ-BB	$350
ONE-TON BULK BAGS (F.O.B., NJ)	—	HT-IC-NJ-BB	$750

BEAM CLAY®

How Many Mound Bricks Do You Need?

How Many Mound Bricks Do You Need?

Measure area you want to work and figure how many mound bricks you need. Laying flat one mound brick (8" x 4") equals 32 square inches x 2-3/8" deep.

Here is a guide for doing the full size areas below one layer deep, laying flat:

For regulation mounds:
180 mound bricks - for a 34" x 60" mound top platform (63 bricks), 32" x 36" stride area (36 bricks), and 3' x 6' landing area (81 bricks).

For two regulation batter's boxes and one catcher's box:
308 mound bricks - for each 4' x 6' batter's box (108 bricks), for a 43" x 68" catcher's box (92 bricks).

For little league mounds:
74 mound bricks - for a 20" x 40" mound top platform (23 bricks), 24" x 28" stride area (21 bricks), and 20"' x 48" landing area (30 bricks).

For two little league batter's boxes and one catcher's box:
216 mound bricks - for each 3' x 6' batter's box (81 bricks), for a 36" x 48" catcher's box (54 bricks).

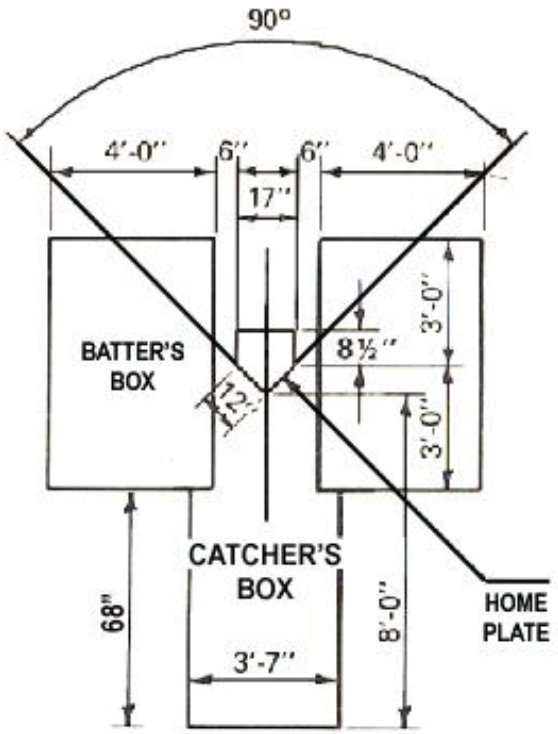

For ASA softball pitcher's area:
905 mound bricks for a 16' diameter circle, or 135 mound bricks for a 3' x 10' area, or 180 bricks for 4' x 10' area, measuring one foot behind the rubber and 9' in front.

For two ASA softball batter's boxes and one catcher's box:
569 mound bricks—for each 3' x 7' batter's box (95 bricks), for a 8'5" x 10' catcher's box (379 bricks).

DIRECTIONS: Dig down 3-4", install mound bricks, water (letting water soak in), tamp, cover with infield mix, re-place as needed.

CAUTION: 12 Mound Bricks = approximate volume of one 50 lb. bag of mound clay compacted. Mound bricks are easier and cleaner to use than bags; but, remember you are paying to ship water. 300 bricks = 36 (50 lb.) bags by weight but only 25 bags by volume.

Another option is using **PERMA-MOUND™** Permanent Pitcher's Mound Pads and **SAFE "T" MATT SYSTEM™** Batter's & Catcher's Box Pads which bury 2" below surface and give the feel of properly maintained clay.

BEAM CLAY®

Permanent Pitcher's Mound & Batter's Box Pads

WHOLESALE PRICE LIST: F.O.B. GREAT MEADOWS, NJ
EFFECTIVE: JANUARY 1, 2022

PERMANENT PITCHER'S MOUND & BATTER'S BOX PADS

PERMA-MOUND™ Outdoor Pitcher's Mound Pads and **SAFE "T" MATT™ Batter's/Catcher's Pads** reduce maintenance **yet provide the feel of properly packed clay!**

Patented poured **red** polyurethane with **non-skid granular surface.** Less expensive than artificial turf pads, plus longer lasting and with **the feel of natural clay**. Great for recreation departments with several high-use fields!

Eliminates deep holes at mound and batter's boxes. Saves maintenance time and money. Coaches or parents can sweep infield material back over. Mounds and batter's boxes are always game ready. Batter's and catcher's box pads last for years. Pitcher's mound pads can be used with either metal or plastic cleats. Because of the greater torque on pitcher's cleats, mound pads used with metal cleats usually need to be repaired at end of season. Just clean and re-pour worn areas with available repair kits.

Provides great footing! Legal in College, High School, Babe Ruth, Pony & Little League Baseball. Easy one time installation - stays in ground year round.

PERMA-MOUND™ - Outdoor Pitcher's Mound Pad

(1-1/8" Thick) Pitcher's Mound Pads should be buried 1-1/2" below surface at pitcher's plate and 2" below surface at landing area for teams with metal cleats. Can be installed at mound surface for plastic cleats. **Includes 3-spike pitcher's plate**. Please specify either Official 6" x 24" or Youth 4" x 18" pitcher's plate and whether installing at surface or buried (shim is included for placement between pitcher's plate and pad if burying pad).

3' wide x 7'6" long x 1-1/8" thick, 187 lbs.	PERMA-MOUND	$950

Installation Instructions for Pitcher's Mound Pads

PADS BEFORE BEING COVERED

SAFE "T" MATT SYSTEM™ - Batter's/Catcher's Box Pads

(5/8" Thick) - Must be buried 2" below surface

Batter's Pad, 35" x 6' x 5/8", 78 lbs.	Stille-Pad	$475
Pair of Batter's Pads, 156 lbs.	Stille-Pad-Pr	$925
Catcher's Pad, 35" x 3' x 5/8", 39 lbs.	Stille-Catch	$235
Complete Set: (2) Batter's 35" x 6' x 5/8", (1) Catcher's 35" x 3' x 5/8", 195 lbs.	Stille-Set	$1,100

Installation Instructions for Batter's & Catcher's Box Pads

On-Deck Circle & Fungo Pads - Install at surface with non-skid granular side up.

4' Diameter, 3/4" thick, 65 lbs.	BC-OnDeck4	$425
5' Diameter, 3/4" thick, 95 lbs.	BC-OnDeck5	$625
6' Diameter, 3/4" thick, 135 lbs.	BC-OnDeck6	$900

One Gallon Repair Kit - Enough to repair 3-1/2 Square Feet, 1/4" Deep, 22 lbs.	Stille-Repair	$175

FIELD ARMOR

Buried fortification for batter's/catcher's boxes and softball pitcher's stride area. Save labor and keep a consistent playing surface. Field Armor panels will reduce the amount of time it takes to repair your batter's box or pitching areas for those long weekend tournaments and make sure your field maintenance labor is reduced.

- Tan color 60 oz. knitted nylon turf (the strongest synthetic turf available) bonded to an advanced synthetic core.
- Dramatically decreases repetitive field maintenance
- Eliminates standing water
- Long lasting
- Baseball or softball
- Increases player safety
- Easy to install
- Bury 2-1/2" - 3" deep, cover with 100 lbs. of sand and 1/2"-1" infield mix to grade

BEAM CLAY®

Pitcher's Mound Top-Dressings

WHOLESALE PRICE LIST
EFFECTIVE: JULY 1, 2022

PITCHER'S MOUND TOP-DRESSINGS IN BAGS

For firm mounds in wet conditions!

Please Note: Care must be taken with all Mound Top-Dressings to not work into and loosen the mound clay. When doing repairs, sweep aside and make repair with fresh mound mix. Rake topdressing back over repair.

BEAM CLAY® Baseball Diamond Mix • Popular everyday pitcher's mound top-dressing, reddish-orange color, quick drying surface. Ten (50 lb.) bags for a 1/4" cover over regulation mounds. 50 lb. bags, up to 50/pallet. F.O.B., NJ

	PER BAG PRICE
Original Premium (4 mm)	BD-BAG $8.25
Pro Premium (3 mm)	PRO BAG $9.25

PRO'S CHOICE® Red, Select, Pro Red or Pro Brown • Permanently porous calcined montmorillonite clay makes an excellent mound top-dressing that can be added to other mound top-dressings in wet conditions. Calcined clay is the most absorbent mound top-dressing and these grades with larger particles are easier to remove before doing repairs. Four (1-½ cubic foot) 50 lb. bags for a 1/4" cover. 50 lb. bags, 40/Pallet. Full pallets only, **EXCEPT** any quantity from NJ.

PRO'S CHOICE® SELECT (Pro Grade: 8/16)

(1mm-2.5mm)	F.O.B., MS	BAG-A45202G40 $12.25
	F.O.B., CA	A45202G40-CA $20.95
	F.O.B., NJ	A45202G40-NJ $18.95

PRO'S CHOICE® RED (Regular Coarse Grade: 5/20)

(.5mm-4mm)	F.O.B., MS	A45201G40 $10.75
	F.O.B., CA	A45201G40-CA $20.15
	F.O.B., NJ	A45201G40-NJ $17.45

PRO'S CHOICE® PRO RED or PRO BROWN (Pro Grade: 8/16 Permanent Dark Red or Dark Brown)

		PRO BROWN	PRO RED	
(1mm-2.5mm)	F.O.B., MS	A45504G40	A45503G40	$19.85
	F.O.B., NJ	A45504G40-NJ	A45503G40-NJ	$26.55

DIAMOND PRO® Red or Grey Infield Conditioner • Vitrified clay also makes an excellent mound top-dressing - six 50 lb. bags for a 1/4" cover. Calcined clay: four 50 lb. bags for a 1/4" cover. 50 lb. bags, 40/Pallet. Full pallets only.

DIAMOND PRO® RED (Red Bag)	F.O.B., Ft. Worth, TX	DP-RED-IC-BAG	$9.95
DIAMOND PRO® PRO DARK RED (Blue Bag)	F.O.B., Ft. Worth, TX	DP-PRO-IC-BAG	$15.25
DIAMOND PRO® GREY (Grey Bag)	F.O.B., Ft. Worth, TX	DP—GREY-IC-BAG	$8.75
DIAMOND PRO® CALCINED CLAY TOP DRESSING: (5/30 - Green Bag)	F.O.B., Ft. Worth, TX	DP-CCP-IC-BAG	$13.25
DIAMOND PRO® CALCINED CLAY PRO GRADE: (8/16 - Blue Bag)	F.O.B., Ft. Worth, TX	DP-CCTD-IC-BAG	$13.50

RED BRICK DUST INFIELD CONDITIONER/TOP-DRESSING • Similar to Red Lava Dust but lighter red color and less absorbent. Use 600 lbs. for a 1/4" cover.

F.O.B., NJ - 50 lb. bags, any quantity. REDBRICK-BAG $10.95

TURFACE Permanently porous calcined montmorillonite clay makes an excellent mound top-dressing that can be added to other mound top-dressings in wet conditions. Calcined clay is the most absorbent mound top-dressing and these grades with larger particles are easier to remove before doing repairs. Four (1-½ cubic foot) 50 lb. bags for a 1/4" cover. 50 lb. bags, 40/Pallet. Full pallets only, F.O.B. MS

TURFACE PRO LEAGUE ELITE NATURAL (Pro Grade: 8/16)	BFPL5027P $10.35
TURFACE PRO LEAGUE RED ELITE (Pro Grade: 8/16)	BFPL5029R $13.45
TURFACE PRO LEAGUE HERITAGE RED ELITE (Pro Grade: 8/16)	BFPL5039 $13.45
TURFACE PRO LEAGUE CHAMPION BROWN ELITE (Pro Grade: 8/16)	BFPL5043 $13.45
TURFACE MVP (Regular Coarse Grade: 5/20)	BFMVP5004P $9.65

PLAYBALL® INFIELD CONDITIONER 8/20 (.84—2.38mm), 50 lb. Bags - 40 bags/pallet, F.O.B. TN EPM-IC-BAG $7.25

PALLET & COVER CHARGE: NJ $10.50/PALLET; MS, TN, or TX included in price.

BEAM CLAY®

Tools for Building Pitcher's Mounds

WHOLESALE PRICE LIST
EFFECTIVE: MAY 15, 2022

MOUND BUILDING TOOLS

TAMPERS

	EACH
Heavy-duty (3/8" thick) steel base plates	
Pro 10" x 10" Tamper with 48" Steel Handle (18 lbs.) **#85010**	$125
Pro 8" x 8" Tamper with 48" Steel Handle (15 lbs.) **#85008**	$140
Pro 6" x 6" Tamper with 48" Wood Handle (10 lbs.) **#Tamper6X6WH**	$85
Standard-duty (1/4" thick) steel base plates	
Standard 10" x 10" Tamper with 44" Wood Handle (13 lbs.) **#85090**	$105
Standard 8" x 8" Tamper with 44" Wood Handle (11 lbs.) **#85088**	$85
Standard 8" x 8" Tamper with 45" Yellow Fiberglass Handle (10 lbs.) **#85078**	$85
Ash Replacement Handle (1-7/16" x 44") **#66547**	$26.50

BULLDOG TAMP **#BDTAMP** — **$99**

Lighter tamp weighs 14 lbs. and is made in the USA. It features a solid 1/4" bottom plate size 8" x 8" with side gussets to offer more durability and strength to help extend the life of the product. The wood handle is approximately 56" tall and also made in the USA.

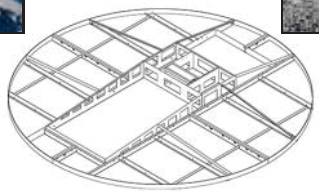

PITCHING MOUND FORMING SYSTEM

Concrete for Synthetic Turf

- Designed specifically for permanent synthetic infill turf installations
- Pre-engineered concrete forming system eliminates complex hand-forming
- Meets all rules and regulations for 18' mound diameter, height, and slope
- Pitching rubber height adjustment, drainage, and turf attachment ledges
- Bolt-together aluminum construction with rebar anchoring provisions
- Superior stability and longevity versus compacted stone alternatives
- Replaceable synthetic infill turf center section
- Synthetic infill turf to be provided and installed by others on site
- Includes replaceable Hollywood® four-sided professional pitching rubber (#12909180) and 1/4" rubber for high traffic areas
- U.S. Patent Pending

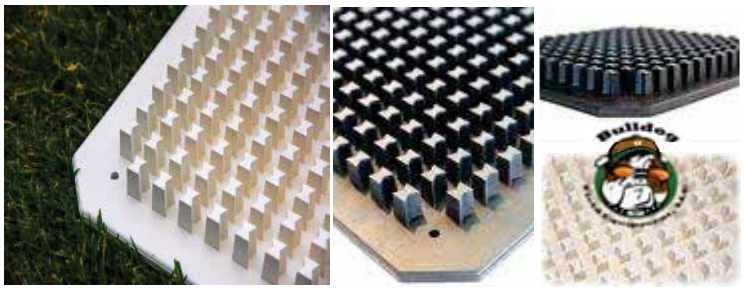

#PMFS-B	Baseball 18' Diameter	**$9,295**
#PMFS-BPD	Baseball Double Bullpen	**$5,195**
#PMFS-BPS	Baseball Single Bullpen	**$2,595**
#PMFS-BPT	Baseball Triple Bullpen	**$9,295**
#PMFS-S	Softball	**$3,795**

CHAMPRO CLEAT CLEANERS

CLEAT CLEANER NO HANDLE #ACC	**$27.29**
CLEAT CLEANER WITH HANDLE #ACCB	**$27.29**

- Durable all-rubber construction
- 84 spikes for removing mud from cleats
- Perfect for use outside a locker room, near a team bench or on the back-side of a pitcher's mound
- Can be mounted to treated wood and buried for permanent installation
- Available with or without handle

#BFE2CCBL BLACK — **$43**

#BFE2CCWH WHITE — **$43**

Heavy-Duty Bulldog Cleat Cleaner
2nd Edition Bulldog Cleat and Spike Cleaner still features a larger base surface but is made with more flexible natural rubber cleat cleaning spikes - 178 spikes. The spikes have an innovative bow-tie design to get more debris of the bottom of the athletic shoes. Four pre-drilled holes in the corners of the cleat and spike cleaner make installation easier. Cleaner can be mounted to a block of wood, buried in the ground, laid on the turf or mount it on the dugout steps. The cleat and spike cleaner measures 14.5" x 13.5" and weighs 5 lbs. Two colors are available - black and white.

DURA PAD™ ON-DECK CIRCLES, FUNGO CIRCLES & COACHES BOXES WITH LOGOS

Professional, Durable, Heavy-Duty Grade

DISPLAY YOUR TEAM, LEAGUE, OR SPONSOR'S LOGO IN BRILLIANT COLORS!

We are the U.S. Distributor of DURA-PAD™.

"A WHOLE NEW MARKETING OPPORTUNITY"

Used by every Major League Team and dozens of Minor League Teams, plus Little Leagues, Municipalities, Schools, Colleges, plus Olympic, World Series and All-Star Games.

THERE IS NO OTHER PRODUCT LIKE DURA-PAD™ ON-DECK CIRCLES ON THE MARKET! No other product gives the sharp, colorful graphics and the durability of **DURA-PAD™.**

DURA-PAD™ On-Deck Circles are manufactured through a multi-layered, high-tech process utilizing a compressed granular rubber base, seal coats, a strong poly fiber mesh core, polyurethane top coats, polyurethane white finish coats and specially formulated rubberized polyurethane paints which react with the polyurethane finish to create colorful and detailed artworks which are very resistant to scuffing and scratching. **Available in custom sizes and in ovals, rectangles, as well as circles. DURA-PAD™** On-Deck Circles are manufactured in Canada by Joe Albert of Sports Field Markings, the originator and artist who created **DURA-PAD™**. Prices are F.O.B., Ont., plus customs and freight.

Graphics: Digital Print.

Pad Durability for All Levels of Play: 5-10 Games.*

DURA PAD™ ON-DECK CIRCLES, FUNGO CIRCLES & COACHES BOXES WITH LOGOS

PRO SERIES & SHORT TERM SERIES

SPONSORSHIP/ADVERTISING - Make your sponsor's logo stand out in brilliant colors!
DURA-PADS™ make an excellent fund raising vehicle that makes your sponsor's logo the only logo "in play" at home plate, seen at every at bat. Sponsor's name can also be placed around team or league logo, or vice versa. If selling advertising: multi-year contracts are recommended so that you don't need to redo artwork every year.

INSTALLATION & CARE
Install **DURA-PAD™ On-Deck Circles** on a firm surface. They can be left out year-round and can be glued to macadam or concrete. If removing after games: roll up (with paint side inside and rubber out), carry to storage, unroll and store flat. [Care and Storage Sheet—PDF]

ARTWORK SPECIFICATIONS—Send us your camera-ready artwork & PMS colors (or color samples). Additional artwork charges will apply if you do not have finished layouts. Some special colors may have a surcharge; if so, we will advise you. [Artwork Specification Sheet - PDF]

BEAM CLAY®

Dura-Pad™ On-Deck Circles

CARE AND STORAGE OF DURA-PAD™ ON-DECK CIRCLES

AFTER RECEIVING YOUR SHIPMENT OF DURA-PADS™, UNROLL THEM FROM SHIPPING TUBE AND ALLOW PADS TO SIT UNTIL FLAT, DO NOT FORCE FLAT.

DO NOT ROLL/UNROLL PADS IN FREEZING TEMPERATURES.

ALWAYS CARRY PADS. DO NOT DRAG BY ONE EDGE.

ALWAYS STORE PADS FLAT.

DO NOT FOLD PADS.

ALWAYS INSTALL PADS ON A FIRM SURFACE. DO NOT INSTALL ON A SOFT, MUSHY BASE AS THIS WILL NOT PROVIDE SUFFICIENT RESISTANCE TO PRESSURE FROM CLEATS AND CAN CAUSE PREMATURE WEAR.

IF INSTALLED PERMANENTLY BY GLUEING TO CONCRETE OR MACADAM, PADS REQUIRE A PROTECTIVE COVERING WHEN NOT IN USE.

PADS ARE ARTWORK. WHILE SCUFF RESISTANT, DO NO ALLOW PLAYERS TO GRIND SPIKES INTO SURFACE, OR THEY WILL TEAR THROUGH.

WE RECOMMEND ORDERING EARLY AND STORING FLAT AT LEAST ONE MONTH BEFORE USE, AS DURA-PADS™ BECOME HARDER AND MORE SCUFF RESISTANT THE LONGER THEY AGE.

CLEAN BY MILD SCRUBBING WITH SOAP & WATER; DO NOT USE SOLVENTS SUCH AS PAINT THINNERS.

BEAM CLAY®

Dura-Pad™ On-Deck Circles

INSTRUCTIONS FOR RETURNING DURA-PAD™ ON-DECK CIRCLES FOR RESURFACING

1) Dura-Pad™ On-Deck circles being returned for resurfacing must be packaged individually on sonic tubes for shipping. The sonic tubes should be 12" diameter x 2" longer than the width of pads. For instance, 12" x 8' long for 6' pads.)

2) It is very important that you roll each pad face down on the outside of each sonic tube so that the black rubber bottom is facing out. This protects the painted surface from damage, plus rolling the surface inside doesn't stretch the surface; whereas, rolling the surface outside stretches the surface and may cause cracking.

3) Also important: Roll with the seam perpendicular to the tube so that the seam is rolled onto the tube not laying lengthwise along the tube.

4) Secure the rolled pad well with duct tape so that the pad will stay rolled up in shipping. Then wrap the roll in plastic and plastic wrapping tape. Leave the ends open so that the carrier can pick up the tubes with one fork of a forklift.

5) Let us know when ready and we'll arrange pick up and customs.

Sonic tubes are used for concrete pilings and should be available from any lumberyard, Home Depot/Lowes, or concrete supply store for approximately $20 each.

Turn around time should be approximately 3 weeks upon receipt of pads for resurfacing versus approximately 4-6 weeks for new. While resurfacing will save time and money, you should only decide to resurface if the existing pads are in good condition and still usable. *Please inspect them*. If there are any major tears or pitting into the rubber over approximately 1" in diameter, there will be additional charges or the pads may not be fully repairable but you would still be responsible for the freight and customs charges to Canada.

BEAM CLAY®

Dura-Pad™ On-Deck Circles

DURA-PAD ON DECK CIRCLES

Digital Printed On Deck Circle Artwork Requirements

Vector File — EPS or AI (Adobe Illustrator) file format. (Preferred)
- ALL fonts MUST be converted to outlines to avoid font errors.
- Use Pantone swatches for color matching.
- Layered files are preferred.

Bitmap File — PSD (Adobe Photoshop), JPG or TIFF file format.
- Should be no less then 150 dpi at 100% in size.
- Layered files are preferred.

Other Requirements
- Can be Mac or PC formats.
- Include CLEAR instructions and a proof of what the final job should look like in JPG or PDF format.

A Note on Graphic Industry Standards

TIFF, JPG, and BMP graphics are bitmap image formats, comprised of individual dots of color, generally used to display images on a computer screen. Usually they are only a couple of inches in size when printed. Enlarging a bitmap image to the size of an On Deck Circle simply enlarges the individual dots of color. This results in bigger, chunkier dots, with no additional detail and gives poor print quality.

Vector format images are mathematically defined images comprised of lines and curves associated with coordinated locations on a graph. They can be scaled to any resolution or size without loss of quality, and because of that are ideal for large format printing, like an On Deck Circle because the image detail is clean sharp at any size.

Note

Bitmap images simply saved in an EPS file DOES NOT create a vector format file.

Artwork should be submitted as follows:

On disk:	Partac Peat Corporation 55 Church Street South, Ajax, ON Canada L1S 6A6
E-mail:	info@durapad.ca (***PLEASE*** ZIP files to decrease size)

BEAM CLAY®

Polyurethane & Synthetic Turf On-Deck Circles

WHOLESALE PRICE LIST
EFFECTIVE: JANUARY 1, 2021

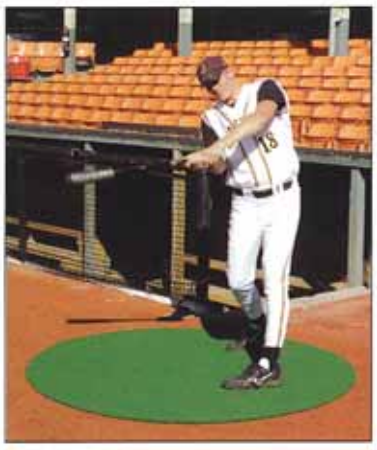

MEDIUM-DUTY ON-DECK, FUNGO & COACHES BOX OPTIONS:

RED POLYURETHANE On-Deck Circle & Fungo Pads are normally installed with non-skid granular side up, smooth side down. If you want to paint logos, either side can be painted with polyurethane paint; however, paint will not hold up with metal cleats and would only be for decorative, light-duty use.

BC-ONDECK4	4' Diameter, 3/4" thick, 65 lbs.	$425/ea
BC-ONDECK5	5' Diameter, 3/4" thick, 95 lbs.	$625/ea
BC-ONDECK6	6' Diameter, 3/4" thick, 135 lbs.	$900/ea

SYNTHETIC TURF Pads without logos, 3/4" thick spike proof turf with 5mm foam backing. One solid color. Stock sizes in Green. Special order multiples of two available in Clay, Red, White, Royal Blue, Orange, Yellow, Black, Purple, Crimson, Maroon, Brown, & Navy. (F.O.B. GA)

ST-4	Set of 2 On-Deck/Fungo Circles (4' diameter) (15 lbs.) - Green	$295/set
ST-4C	Set of 2 On-Deck/Fungo Circles (4' diameter) (15 lbs.) - Colors	$325/set
ST-5	Set of 2 On-Deck/Fungo Circles (5' diameter) (21 lbs.) - Green	$345/set
ST-5C	Set of 2 On-Deck/Fungo Circles (5' diameter) (21 lbs.) - Colors	$375/set
ST-6	Set of 2 On-Deck/Fungo Circles (6' diameter) (30 lbs.) - Green	$425/set
ST-6C	Set of 2 On-Deck/Fungo Circles (6' diameter) (30 lbs.) - Colors	$455/set
ST-CB1	Coaches Box Mat (6' x 12') (75 lbs.) - Green	$450/ea
ST-CB1-C	Coaches Box Mat (6' x 12') (75 lbs.) - Colors	$480/ea

For custom sizes, see Artificial Turf Catalog

LIGHT-DUTY ON-DECK, FUNGO & COACHES BOX OPTIONS:

ARTIFICIAL TURF Pads with Logos, 3/4" thick with 5mm foam-rubber backing. Logos are not painted they are inset with colored turf (Clay, Red, White, Royal Blue, Navy Blue, Green, Orange, Yellow or Black. Allow 4-6 weeks for delivery.

CAUTION: While the medium-duty, one solid color, artificial turf mats above will stand up to metal spikes, these with logos of colored turf glued into the mat will not and are for decorative or light-duty game day use at Fungo Circles or at On-Deck circles not exposed to heavy use with metal cleats.

2ST-6L Set of Two (6' Diameter) On-Deck/Fungo Circles (60 lbs./set) **Send Logo**

Maximum 3 colors—Send artwork for firm quote - price depends on complexity of artwork.

Logos also available inset in artificial turf halos around Home Plate Circle, **see our Artificial Turf Catalog**.

BEAM CLAY®

Infield Grooming Equipment - Drag Mats

WHOLESALE PRICE LIST
EFFECTIVE: JANUARY 1, 2022

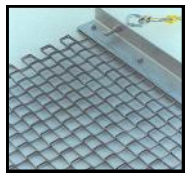

DRAG MATS

BEAM CLAY'S ORIGINAL HEAVY-DUTY RIGID BASEBALL DIAMOND DRAG MATS:

RIGID INFIELD DRAG MATS, HEAVY-DUTY with 2" x 2" Rigid Angle Iron Attachment and rope and handle. Use cutting lip down for aggressive leveling, up for normal smoothing.

	Heavy-Duty - Rigid Mat - Best for filling infield low spots. Does not roll up (from NJ Plant):	
#RIDM3x3-1/2	3' Wide x 3½' Long (27 lbs.)	$250
#RIDM4X3-1/2	4' Wide x 3½' Long (36 lbs.)	$315
#RIDM5X3-1/2	5' Wide x 3½' Long (45 lbs.)	$375
#RIDM6X3-1/2	6' Wide x 3½' Long (54 lbs.)	$395
#RIDM8X3-1/2	8' Wide x 3½' Long (72 lbs.)	$525
	Standard-Duty - Rigid attachment but mat rolls up (from PA Plant):	
#RIDM4X18	4' Wide x 18" Long (24 lbs.)	$145
#RIDM4X2	4' Wide x 2' Long (23 lbs.)	$165
#RIDM4X3	4' Wide x 3' Long (33 lbs.)	$205
#RIDM6X18	6' Wide x 18" Long (35 lbs.)	$205
#RIDM6X2	6' Wide x 2' Long (33 lbs.)	$235
#RIDM6X3	6' Wide x 3' Long (44 lbs.)	$300

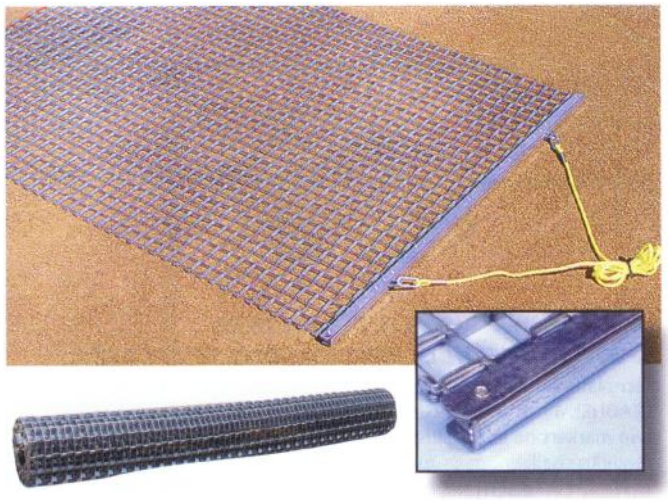

FLEXIBLE TURF & INFIELD DRAG MATS, STANDARD-DUTY 3/8" x .046" galvanized steel with Rope & Handle. Red spacers are placed in the two corners that do not have the attachment. The mat can roll up from left to right with the drag attachment bar on the right. Great for working aerification cores into turf. Convenient for transporting to multiple infields since they roll up. Custom sizes available. Mats are generally rolled and a cardboard sleeve is placed over each end for shipping with additional cardboard around the middle to place shipping labels.

Most Popular Sizes: From PA plant allow 2-3 weeks lead time. Most popular sizes normally in stock from NJ.

BEAM CLAY®

Infield Grooming Equipment - Cocoa Mats

WHOLESALE PRICE LIST
EFFECTIVE: JANUARY 1, 2022

COCOA MATS

The secret weapon for professional grounds keepers across the country! Constructed from natural cocoa fibers that "float" across the surface producing a beautiful finish with minimal movement and build-up of your infield mix. Unlike steel drags, cocoa mats drastically reduce the accumulation of dirt when you're finished.

COCOA MATS—CHAIN BRAIDED—NOT FRAME MOUNTED
For 5th Inning Touch-Up! Attach your own 2 x 4 and pull rope or chain. Attach two side-by-side to double width.

36" x 24" x 1-1/4" (8 lbs.) **#CM-CB-NFM36X24**	**$55**
42" x 26" x 1-1/4" (8 lbs.) **#CM-CB-NFM42X26**	**$50**
48" x 30" x 1-1/4" (10 lbs.) **#CM-CB-NFM48X30**	**$85**

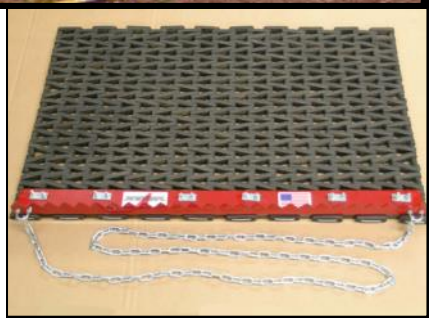

COCOA MATS— RUBBER BACKED—FRAME MOUNTED
Bristles down for the perfect 5th inning touch-up! Flip mat over and use solid steel twin bladed cutting edge for shaving off high spots and filling in the low. Also great on turf to break up core aeration plugs and smooth in top-dressing materials. Features a hand hold for easy transport. Note: 2' deep mats include a tow rope with wood handle; the 4' deep mat includes a heavy-duty tow chain at no additional cost.

STANDARD **#1091540** - 4' Wide x 2' Long w/rope & handle (27 lbs.)	**$240**
LARGE **#1091557**- 6' Wide x 2' Long w/rope & handle (39 lbs.)	**$290**
JUMBO **#1091564** - 6' Wide x 4' Long w/rope & handle (66 lbs.)	**$485**
#CHAIN– 9' Drag Chain	**$75**

DRAG LITE™
Industrial rubber mat (won't rust or kink) with a unique adjustable scarifier blade (one side serrated, one side smooth) to break up hard packed surfaces, cushion hand grip and heavy-duty chain.

SMALL - 3' W x 2' L, Scarifier Bar & Chain (31 lbs.) **#10004485**	**$250**
LARGE - 6' W x 2' L, Scarifier Bar & Chain (60 lbs.) **#10004486**	**$400**

REPLACEMENT NAILS: 3'w x 3' long: 51 nails
5'w x 3' long: 75 nails

WARRANTY: 36 month, longest in the industry

CUT-N-LEVEL DRAG/SCREEN

The Cut-N-Level drag/screen is designed for grooming the surface of playing fields. It features flat steel cutting blades & a screen for rock removal. The cutting blades are slotted and attached to the main frame with bolts, allowing the operator to adjust the blades for the desired depth of cut. The Cut-N-Level drag/screen can be used to smooth and level the field, plus for rock removal as the need arises saving the extra man hours normally needed to do these jobs. Frame & Blades are galvanized. Weight 220 lbs. Size 6'W x 4'6"D.

#BSCLDRAG **$1,155**

LEVELS FIELD
By adjusting the blades the operator cuts down clay build-up. The clay is carried by the blades, as the drag passes over holes it is then deposited in the holes leaving a smooth & level surface.

PICKS UP STONES
Rocks and stones are removed by placing the screen (16 gauge x ½" opening) above the frame and adjusting the blade so that they scrape up rocks lying on the field. This directs the rocks onto the screen that is made of wire mesh. The clay sifts through, thus holding any materials too large to fall through.

HELPS DRY WET FIELDS
By adjusting the blades to shave the top layers of clay, the drag will mix wetter top clay with dryer lower clay. By rolling this mixture along and exposing it to the air, a dryer clay will deposit on the field.

BEAM CLAY®

Infield Grooming Equipment - Scarifier/Drag Screen

DRAG KING™

#10001592 Drag King with Optional Scarifier

The Drag King infield groomer features a unique 3-section component design that combines the grooming capabilities of conventional hand pulled mats with the field conditioning capabilities of tractor pulled units costing thousands of dollars more.

The Basic 2 section model, pulled by hand without weights, quickly grooms base lines and infields to a "ready-to-play" state. To bring rougher fields back into shape add the optional scarifier/ballast box section plus weights if needed and attach the Drag King to any standard lawn & garden tractor or utility vehicle. The reversible scarifier/planing blades can be lowered to a 1" maximum cutting depth.

The 48" x 48" Drag King features:

Modular Design — Use one, two or three sections at a time to achieve the field finish you desire.

Reversible Scarifying/Planing Blades — Depending on your field's condition choose either the smooth or serrated edge.

Debris Basket — Catches small stones and litter from the surface as you groom the field when infield is very dry.

#10001592	**Drag King with Optional Scarifier**	**$1,050**

SPECIFICATIONS

DIMEMSIONS:
Basic 2 piece 48" w x 29" long
with Scarifier 49" w x 44" long

BEAM CLAY®

Infield Groomers - Dirt Doctor Jr.

WHOLESALE PRICE LIST
EFFECTIVE: JANUARY 1, 2022

DIRT DOCTOR™ JR. INFIELD GROOMER

Like the powerful **DIRT DOCTOR™,** the **DIRT DOCTOR™ JR.** Infield Groomer is designed to do the job of 3 separate implements in one convenient unit. It is a ripper, a drag, and a roller - all in one. The **DIRT DOCTOR™ JR.** is designed specifically to be pulled by a 4-wheel drive utility vehicle or a compact tractor.

Manufactured to the same exacting standards as the larger model, **DIRT DOCTOR™ JR.** shares the same rugged durability but weighs less than 600 lbs. Now you can have the durability of the original **DIRT DOCTOR™** without the need for a large, expensive, field size tractor.

The **DIRT DOCTOR™ JR.** can plow, pulverize, drag, compact, and finish a 4' wide path in one pass. The pulverizer bar, wheels, center drag, and harrow bar with reversible teeth have multiple height positions that are quickly and easily changed without tools. No more running back to the shop to make adjustments. Plus the multiple height adjustment is perfect for varying soil and field conditions. The front hitch has 4 positions to adjust for varying hitch heights. A 6' wide drag mats can be attached to either model for final grooming or between innings.

Backed by a 36 month warranty, the **DIRT DOCTOR™ JR.** is a workhorse designed to be used for years to come.

DIRT DOCTOR™ JR. 4' Tow Model INFIELD GROOMER	**#10003679**	**$4,900**
Optional Finishing Broom Attachment for 4' Model	**#10003680**	**$360**

Synthetic/Artificial Turf Groomers - Go Groomer Go

Go Groomer Go™

About the Go Groomer Go™
The **Go Groomer Go™** is the only synthetic turf maintenance equipment that features four light synthetic straight-line brushes and a single row of spring loaded grooming tines which are used as needed and designed to rejuvenate a turf's rubber, rubber sand or silica infill and playing surface.

Designed and engineered to avoid being overly aggressive when grooming Soccer, Football, Baseball, Lacrosse, Rugby, Field Hockey and many other synthetic turf fields and surfaces - both indoor and outdoor!

With over 20 years of industry experience, the **Go Groomer Go™** synthetic turf groomer along with the **G30 Inline Safety Magnet**, our synthetic turf magnet, improve the quality and safety of a playing surface while decreasing maintenance and lowering risk management.

Why the Go Groomer Go™

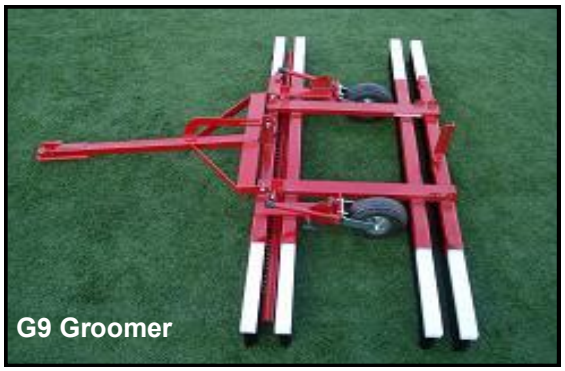

- Extends Playability and Decreases Maintenance
- Spring Loaded Tines Elevate Infill Compaction
- Prevents Rubber Granules From Traveling to Sidelines
- Optional use of Spring Loaded Tines
- The Only Synthetic Turf Maintenance Equipment
- Needed for Proper Grooming
- Lowers Risk Management
- Decreases Wear Patterns
- Increases Eye Appeal
- Improves the Playing Field
- Helps Level Rubber Granule Infill
- Keeps Grass Blades at 12:00
- Repairs Ghost Markings
- Maximize Fiber Lifespan

G4 Groomer

Features unique to the Go Groomer Go™

- Easy Storage
- Never-Flat Airless Tires
- Adjustable Pin Settings
- Multiple Brush Settings
- Hardened Steel Construction
- Patented Design Pd
- Optional Use of Spring Loaded Tines
- Expandable Width
- Multiple Tine Setting
- Inline Safety Magnet can be used while grooming
- No Expensive, Greasy or Oily Motors
- Welded Frame
- Tow Hitch Fits All Vehicles
- Reversible Tow Hitch
- No Wiring
- Soft Extra Long Bristles
- Rooster Tail Broadcasting of Rubber Granules
- Tines Operate Safely Between Brushes
- UV Resistant Brushes Never Rust or Rot
- No Expensive Hydraulic System

G30 Inline Safety Magnet

Even the best maintained synthetic fields have potential dangers from unwanted foreign debris hidden within the surface infill. While the **Go Groomer Go™** properly grooms a synthetic turf field, the **G30 Inline Safety Magnet** goes the extra step to insure that hidden dangers, which are unseen by the naked eye, are properly removed. Best of all, the Inline Safety Magnet is compatible with all 3 **Go Groomer Go™** models and can be used while simultaneously grooming a synthetic field.

With the **G30 Inline Safety Magnet**, risk management is drastically lowered by improving the safety of the playing surface for those who utilize the synthetic turf facility.

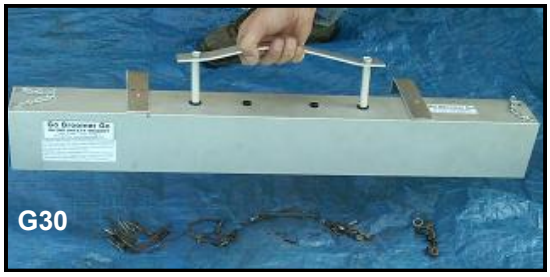

Debris picked up by the Inline Safety Magnet on a high school's multipurpose synthetic field

Debris picked up by the Inline Safety Magnet on a university's soccer stadium field

CALL FOR PRICE

Debris is easily and safely removed from the G30 Inline Safety Magnet

The **G30 Inline Safety Magnet** is not only a synthetic turf magnet, it is also the magnet you can't afford not to have. Time and time again the results of using the **G30 Inline Safety Magnet** on a synthetic turf field are astonishing. Some of the items picked up by the magnet are small but numerous such as hair pins and bobby pins. However, other items, which are much more dangerous are screws, nails, bolts, wires, earrings and other sharp, skin piercing objects (some of which are rusted). These times easily find their way onto the playing surface and into the synthetic infill but are just as easily removed by the **G30 Inline Safety Magnet**. Removing such items will drastically decrease the unlimited potential dangers and liabilities that could ensue as a result of an injury.

Every Synthetic Surface deserves a

Midwest™ Rakes, Lutes, Plug Pushers & Roller Squeegees

MIDWEST™ SPECIALTY TOOLS

TENNIS COURT SCARIFIER/LUTE - One side serrated teeth, one side straight edge - Its saw-tooth design makes this tool an excellent choice when breaking up and grading hard soils. Originally designed for dressing clay tennis courts, the Scarifier Lute is also used by professional landscapers and grounds crews. Wrap-around bracing and a 1-1/8" diameter powder-coated aluminum handles with 5" vinyl grip provide maximum strength and comfort.

Larger Teeth, 66" Handle			82" Handle		
56923	24" Blade	$72.95	56924	24" Blade	$78.95
56929	30" Blade	$77.95	56930	30" Blade	$83.95
56935	36" Blade	$82.95	56936	36" Blade	$88.95
Finer Teeth					
52936	36" Blade	$85.95	52037	36" Blade,	$91.95
			52038	36" Blade, 1-3/8" dia. handle	$92.95

DOUBLE PLAY GROOMING RAKE - This innovative and versatile tool has two teeth designs. The short teeth are used for breaking up hard packed clay, while the long teeth are for wet clay and general raking. Comes with either a 24" or 36" head and sturdy wrap-around braces. Its 66" powder-coated aluminum handle with 6" non-slip vinyl grip provides for extra comfort.

12524	24" Blade	$95.95
12536	36" Blade	$112.95

GOLF COURSE PLUG PUSHER/SUPER SCRAPER - Straight edge on both sides. Made of high-quality aluminum, this durable versatile tool can be used to push aeration plugs off turf and grade soil. Comes with either a 24" or 36" head, with a 66" powder-coated aluminum handle. Wrap-around bracing ensures maximum strength.

51924	24" Blade	$84.95
51936	36" Blade	$96.95

MIDWEST™ ROLLER SQUEEGEES

ROLLER SQUEEGEE - Called "The best roller squeegees on the market" by our customers, these roller squeegees are built to outlast and outperform other brands. These squeegees are excellent for rolling water off floors, pavement, ballfields, tennis courts and golf greens. The heavy-duty aluminum frame construction and stainless steel axles ensure the roller stays secure. Two roller styles are available: Non-Absorbent—excellent for infields and turf because it pushes the water; and PVA Absorbent—made of superior high-tech polymer designed to soak up incredible amounts of liquid off hard surfaces. Rollers are easily replaceable and interchangeable.

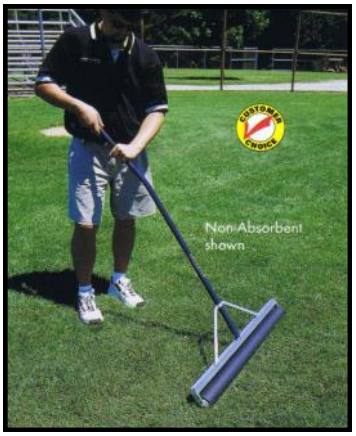

Non-Absorbent Roller Squeegee

54" Powder Coated Curved Aluminum Handle With 6" Vinyl Grip.

70924	24" Wide, 6 lbs.	$195.95
70936	36" Wide, 8 lbs.	$208.95
70948	48" Wide, 10 lbs.	$234.95

BEAM CLAY®

WHOLESALE PRICE LIST
EFFECTIVE: MAY 1, 2022

Midwest™ Squeegees

MIDWEST™ SQUEEGEES

A. General Purpose Squeegee
The best on the market. Made with an extra-wide reversible neoprene rubber blade for long-lasting use. Available in 24" and 36" widths, this super flexible squeegee is excellent for pushing and pulling liquids off hard surfaces. Comes with a 66" powder-coated aluminum handle and wrap-around braces. Because the head bolts do not penetrate the rubber, the blade on this squeegee is easily reversible and replaceable.

76924	24" Wide Blade, 5 lbs.	$88.95
76936	36" Wide Blade, 6 lbs.	$100.95

B. Straight Blade Squeegee
A rugged squeegee, excellent for removing heavier liquids such as mud. The neoprene blade is stiffer than that used on the General Purpose Squeegee, so it scrapes as well as squeegees. Comes with a 66" powder-coated aluminum handle and wrap-around braces for maximum strength. The double-edge design doubles the life of the blade.

75936	36" Wide Blade, 6 lbs.	$94.95

Brooms & Brushes

BROOMS & BRUSHES

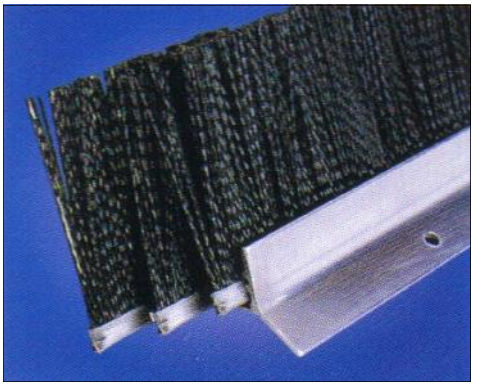

7' WIDE MONSTER BROOM - Drag it on the infield, golf green, tennis or bocce court, push it on the warehouse floor. This broom is powerful and has amazing versatility. Made with heavy-duty aluminum construction. Available with two or three rows of 4-1/2" bristles. Bristles are removable for easy replacement or for adjusting the broom's stiffness.

#82084	Monster Drag Broom (Two-Row Bristles)	$260.95
#83084	Monster Drag Broom (Three-Row Bristles)	$295.95
#SP50067	7' Replacement Bristles (One Row)	$51.95

DOUBLE PLAY MONSTER BROOM - Identical to the two-row Monster Broom, the Double Play Monster Broom comes with an aggressive scarifying edge for breaking up packed soils.

#82384	84" Double Play Scarifier Monster Broom (Two-Row Bristles)	$333.95
#SP50067	7' Replacement Bristles (One Row)	$51.95

MAXIMUM-DUTY BROOM - Made from the same heavy-duty extrusion as our 7' Monster Broom, this broom is one of the heaviest built brooms on the market. By flipping the broom over, you have a scraping edge for breaking up packed dirt. The 28" head is available with two-row or three-row bristles. Available with the innovative 60" bent powder -coated aluminum handle, excellent for eliminating back strain. Bristles are removable for easy replacement or for adjusting the broom's stiffness.

#82928	28" Maximum-Duty Broom (Two-Row Bristles)	$107.95
#83928	28" Maximum-Duty Broom (Three-Row Bristles)	$120.95
#SP50068	28" Replacement Bristles (One Row)	$15.95

DOUBLE PLAY SCARIFIER BROOM - Developed in cooperation with Floyd Perry, award-winning sports turf expert. An aggressive scarifying edge makes this perfect for breaking up packed soils. Excellent for infield dressing!

#82328	28" Double Play Scarifier Broom (Two-Row Bristles)	$153.95
#SP50068	28" Replacement Bristles (One Row)	$15.95

More Brooms & Brushes

MIDWEST BROOMS & BRUSHES

24" GENERAL-PURPOSE BROOM - This 24" general-purpose broom is an excellent choice for the garage or shop, and is also used for base path and infield dressing. Professional grounds keepers flip the broom over for a final dressing of base paths. Available with either a 60" ergonomic bent powder-coated aluminum handle or a 60" straight powder-coated aluminum handle.

#82924	24" General-Purpose Broom, Bent Handle	$78.95
#82925	24" General-Purpose Broom, Straight Handle	$78.95

JET BLAST WATER BROOM - This heavy-duty, yet lightweight innovative aluminum tool does an excellent job of washing away dirt and grime. Hook it up to a water hose and watch it blast away dirt. The 32" head is fitted with eight high-pressure nozzles, while the 48" head has 12 nozzles. Comes complete with high-quality garden hose nozzle for easy operation. Intended for use with normal water pressure, not for use with high-pressure water systems.

#46032	32" Water Broom (8 nozzles)	$301.95
#46048	48" Water Broom (12 nozzles)	$343.95

WHOLESALE PRICE LIST

Batting Practice - Jaypro Big League Batting Cages

BIG LEAGUE SERIES

BUY A BETTER CAGE

Jaypro's swivel wheel allows for a more precise cage placement!

(1) The addition of handle wheels controls the cage height over uneven surfaces, which allows for additional leverage to lift and raise the cage. Reduces cage drag and divots while in motion.
(2) Includes joint reinforcing clamps for added rigidity
(3) Through-bolts and locking nut connections only, no allen screws here!
(4) 18"W x 9"D swivel tires can be adjusted to two different heights which allow movement in multiple directions for easy installation and removal on the playing field
• Fully welded design and pre-assembled side frames make the cage strong and rigid for a long life span
• Net attaches directly to the frame and has reinforced seams and an integrated baffle

BEAM CLAY®

WHOLESALE PRICE LIST
EFFECTIVE: AUGUST 1, 2022

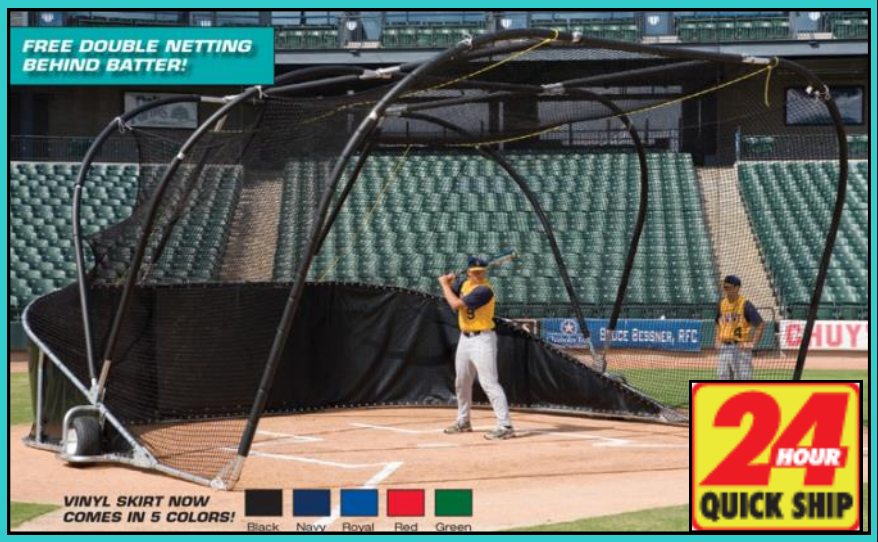

Batting Practice - Bubba Elite Batting Cage

8" WIDE X 18" DIAMETER WHEELS FOR EASY TRANSPORT

NEW DESIGN LIFTING/STEERING DOLLY

DOUBLE COACHES

BAFFLE NET AND 4" THICK THUD PAD

BUBBA ELITE PORTABLE/COLLAPSIBLE BATTING CAGE
THE ULTIMATE PORTABLE BATTING

COLLAPSES DOWN TO 5' TALL

RICOCHET PADDING ON ALL OVERHEAD FRAMES

The top choice of Professional, Collegiate and Varsity baseball programs with larger wheels, 2 observation platforms, thud pad and ricochet padding on most frame work.

Frame is 2" heavy wall aluminum tubing that easily and quickly collapses down to 5' high for transport and storage. Includes heavy duty 3.5 mm weather treated EHT netting, plus 10' x 10' baffle net, 4" thick thud pad and 18 oz. vinyl skirt. Three 8-1/2" wide x 18" diameter pneumatic wheels and newly designed lifting/steering locking mechanism makes this the easiest cage to transport and maneuver. Overhead arched frames are all protected with ricochet padding to minimize ball rebound and reduce damage to the frame. Size is 18' wide x 22' deep x 12' high. Weight 600 lbs. **5-Year Limited Warranty**.

Our sharp multi-color images will outlast other processes. Eliminates the historic problems of digital printing, like weathering, premature fading, scuffing, and unsightly white mesh backside color. Images will last outdoors as long as the fabric, something rarely true with digital imprinting. Also highly spike, cleat, and racquet resistant. Our thick, individually-applied, double coating process literally bonds the image into the vinyl and completely masks the underlying fabric color, so image colors are vivid and true.

Chroma-Bond imprinting is available on our vinyl-surfaced windscreen, cover, padding & sign products.

BEAM CLAY®

WHOLESALE PRICE LIST
EFFECTIVE: AUGUST 1, 2022

Batting Practice - Batting Tunnel Frames & Nets

PROFESSIONAL BATTING TUNNEL FRAMES & NETTING

With our **Professional Batting Tunnel Frame (#66214)** your poles can be set at your desired length (55' | 70' | 75') and can also be adjusted to fit custom net widths. This unique design allows for the tunnel's net to easily be adjusted at any time after the initial installation. This heavy-duty frame is constructed using six 4" square, heavy-duty steel poles. A black, baked on powder coat finish on the steel frame provides the ultimate weather resistance and protection. Frame is reinforced using 13-gauge galvanized steel crossbars to hang the net. Crossbars feature Allied's® zinc Flo-coat galvanization process for maximum protection. System includes everything needed to install and hang net: chain, cables, hooks, collars, ground sleeves and c-snaps. Tunnel net is sold separately. The Professional Batting Tunnel Frame has a 5 Year warranty.

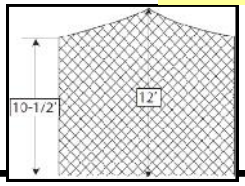

Professional Double Batting Tunnel Frame (# 66214D)
Same high quality materials as the standard Professional Batting Tunnel Frames. These double frames share center poles to allow side-by-side installation, eliminating the need for extra poles and ground footings.

#66216	55' | 70 ' | 75' Model, 868 lbs.	**$4,195**
#66216D	Double Model (side-by-side)	**$6,995**
#66216T	Triple Model (Side by Side)	**$9,795**

5-Year warranty. System can be adjusted to fit custom net widths and lengths.

Order netting separately.

BATTERS VIEW OF CAGE
Note: The "slope" of the net is important. The center of the net for it's entire length is 12' high. The sides of the net are 10-1/2' high, leaving 18" of net on the ground to keep batter balls inside the enclosed area.

Premium Knotted Braided HDPE Polyethylene Black Tunnel Netting:

Polyethylene netting is more durable and weather, UV, mold and mildew resistant than polypropylene or nylon netting. Knotted netting provides a higher overall strength rating than knotless netting making it superior for direct impact applications.

- Tunnel nets are made with 1-3/4" knotted square mesh to reduce sag, for easier installation, and to provide a cleaner appearance.
- 5/16" rope border sewn around perimeter.
- Corners have 6' rope tails and sewn loops making it easier to hang.
- All tunnel nets include a convenient overlap style entry door..
- Tunnels can be customized to your size specifications.

#48 Professional, BT-PRO 3.5 (3.5 mm Knotted; 4 Year Warranty)

#36033	BT-Pro 3.5 Knotted Braided HDPE Batting Tunnel Net, 12'H x 12'W x 70'L	**$1,190**
#36035	BT-Pro 3.5 Knotted Braided HDPE Batting Tunnel Net, 12'H x 14'W x 70'L	**$1,260**
#36039	BT-Pro 3.5 Knotted Braided HDPE Batting Tunnel Net, 12'H x 14'W x 75'L	**$1,330**
#36038	BT-Pro 3.5 Knotted Braided HDPE Batting Tunnel Net, 12'H x 12'W x 55'L	**$910**
#36036	BT-Pro 3.5 Knotted Braided HDPE Batting Tunnel Net, 12'H x 14'W x 55'L	**$980**

#42 Collegiate, BT-#42 (3 Year Warranty)

- Polyethylene netting is a #42 gauge in with reinforced sewn rope borders around the perimeter.
- Corners have 6' rope tails and sewn loops making it easier to hang.
- Choose from six standard sizes.
- All nets include a convenient overlap style entry door.

#36042	BT-#42 Knotted Twisted HDPE Batting Tunnel Net, 12'H x 12'W x 35'L	**$420**
#36048	BT-#42 Knotted Twisted HDPE Batting Tunnel Net, 12'H x 12'W x 55'L	**$560**
#36046	BT-#42 Knotted Twisted HDPE Batting Tunnel Net, 12'H x 14'W x 55'L	**$630**
#36043	BT-#42 Knotted Twisted HDPE Batting Tunnel Net, 12'H x 12'W x 70'L	**$695**

BEAM CLAY®

WHOLESALE PRICE LIST
EFFECTIVE: AUGUST 1, 2022

Batting Practice—Indoor Batting Tunnels/Indoor Ceiling Suspension Kit

Protective Net Saver or Divider

12'H x 14'W (Item # 36060)
12'H x 12'W (Item # 36062)
Our #48 knotted braided polyethylene netting backdrop provides a buffer for your net as a Net Saver behind the batter or as a Net Divider position to create two short toss stations. The durable rope border simplifies installation and reduces sag. Available in black only.

#36060 Protective Net Saver or Divider, 12'H x 14'W, 9 lbs. — **$95**
#36062 Protective Net Saver or Divider, 12'H x 12'W, 7 lbs. — **$95**

Indoor Batting Tunnel Tensioning Kit

(Item # 66200)
The perfect solution for anyone who wants an indoor batting tunnel but can't install or leave up overhead cables, permanent posts or automated drop down frames. This system is ideal for multi-purpose facilities like gymnasiums, cafeterias, pole buildings, etc. because it sets up, tears down, and stores away in minutes--leaving your space free from any overhead obstructions. Choose your batting tunnel net and add a heavy-duty vinyl floor cover for a complete professional indoor batting tunnel system.

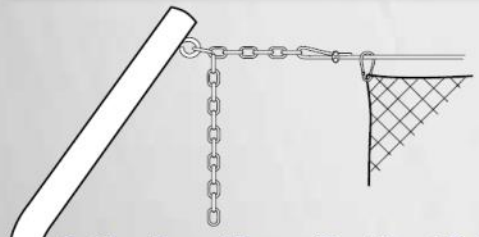

Tensioning Kit Contains:
6 – Eyebolts
6 – 8 mm Spring Link Clips
6 – 3/8" Spring Link Clips
6 – Cables 15' long
3 – 50' Pieces of High Strength Braided Hoisting Rope 3/8"
3 – Complete Cam Lock Pulley Systems

Batting Tunnel Floor Covers

15'W x 60'L (Item # 29250)
15'W x 80'L (Item # 29255)
Constructed of 20.5 oz/sq. yd. PVC coated polyester vinyl that is anti-mildew and UV coated. Meets California Fire Marshal requirements. Standard Tan in color. 7 Year limited warranty.

Batting Tunnel Frame Kit without Poles

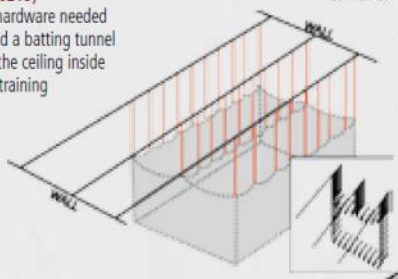

55' Softball Kit (Item # 66221)
70/75'Baseball Kit (Item # 66220)
A Do-It-Yourself Batting Tunnel Kit! Includes all the supplies you need to turn standard 12' long, 3" OD steel into a full size Batting Tunnel. Complete kit includes: Top angle bars, support cables, cable clamps and carabineers. Top angle bars are 2-3/8"OD galvanized steel pipe with a 15 degree bend; providing enough space to properly hang the tunnel net away from the steel posts. The provided Support Cable is 1/4" galvanized steel with a 4200 lb break strength. Batting Tunnel Net and optional ground sleeves are sold separately. Standard 3" OD steel poles are not included.

Kit is for use with 3" OD steel poles

Indoor Ceiling Suspension Kit

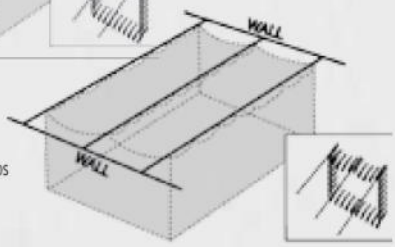

(Item # 66219)
Includes hardware needed to suspend a batting tunnel net from the ceiling inside a gym or training facility.

Contains:
3 - 100' galvanized wire cables
30 - 30' galvanized wire cables
66 - Wire rope clamps
6 - Hook and eye turnbuckles
6 - Eyebolts
70 - Snap links

Indoor Accessory Cable Hardware Kit (Item # 66213)

Contains:
3-100' cables
50 - Steel c-snaps
6 - Turnbuckles
12 - Cable clips
6 - Eyebolts.

#66200	Indoor Batting Tunnel Tensioning Kit, 30 lbs.	**$1,400**

BEAM CLAY®

Batting Practice - Batting Tunnel Frames & Nets

WHOLESALE PRICE LIST
EFFECTIVE: AUGUST 1, 2022

Hitting Station Systems—10' High

Great for "soft toss", tee work and more, the 3-pole shown in red against batting frame of the Hitting Station helps coaches and players get the most out of every practice. This "stand alone" system can be placed along side of your batting tunnel/cage for players to use before or after their turn in the cage, or anywhere you need 3-4 hitting stations. Constructed from 4" square, heavy-duty steel poles, this black powder coated pole system is an attractive addition to any facility. Impact netting is constructed of black 3.5mm knotless 1-3/4" square mesh high-tenacity polypropylene (Pylon). Netting is hung from 1/4" galvanized steel cable and the system includes everything needed to install, including ground sleeves. Custom lengths are available.

#66270	70' / 75' Model—4 hitting stations (3 poles) *(specify 70' or 75' when ordering)*	**$3,220**
#66255	55' Model—3 Hitting Stations (2 poles)	**$2,800**

Protective Net Saver or Divider

Our #48 knotted braided polyethylene netting backdrop provides a buffer for your net as a Net Saver behind the batter or as a Net Divider position to create two short toss stations. The durable rope border simplifies installation and reduces sag. Available in black only.

#36062	12' H x 12' W	**$95**
#36060	12' H x 14' W	**$95**

THUD PADS are 18 oz. vinyl over 4" thick polyurethane foam. **PROTECTOR PADS** are 18 oz. vinyl covered 1-1/2" polyethylene foam. Both have grommets for attachment. Available plain or with optional solid or framed targets and optional lettering. Custom sizes and thickness available.

Thud Pad 68"W x 52"H x 4" Thick
#1217612DS - $370
Batting Tunnel Net Protector Pads: 3'W x 4'H x 1-1/2" Thick—BLACK

BEAM CLAY®

Aluminum Frame Batting Tunnels

WHOLESALE PRICE LIST
EFFECTIVE: JULY 1, 2022

Poles are 20'L (17.5' above ground & 2.5" in Ground)
2 adults required on site to manually unload.

ALUMINUM FRAME BATTING TUNNELS

Engineered to withstand the rigors of both practice and the elements
No tedious tie-down cables extending beyond the posts with these high quality batting cages
Offset main uprights are fabricated of 4" diameter aluminum tubing, which install into aluminum ground sleeves
Mill finish aluminum. Powder-coated frames also available.
42# Nylon Netting 1-3/4" Square
Swivel pulleys with eyebolts are mounted at top to raise and lower the protective netting
Available in two standard sizes

BT141455	14'H x 14'W x 55'L	$7,550
BT121470	12'H x 14'W x 70'L	$7,950

DUAL AND TRIPLE BATTING TUNNELS

Increase your batting practice area two-fold, or even three-fold, within a smaller footprint of your valuable field space with side-by-side dual batting tunnels or triple batting tunnels.

BT141455-DUAL	14'H x 14'W x 55'L	$17,990
BT121470-DUAL	12'H x 14'W x 70'L	$19,780

BATTING TUNNEL EZ ZIPPER ENTRANCE

Add an entrance to any batting tunnel or batting cage in three easy steps with this "EZ" Zipper. Step #1: Zip tie the EZ Zipper wherever you want your entrance located. Step #2: Unzip the zipper. Step #3: Use hot knife to simultaneously cut net between the zipper and prevent fraying.

BTEZ 14'H x 14'W x 55'L $170

PORTABLE BATTING TUNNEL

Engineered to withstand the rigors of both practice and the elements and, most importantly, it is portable. Eliminates the need to find one spot for batting practice and adds flexibility to locate anywhere, indoors and/or outdoors.

Artificial and natural grass friendly design, all components are rounded
Offset main uprights are fabricated of 4" diameter aluminum tubing (same as our in-ground model), which inserts into welded aluminum bases with receptacles to accept frame supports
2" sq. aluminum supports (top and bottom) are bolted to receptacles to rigorize the entire structure as one unit
Swivel pulleys with eyebolts are mounted at top to raise and lower the protective netting as needed
All hardware is rust-proof galvanized steel and stainless steel

BT141455-P	14'H x 14'W x 55'L	$19,470
BT121470-P	12'H x 14'W x 70'L	$20,365

BATCO™ INDOOR/OUTDOOR FOLD-UP BATTING TUNNELS

USE INDOORS OR OUTDOORS!

CG721812O	72' L x 18' W x 12' H (Baseball) with Metal Outdoor Feet (5 Arcs)	$6,800
CG541812O	54' L x 18' W x 12' H (Softball & Little League) with Metal Outdoor Feet (4 Arcs)	$6,015
CG721812IN	72' L x 18' W x 12' H (Baseball) with Rubber Indoor Feet (5 Arcs)	$6,540
CG541812IN	54' L x 18' W x 12' H (Softball & Little League) with Rubber Indoor Feet (4 Arcs)	$5,885
CG721512	72' L x 15' W x 12' H with Rubber Indoor Feet	$6,540
CG541512	54' L x 15' W x 12' H with Rubber Indoor Feet	$5,885
CG721412	72' L x 14' W x 12' H with Rubber Indoor Feet	$6,540
CG541512	54' L x 14' W x 12' H with Rubber Indoor Feet	$5,885

Cage Features

- Folds like an accordion for quick storage
- 72' and 54' cage folds to 2 feet in less than 5 minutes.
- 25% wider than standard cages
- Arc shaped design for maximum hitting space
- Size allows live batting practice to be thrown comfortably
- Uses #42 Braided nylon net - the strongest available
- No permanent construction required
- No cables to run indoors
- No frame to build outdoors
- The customer will need to provide two end anchors (usually eye bolts), one at each end of the cage

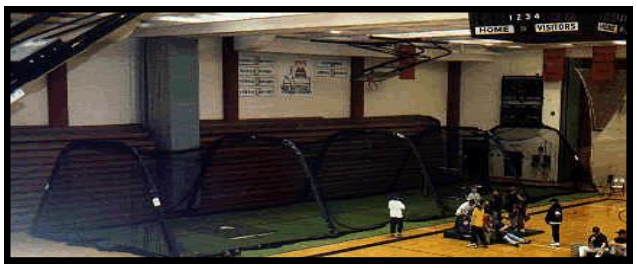

The Batco cage can easily be folded and unfolded, like an accordion. After use, the Batco cage can be folded to 18' wide, 12' high, and just 2' long in less than 5 minutes. To collapse the cage you need two players per arc (8 players for the 54 footer and 10 for the 72') to slide the cage into storage. The players simply walk in unison, folding the cage up against the wall or fence as they walk.

*Batco cages are very large. Be sure you have enough room in your gym. **No returns allowed.***

DESIGNATED HITTER—PRO

The Designated Hitter™ Pro will help your pitcher learn how to pitch inside and handle a hitter who might be crowding the plate.

The Designated Hitter™ Pro is the ideal pitcher's training tool for baseball and softball pitchers at the advanced level. It allows your pitchers to have a live training or a more realistic bullpen session without the need for a live batter. This dummy model gives your pitchers a more efficient, effective and safe training session while practicing on the mound. The Designated Hitter™ pitching dummy stands 5'9" tall, can be used in either indoor or outdoor facilities, and comes with a weighted base to allow it to stand on its own. It is made with durable materials so it will not break when hit by fastballs. The Designated Hitter™ Pro is also constructed with beveled edges to reduce pitch deflection and provide a safer experience for your catchers. An orange string that attaches to the elbow of the dummy provides a visual representation of the inside corner of the strike zone for your pitchers to aim at. The DH displays all of the hitter's key landmarks, giving pitchers a complete image of the strike zone. This helps pitchers develop more consistency in the accuracy and trajectory of their pitches. This helps your baseball and softball pitchers visualize the zone and practice hitting their marks.

The Designated Hitter™ Pro Model
• Can be used indoors or outdoors
• Simulates a left or right-handed batter
• Is designed for baseball or softball teams
• Is portable and easy to transport
• Comes in red, blue or gray color

#TA2131R	Red 5'9" Tall Pro Model	$345
#TA2131B	Blue 5'9" Tall Pro Model	$345
#TA2131G	Grey 5'9" Tall Pro Model	$345

DESIGNATED HITTER—YOUTH

The Designated Hitter™ Youth is the ideal pitcher's training tool for baseball and softball pitchers at the advanced level. It allows your pitchers to have a live training or bullpen session without the need for a live batter. This gives you a more efficient, effective and safe training session. The Designated Hitter™ pitching dummy stands 5'2" tall and comes with a weighted base to allow it to stand on its own. It is made with durable materials so it will not break when hit by fastballs. It is also constructed with beveled edges to reduce pitch deflection and provide a safer experience for your catchers. An orange string that attaches to the elbow of the dummy provides a visual representation of the inside corner of the strike zone for your pitchers to aim at. This helps your baseball and softball pitchers visualize the zone and practice hitting their marks.

The Designated Hitter™ Youth Model
- Can be used indoors or outdoors
- Simulates a left or right-handed batter
- Is designed for baseball or softball teams
- Is portable and easy to transport
- Comes in red, blue or gray color

PITCHERS POCKET 9 HOLE BASEBALL PITCHING NET

Pitcher's Pocket

Pitcher's Pocket

9-Hole Pitching Training Aid

The Pitcher's Pocket is the only industrial grade training aid that has nine individual pockets. The nine individual pockets allow for true accountability after a workout.

The Pitcher's Pocket is perfect for youth pitchers that are just learning to throw strikes. However, the 45 inch high and 35 inch wide frame is more than large enough to ensure an experienced picture gets reps keeping the ball out of the zone.

- industrial Gauge #60 Net with Galvanized Steel Frame. Perfect for outdoor/indoor use
- Challenge the player by ensuring they hit their spots with the 9 individual pockets
- Perfect size to teach players to throw strikes but also big enough to leave the ball out of the zone
- No need for a catcher to ensure you get your daily reps. The nine targets keeps players engaged
- Ships fully Assembled. Adjustable legs to change height and detachable legs for easy storage.

Versatile Training Aid

Specificaly designed for pitching in mind, but can also be used as a great tool for infield, outfield, and catching drills. The adjustable heights on the Pitcher's Pocket can make it a great throwing target anywhere on the field.

- Great for infield throwing practice
- Have catcher's work on their pop up times and throws
- Have outfielders throw into the Pitcher's Pocket at home plate
- Place it at first base, and have your pitcher's work on their pick off throws

WHOLESALE PRICE LIST
EFFECTIVE: JULY 1, 2022

PITCHERS POCKET PRO 9 HOLE BASEBALL PITCHING NET

The Pitcher's Pocket Pro was designed to mimic the actual size of the strike zone. The Pitcher's Pocket Pro is the only industrial-grade training aid that has nine individual pockets. The nine individual pockets allow for true accountability after a workout. A player or coach can count the balls inside the pocket that hit or missed the desired location providing real-time pitch location. Perfect for the elite pitchers just looking to fine-tune his accuracy within the strike zone! The Pitcher's Pocket is the perfect training aid to keep a player engaged during a practice session without having to use a catcher.

Pitchers Pocket
The Pitcher's Pocket Pro has a 12-Month All-Inclusive Warranty, and a Five-Year Limited Warranty covering the frame. The Pitcher's Pocket Pro is over-engineered and constructed with industrial-grade materials. Commercial baseball and softball training facilities have had this product in their cages for years without issue. Any player can feel confident leaving the Pitcher's Pocket Pro in the backyard without having to worry about durability.

PITCHERS POCKET 12 & 16 HOLE PITCHING NET

Pitchers Pocket 12 Hole Practice Screen	#PP12	$490/EA

The Pitchers Pocket Practice Screen is perfect for quickly and conveniently evaluating a pitcher's accuracy. With 12 pockets, this training aid provides a wide range of targets for pitchers to improve accuracy around the strike zone without the use of a catcher.
Features:
• 1 5/8 in. steel frame
• 60-gauge nylon netting
• Adjustable legs can increase height by an additional 2 feet
• 3 ft wide x 4ft5in height
• Ships fully assembled

Pitchers Pocket 16 Hole Practice Screen	#PP16	$560/EA

16 Hole Pitcher's Pocket

The Pitchers Pocket Practice Screen is ideal for evaluating a pitcher's accuracy for baseball and softball. The 16 pockets provide a range of targets for a pitcher to improve and evaluate his/her accuracy around the strike zone. It's like having a catcher that tells you exactly where the pitch was thrown!

The frame is constructed of 1 5/8 in. steel with 16 pockets laced with a #60 nylon net to a 1/2 in. bungee cord. The frame is protected with vinyl covered foam which is reinforced with grommets. The frame sits on 2 removable legs. 4'5" Tall by 4' Wide. SHIPS FULLY ASSEMBLED

BEAM CLAY®

Portable Pitching Mounds—True Pitch

WHOLESALE PRICE LIST
EFFECTIVE: SEPTEMBER 1, 2022

TRUE PITCH® GAME MOUNDS

All True Pitch® Mounds have a reinforced fiberglass base covered with green or clay color AstroTurf®.

TRUE PITCH® Portable Pitcher's Mounds are approved for official game use for Senior League, Babe Ruth, Pony, Bronco, Little League, Dixie Youth, and Cal Ripken. The **TRUE PITCH®** Portable Mounds have been used, tested and approved at the National Little League headquarters in Williamsport, Pennsylvania and are the only portable mounds approved for use in official games.

TRUE PITCH® Portable Pitcher's Mounds have patented tapered edges - no lip or edge around perimeter - for smooth mound to field transition. Made to official dimensions, they are manufactured with reinforced fiberglass base and heavy -duty green or clay 60 oz. knitted nylon AstroTurf® . All types of cleats can be used on these mounds; however plastic or rubber cleats are recommended, since metal cleats will cause faster turf wear. If using metal cleats, optional ice hockey grade rubber is available underneath turf to prevent damage to fiberglass. Ice hockey grade rubber is standard on all 10" and 8" game mounds between the fiberglass surface and the AstroTurf® extending from 6" behind pitcher's plate to front lip. Pitcher's plates are bolted to reinforced fiberglass frame with three 5/8" bolts, except 318-G includes 4 -way pitcher's rubber that fits into box in frame.

Using **TRUE PITCH®** Portable Pitcher's Mounds makes it easy to convert your field from softball to baseball in minutes and cleanup is a snap! Just hose it down after the game.

TRUE PITCH® Portable Pitcher's Mounds allow for batting practice pitching, bullpen pitching and actual game pitching from the same identical mound and because **True Pitch®** portable pitcher mounds are made to official dimensions and are wider than other portable mounds, they make pick off moves comparable to these from a regulation clay mound.

TRUE PITCH® Portable Pitcher's Mounds provide

- mounds at the right distance from home plate (for all age groups organized league baseball)
- the exact regulation pitching mound height (6", 8", 10")
- a mound for both games AND practice (approved and recommended by trainers)
- easy movement from diamond to diamond, park to park
- an ideal pitching mound in (or after) any weather
- no sand or rubber infill needed or recommended.
- 10-year limited warranty for fiberglass shell.

MODEL	DESCRIPTION	EACH
#600-G	**10" High, 10' Wide, 12'6" Long, 340 lbs.—High School Portable Game Mound** Approved for Little League Baseball Senior League Division and Babe Ruth League games. Covered with turf. Ice Hockey grade rubber under turf included.	$4,695

Portable Pitching Mounds—True Pitch

318-G

The 318-G is a full regulation 18' fiberglass pitching mound. It can be ordered with or without AstroTurf. The 318-G mound meets all NCAA requirements. The mound features four individual interlocking sections which make assembly and portability easy. Three or four athletes is all it takes to carry the sections.

Features

- 18' Diameter x 10" High (meets NCAA dimension requirements) 900 lbs. in 4 sections: middle @ 360 lbs., 2 side wings @ 200 lbs. each, back @ 140 lbs.
- Durable fiberglass shell construction with green or clay 60 oz. knitted nylon AstroTurf
- Pitching platform meets all requirements presented in NCAA rule book
- Patented pitching lane technology increases fiberglass shell longevity
- Includes 4-way pitching rubber that fits into box in frame
- Patented tapered edge for smooth transition to playing field
- Features interlocking section design for portability
- 10 year manufacturer's warranty

**True Pitch Inc. 10-year warranty is exclusive to the fiberglass shell and does not cover the AstroTurf®. Use of metal cleats or spikes is not recommended on any True Pitch Inc. mound product. Use of metal cleats or spikes will void warranty. True Pitch Inc. reserves the right to determine warranty eligibility on all sales.*

Pitch Pro

Portable Fiberglass Pitching Mounds

The Truth About Turf and Metal Cleats

While we hope that metal cleats can one day be used on our mounds, a turf designed for metal cleats, suitable for sustained use in a high traffic area has yet to be invented. We checked. We called turf manufacturers, turf councils and turf testing companies. Hundreds of years of combined experience have repeatedly told us that there is not a metal cleat friendly turf available. Each response came with a recommendation: "Use rubber cleats, turf shoes or even tennis shoes. Metal cleats will cut the fibers that hold the turf together". The surface area of a metal cleat is much smaller than plastic or rubber. In addition, steel is a much harder material than the turf. The result is metal cleats that cut through the bottom fibers of the turf. All mound manufacturers have the same warranty for their turf, NONE. They all refer to the turf manufacturer's warranty. Why is that? Since the turf manufacturers do not recommend using metal cleats, no warranty conditions exist.

FACTS:
All artificial turf will be damaged by metal cleats.
All turf manufacturers recommend plastic or rubber cleats.
Mound life with metal cleats; 1 season
Mound life with plastic cleats; 6-8 seasons or more

All Pitch Pro Portable Pitching Mounds have tan or burnt orange color 60 oz. knitted nylon turf (the strongest synthetic turf available) and weather UV resistant, gel coated fiberglass frames. For outdoor or indoor use.

Pitch Pro only recommends plastic or rubber cleats for all mounds.

Pitch Pro's Model 1810 is an 18' diameter, full size game mound. As with the rest of our product line, we have engineered a full size game mound that comes with the same high-quality rigid design as our other game mounds. The Model 1810 is a six piece "snap together" game mound designed straight from the MLB Rulebook. This mound will provide a FULL line of game mounds to satisfy your every need.

- Extremely rigid mound without dead spots
- Highest grade and dense turf available that requires NO messy crumb rubber-dark clay color
- Snap together assembly with no tools
- 6" x 6" x 24" four sided rotational pitching rubber
- Perfect for all levels of play requiring an 18' diameter mound
- TEN YEAR warranty on fiberglass core!
- Available with or without turf allowing field construction/project managers to match the turf specified for the project

Portable Pitching Mounds—Pitch Pro

WHOLESALE PRICE LIST
EFFECTIVE: JANUARY 1, 2022

Pitch Pro

Portable Fiberglass Pitching Mounds

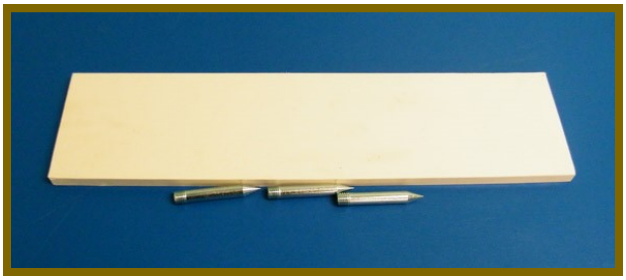

Pitch Pro Model 465 Portable Pitching Mound

The 465 is designed for ages 8-12 but can be used for most any age. It is the NUMBER ONE choice for tournament directors across the US. Easy to move, extremely durable, lightweight and versatile best describes the 465. Perfect for game day but all will also serve well for bullpen work and practice for older pitchers. The 465 is built and designed the same as our larger mounds with correct MLB recommended slope toward home and a gradual drop-off for pick-off moves to other bases. The regulation rubber and launch pad are removable and can be easily replaced if worn or damaged.

- 4' wide x 6' long x 6" high*
- The light weight, size, and partial nesting capability of this model make it the NUMBER 1 choice for tournament directors. Transporting many mounds over several fields is easy with this model.
- Great mound for ages 8-12 to transition from machine pitch to kid pitch. Many teams currently use this mound for ages up to 14.
- Launch Pad included on all game mounds / Replaceable Pitching Rubber
- Weight: 65 lbs.
- Tan or burnt orange 60 oz. nylon turf
- TEN YEAR warranty on fiberglass core!
- Made in U.S.A.

#101302 $975

Replacement Rubber with Spikes 6" x 24" **#101374 $50**

Replacement Launch Pad
The front of the pitching rubber has been a pain on most portable mounds. The carpet always wears quickly in this area. Now you can replace the carpet with a Pitch Pro Launch Pad™. The Launch Pad includes 15 x 24 launch Pad and installation instructions. *Pitcher's rubber not included.*

Replacement Launch Pad **#101368 $55**

WHOLESALE PRICE LIST
EFFECTIVE: JANUARY 1, 2022

Pitch Pro

Portable Fiberglass Pitching Mounds

Pitch Pro Model 486 Portable Pitching Mound

#101304 $1,345

The size up from the 465, you will still find the same versatility in the 486. Older kids will be able to take a full stride and still land on the superior mound support structure which provides the rigid feel of the mound, especially in the landing area..

So you want your pitcher to take a full stride? Don't like your pitcher landing in a hole on the dirt? The 486 is your mound. This mound is designed to allow pitchers to take their big stride without landing on flat ground and digging a hole after a few pitches. Manufactured with the MLB recommended slope toward home.

The 486 will provide a perfect landing location with every pitch. A pitcher will comfortably be able to make pick-off moves without a jarring follow-thru, with our tapered drop-off on the sides and rear. The regulation rubber and launch pad are removable can be easily replace if worn or damaged.

Tan or burnt orange 60 oz. nylon turf

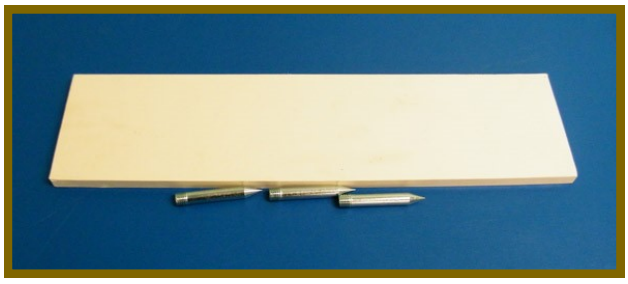

- 4' wide x 8' long x 6" high*
- The light weight, size, and partial nesting capability of this model make it a top choice for tournament directors. Transporting many mounds over many fields is made easy and can fit in a pickup or field cart.
- Great mound for ages 8-12 to transition from machine pitch to kid pitch. Many teams currently use this mound for ages up to 14.
- Launch Pad included on all game mounds / Replaceable Pitching Rubber
- Weight: 115 lbs.
- TEN YEAR warranty on fiberglass core!
- Made in U.S.A

Replacement Launch Pad
The front of the pitching rubber has been a pain on most portable mounds. The carpet always wears quickly in this area. Now you can replace the carpet with a Pitch Pro Launch Pad™. The Launch Pad includes 15 x 24 launch Pad and installation instructions. *Pitcher's rubber not included.*

BEAM CLAY®

Portable Pitching Mounds—Pitch Pro

WHOLESALE PRICE LIST
EFFECTIVE: JANUARY 1, 2022

Portable Fiberglass Pitching Mounds

Pitch Pro Model 796 Portable Pitching Mound

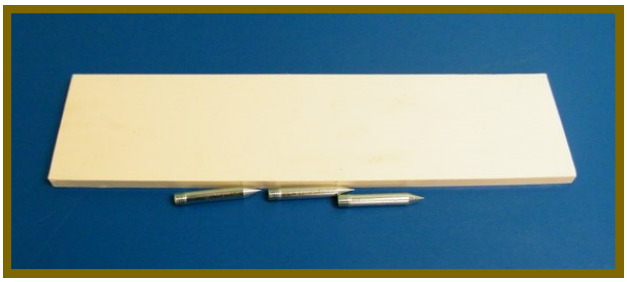

#101306 Tan
#101308 Red
$2,495

The 796 is a fuller version of the 486. It's longer and wider than the 486 with a wider slope on sides and back. Great for age's 14 years old and down, this mound is very capable of holding the games' bigger youth pitcher. Bigger kids, more pronounced pick-off moves, a real game mound feel are the main reason behind the 796. Our mound support structure proves to be essential when dealing with mounds of this size. Pitch Pro has made the mound(s) where pitchers can concentrate on pitching and not worry about poor footing, landing area or feel. As the 465 and 486 are very popular with tournament directors, the 796 has become a popular choice for Rec Department and Complex Managers that provide mounds for games.

So you want your pitcher to take a full stride? Don't like your pitcher landing in a hole on the dirt? The 796 is your mound. This mound is designed to allow pitchers to take their big stride without landing on flat ground and digging a hole after a few pitches. While manufactured with the MLB recommended slope toward home, the Pitch Pro Model 796 portable pitching mound will provide a perfect landing location with every pitch. A pitcher will comfortably be able to make pick-off moves, without a jarring follow-thru, with our tapered drop-off on the sides and rear. The regulation rubber and launch pad are removable and can be easily replaced if worn or damaged.

- 7' wide x 9' long x 6" high*
- Tan or Red 60 oz. Nylon Turf
- Commonly used on fields where the mound is owned by the community (Rec Centers), league or group who mainly utilize a single complex
- Great mound for ages 9-14
- Launch Pad included on all game mounds / Replaceable Pitching Rubber
- Weight: 220 lbs.
- TEN YEAR warranty on fiberglass core!
- Made in U.S.A

Replacement Rubber with Spikes 6" x 24" **#101374** **$50**

Replacement Launch Pad
The front of the pitching rubber has been a pain on most portable mounds. The carpet always wears quickly in this area. Now you can replace the carpet with a Pitch Pro Launch Pad™. The Launch Pad includes 15 x 24 launch Pad and installation instructions. *Pitcher's rubber not included.*

BEAM CLAY®

Portable Pitching Mounds—Pitch Pro

WHOLESALE PRICE LIST
EFFECTIVE: JANUARY 1, 2022

Portable Fiberglass Pitching Mounds

Pitch Pro Model 898 Fiberglass Mound

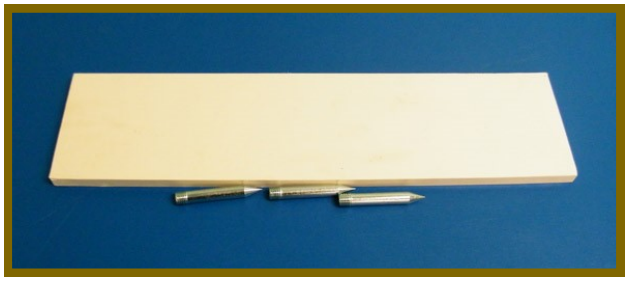

#101312 $3,350

The 898 is the newest edition to our game mounds. This is an 8" mound designed for the 12-14 age group but certainly is suitable for most ages under 14. With a longer landing area in front of the rubber, bigger kids will not reach the end of the mound with a long stride - about 78" from front of rubber to edge of mound. The mound support structure plays a key role in maintaining a solid surface where the pitcher can comfortably land. A superior mound for the transition to a full 10" mound.

- 7' wide x 10' long x 8" high*
- Commonly used on fields where the mound is owned by the community (Rec Centers), league or group who mainly utilize a single complex
- Great mound for ages 10-14
- Launch Pad included on all game mounds / Replaceable Pitching Rubber
- Weight: 275 lbs.
- TEN YEAR warranty on fiberglass core
- Made in U.S.A.

Replacement Rubber with Spikes 6" x 24" **#101374 $50**

Pitch Pro

Portable Fiberglass Pitching Mounds

Pitch Pro Model 8121 Fiberglass Mound

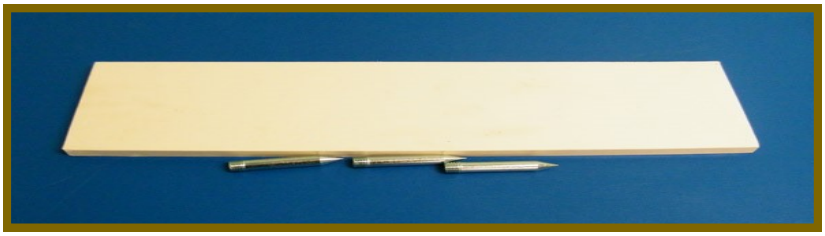

#101314 $4,150

A full 10" mound designed for the big boys. The 8121 is the most rigid and portable 10" mound on the market today. As with all of Pitch Pro mounds, our mound support structure is designed to prevent surface deflection and dead spots. These characteristics are the main culprits of a mound breaking down and becoming weak and flimsy. This is why we are able to provide a five year warranty on the mound core to ensure that these mounds are worth every penny and longevity is guaranteed.

- 8' wide x 12' long x 10" High
- Most stable and rigid 10" portable mound available
- Used for 60'6" distance
- Commonly used on fields where the mound is owned by the community, league or group who mainly utilize a single complex
- Launch Pad included on all game mounds / Replaceable Pitching Rubber
- Used for ages 14+
- Weight: 325 lbs.
- TEN YEAR warranty on fiberglass core
- Made in U.S.A

Pitch Pro Model 504 BP Platform

#101504 $1,095

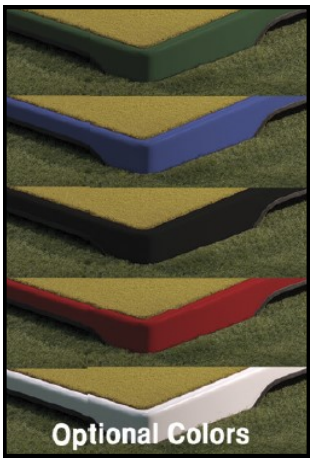

504 Batting Practice (BP) Platform

The 504 brings a more economical option to getting a Batting Practice (BP) platform. Not as big as the 508, it provides an excellent opportunity to toss BP from an elevated position so the hitters see the ball coming downhill.

- 42” wide x 84” long x 8” high – easily stored and portable
- Platform has up to a 8” height that hitting coaches prefer to simulate game perspective
- Air Flow venting on all 4 sides – prevent grass from wilting if in place for extended period
- Used indoors and outdoors for throwing batting practice in front of game mounds or in hitting tunnels
- Weight: Under 100 lbs.
- TEN YEAR warranty on platform core!
- Optional Wheel Kit. Wide turf tires will not rut playing surface.
- Gel coated fiberglass sides available in green (G), blue (B), black (BK), red (R) or white (W).
- Age: Any

Add a wheel kit to your platform. This kit makes it easy for one person the move your platform around. Easy 5 minute bolt-on installation. Our platforms are pre-drilled for this kit.

Fits our Model 504

Pitch Pro Model 508 BP Platform

#101508 $1,495

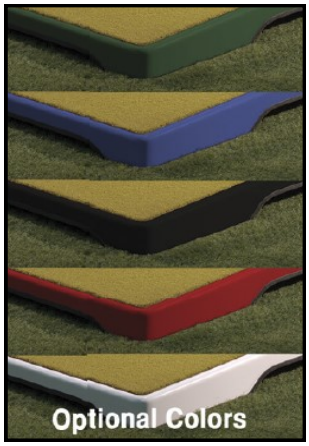

508 Batting Practice (BP) Platform

The introduction to our complete line of platforms stems from the innovation of the 508. This platform is the product of coaches, trainers, grounds crew professionals and players working together to create the best BP platform available. We were looking for an affordable mound that would not prohibit any age or level of play from being able to use it… this platform is used by ALL levels of play.

- 48” wide x 96” long x 10” high – easily stored and portable
- Platform has up to a 10” height that hitting coaches prefer to simulate game perspective
- Air Flow venting on all 4 sides – prevent grass from wilting if in place for extended period
- Used indoors and outdoors for throwing batting practice in front of game mounds or in hitting tunnels
- Weight: 110 lbs.
- TEN YEAR warranty on mound core!
- Optional Wheel Kit. Wide turf tires will not rut playing surface.

Pitch Pro Model 516 Training/Bullpen Mound

#101516 $1,885

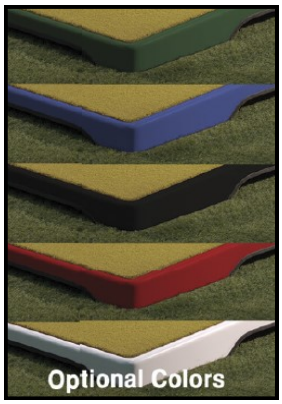

516 Bullpen Platform

Bad weather? Not much extra room? Simulate game condition? The 516 can answer all those questions and more. This bullpen platform was absolutely designed with a pitcher in mind. This EXTRA-WIDE platform will allow a pitcher to cut loose without worrying where his trail leg lands. Long enough that even the biggest stride can't reach the end. PLENTY of room behind the rubber for either side step or rocker step pitchers… wind-up or stretch. Use in a gym or outside next to the field (or on the field), the 516 will get your pitcher the work he needs - Perfect for indoor practice facilities as well.

- 54"wide x 110' long x 10" high – easily stored and portable
- Pitching Rubber with launch pad included
- Air Flow venting on all 4 sides – prevent grass from wilting if in place for extended period
- Used indoors and outdoors for working your pitching staff
- Weight: 140 lbs.
- TEN YEAR warranty on mound core!
- Optional Wheel Kit. Wide turf tires will not rut playing surface.
- Gel coated fiberglass sides available in green (G), blue (B), black (BK), red (R) or white (W).

Porta-Pitch Portable Pitcher's Mounds

Porta-Pitch Portable Pitcher's Mounds have been completely redesigned and now offer our customers an official size, truly portable baseball and little league pitcher's mound; allowing for maximum design flexibility when constructing multi-use synthetic turf or natural grass baseball fields and/or bullpen areas.

The Porta-Pitch unit is manufactured out of structural aluminum sections covered with an aluminum sheathing, a 1/4" thick rubber impact pad and factory installed red clay colored or green colored synthetic turf with a thatch layer. The main center section includes factory installed Hilltopper® Mound Clay or synthetic turf that allow for complete pitcher follow through and an official professional size 6"W x 24"L or youth size 4"W x 18"L, four (4) sided removable and rotatable pitcher's rubber, as well as an external attachable mobility wheel kit with jack and an attachable transport tow hitch, allowing for quick and easy movement of the Porta-Pitch unit on and off the field.

The surrounding sections can be stacked on top of an optional transport cart providing for faster setup and breakdown of the Porta-Pitch and more compact storage. When fully assembled for baseball, the Porta-Pitch mimics an official size, 18' diameter portable baseball pitcher's mound, meeting both the 10" height and slope to finished grade requirements and when fully assembled for little league, the Porta-Pitch mimics an official size, 10' diameter portable little league pitcher's mound, meeting both the 6" height and slope to finished grade requirements.

The new Porta-Pitch product design features allow for it to be set directly on the synthetic turf or natural grass field, as well as be installed and removed with only two to three (2 - 3) people in under 15 minutes and all without the use of foundation anchors and/or heavy equipment. This allows for quick changeovers of the field with minimal maintenance, personnel and ground rework required. More importantly, it eliminates the need for time consuming and messy all clay built mounds that must be fully constructed and removed into the field by hand. The Porta-Pitch provides a durable and cost effective alternative for all multi-use baseball and little league facilities looking to maximize the use of their playing surface for alternate sports and/or other events that require removal of their pitchers mound.

PPB WITH CLAY: Porta-Pitch Portable Baseball Pitcher's Mound, Official Size 18' Diameter and 10" Height, Includes Hilltopper® Mound Clay Infilled Center Section with External Attachable Mobility Wheel Kit with Jack, Replaceable SHBBPB Four Sided Professional Pitching Rubber and Attachable Transport Tow Hitch, Remaining Sections Arrive Fact Pre-Covered with Brown Yarn Synthetic Turf with Red Clay Thatch Layer (No Rubber and/or Sand Infill Material Necessary)	**$27,595**

BEAM CLAY®

Champro® Bases

WHOLESALE PRICE LIST
EFFECTIVE: JULY 1, 2022

CONCEPT 3000 DISLODGING SAFETY BASE

REDUCES THE POTENTIAL FOR INJURIES FROM SLIDING

On impact, the top pad dislodges from the bottom plate. The pad of the base is engineered to maintain vertical rigidity, to support a player standing on the base, while maximizing horizontal flexibility so that the pad will flex on impact.

The plate of the base is designed to be streamlined and low to the ground to allow the player to smoothly slide over the plate after the pad dislodges.

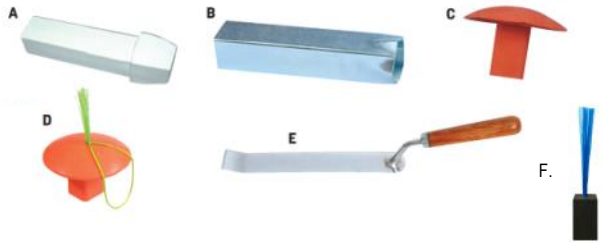

To reset the pad after it has dislodged from the plate, the posts on the pad may simply be aligned with the holes in the plate and inserted. The pad can be reset on the plate in seconds.

DISLODGING BASE SYSTEM

Official 15" x 15" size to meet Little League® requirements
Base is designed to allow the umpire to make calls as the play progresses
Heavy-duty all-rubber pad
Steel stanchion fits male & female anchor systems
3 ground anchors and 3 plugs included
*Complies with Little League® Rule 1.06

B072	15" X 15" X 3" SET OF 3 BASES	$360.23/SET

BEAM CLAY®

WHOLESALE PRICE LIST
EFFECTIVE: JANUARY 1, 2022

Soft Touch™ Bases

SOFT TOUCH™ PROGRESSIVE RELEASE BASES

Progressive release bases are designed to flex and absorb energy as a player slides into the base. In case of a short slide, the "progressive release" action allows the base to flex until enough force is applied to "pop" the base free from its mount. Available in 3 styles: Premium In-Ground Mount, Spike Down, or Anchor Style T-Stanchion. **Little League Approved.**

PREMIUM "A" SERIES IN-GROUND:

Molded from durable cut-resistant polyurethane, the molded 7" stem fits over the yellow play-plug and inside the ground mount. **The yellow play-plug remains in place when the base comes free to fill most of the cavity and reduces the potential of a player stepping inside the ground mount.**

A1500	3 - 15" Bases, Ground Mounts & play plugs	$660
Y1400	3 - 14" Youth Bases, Ground Mounts & play plugs	$635
A150L	3 - 15" Bases—Covers Only	$525
Y140L	3 - 14" Youth Bases—Covers Only	$485

"S" SERIES SPIKE DOWN:

Portable mounting system designed for easy installation, replacement, and removal for infields without ground anchors using three 3/8" x 12" metal spikes through the white mounting tee. Spikes included. No ground anchors needed!

S1500	3 - 15" Bases, Mounting Tees & Spikes	$625
S1400	3 - 14" Bases, Mounting Tees & Spikes	$800
S150L	3 - 15" Bases—Covers Only	$390
S140L	3 - 14" Bases—Covers Only	$485

"C" SERIES CONVERTIBLE FOR IN-GROUND METAL ANCHORS:

Designed to fit into your existing 1-1/2" female or 1" male ground anchors. If needed, ground anchors are sold separately.

C1500	3 - 15" Bases & Convertible Tees	$655
C1400	3 - 14" Bases & Convertible Tees	$650
C150L	3 - 15" Bases—Covers Only	$390
C140L	3 - 14" Bases—Covers Only	$395

"IN" SERIES INDOOR BASES:

IN1500/1400	3 - 15" or 14" Indoor Bases with Indoor Mounting Tees & Friction Pads	$950
IN15/IN14	1 - 15" or 14" Indoor Base with 1 - Indoor Mounting Tee & Friction Pad	$365
IN1415M	1 - Indoor Mounting Tee, No Friction Pad	$285
IN1415MS	3 - Indoor Mounting Tees, No Friction Pads	$835
INFP	1 - Indoor Friction Pad	$175

"T" SERIES FOR SYNTHETIC TURF:

T1500	3 - 15" Bases for Turf	$1,095
T15	1 - 15" Bases for Turf	$415
THP	1 - Home Plate for Turf	$315
TPR	1 - 24" Pitching Rubber for Turf	$315
T15DBL	1 - 15" White Bases for Turf and 1 - 15" Orange Base for Turf	$835
T15-OR	1 - 15" Orange Base for Turf	$435
	Lightweight *(Approx. 1/3 of the weight of the standard Soft Touch for Turf)*	
T1500LW	3 - 15" Bases for Turf—Lightweight	$995
T15LW	1 - 15" Base for Turf—Lightweight	$395
T15LW-DBL	1 - 15" White Bases for Turf—Lightweight and 1 - 15" Orange Base for Turf—Lightweight	$775
T15LW-OR	1 - 15" Orange Base for Turf—Lightweight	$395

$10 handling charge per shipment (including 3rd party orders), $25 US Postal Shipment, $25 per pallet, all residential packages are shipped "Signature Required" on both Fed-Ex and UPS unless indicated differently on PO. Partac nor Soft Touch are **NOT** liable for lost shipments if "Signature Required" designation is removed. *(These are pass thru charges directly from the manufacturer NO DISCOUNTS ON THESE FEES.)*

Check for additional discounts for 5 or more sets per item.

WARNING: Soft Touch® Bases advises that sliding into any baseball base represents a clear and present danger, injury may occur. It is the purchaser's responsibility to inform each participant of these dangers. The purchaser of these products should take warning that deviation from the installation instructions could increase the risk of injury to game participants.

BEAM CLAY®

Soft Touch™ Bases—A Series Premium Bases

Progressive Release

A Series Premium Bases

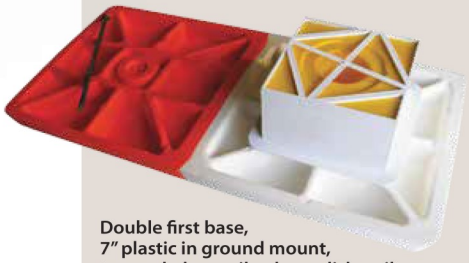

Soft Touch "Progressive Release" bases are molded from durable cut resistant polyurethane. Made in the USA, all of our bases are designed to flex and absorb energy as a player slides into the base. In the case of uncontrolled slides, the "Progressive Release" action allows the base to flex until enough force is applied to "pop" the base free from the mount, unlike any stationary base. Over the years, Soft Touch "Progressive Release" bases have been proven in play to out-perform standard bases. Soft Touch bases are fully warranted against failure due to defective materials for one year.

Product Information

With Soft Touch Premium bases, you get the ultimate in safety, installation and maintenance. The patented 7" box mounting system remains in-ground for a full season of play and the wide opening makes cleaning out dirt a snap. Lastly, these bases are constructed with the exclusive "Progressive Release" design, providing the latest safety technology.

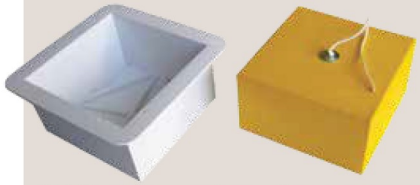

15" base, 7" plastic in ground mount, tapered plug
Soft Touch Order#: A15

Double first base,
7" plastic in ground mount,
tapered plug, spike down disk, spike
Soft Touch Order#: A15DBL

With the Soft Touch double first base, both fielder and runner have their own base, to reduce the chance of collision.

Soft Touch in ground mounting system with 7" plastic in ground mount and heavy duty drag plug
Soft Touch Order#: AY1415M
Soft Touch Order#: AYPHD

When bases are in use, a tapered plug is placed in the 7" plastic in ground mount. After play, replace the tapered plug with heavy-duty drag plugs (sold separately).

MADE IN THE USA

14" bases comply w/ Little League Rule 1.06

Warning: Sliding into a base represents a clear danger. All players must **be advised of this hazard and properly trained in sliding technique.**

S Series
Spike Down Bases

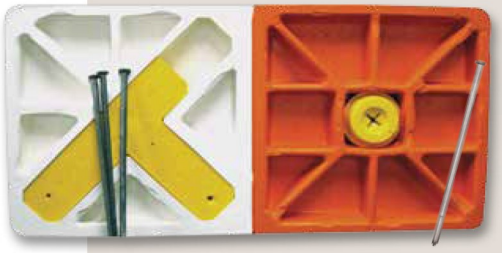

Soft Touch "Progressive Release" bases are molded from durable cut resistant polyurethane. Made in the USA, all of our bases are designed to flex and absorb energy as a player slides into the base. In the case of uncontrolled slides, the "Progressive Release" action allows the base to flex until enough force is applied to "pop" the base free from the mount, unlike any stationary base. Over the years, Soft Touch® "Progressive Release" bases have been proven in play to out-perform standard bases. Soft Touch® bases are fully warranted against failure due to defective materials for one year.

Product Information

No mounting system? Not a problem! Soft Touch Spike Down bases are specifically created for teams, leagues and facilities that do not have a mounting system in place. With the unique spike down feature, game-time installation and removal is a breeze. These bases are also ideal for practice or an impromptu game in any grassy area. The exclusive "Progressive Release" technology provides unmatched safety for players.

15" Base with spike down tee and spikes
Soft Touch Order #: S15

15" double first base, mounting tee, spike down disk and spikes
Soft Touch Order #: S15DBL

With the Soft Touch® Double First Base, both fielder and runner have their own base, to reduce the chance of collision.

15" base
Soft Touch Order #: S15L

MADE IN THE USA

14" bases comply w/ Little League Rule 1.06

Warning: Sliding into a base represents a clear danger. All players must be advised of this hazard and properly trained in sliding technique.

BEAM CLAY®

Soft Touch™ Bases—IN Series Indoor Bases

IN Series Indoor Bases

Practice year round with Soft Touch® Indoor Bases! The revolutionary suction cup mounting system applies to any smooth practice surface, providing Soft Touch quality and safety without the hassle of seasonal weather. In the case of a textured surface a friction pad is included. These bases allow teams to conveniently practice indoors during inclement weather.

Soft Touch® bases have been proven in play to out-perform standard bases and they are fully warranted against failure due to defective materials for one full year.

Soft Touch® "A" Series-Premium In-Ground Mount Bases Installation Instructions

These instructions should be read thoroughly before installation. If there are questions concerning the installation or use of these bases, consult Soft Touch® Bases before using them.

The patented Soft Touch® base is designed for easy installation and maintenance. It is designed to flex and absorb energy as a player slides into the base. A forceful slide applied to the base will disengage it from the mount, to be replaced easily after disengagement.

Ground Mount Cement Installation:
(NOTE: This is the recommended installation method.)

Step 1: Make sure site is level.
Step 2: Place the base upside down in the proper location (square to the base line for 1st base). Mark the outline of the base on the ground. (See Fig. 1)
Step 3: Excavate a 10"x 10" square in the center of the base outline for the ground receptacle and cement.
Step 4: Place cement around the sides and bottom of the hole so that the flange fits one inch below the playing surface. Cement should be lapped slightly over the corner braces only in the bottom. The center of the receptacle should have no cement installed and should be left open for drainage. Taper the cement 3" from the top of the flange at a 45° angle. (See Fig. 2)
Step 5: After the cement has dried, level and tamp the ground around the top of the receptacle to insure that the base will lay flat and level and that the flange is at the correct depth of one inch from the playing surface.

(To speed the installation process the mounts can be encased in cement off site and allowed to dry before installation)

FOR MAXIMUM STABILITY, THE UNDERSIDE OF THE BASE SHOULD MAKE FULL CONTACT WITH THE GROUND AT ALL TIMES WITH NO VOIDS OR HOLLOWS.

Ground Mount Dirt Installation: **(NOTE: It is recommended that the ground receptacle be cemented in place.)**
Step 1: Follow steps 1 and 2 above for cement installation.
Step 2: Excavate an 8" x 8" square in the center of the base outline for the ground receptacle.
Step 3: Place the ground receptacle in the hole with the flange of the mount one inch below the playing surface. Pack and tamp the dirt around the sides and bottom of receptacle. The final installation depth should be one inch below ground level.

FOR MAXIMUM STABILITY, THE UNDERSIDE OF THE BASE SHOULD MAKE FULL CONTACT WITH THE GROUND AT ALL TIMES WITH NO VOIDS OR HOLLOWS.

CAUTION
The flange of the ground receptacle should not be less than one inch below the playing surface at any time to insure that players will not make contact with it.

Soft Touch® "A" Series-Premium In-Ground Mount Bases Installation Instructions *continued*

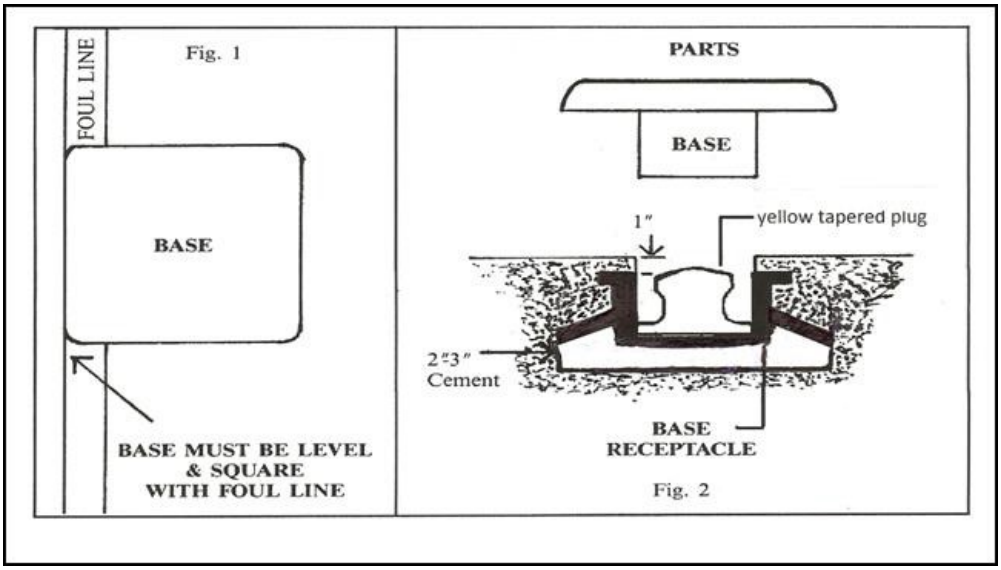

Tapered Yellow Plug

The yellow plug is to be used inside each ground receptacle ***during*** play. Placing widest part in first, firmly push yellow plug into ground receptacle until properly seated. Bases will then fit over the top of the yellow plugs. When a base releases from the ground receptacle, this plug will prevent a player from stepping into an open hole.

When the base has been dislodged it can be replaced quickly and easily. Before replacement, the ground should be leveled out to eliminate any buildup of dirt under the base and any dirt in the receptacle should be removed to insure that the base will sit fully supported by the ground and level. *Optional:* Heavy duty drag plugs can be purchased for dragging the field and filling the receptacle when the bases ***are not*** in use.

PLEASE NOTE

If the base releases easily or releases too frequently, check the distance from the flange top to the playing surface. The distance should be one inch. The deeper the receptacle is buried, the easier the base will pop out of the ground mount. Remember, the base should always lay flat with full ground support on the underside. Dirt will sometimes build up during play, increasing the depth at which the ground mount is buried. It is important that a proper and regular maintenance program be followed to insure that the bases will lay flat and level on the field and perform as intended.

Warranty

Soft Touch® bases are warranted against defects in materials and workmanship when used in a usual and customary manner for one year (defined as a regular season of normal length for softball or baseball). Warranty is void if any changes are made to the original mounting system or not installed as per installation instructions. **Proof of purchase is required in the form of dealer PO number, Invoice number, or any other documentation that will verify when products were purchased.** Normal wear and tear is excluded from coverage. **Pictures of defective merchandise are required** and the Manufacturer may request that merchandise be returned before any warranty adjustment will be made. The liability of the Manufacturer for a warranty is limited to either a refund of the purchase or replacement of the defective product.

Disclaimer

Be advised that sliding into a baseball/softball base may cause serious and permanent injury. No base, however constructed or designed, can prevent all injuries and the Soft Touch® base is no exception. The Manufacturer advises that deviation from installation instructions, failure to properly install and maintain bases, and failure to properly groom playing surfaces around bases and home plate area, could increase the risk of injury to players. Under no circumstances should these bases or base anchors be modified, altered, tampered with, or used when they are damaged, as serious injury may occur. Buyer is responsible for furnishing proper installation instructions to the purchaser.

Soft Touch® A Series –A15DBL Installation Instructions

These instructions should be read thoroughly before installation. If there are questions concerning the installation or use of these bases, consult Soft Touch® Bases before using them.

The Soft Touch® Double First Base with Soft Touch® In-ground mount, disk, and spike has been designed to alleviate the problems of installation and misalignment with regular double stem bases and ground mounts. **Although the double first base uses the patented disk anchor from the Soft Touch® base system, the base is not designed as a release or pop-off style base.**

PLEASE NOTE
The Soft Touch Double First Base is not a "progressive release" or "pop-off" style base due to the dual anchor system and should not be used in that way.

Ground Mount Cement Installation: (NOTE: This is the recommended installation method.)

Step 1: Make sure site is level.
Step 2: Place the base upside down in the proper location (square to the base line for 1st base). Mark the outline of the base on the ground. (See Fig. 1)
Step 3: Excavate a 10"x 10" square in the center of the base outline for the ground receptacle and cement.
Step 4: Place cement around the sides and bottom of the hole so that the flange fits one inch below the playing surface. Cement should be lapped slightly over the corner braces only in the bottom. The center of the receptacle should have no cement installed and should be left open for drainage. Taper the cement 3" from the top of the flange at a 45° angle. (See Fig. 2)
Step 5: After the cement has dried, level and tamp the ground around the top of the receptacle to insure that the base will lay flat and level and that the flange is at the correct depth of one inch from the playing surface. (To speed the installation process the mounts can be encased in cement off site and allowed to dry before installation)

FOR MAXIMUM STABILITY, THE UNDERSIDE OF THE BASE SHOULD MAKE FULL CONTACT WITH THE GROUND AT ALL TIMES WITH NO VOIDS OR HOLLOWS.

Ground Mount Dirt Installation: (NOTE: It is recommended that the ground receptacle be cemented in place.)
Step 1: Follow steps 1 and 2 above for cement installation.
Step 2: Excavate an 8" x 8" square in the center of the base outline for the ground receptacle.
Step 3: Place the ground receptacle in the hole with the flange of the mount one inch below the playing surface. Pack and tamp the dirt around the sides and bottom of receptacle. The final installation depth should be one inch below ground level.

FOR MAXIMUM STABILITY, THE UNDERSIDE OF THE BASE SHOULD MAKE FULL CONTACT WITH THE GROUND AT ALL TIMES WITH NO VOIDS OR HOLLOWS.

CAUTION
The flange of the ground receptacle should not be less than one inch below the playing surface at any time to insure that players will not make contact with it.

Soft Touch® A Series –A15DBL Installation Instructions *continued*

Tapered Yellow Plug

The yellow plug is to be used inside each ground receptacle ***during*** play. Placing widest part in first, firmly push yellow plug into ground receptacle until properly seated. Bases will then fit over the top of the yellow plugs. When a base releases from the ground receptacle, this plug will prevent a player from stepping into an open hole.

Mounting for Orange Base with disk:

Step 1: The orange portion of the base should be in the foul territory. Press down the orange cover to make an impression of the bottom of the base on the ground. Pick up the double base. Place the disk in the center square over the ground impression with the washer facing up. Drive the spike through the hole in center of the disk until the head of the spike rests on the washer. Manufacturer advises that this position for the disk is the **only** position that should be used for all play.

Step 2: Align the recess in the base cover with the installed ground disk. The ground below the base cover should be flat and level with no hollows, depressions or soil buildup.

Step 3: Step on the cover until it completely snaps over the ground disk and the base lays flat on the ground.

Removal

To remove the cover from the disk, grasp the base and pull upward. The cover will release from the disk. To remove the disk from the ground use a flat bar to pry up on the underside of the disk near the spike. **Do not pull up on the disk with the spike still in place.** This may cause the disk to tear around the holes or pull the spike through and thereby void the warranty.

It is important that a proper and regular maintenance program be followed to insure that the bases will lay flat and level on the field and will perform as intended.

Warranty

Soft Touch® bases are warranted against defects in materials and workmanship when used in a usual and customary manner for one year (defined as a regular season of normal length for softball or baseball). Warranty is void if any changes are made to the original mounting system or not installed as per installation instructions. **Proof of purchase is required in the form of dealer PO number, Invoice number, or any other documentation that will verify when products were purchased.** Normal wear and tear is excluded from coverage. **Pictures of defective merchandise are required** and the Manufacturer may request that merchandise be returned before any warranty adjustment will be made. The liability of the Manufacturer for a warranty is limited to either a refund of the purchase or replacement of the defective product.

Disclaimer

Be advised that sliding into a baseball/softball base may cause serious and permanent injury. No base, however constructed or designed, can prevent all injuries and the Soft Touch® base is no exception. The Manufacturer advises that deviation from installation instructions or failure to properly install and maintain bases and to properly groom playing surfaces around bases and home plate area could increase the risk of injury to players. Under no circumstances should these bases or base anchors be modified, altered, tampered with, or used when they are damaged, as serious injury may occur. Buyer is responsible for furnishing proper installation instructions to the purchaser.

BEAM CLAY®

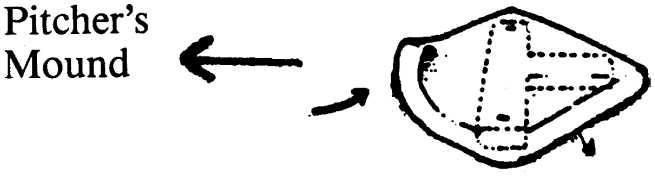

"S" Series - Spike Down Bases Installation Instructions

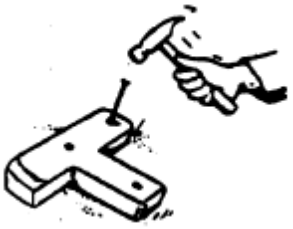

These instructions should be read thoroughly before installation. If there are questions concerning the installation or use of these bases, consult Soft Touch® Bases before using them. It is important that a regular maintenance program be followed to insure the bases will lay flat and level on the field and perform as needed.

The patented Soft Touch® base is designed for easy installation, replacement, and removal from playing fields. It is designed to flex and absorb energy as a player slides into the base. A forceful slide applied to the base will disengage it from the mount, to be replaced easily after disengagement.

Step 1: Make sure site is level. Measure and mark the proper location for each base. Place the base cover in proper position with the arrow in the corner of the cover pointing toward the pitcher's mound. Remove the cover and an impression of the underside of the base will be outlined in the dirt.

Step 2: Place the spike tee over the ground impression with the arrow pointing toward the pitcher's mound. Drive the three spikes through the holes in the outer edges of the tee until the heads of the spikes are below the top of the tee. **Note**: Manufacturer advises that pointing the arrow toward the pitcher's mound is the **only** position that should be used for all play.

Step 3: Align the recess in the base cover with the installed spike tee. The ground below the base cover should be flat and level with no hollows, depressions, or buildup under the base.

Step 4: Step on the cover until it completely snaps over the tee and lays flat on the ground. The ground be low the base cover should be flat and level with no hollows, depressions, or buildup under the base.

To remove the tee from the ground use a flat bar to pry up on the underside of the tee near the spikes. **Do not pull up on the tee with the spikes still in place**. This may cause the tee to tear around the holes or pull the spikes through and thereby void the warranty.

Replacement of cover: To replace the base cover after disengagement, smooth dirt around the tee and below the area of the base cover to insure a flat level surface. Shake out any dirt that may be lodged in the underside of the cover. Replace cover and step down on it until it snaps into place.

Warranty

Soft Touch® bases are warranted against defects in materials and workmanship when used in a usual and customary manner for one year (defined as a regular season of normal length for softball or baseball). Warranty is void if any changes are made to the original mounting system or not installed as per installation instructions. **Proof of purchase is required in the form of dealer PO number, Invoice number, or any other documentation that will verify when products were purchased.** Normal wear and tear is excluded from coverage. **Pictures of defective merchandise are required** and the Manufacturer may request that merchandise be returned before any warranty adjustment will be made. The liability of the Manufacturer for a warranty is limited to either a refund of the purchase or replacement of the defective product.

Disclaimer

Be advised that sliding into a baseball/softball base may cause serious and permanent injury. No base, however constructed or designed, can prevent all injuries and the Soft Touch® base is no exception. The Manufacturer advises that deviation from installation instructions, failure to properly install and maintain bases, and failure to properly groom playing surfaces around bases and home plate area, could increase the risk of injury to players. Under no circumstances should these bases or base anchors be modified, altered, tampered with, or used when they are damaged, as serious injury may occur. Buyer is responsible for furnishing proper installation instructions to the purchaser.

BEAM CLAY®

"S" Series - S15DBL Installation Instructions

These instructions should be read thoroughly before installation. If there are questions concerning the installation or use of these bases, consult Soft Touch® Bases before using them. It is important that a regular maintenance program be followed to insure the bases will lay flat and level on the field and perform as needed.

The Soft Touch® Double First Base with a spike down tee, disk, and spikes has been designed to alleviate the problems of installation and misalignment with regular double stem bases and ground mounts. **Although the double first base uses the patented disk anchor from the Soft Touch® base system, the base is not designed as a release or pop-off style base.**

PLEASE NOTE The Soft Touch Double First Base is not a "progressive release" or "pop-off" style base due to the dual anchor system and should not be used in that way.

Step 1: Make sure site is level. Place the double first base on the ground, square to the baseline for 1st base. The orange side should be in foul territory. This will create an impression of the base in the ground.

Step 2: Place the spike tee over the ground impression of the white side of the base with the arrow pointing toward the pitcher's mound. Drive the three spikes through the holes in the outer edges of the tee until the heads of the spikes are below the top of the tee. **Note:** Manufacturer advises that pointing the arrow toward the pitcher's mound is the only position that should be used for all play.

Step 3: Place the disk in the center of the ground impression on the orange side with the washer facing up. Drive the spike through the hole in the center of the disk until the head of the spike rests on the washer.

Step 4: Align the recess in the base cover with the installed spike tee and disk. The ground below the base cover should be flat and level with no hollows, depressions, or buildup under the base.

Step 5: Step on the cover until it completely snaps over the tee and lays flat on the ground. The ground below the base cover should be flat and level with no hollows, depressions, or buildup under the base.

Removal

To remove the cover from the ground, grasp the base and pull upward. The cover will release from the disk and tee. To remove the tee and disk from the ground use a flat bar to pry up on the underside of the tee and disk near the spikes. Do **not pull up on the tee or disk with the spikes still in place.** This may cause the tee or disk to tear around the holes or pull the spikes through and thereby void the warranty.

Warranty

Soft Touch® bases are warranted against defects in materials and workmanship when used in a usual and customary manner for one year (defined as a regular season of normal length for softball or baseball). Warranty is void if any changes are made to the original mounting system or not installed as per installation instructions. **Proof of purchase is required in the form of dealer PO number, Invoice number, or any other documentation that will verify when products were purchased.** Normal wear and tear is excluded from coverage. b and the Manufacturer may request that merchandise be returned before any warranty adjustment will be made. The liability of the Manufacturer for a warranty is limited to either a refund of the purchase or replacement of the defective product.

Disclaimer

Be advised that sliding into a baseball/softball base may cause serious and permanent injury. BEAM CLAY®

"C" Series - Convertible Bases Installation Instructions

These instructions should be read thoroughly before installation. If there are questions concerning the installation or use of these bases, consult Soft Touch® Bases before using them. It is important that a regular maintenance program be followed to insure the bases will lay flat and level on the field and perform as needed.

The patented Soft Touch® base is designed for easy installation, replacement, and maintenance. It is designed to flex and absorb energy as a player slides into the base. A forceful slide applied to the base will disengage it from the mount, to be replaced easily after disengagement.

The Soft Touch® Convertible Tee will fit any existing 1" ground anchor stem or 1½" ground anchor sleeve.

Installing ground anchors: (If you already have 1" or 1 ½" ground anchors in your field proceed to Step 5)

Step 1: Build a form for the 1" or 1 ½" anchor of your choice. Center the anchor and fill form with concrete.

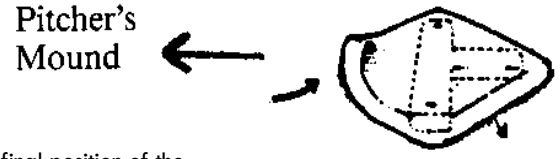

Step 2: Make sure site is level. Measure and mark the proper location for each base and excavate a hole.

Step 3: Place and level the anchors. The top of the ground anchor should be 1" below the playing surface. The ground tee will be at a 45° angle to the base line and level with the ground at the final installation.

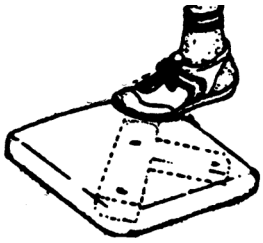

Step 4: Bury the anchor adding soil a couple of inches at a time compacting thoroughly. The stem of the tee should not make contact with any concrete of the ground anchor and should lay flat on the ground. The tee should be fully supported at all points of the playing field.

Step 5: Place the tee in the ground anchor with the longest part of the tee facing away from the pitcher's mound.

Step 6: Align the recess in the base cover with the tee. The arrow on the base should be pointing toward the pitcher's mound. Manufacturer advises that pointing the arrow towards the pitcher's mound is the only position that should be used for all play.

Step 7: Step on cover until it completely snaps over the tee and lays flat on the ground. The final position of the base should be square with the base line. The ground below the base cover should be flat and level with no hollows, depressions, or buildup under the base.

Replacement of cover: To replace the base cover after disengagement, smooth dirt around the tee and below the area of the base cover to insure a flat level surface. Shake out any dirt that may be lodged in the underside of the cover. Replace cover and step down on it until it snaps into place.

Warranty

Soft Touch® bases are warranted against defects in materials and workmanship when used in a usual and customary manner for one year (defined as a regular season of normal length for softball or baseball). Warranty is void if any changes are made to the original mounting system or not installed as per installation instructions. **Proof of purchase is required in the form of dealer PO number, Invoice number, or any other documentation that will verify when products were purchased.** Normal wear and tear is excluded from coverage. **Pictures of defective merchandise are required** and the Manufacturer may request that merchandise be returned before any warranty adjustment will be made. The liability of the Manufacturer for a warranty is limited to either a refund of the purchase or replacement of the defective product.

Disclaimer

Be advised that sliding into a baseball/softball base may cause serious and permanent injury. No base, however constructed or designed, can prevent all injuries and the Soft Touch® base is no exception. The Manufacturer advises that deviation from installation instructions, failure to properly install and maintain bases, and failure to properly groom playing surfaces around bases and home plate area, could increase the risk of injury to players. Under no circumstances should these bases or base anchors be modified, altered, tampered with, or used when they are damaged, as serious injury may occur. Buyer is responsible for furnishing proper installation instructions to the purchaser.

BEAM CLAY®

"C" Series - C15DBL Installation Instructions

These instructions should be read thoroughly before installation. If there are questions concerning the installation or use of these bases, consult Soft Touch® Bases before using them. It is important that a regular maintenance program be followed to insure the bases will lay flat and level on the field and perform as needed.

The Soft Touch® Double First Base with a convertible tee, disk, and spike has been designed to alleviate the problems of installation and misalignment with regular double stem bases and ground mounts. Although the double first base uses the patented disk anchor from the Soft Touch® base system, the base is not designed as a release or pop-off style base.

PLEASE NOTE
The Soft Touch Double First Base is not a "progressive release" or "pop-off" style base due to the dual anchor system and should not be used in that way.

The Soft Touch® Convertible Tee will fit any existing 1" ground anchor stem or 1½" ground anchor sleeve.

Installing ground anchors: (If you already have 1" or 1 ½" ground anchors in your field proceed to Step 5)

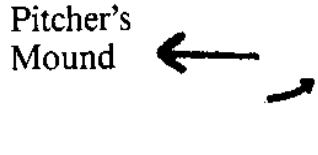

Step 1: Build a form for the 1" or 1 ½" anchor of your choice. Center the anchor and fill form with concrete.

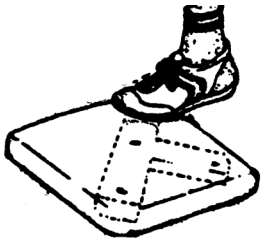

Step 2: Measure and mark the proper location for each base and excavate a hole.

Step 3: Place and level the anchors. The top of the ground anchor should be 1" below the playing surface. The ground tee will be at a 45° angle to the base line and level with the ground at the final installation.

Step 4: Bury the anchor adding soil a couple of inches at a time compacting thoroughly. The stem of the tee should not make contact with any concrete of the ground anchor and should lay flat on the ground. The tee should be fully supported at all points of the playing field.

Step 5: Place the tee in the ground anchor with the longest part of the tee facing away from the pitcher's mound.

Step 6: Align the white side of the double first base with the tee. The base should be square to the baseline for first base and orange side should be in foul territory. Press down on the orange cover to make an impression of the bottom of the base in the ground. Pick up the base. Place the disk in the center of the ground impression with the washer facing up. Drive the spike through the hole in the center of the disk until the head of the spike rests on the washer.

Step 7: Step on cover until it completely snaps over the tee and lays flat on the ground. The ground below the base cover should be flat and level with no hollows, depressions, or buildup under the base.

Removal
To remove the cover from the ground, grasp the base and pull upward. The cover will release from the disk and tee. To remove the disk from the ground use a flat bar to pry up on the underside of the disk near the spike. **Do not pull up on the disk with the spike still in place.** This may cause the disk to tear around the holes or pull the spike through and thereby void the warranty.

Warranty
Soft Touch® bases are warranted against defects in materials and workmanship when used in a usual and customary manner for one year (defined as a regular season of normal length for softball or baseball). Warranty is void if any changes are made to the original mounting system or not installed as per installation instructions. **Proof of purchase is required in the form of dealer PO number, Invoice number, or any other documentation that will verify when products were purchased.** Normal wear and tear is excluded from coverage. **Pictures of defective merchandise are required** and the Manufacturer may request that merchandise be returned before any warranty adjustment will be made. The liability of the Manufacturer for a warranty is limited to either a refund of the purchase or replacement of the defective product.

Disclaimer
Be advised that sliding into a baseball/softball base may cause serious and permanent injury. No base, however constructed or designed, can prevent all injuries and the Soft Touch® base is no exception. The Manufacturer advises that deviation from installation instructions or failure to properly install and maintain bases and to properly groom playing surfaces around bases and home plate area could increase the risk of injury to players. Under no circumstances should these bases or base anchors be modified, altered, tampered with, or used when they are damaged, as serious injury may occur. Buyer is responsible for furnishing proper installation instructions to the purchaser.

BEAM CLAY®

"IN" Series - Indoor Bases Installation Instructions

These instructions should be read thoroughly before installation. If there are questions concerning the installation or use of these bases, consult Soft Touch® Bases before using them.

The Soft Touch® Indoor Base has been designed to allow for practice year round with the same intensity and safety as outdoor play. The suction cup mounting system applies to any smooth practice surface.

Step 1: Wipe the surface with a clean cloth, removing dirt and dust from the area where the base will be placed. The base will work best on a smooth seamless surface. **IMPORTANT: Be sure vacuum tee will hold firmly to floor. A square friction pad has been provided for use on floor surfaces that do not have a smooth seamless surface.** Wipe area, pad and suction cups and lay the pad in the proper location.

Step 2: Measure and mark the proper location for each base. Insert the tee into the under side of the base. Place the base cover in the proper position with the arrow in the corner pointing toward the pitcher's mound.

Note: Manufacturer advises that pointing the arrow toward the pitcher's mound is the only position that should be used for all play.

Step 3: Place the base cover with the vacuum cupped tee on the floor/pad. Step down on the base cover to create the vacuum needed to adhere the cups to the floor. Check the base to be sure the vacuum cups are holding the base in place. You are now ready for play.

Sliding into this base **IS NOT RECOMMENDED**.

Removal

To remove base from floor, pull base cover off of tee. Then remove the tee by pulling up one edge of vacuum cup until it releases.

It is IMPORTANT that the bases be checked before each use to be sure that the vacuum cups are holding the base in place.

Warranty

Soft Touch® bases are warranted against defects in materials and workmanship when used in a usual and customary manner for one year (defined as a regular season of normal length for softball or baseball). Warranty is void if any changes are made to the original mounting system or not installed as per installation instructions. **Proof of purchase is required in the form of dealer PO number, Invoice number, or any other documentation that will verify when products were purchased.** Normal wear and tear is excluded from coverage. **Pictures of defective merchandise are required** and the Manufacturer may request that merchandise be returned before any warranty adjustment will be made. The liability of the Manufacturer for a warranty is limited to either a refund of the purchase or replacement of the defective product.

Disclaimer

Be advised that sliding into a baseball/softball base may cause serious and permanent injury. No base, however constructed or designed, can prevent all injuries and the Soft Touch® base is no exception. The Manufacturer advises that deviation from installation instructions or failure to properly install and maintain bases and to properly groom playing surfaces around bases and home plate area could increase the risk of injury to players. Under no circumstances should these bases or base anchors be modified, altered, tampered with, or used when they are damaged, as serious injury may occur. Buyer is responsible for furnishing proper installation instructions to the purchaser.

"T" Series - Turf Bases Installation Instructions

These instructions should be read thoroughly before installation. If there are questions concerning the installation or use of these bases, consult Soft Touch® Bases before using them.

The patented Soft Touch® base is designed for easy installation and maintenance. It is designed for use on synthetic playing fields.

The Soft Touch® for Turf is not a "progressive release" or "pop-off" style base. It is considered a "throw down" base. Also, it is not a stationary base.

Our unique design requires no mounting system and sits securely on the synthetic turf. Simply measure and mark the location for each base and place the base on the field. Easy to install, Soft Touch® for Turf can remain on the field year round or set up for game-time.

Warranty
Soft Touch® bases are warranted against defects in materials and workmanship when used in a usual and customary manner for one year (defined as a regular season of normal length for softball or baseball). Warranty is void if any changes are made to the original mounting system or not installed as per installation instructions. **Proof of purchase is required in the form of dealer PO number, Invoice number, or any other documentation that will verify when products were purchased.** Normal wear and tear is excluded from coverage. **Pictures of defective merchandise are required** and the Manufacturer may request that merchandise be returned before any warranty adjustment will be made. ROGERS® ONE TIME HOME PLATE #RHP-1

Rogers® One Time™ Home Plate is an innovative and cost efficient Bury-All home base. Replaceable white top extends the useful life of the plate. "Up-Tight" beveled collar prevents gaps and exposed edges that otherwise may cause sliding injuries. Patented design includes integrated marks and steel set-up pins to assist with field set-up.

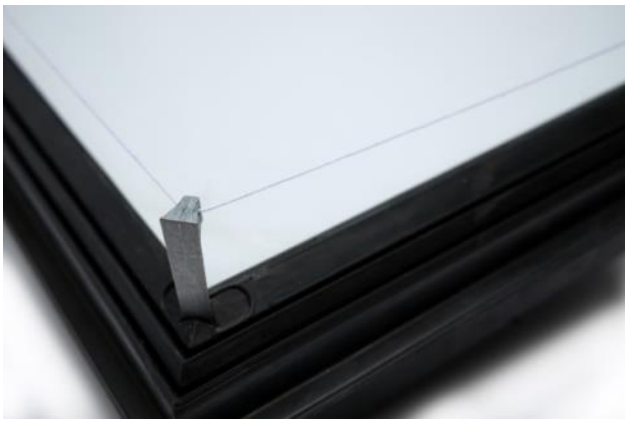

Rogers® One Time™ Home Plate features:

- Replaceable anti-skid white top with interlocking edges
- Beveled collar ensures infield material stays tight against home plate to eliminate gaps and sharp edges
- Integrated marks and pins provide an excellent guide to set up and line the baseball field
- Durable all-rubber waffle bottom provides a stable foundation that will not deteriorate over time

System includes:

- Bottom – 100% durable natural rubber construction – no wood components that deteriorate
- Bevelled Collar
- One (1) smooth white home plate top
- Two (2) field set-up pins / base plugs

BEAM CLAY®

Rogers® Break Away Bases®

Rogers® Break Away Base® System

The safest, most durable dis-engageable base on the market. Sets the standard that others have attempted to follow. The only base clinically proven to reduce injuries. *

The base system is unique in design from the ground up and consists of three components:

ANCHOR SYSTEM - The anchor ensures the base system will not shift or tilt after installation and includes a set of 15x15x8 plastic anchor housing forms for pouring concrete. In addition, the top of the housing has notches that lock the base plate into place for superior performance.

BASE PLATE - Durable rubber grommets strategically positioned on a rubber coated steel plate allow for controlled deformation and release of the base top when necessary.

BASE TOP - Durable rubber exterior infused with anti-skid materials, UV inhibitors and ribbed corners for ultimate traction when rounding bases. Varying degrees of firmness and connectivity to the base plate accommodates players from youth to college level play.

MODEL	RECOMMENDED USAGE TABLE
Youth	MALE up to 12 Years - FEMALE up to 16 Years
Teen	MALE 12 to 16 Years - FEMALE 16 to 21 Years
Adult	MALE 16 Years & Up - FEMALE 21 Years & Up
Pro	Advanced or College/Professional Players Only

Rogers® Break Away Bases®

Rogers® Break Away Base® Double First Systems

Rogers® Step Away™ Low Profile Double First Base

- Lightweight and easy to use.
- Add-on orang base clips on to the side of 1st base.
- Low profile design (1 1/2" high) allows Break Away Base to clear orange base when releasing.
- No additional ground anchor required.
- System includes one (1) modified base plate and one (1) low-profile orange base.

Rogers® Single-Molded Break Away Double First Base

- Traditional single-molded double first base without the double anchor
- White and orange section of the base molded together as one unit and the same height
- White side attaches to the base plate at first base; orange side is stabilized by tacks underneath the orange section that grip the dirt in foul territory.

BEAM CLAY®

Rogers® Break Away Bases®

Rogers® One Time Home™ Plate

Rogers® One Time™ Home Plate is a patented Bury-All plate with two very unique features. 1) A replaceable white top section that extends the lifespan of the plate and 2) Steel "set-up" pins that can be inserted into the back of the plate with string used to center the pitcher's rubber and 2nd base. It can also be used as a guide for chalking foul lines by pulling the string down the outer edges of 1st & 3rd base.

One Time™ Home Plate	Set-Up Pin	Replaceable Top
		

Replaceable Top Plate:

Durable non-skid, replacement top engineered with side edges that lock the top into place. Replacement feature extends the lifespan of the home plate and reduces equipment costs.

Beveled Collar:

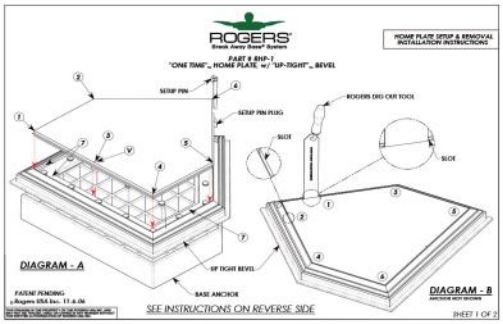

"Up Tight" beveled collar ensures infield material remains tight against the home plate eliminating injuries caused by gaps and exposed edges. Prevents base runners from catching cleats while sliding into home.

Home Base Anchor:

Molded, heavy-duty rubber waffle bottom design provides a stable foundation that will not deteriorate over time.

Steel Pin & Rubber Plug:

Integrated marks & pins provide an excellent guide to properly set up your field and can also be used as guides for chalking foul lines.

BEAM CLAY®

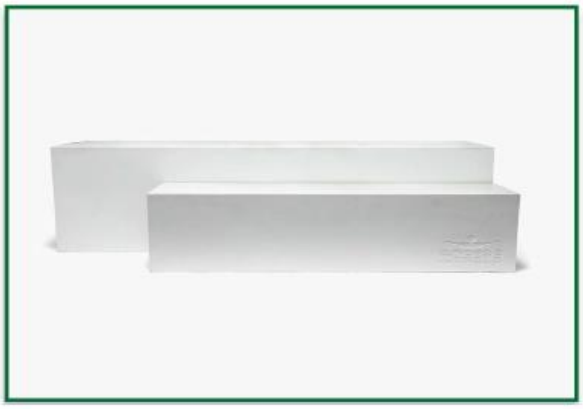

Rogers® Break Away Bases®

Rogers® Break Away Base® System

The safest, highest performing, most durable disengagable base on the market. Sets the standard that others have attempted to follow.

- The base system is unique in its design and consists of three components:
  - ***Anchor System*** – The anchor ensures that the system will not shift after installation and ensures that the position of the base plate is at the grade of the field and does not create a secondary hazard.
  - ***Base Plate*** – Durable rubber grommets are positioned on a rubber coated steel plate and allow for a controlled deformation and release of the base top when necessary.
  - ***Base Top*** - The construction of the base top allows for varying degrees of firmness to match the level of competition.

- There are no magnets or stationary above ground components that can malfunction or cause safety issues.
- High quality, natural rubber construction provides years of use.
- Multiple base tops provide superior performance at all levels of play and environmental conditions.
- The only base clinically proven to reduce injuries. The documentation is available on numerous studies and clinical trials that you can share with your customers regarding the performance and effectiveness of this product
- Product Endorsements / Sponsorships include:
  - Little League® International
    - Used at Little League® World Series and all Williamsport complex fields
    - Used at all Little League® US Regional qualifying tournaments
    - Used at Little League® Asia-Pacific Tournament in Hong Kong

Rogers® Break Away Bases®

Rogers® One Time™ Home Plate is a one of a kind modular component baseball home plate system that enhances safety at the plate, provides improved field maintenance and saves money. Interchangeable smooth or grooved white tops are easy to replace without the need to replace the entire system.

Rogers One Time™ Home Plate features:

Modular design allows for easy replacement on the field

Beveled collar ensures infield material stays tight against home plate to eliminate gaps and sharp edges

Integrated marks and pins provide an excellent guide to set and line the baseball field

Patented grooves on the interchangeable plates provide a non-slip surface

100% high quality natural rubber construction

System includes:

Bottom - 100% durable natural rubber construction - no wood components that deteriorate

Beveled Collar

One (1) smooth white home plate top (small and large grooved white base tops sold separately)

Two (2) field set-up pins / base plugs

Rogers One Time™ Home Plate ***Large Groove*** Replacement Top.

Rogers One Time™ Home Plate ***Large Groove*** Replacement Top. Large groove design reduces slipping. Patented modular design allows for interchangeable components and saves money. Smooth and small groove tops also available/sold separately. Compatible with Rogers One Time™ Home Plate Only.

Rogers One Time™ Home Plate ***Small Groove*** Replacement Top.

Rogers® Break Away Bases®

Breakaway Base Rule Goes Into Effect Soon

WILLIAMSPORT, Pa. (Oct. 3, 2006) – Local Little Leagues have until the 2008 season to install breakaway bases for all levels of play, if they have not already done so.

So now is the best time to get this important project done!

The new rule appeared in the 2006 baseball and softball rule books of Little League:

Rule 1.06: Beginning with the 2008 season, it will become mandatory that all leagues utilize bases that disengage their anchor. Leagues are encouraged to begin the process of implementing these types of base systems during the current season on all their fields so that the process is completed by the 2008 season.

ROGERS® BREAK AWAY BASES® are Little League Approved

BEAM CLAY®

Stackhouse Line Marking Equipment—Dry

WHOLESALE PRICE LIST
EFFECTIVE: JANUARY 1, 2022

STACKHOUSE LINERS

All Stackhouse four-wheel liners (except LPFP50) use a heavy duty, 20 gauge steel body with an attractive powder coated blue finish. The liner body has been designed so that its wedge shape ensures a constant flow of chalk to the bottom of the liner. Our liner gut, which is driven by the liner wheels, has an auger at each end that forces the chalk into a six-bar expulsion wheel which ensures a consistent flow of chalk. A fingertip control allows you to adjust the thickness of your line and control shut-off of chalk. The liners ride on rubber diamond-tread wheels that use steel hubs and bearings for minimum rolling resistance. The liners offer both a 2" and 4" line for baseball, football, and soccer fields. These features, combined with the 5 models we offer, allow you to pick the best liner for your purpose - within your budget.

5 YEAR WARRANTY
ON ALL STACKHOUSE LINERS

#LR50 - Line Ranger 50

This heavy duty, 50 lb. capacity liner is ideal for lining multiple baseball fields. 10" pneumatic wheels give a smooth rolling ride for easy field lining. 2" to 4" line. Powder coated

Shipping: UPS 54 lbs. Ships Dimensional

LR50	**$455**

#LG50 - Genie 50

Our most popular liner! This 50-pound capacity liner rides on four 8" wheels. This liner is designed for the school on a budget and offers all the quality and durability of the bigger liners. Ideal for football and baseball fields. 2" to 4" line. Powder coated.

Shipping: UPS 58 lbs.

EFFECTIVE: AUGUST 1, 2022

Alumagoal 4-Wheel Line Markers w/ Pneumatic Tires

- Durable design with an 11-gauge steel frame, 18-gauge galvanized steel bucket and steel axle bushings
- Four 10" D pneumatic tires maneuver the marker across playing fields
- Two handles with grips offer a sturdy hold for pushing the marker
- Settings can be easily adjusted to switch between 2 in. dry lines and 4 in. dry lines

BBHDDM10—100# Capacity	**$515**
BBHDDM50—50# Capacity	**$470**

Alumagoal All-Steel Dry Line Marker 25lb.

- All-steel construction is strong and durable enough to withstand heavy use
- Can be used on football, baseball, lacrosse and soccer fields to make sidelines, end lines, goal lines and boundaries
- Hard rubber wheels easily navigate tough terrain to make even lines
- Handle lever allows simple line width adjustments from 2 in. to 4 in.
- 25 lb. capacity holds ample material for marking up entire fields without constantly refilling the marker

BBDLM252—25# Capacity	**$255**

Alumagoal 65 lb. Steel Dry Line Marker

- All-steel construction and rubber wheels hold up through seasons of use with 4 hard rubber wheels
- Rolling design is easy to move across each sports field, leaving dry lines to mark boundaries and goal areas
- Adjust between 2 in. and 4 in. lines by pulling the lever
- Marker can be pushed via the handle with grip for sure maneuvering
- 65 lb. capacity holds enough material to paint multiple lines across the field

BBDLM654—65# Capacity	**$370**

NEWLINER DRY LINE MARKERS HEAVY DUTY (USA MADE)

The NewLiner™ Dry Line Markers are the original, American made infield chalkers. Designed for those who want the best, most durable field chalkers available they feature:

Rugged Construction – **American Made** – Galvanized loop handles with foam grips for comfort. Galvanized steel material containers to prevent rusting. 1/2 inch axles and drive shafts for strength. Large 10" pneumatic tires for easy pushing even over rough terrain. Don't be fooled by the cheap, offshore copies.

Easy to use – Precision control for 2 inch or 4 inch lines. Frame has site window to allow view of layout string and chalk dispensing.

18 Month Limited Warranty – Longest in the industry.

Available in two sizes to fit your needs and budget:

50lb HD 4-Wheel – Our most popular model for strength, ease of use and reliable performance

100lb HD 4-Wheel – The most durable heavy-duty dry line field marker available. Over-sized foam rubber hand grips for increased operator comfort.

25lb 2-Wheel – Ideal for light duty and those on a tight budget needing a quality chalker. Two (2) 8 inch semi-pneumatic wheels. Oversized foam rubber hand grips for increased operator comfort.

50lb 3 -Wheel – Ideal for those on a tight budget needing a quality, higher capacity chalker. The three wheel design with 8 inch semi-pneumatic wheels.

BEAM CLAY®
MarkSmart™ Field Marking Systems

WHOLESALE PRICE LIST

The MARKSMART™ Field Marking System

Step-by-step guide to eliminate repeated measuring and staking. From now on… Just connect the dots.

Any Time is the RIGHT TIME to Mark Your Fields PRE-SEASON:

You have to stake and measure anyhow. Why not install MarkSmart and your staking and measuring days are over.

MID-SEASON: You already have the field lined and set. Why not permanently mark critical locations with **MarkSmart™** so your staking and measuring days are over.

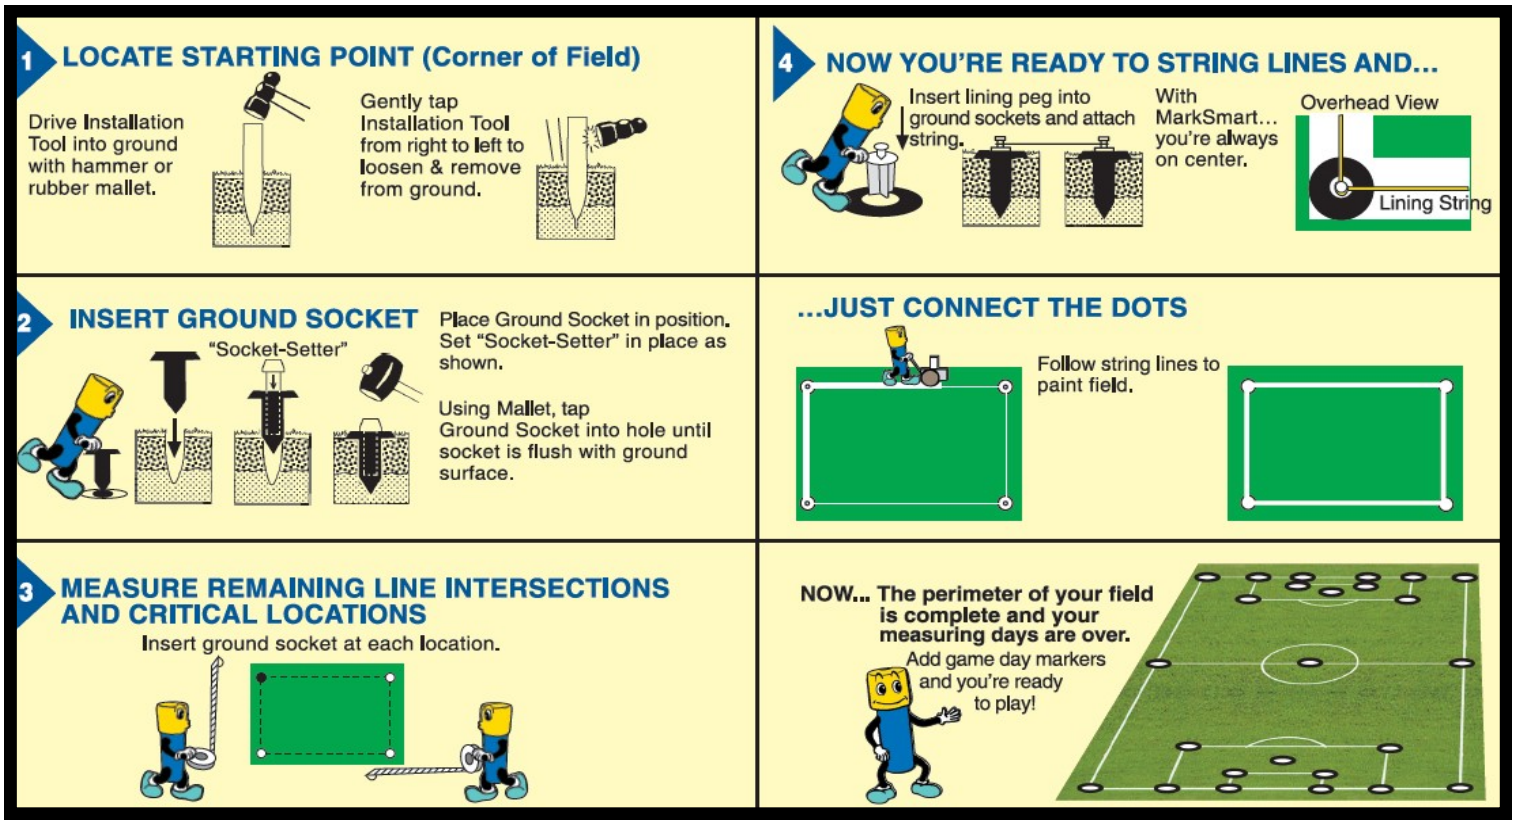

POST-SEASON: Before the lines fade away, install **MarkSmart™** and you're ready to connect the dots for next season, without staking and measuring.

...It's the Only Field Lining System available that includes the Multi-purpose Ground Socket that:

- Is easily installed and permanently locates critical line intersections.
- Accepts a Lining peg which, with string attached, provides plumb line for lining fields.
- Holds or anchors Game-Day Field Markers on the windiest of days.

This simple system has saved hundreds of hours of field set-up time at thousands of schools, parks and recreation departments.

BEAM CLAY®

Foul Poles

WHOLESALE PRICE LIST
EFFECTIVE: JUNE 1, 2022

ALUMINUM FOUL POLES

Winged models are superior to straight foul poles for determining fair balls from foul ones - any part of pole or wing hit is still a fair ball.

Offset screen "wings" fabricated of a 1-1/2" aluminum diamond pattern mesh, encased on the entire perimeter by a slotted, welded aluminum frame for maximum rigidity.

Main post fabricated of either 4" diameter heavy-wall structural aluminum tube for 22' above ground model or 6" diameter heavy-wall aluminum tube for 30' above ground model.

Features white or yellow powder-coated finish for high visibility and minimal maintenance.

Additional colors and custom sizes also available.

Aluminum ground sleeves included;

Sold in pairs.

Assembly Required.

AFP-22-Y | 22' high - yellow with wings	**$3,995/PR**
SAFP-22-O | 22' high - orange w/o wings	**$1,995/PR**
AFP-22-W | 22' high - white with wings	**$3,995/PR**

BEAM CLAY®

Long Gone® Foul Poles

WHOLESALE PRICE LIST
EFFECTIVE: FEBRUARY 1, 2022

Long Gone® Foul Poles are manufactured from 4" or 6.625" outside diameter aluminum pipe and are available in standard above ground heights of 15', 20', 30' and 40'. All foul poles are powder coated yellow, utilize ground sleeves with corresponding caps or a base plate mounting system for a semi-permanent installation, and are available with or without a wing.

Standard wings start 8' above finished grade and consist of 1/8" stamped aluminum sheet with double reinforced bends making them much more durable and longer lasting than weaker competitive mesh products. Custom foul pole heights and/or wing sizes are available, upon request.

Available with base plate or ground sleeve insert

Standard powder coated yellow finish (white or orange available upon request to meet current recommended NCAA softball field of play, foul pole rule 2.12 requiring a contrasting color to the ball that becomes mandatory in 2018)

Available in 4 standard heights. Custom sizes available, upon request

FOUL POLES SOLD INDIVIDUALLY

	Each come Powder Coated Yellow *White or Orange **Available Upon Request** to Meet Current NCAA Softball Field of Play Foul Pole Rule 2.16.1 Requiring a Contrasting Color to the Ball	EACH

Improved Back Support Piece

GYM FLOOR PROTECTOR KITS—5 YEAR LIMITED WARRANTY!
Adapts the portable benches for use indoors. Each kit provides non-marring floor protectors that easily slips on to the bench legs. May be used on any 2⅜ O.D. material.

7.5' Bench Conversion Kit of 4:	**BEPROT8**	**$25**
15' Bench Conversion Kit of 6:	**BEPROT15**	**$30**

WHY OUR BENCHES & BLEACHERS ARE BETTER!

DON'T BE FOOLED BY CHEAPER IMITATIONS!

5 Year Warranty on bleachers, 5 Year Warranty on benches!

Anodized Aluminum: Keeps aluminum from rubbing off on your uniform or clothing.

Freight: We charge a flat 14%, others charge actual freight, bringing total freight to 20-40%.

Our bench supports are 13 gauge 2-⅜" O. D. Galvanized Steel, while others manufacture theirs w/a thinner wall thickness & smaller O.D.

End Caps: We supply end caps for each plank with predrilled holes & metal screws.

BEWARE OF PHONY BLEACHER BIDS

We build our benches & bleachers to the highest standards. Listed below are some of the differences by others who may be listing their benches & bleachers as comparable to ours.

1. **FRAMES** - Ours is 100% aluminum angle. Be careful of those quoting "galvanized steel as angle iron" as equal.

2. **SEAT PLANKS** - Ours is 100% anodized aluminum with a minimum wall thickness of .078. A thinner walled not does not have the strength or support. Be careful of anyone offering powder coated steel planks which will rust out when powder coating wears off.

3. **FOOT PLANKS** - Ours is 100% Mill Finish Aluminum. Be careful of those quoting steel foot planks. They could rust out & will need to be replaced.

4. **END CAPS** - Ours are constructed of fiber reinforced polypropylene. There are no holes to drill to complete installation. No sharp edges to snag clothing or skin.

5. **INDOOR USE** - Our Tip N' Roll units come with rubber leg protectors so they can be used indoors or out. Be careful of those units using steel vs. aluminum as the total body weight is nearly 400 lbs. and attempting to use these in a "tip-over" fashion could damage your gym floor or cause personal injuries.

6. **FRONT ROWS** - Be very careful of knowing the exact height of each seat section and the overall units. We are seeing as much as 6" being cut off every seat height by other makers trying to save money and lower their bids. This puts the first row nearly at 11" above ground level.

7. **BACK & SIDE FENCING** - We use 9 gauge wire and heavy duty fence pipe, and attached to bleacher using heavy duty aluminum angle and channel. Anything less is asking for mechanical and safety problems.

Don't be fooled by a low price. Our manufacturing team has been in this business for 30 years. If you see bids or quotes that "seem too good to be true" - they are. Respectable manufacturers purchase aluminum at the same prices. Anyone offering to deliver product at 30% less is not matching specs.

BEAM CLAY®

Aluminum Bleachers - Alumagoal

WHOLESALE PRICE LIST
EFFECTIVE: JULY 1, 2022

TIP N' ROLL BLEACHERS

Tip N' Roll bleachers are perfect for auxiliary seating requirements.

Unit easily tips up on its casters for convenient storage.

Seat planks are either anodized or powder coated (where applicable).

High grade swivel casters & rubber foot pads will not mar your floors.

Due to constantly changing specifications, please check local building and safety codes to insure compliance.

Standard models include single foot plank.

4 row models feature low rise framework – the first seating row is 12" off the ground.

Some assembly required.

WARNING: These lightweight units are easily tipped up for rolling by any responsible adult. However, if tipped up outdoors, extreme caution should be taken in windy conditions. Multiple adults may be required to control the unit.

5 Year Limited Warranty

BEAM CLAY®

Aluminum Bleachers - National Recreation Systems

Buying Aluminum Bleachers — Things & Terms You Need to Know

System Types

"Non-Elevated Bleachers" is a term used to describe a type of bleacher that when seated on the first row, your feet are at ground level. Available in Standard, Preferred, Deluxe and ADA Models.

"Low-Rise Bleachers" have a first seat height under 12" and a 6" rise per row. They have a 12" anodized aluminum seat plank as opposed to the standard 10" seat plank. This system is designed to meet most building codes without an aisle or rear guardrail. This type system provides more bleacher seats at affordable prices. These systems are available up to 4 rows without a guardrail system. A 5 row Low-Rise is available with the same features and includes a unique vertical picket guardrail that wraps around the ends of the top seat.

"Tip N' Roll Bleachers" have the ability to be tipped up onto their attached caster wheels and rolled away for easy storage. They feature an extension arm for easy tipping, 5" non-marring caster wheels (rear wheels have a brake for securing movement when stored), rubber foot pads to prevent marring of indoor flooring and secure movement when in use and cross bracing on all understructure frame bays. A NRS exclusive outrigger is standard on all 4 row Tip and Roll bleachers for added stability when in an upright position. Tip N' Roll bleaches are also available in a Low-Rise system.

"Transportable Bleachers" can be moved from one area of the grounds to the next (5 m.p.h. max). This versatile system, available with 5 rows or 10 rows, is the perfect solution for adding seating where permanent year round bleacher seating is not required. Sharing Transportable Bleachers is an affordable multi-area solution. The Transportable Bleacher are available with an extra heavy aluminum understructure or a galvanized steel understructure. There is additional cross- bracing and added galvanized steel horizontal lifting braces on the front and rear of the understructure for added stability when moving the system. Transportable Bleachers require a Transport Kit (sold separately) that includes a jack for lifting the system to insert the wheel assembly, the wheel assembly with attached axle, tongue assembly and removable tongue assembly brackets to secure the tongue assembly. A heavy duty Transport Kit (with built-in hydraulic jack and larger 14" wheels) is required for all 10 row and elevated systems.

"Elevated Bleachers" is a term used to describe a type of bleacher that when seated on the first row, your feet are at the height of the elevated front walkway. Several elevation heights are available. These elevations require entry stairs and front guardrail. A handicap ramp may also be required with ADA seating.

Basic Bleacher Terms

"Single Foot Plank" is a term used to describe (1) 2"x10" mill finish aluminum foot plank per row to rest your feet on when seated.

"Double Foot Plank" is a term used to describe (2) 2"x10" mill finish aluminum foot planks per row to rest your feet on when seated.

"Riser Plank" is a term used to describe a "mill finish" aluminum plank that is mounted vertically under the seat and behind your feet to close the opening to meet building and safety codes.

"Rise" The vertical measure from the top of a bleacher seat to the top of the bleacher seat in the next row.

"Run" The horizontal measure from the front of a bleacher seat to the front of the bleacher seat in the next row.

Models

"Standard" suffix **STD** on the end of National Rec's model refers to the bleacher system having single mill finish 2"x10"aluminum foot plank on rows 2- 3, double mill finish aluminum 2"x10" foot planks and mill finish aluminum 1"x6" riser plank on rows 4 & up, double mill finish aluminum 1"x6" riser plank on top row only. ***Guardrails are included on all systems with 5 rows of seating or more.

"Preferred" suffix **PRF** on the end of National Rec's model refers to the bleacher system having double mill finish aluminum 2"x10" foot plank on all rows and and mill finish aluminum 1"x6" riser plank on rows 4 & up double mill finish aluminum 1"x6" riser plank on top row only. ***Guardrails are included on all systems with 5 rows of seating or more.

*"**Deluxe**"* suffix **DLX** on the end of National Rec's model refers to the bleacher system having double mill finish aluminum 2"x10" foot plank on all rows, mill finish aluminum 1"x6" riser plank on all rows double mill finish aluminum 1"x6" riser plank on top row only, and aisle with anodized aluminum handrail. ***Guardrails are included on all systems with 5 rows of seating or more.

WHOLESALE PRICE LIST

Transportable Aluminum Bleachers - National Recreation Systems

Transportable Bleachers

Our Transportable bleachers are designed specifically to withstand the rigors of movement. Each Transportable bleacher is fitted with a galvanized steel horizontal lifting brace and has extra bracing to stabilize the bleacher during movement. These systems are not intended for use on any public roadways. 5 mph is recommended speed limit. All Transportable bleachers include ground sills and are available in "Standard", "Preferred" & "Deluxe" models. Vertical Picket Guardrails are additional. Assembly required.

5 Row Transportable Bleacher

10 Row Transportable Bleacher

Light Duty 5 Row Wheel Kit includes (2) 12" wheels

NOT INTENDED
FOR PUBLIC ROADWAYS

Heavy Duty 10 Row Wheel Kit includes (2) 14" wheels

Note: Order one "Wheel Kit" (required) to move multiple sets of bleachers. A "Light Duty" Transport (Wheel) Kit must be ordered with 5 row transportable bleachers. A "Heavy Duty" Transport (Wheel) Kit must be ordered with 10 row transportable bleachers. Each kit includes wheels, built-in hydraulic jack and tongue assembly.

"Standard" suffix **STD** on the end of National Rec's model # refers to the bleacher system having single mill finish 2"x10"aluminum foot plank on rows 2- 3, double mill finish aluminum 2"x10" foot planks and mill finish aluminum 1"x6" riser plank on rows 4 & up, double mill finish aluminum 1"x6" riser plank on top row only. ***Guardrails are included on all systems with 5 rows of seating or more.

"Preferred" suffix **PRF** on the end of National Rec's model # refers to the bleacher system having double mill finish aluminum 2"x10" foot plank on all rows and and mill finish aluminum 1"x6" riser plank on rows 4 & up double mill finish aluminum 1"x6" riser plank on top row only. ***Guardrails are included on all systems with 5 rows of seating or more.

"Deluxe" suffix **DLX** on the end of National Rec's model # refers to the bleacher system having double mill finish aluminum 2"x10" foot plank on all rows, mill finish aluminum 1"x6" riser plank on all rows double mill finish aluminum 1"x6" riser plank on top row only, and aisle with anodized aluminum handrail. ***Guardrails are included on all systems with 5 rows of seating or more.

Aluminum Tip N' Roll Bleachers

WHOLESALE PRICE LIST
EFFECTIVE: JULY 1, 2022

NATIONAL RECREATION SYSTEMS—Tip N' Roll Bleachers

Our "Tip N' Roll" bleachers tip and roll away for easy storage and are the ideal solution to your auxiliary seating needs. This bleacher is easily tipped up onto its swivel casters for movement and caster brakes keep the bleacher from rolling when stored. All "Tip N' Roll" bleachers include 5 casters with non-marring wheels and non-marring rubber foot pads to protect wood floors. Powder-coated color seat planks are additional. The aluminum understructure (frame) reduces weight for easier lifting. Photos below show our exclusive 4 row outrigger for added safety and stability. Always take extra care when you tip up bleachers.

Our "Preferred" Tip N' Roll bleachers include (2) 2"x10" foot planks. Since all 2 and 3 row Tip N' Roll models and 3 and 4 row Low Rise Tip N' Roll models are under 30" high, most codes do not require guardrail. 5-Year Limited Warranty. Assembly required.

STANDARD MODELS W/ALUMINUM UNDERSTRUCTURES (Single Footboards)

- Reduces deflection.
- Patrons feel safer with reduced deflection.

Positive Seatboard and Footboard Connections.
- Internal aluminum connection clips, with memory.
- Additional shake-proof washers to provide maintenance-free connections after installation.

Heavy-Duty End Caps
- Match in both color and finish to the aluminum seatboards and footboards.
- Single, full length design provides additional stability.
- Friction fit for a positive connection.

Heavy-Duty Guard Rail System.
- Rear corner rail connector for continuous railing system.
- Snag-free design.
- Schedule 40 aluminum pipe with clear anodized finish.
- Cast aluminum plugs and fittings.
- 9ga. Chain link fencing.

Closed Aisle System.
- Completely closes the horizontal plane of the aisle.
- Contrasting nose marker for safety.
- Intermediate aisle handrail for comfort and safety.
- Made of the same schedule 40 anodized aluminum pipe as the guardrailing.

Safety is in the Design.
- Fluted non-skid walking surfaces.
- Contrasting nose markers on stairs and aisle access ways.
- Snag-free guardrailings.
- Engineered for heavy loads transmitted to the understructure.

BEAM CLAY®

WHOLESALE PRICE LIST
EFFECTIVE: JANUARY 1, 2022

Backstops

BACKSTOPS—10' HIGH

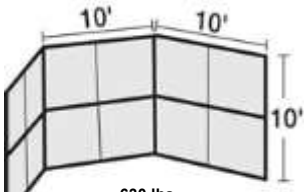

CHAIN LINK WINGED BACKSTOPS for Permanent Installation in Ground

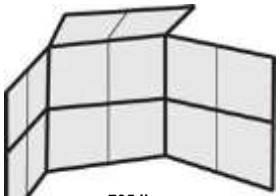

CHAIN LINK WINGED BACKSTOPS
Permanent backstops are constructed by installing supplied 2-3/8" pipe supports approximately every 10' in concrete footings as shown on installation drawings provided. You then simply bolt factory pre-fabricated 5' x 10' panels in place to create your finished backstop. No more cutting and stretching chain link material in the field. These backstops are extremely durable and allow individual panels to be removed for re-screening or replacement as needed.
5 Year Limited Warranty.

CHAIN LINK PANELS—5' x 10'
Prefabricated panels are the building blocks of these backstops. They simply bolt into place, eliminating on-site cutting and fitting. Panels are 5' x 10' & are composed of 1-5/16" O.D. galvanized tubing with center reinforcing brace and 9 gauge galvanized woven wire that is stretched and fastened on all sides with 3/8" rods and steel clamps. These 5' x 10' panels may also be used to construct 5' high fences for dugout and baseline extension.
5 Year Limited Warranty.

WHOLESALE PRICE LIST

Chain Link Fence Slats

PRIVACY DECORATIVE SLATS (PDS®) FOR CHAIN LINK FENCING

Made in the USA: Be aware of some non-USA made fence slats that may fade and discolor. Our PDS® slats are made of virgin High Density Polyethylene (HDPE) are made in the USA and have UV inhibitors (UV resistant color concentrates) to add color protection and guard against cracking, chalking, and fading in the sunlight.

Durability: Our PDS® slats are resistant to: severe weather conditions, salt water, sand, road dirt, most acids, alcohol, alkaline, ammonia, petroleum distillates and common environmental pollutants.

Standard Colors*

white green brown black beige gray redwood royal blue light blue

* Exact representation of slat colors in printing is difficult. Please refer to actual color samples for final matching.
* Special colors are available upon request. Minimum quantities apply.
* Made in the USA

ASTM
"Meets ASTM3000 and ASTM3000M specifications"

Materials
All except Hedgelink® are extruded from High Density Prime Polyethylene, color pigments and ultra violet (UV) inhibitors, specifically designed to retard the harmful effects of the sun and lengthen the life of the product.

Maintenance
Cleaning of most surface contaminants is quickly accomplished with plain water.

Wind Load Disclaimer
Seller/Manufacturer will not be responsible for fence damage resulting from wind load conditions due to insufficient structural support.

Limited Warranty
PDS® Fence Products carry an extensive, pro-rata warranty against breakage and material degradation under normal conditions.

WHAT SIZE PDS® FENCE SLATS WILL WORK IN YOUR CHAIN LINK FENCE?

The PDS® Fence products are available in a variety of Fence Privacy Slats (Inserts), which fit in different sizes of chain link fencing. We have Fence Slats that fit into the following diamond sizes: 1-3/4", 2", 2-1/4", 2-3/8" and 3-1/2" x 5".

Before you order Fence Slats, you must first determine the size of the "diamond" on your fence. This is done by measuring the inside dimensions diagonally in both directions. (See Photos Above)

Please note: The wire gauge (thickness), will affect the fit of our Fence Slats. Each product in this brochure includes a chart to show what size Fence Slat needs to be ordered for the various diamonds and gauge combinations available in the marketplace.

Above is a measurement of a 2" Chain Link Diamond.

BEAM CLAY®

WHOLESALE PRICE LIST

Chain Link Fence Slats

BOTTOM LOCK

Bottom Lock utilizes our innovative bottom locking channel system providing a "snap-in" locking effect for security and deters vandalism at an affordable price.

Design: Bottom-Lock Slats are flat and tubular in shape, with two "legs" inside the rigid, hollow body of the slat, for extra durability.

Installation Instructions:

Step 1 Insert locking channel horizontally in first full diamond at bottom of fence with open side facing up.

Step 2 Insert vertical slats with beveled/notched end downward. Slat engages and interlocks with bottom rail.

Step 3 Push the vertical slat into the horizontal channel to lock in place.

Standard Heights: 4, 5, 6, 7, 8, 10 and 12 feet. Special heights available upon request.

Wind Load and Privacy Factor: Approximately 75%.

Bottom-Locking Channel: 10 feet provided in each bag.

Slat Length: 3½" shorter than the overall height of fence.

Warranty: 25 years pro-rata.

SLAT PROFILE: 

LOCKING CHANNEL: 

Slat Type	Slat Width	Mesh Size	Wire Gauge	Slats Per Bag
Bottom Lock 2"	1 3/32"	2"	8, 9 or 11	82
Bottom Lock 2¼"	1¼"	2¼" or 2⅜"	11½ or 12½	78
Bottom Lock 1¾"	7/8"	1¾"	8, 9 or 11	100
*Bottom Lock 1¾"	7/8"	2"	6	100

*Choosing this option will signifigantly decrease the privacy factor.

TOP LOCK

Top Lock utilizes a top-locking mechanism located near the top of the slats for easy installation and to ensure a clean, straight edge, enhancing its appearance.

Design: Top-Lock Slats are flat and tubular in shape, with circular, notched-out holes located near the top of the slat.

Installation Instructions:

Step 1 No need to kneel, simply insert the slats vertically from top to bottom, keeping the locking holes on top.

Step 2 Thread the flexible locking channel horizontally through the notched holes in the slats. These holes are elliptical to ensure they always stay open for fast and easy threading.

Step 3 For extra security, insert a pop-rivet through locking channel and one slat.

Standard Heights: 4, 5, 6, 7, 8, 10 & 12 feet. Special heights available upon request.

Wind Load and Privacy Factor: Approximately 75%.

Top-Locking Channel: 10 feet provided in each bag.

Slat Length: 2" shorter than the overall height of fence.

Warranty: 25 years pro-rata.

SLAT PROFILE: 

Slat Type	Slat Width	Mesh Size	Wire Gauge	Slats Per Bag
Top Lock 2"	1 3/32"	2"	8, 9 or 11	82
Top Lock 2¼"	1¼"	2¼" or 2⅜"	11½ or 12½	78
Top Lock 1¾"	7/8"	1¾"	8, 9 or 11	100
*Top Lock 1¾"	7/8"	2"	6	100

*Choosing this option will signifigantly decrease the privacy factor.

BEAM CLAY®

Chain Link Fence Slats

WINGED SLAT® (Extra-Privacy)

With the proven quality and durability of our standard slats, plus unique flexible "wings" for extra screening and security, Winged Slats® are self-locking - no locking channels are needed!

Design: Our innovative Winged Slat has a rigid, flat-tubular body, with two "legs" inside the rigid, hollow body of the slat for extra support and durability. Flexible and resilient wing portions are positioned on each side of the slat body. Serrations are added to the wings for easier installation and locking power.

Installation Instructions: Insert vertical slats with angle cut end downward. Winged portion interlocks with chain link knuckles.

Standard Heights: 4, 5, 6, 7 and 8 feet.

Important: For Fence heights higher than 8 feet, we strongly advise **NOT** to double-stack Winged Slats®. If you double-stack, you will be at risk of the Winged Slats® not all giving the same visual appearance or giving the same privacy effect on the top and bottom portions of the Fence.

Wind Load and Privacy Factor: Approximately 90%. (Based on wire/mesh used - stretch tension)

Slat Length: 2" shorter than the overall height of fence.

Warranty: 25 years pro-rata.

SLAT PROFILE:

Slat Type	Slat Width	Mesh Size	Wire Gauge	Slats Per Bag
Winged Slat®	1⅜"	2"	9 only	82

FINLINK® (Extra-Privacy)

The FinLink® slat offers extra screening and security with a unique configuration of (3) three privacy fins.

Design: Our unique innovative design includes a rigid, flat tubular body, with a "leg" inside the rigid, hollow body of the slat for extra support. Three flexible fins (two on one side and one on the other) are positioned on the sides of the slat body. The FinLink® fins are not serrated, thus providing a smooth finished look.

Installation Instructions:

Step 1 Insert locking channel horizontally in first full diamond at bottom of fence with open side facing up.

Step 2 Insert vertical slats with bevel end downward.

Step 3 Push the vertical slat into the horizontal channel until the slat touches the bottom of channel.

Standard Heights: 4, 5, 6, 7 and 8 feet.

Wind Load and Privacy Factor: Approximately 90%.

Bottom-Locking Channel: 10 feet provided in each bag.

Slat Length: 3½" shorter than the overall height of fence.

Warranty: 25 years pro-rata.

SLAT PROFILE:

Slat Type	Slat Width	Mesh Size	Wire Gauge	Slats Per Bag
FinLink®	1⅜"	2", 2¼" or 2⅜"	11	82

BEAM CLAY®

WHOLESALE PRICE LIST

Chain Link Fence Slats

LITELINK®

LiteLink® is a single wall "M" shaped slat that gives visual screening and color enhancement at our most affordable price. It also uses our innovative Bottom-Locking Channel system.

Design: Compact and lightweight, LiteLink®'s unique shape enables the slat to self stack. It comes packaged in a box (2" x 5" x Slat Length), making it easy to ship and efficient to store.

Installation Instructions:

Step 1 Insert locking channel horizontally in first full diamond at bottom of fence with open side facing up.

Step 2 Insert vertical slats with interlocking tab downward. Slat engages and interlocks with bottom rail.

Step 3 Push the vertical slat into the horizontal channel to lock in place.

Standard Heights: 4, 5, 6, 7, 8, 10 and 12 feet. Special heights available upon request.

Wind Load and Privacy Factor: Approximately 75%.

Slat Length: 3½" shorter than the overall height of fence.

Warranty: 7 years pro-rata.

SLAT PROFILE:

Slat Type	Slat Width	Mesh Size	Wire Gauge	Slats Per Box
LiteLink®	1¼"	2", 2¼" or 2⅜"	9, 11 or 11½	82

HEDGELINK® (Extra-Privacy)

HedgeLink® is our most premium and unique chain link fence enhancement product, which creates a natural green hedge look that requires no maintenance and offers almost complete privacy.

Design: The HedgeLink® core is made with a strong, rigid 16-gauge galvanized, braided wire. Blue Spruce colored 3-mil PVC needles are embossed for an extra plush effect.

Installation Instructions: Requires no locking device or tools and installs much like our Winged Slats®. Insert HedgeLink® slats vertically top to bottom, keeping the green needles facing up, while revolving the slat clockwise with your fingers for easier installation.

Standard Heights: 4, 5, 6, 7, and 8 feet.

Wind Load and Privacy Factor: Approximately 95%.

Fence Sizes: For most Chain Link Fence sizes. Not intended for use with mini-mesh or 3½" x 5" fence fabric.

Features: UV stabilized to protect against the harmful rays of the sun. Flame retardant.

Note: Do not mix HedgeLink® with any other manufacturer's hedge product – color shades are different.

Warranty: 10 years pro-rata.

Slat Type	Mesh Size	Wire Gauge	Slats Per Box	Approx. Coverage Per Box
HedgeLink®	2", 2¼" or 2⅜"	9, 11 or 11½	82	10 linear ft

Horizontal lacing lip required for windscreens over 6'H.

For special features (Lacing Lips, Air Vents, Extra Grommets, Two Color Panels) See Page 6

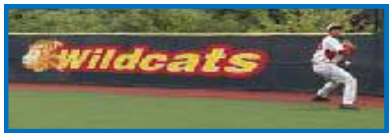

HOW LONG IS YOUR OUTFIELD FENCE?

Outfield fences can be symmetrical (the same distance from home plate to the fence at all points) or like major league parks with different distances to center field and mid-field. The following chart provides approximate outfield fence lengths assuming a center field depth 10% - 15% deeper than the foul lines. If symmetrical, you may approximate your fence length by multiplying 1.57 by the average distance from home plate to the fence.

DISTANCE TO FOUL POLE	APPROX. LENGTH OF FENCE
180 feet	300 feet
200 feet	360 feet
225 feet	395 feet
250 feet	435 feet
290 feet	490 feet
300 feet	515 feet
315 feet	550 feet

MINIMUM CHARGE FOR SMALL PANELS IS $25. **#WS-SP**

WINDSCREEN LETTERING
Block-style letters or numbers factory applied to your windscreen order. Select white, black, or yellow letters or numbers.

BATTER'S EYE WINDSCREENS

Batters, keep your eye on the ball!
Provide the best hitting background, so batters can keep their eye on the ball! Custom made to the dimensions your require.

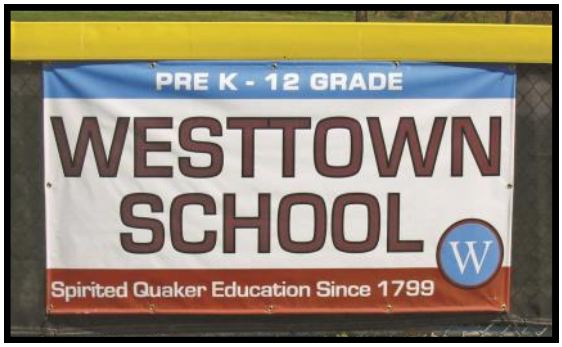

Features:

- Heavy-duty reinforced hems with brass grommets at 18" intervals
- Durable woven polypropylene fabrics (recommended)
- Lacing lips sewn horizontally every 6', not just around the perimeter.

Boston Red Sox training field, Ft. Meyers, FL

BANNERS—DIGITALLY PRINTED

Customize designs for multiple locations!
It is easy and affordable to boost team spirit, raise funds through sponsors and make your field stand out! Digitally printed banners allow you to customize your designs with multiple colors and shading. Choose from mesh or solid vinyl fabrics for a banner of any size. We can reproduce your logo precisely from your digital image — just send us your file and we'll do the rest!

CUSTOM DISTANCE BANNERS

Outfield Distance Markers
Digitally printed on 13 oz. reinforced solid vinyl fabric. Choose from 14 standard banner and number colors: Maple Green, Royal Blue, Red, Navy, Gray, Maroon, Sky Blue, Purple, Yellow, White, Tan, Black, Kelly Green, or Orange. Custom colors available.

BEAM CLAY®

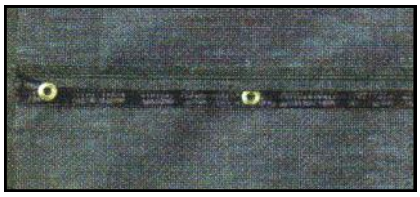

Windscreen Accessories

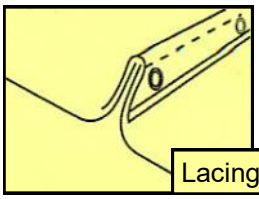

WHOLESALE PRICE LIST
EFFECTIVE: JULY 1, 2022

CUSTOM WINDSCREENS
SPECIAL FEATURES & INSTALLATION ACCESSORIES

LACELIP	**LACING LIP** - Attaches windscreen more securely to fence.	75¢/LF

Horizontal or Vertical Lacing Lip attaches middle of windscreen to fence in addition to the four edges. Lacing Lip is 2 reinforced layers of material, folded to stick out the back, covered and double sewn or 2 layers of vinyl coated material heat-sealed edging with grommets every 18" to attach securely to fence and reduce flapping. **Lacing Lip is required sewn horizontally at center of windscreen along entire length of all windscreens over 6'H.** Check price for more than one lacing lip.

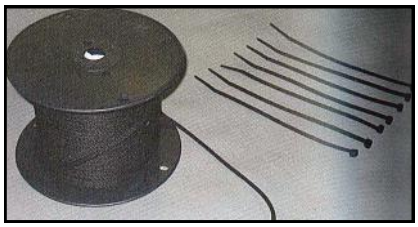

A lacing lip prevents windscreen from billowing and breaking away, ensuring longer life.
>Standard on all screens over 6' high.
>Vinyl coated windscreen is heat-sealed and stronger
>Polypropylene & Polyethylene windscreen is banded and sewn

AIR VENTS, TIES & EXTRA GROMMETS

AV-HALFCIRCLE	18" Diameter **Half Circle Cut-Outs** (without Edging, with or without flap)	$4
AV-REINFORCEDAV	**Reinforced Air Vents** - 6" H x 12" L, usually every 10'	$8
PT-8BK	**Standard 8"** UV-Resistant **Black Plastic Ties,** 50 lb. Breaking Strength (Packs of 100)	$10
PT-HD-8BK	**Heavy-Duty 8"** UV-Resistant **Black Plastic Ties,** 120 lb. Breaking Strength (Packs of 100)	$15
PT-HD-14BK	**Heavy-Duty 14"** UV-Resistant **Black Plastic Ties,** 120 lb. Breaking Strength (Packs of 100)	$32
GROMMETS	**Grommets** every 12" instead of 18"	4¢/SF
TIEROPE-BK	Polyester **Tie Rope**, Black, 1/8" x 250' Spool	$30
CUSTOMCUTOUTS	Custom **Cut Outs** (each - up to 10 SF)	$100
CUSTOMANGLECUTS	Custom **Angle Cuts** (each—per angle)	$100

TWO COLOR WINDSCREEN PANELS

Available for ArmorMesh, VCM9x12 & VCP1800 at 40% additional charge.

2 different color panels joined with heat-sealed seams.

TCWS-TB+40	Top/Bottom (Horizontal Seam, 12" high minimum)
TCWS-SS+40	Side x side (vertical seam, minimum 6' long panels)

Measurements:
Our windscreens are custom made to your dimensions. Measure carefully.

When ordering, please have dimensions ready for each section of windscreen, including gates. There is no extra charge for these smaller pieces. We recommend leaving 6"-12" open at bottom for maintenance and air flow. For long runs 50'-100' pieces work best. Much longer pieces become more difficult for you to install.

Tall Windscreens:

When 2 woven polypropylene rolls are used to make a taller windscreen: one material overlaps the other (and is double sewn with 2 layers of banding) to make a seam (like lacing lip w/o sticking out back and w/o grommets); whereas ArmorMesh, VCM9x12, and VCP1800 seams are heat-welded and do not require the more visible banding. Horizontal lacing lip required for windscreens over 6'H.

TuffPrint™ on Vinyl Windscreen

TUFFPRINT™

TuffPrint™ products will last...and make a lasting impression!

Give your gyms, fields and budgets that finishing touch! Adding lettering or logos is an attractive and affordable way to promote your team's spirit or a sponsor's name to raise funds. TuffPrint™ allows for printing colors of all spectrums — from simple one-color lettering to intricate images of multiple colors and shading — and sizes of all scales—from a small banner, to a fully padded gym wall, to large stadium wraps. With all machinery and printers on site, we are able to pay careful attention to each step of the printing and manufacturing process.

Features:

- Ultra-durable imaging using Premium Ink
- Unlimited color selection and gradient shading
- Best pricing in the industry. All printing done in-house
- Proofs sent for approval prior to printing

Aer-Flo Tuffy Windscreen

AER-FLO® DUO-SCREEN™ WINDSCREEN

Joins Vinyl with Tuffy Windscreen. Choice of solid midsection (shown) for improved player vision or Tuffy midsection with solid vinyl top and bottom for improved court viewing. Windscreen is finished with double-needle LOCK STITCHING, eliminating the thread unraveling problem of traditional windscreens that are fully chain-stitched. 4-year limited warranty. See 23 available colors below. Optional multi-color Chroma-Bond imprinting available. Grommets installed every 12". Not only unique for tennis courts, but also provides a perfect background for logo on baseball, softball, soccer and football fields.

SOLID VINYL - POLYESTER to minimize problems of wind and background visual distractions. Made of high quality 18 oz. UV and mildew treated vinyl in 17 outdoor colors or 16 fire rated indoor colors. Grommets installed every 12". Custom sizes are available. Whether indoor or outdoor, optional multi-color Chroma-Bond imprinting available.

Aer-Flo Tuffy Windscreen

LENO WINDSCREEN *Open Mesh*

Made of leno polypropylene mesh with reinforcing threads to resist tearing and spreading. Open mesh allows 15% wind passage, so it is popular in higher wind areas. Ultraviolet and mildew inhibitors built into fabric to extend useful life. Edges finished with four ply hems and grommets are installed every 18" all around. For additional wind forgiveness, boxed windows are available for additional cost. Available in 3 colors: Black, Dark Green, Royal

Imprinting is not available on this fabric due to its surface characteristics

POLYPROPYLENE WINDSCREEN *Closed Mesh*

Allowing only 8% wind passage, this screen has both high wind blockage and high visual blockage properties. Heavyweight polypropylene fabric is treated for UV, mildew, and insect resistance. This windscreen is available in Dark Green or Black color. Grommets are installed all around every 18" through four ply double stitched hemmed edging. Boxed windows & center tie downs are recommended accessories for 9' size. Available in 6' and 9' sizes only, cut to your length.

Imprinting is not available on this fabric due to its surface characteristics.

Tuffy® BALLASTED WINDSCREEN

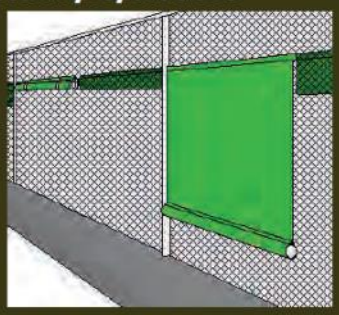

Protects chain link fences from high wind damage and can SAVE COSTLY LABOR TIME in last minute pre-storm preparations

NORMAL POSITION: In calm to low winds, units stay in vertical position. Ballasted PVC pipe is in the reinforced pockets at bottom, and top is attached thru grommets.

STORM POSITION: As winds exceed 20 mph, units billow to allow potentially damaging high wind velocities to blow through, helping to PROTECT FENCE and WINDSCREEN.

TIE-UP FEATURE: Built-in hook & loop strips at top allow one person to roll up and secure entire unit in less than 30 seconds. Also useful for better tournament viewing

PATENTED Tuffy Ballasted Windscreen automatically opens to allow high velocity winds thru . . . NO MATTER THE DIRECTION OF THE WIND. ***HOW IT WORKS:*** Individual 5' wide X 6' tall Ballasted Windscreen units are attached to chain link fence only along their grommeted tops, BUT the units are installed alternately on both sides of the fence. The bottom of each section has a weighted PVC pipe inserted thru its entire width in a reinforced pocket, engineered to provide correct ballast to keep the windscreen unit vertical during lighter winds. It automatically opens up to let higher velocity winds flow thru, significantly reducing wind stress on the fence. *SINCE HALF OF THE WINDSCREEN UNITS ARE ON EACH SIDE OF THE FENCE, HALF OF IT OPENS UP NO MATTER THE WIND'S DIRECTION.* Made with super-tough VIPOL® Matrix in 23 colors. Due to its dynamics, it carries no expressed or implied warranty, but ... THOUSANDS HAVE BEEN IN USE BY SCHOOLS, GOVERNMENT OPERATIONS, AND PRIVATE CLUBS FOR UP TO 7 YEARS. This fully tested system is ready to protect your fences.

U.S. PATENT NO. 7,841,378

Our sharp multi-color images will outlast other processes. Eliminates the historic problems of digital printing, like weathering, premature fading, scuffing, and unsightly white mesh backside color. Images will last outdoors as long as the fabric, something rarely true with digital imprinting. Also highly spike, cleat, and racquet resistant. Our thick, individually-applied, double coating process literally bonds the image into the vinyl and completely masks the underlying fabric color, so image colors are vivid and true.

Chroma-Bond imprinting is available on our vinyl-surfaced windscreen, cover, padding & sign products.

Windscreen Measuring

How to Measure for your Fence's Windscreen

Windscreens come in a number of styles, grades, heights, lengths and colors. Proper measurements equal proper fittings, which in turn equals a professional appearance that is sure to enhance the look of your facility.

Measuring your facility's fences is actually a pretty easy project. Prior to starting, you'll need the following tools:

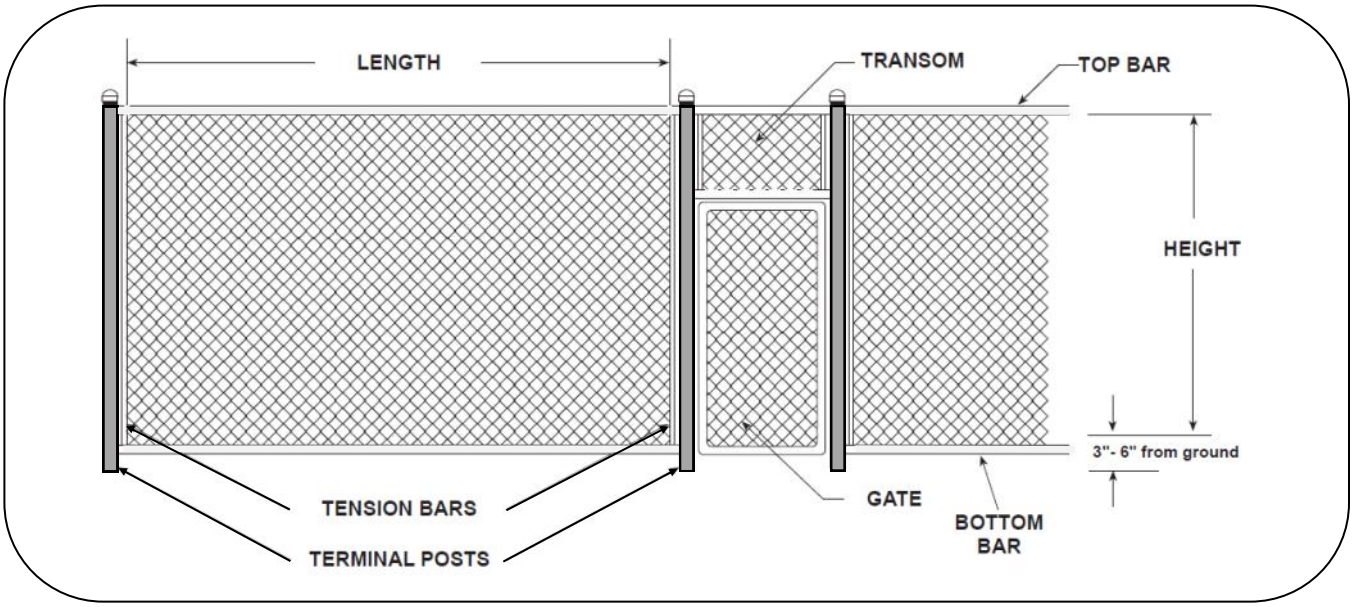

Measuring tape (100'+ in length is preferable) or Measuring Wheel

A pencil or pen to document the measurements.

Field or court diagram showing the fences that will require windscreen. If a diagram is not available, a hand drawn one will help you keep things straight.

With your tools in hand and the step-by-step process below, you're ready to begin measuring.

1. Start with your fence height. For the most part, your fence will remain relatively the same height through out. However, measuring a tennis court will be different than fencing for field sports. Tennis courts are flat surfaces that allow the fence to be the same height all the way around. With field sports, you may have an uneven ground surface which will cause your height measurements to vary slightly. A good rule of thumb is to measure from the bottom of the upper crossbar down to the ground and subtract 3" to 6" for maintenance. It is important to pull the measuring tape tight so that there is no slack. If installing "top bar to bottom bar" or "inside tension bar to inside tension bar" allow one fence diamond exposed top & bottom or each side for attaching windscreen. It's better you if measure an inch too short than too long, to account for stretching. **The windscreens are custom made to the dimensions you provide.**
2. Follow-up the fence height measurements with fence length measurements.
3. For ease of handling, 50'-100' panels work best for ballfield fences. Another consideration is that if you need to replace a panel for whatever reason, it will be cheaper to replace a 50'-100' section versus a much larger section.
4. If there are any angle cuts, be sure you are measuring the side that the windscreen will attach to.
5. Label each segment on your diagram so that when your windscreen arrives, you can put it together correctly and match each segment to the right place on your fence. Send us a copy of this diagram when you place your order so that each windscreen will be properly labeled when it is shipped to you.

REMEMBER… DON'T "GUESSTIMATE". NO TWO FENCES ARE THE SAME!

YOUR "*ONE-STOP*" SOURCE FOR AMERICA'S BASEBALL, SOFTBALL & SPORTS SURFACES & SUPPLIES!

PRICES SUBJECT TO CHANGE & AVAILABILITY PLUS SHIPPING | VOLUME DISCOUNTS AVAILABLE | COOPERATIVE PURCHASING CONTRACT PRICING FOR 50 STATES

Installing Your Windscreen

1. Hang the windscreens so that the seams and hems are toward the fence, leaving the smooth side facing the court.

2. **ALL GROMMETS MUST BE USED** to secure the windscreens to the fence.
   First, fasten one vertical edge at the desired height to the fence using regular (50-lb breaking strength) UV resistant plastic ties.
   Next, fasten the top of the windscreen to the fence, keeping the top straight by following the chain-link pattern. Use regular (50-lb breaking strength) UV resistant plastic ties
   Next, fasten the remaining sides of windscreen to the fence with regular (50-lb breaking strength) UV resistant plastic ties.
   Finally, fasten the bottom with regular (50-lb breaking strength) UV resistant plastic ties or, if the windscreen will be rolled to the bottom during high winds, with heavy-duty (120-lb breaking strength) UV resistant plastic ties.

3. With anti-billowing horizontal lacing lip, fasten it after top and bottom are attached using regular (50-lb breaking strength) UV resistant plastic ties through each grommet.

4. To prevent damage, when high winds are expected, cut away the regular (50-lb breaking strength) UV resistant plastic ties that you have used for the top, sides, & any horizontal lacing lips. Roll the windscreen to where the heavy-duty (120-lb breaking strength) UV resistant plastic ties are attached and tie it up using 14"-long (120-lb breaking strength) UV resistant plastic ties to help prevent wind damage.

5. In climates that get freezing temperatures, high winds and snow, **we recommend that windscreens be taken down for the winter months and rehung in the spring**. *If windscreens are left on the fences during the winter in these areas, they must be at least rolled down and secured.*

   If windscreens are not rolled or removed, all warranties are null and void. There is also a strong chance that the winter winds will cause your chain-link fencing to bend.

PRIVACY DECORATIVE SLATS (PDS®) FOR CHAIN LINK FENCING

Made in the USA: Be aware of some non-USA made fence slats that may fade and discolor. Our PDS® slats are made of virgin High Density Polyethylene (HDPE) are made in the USA and have UV inhibitors (UV resistant color concentrates) to add color protection and guard against cracking, chalking, and fading in the sunlight.

Durability: Our PDS® slats are resistant to: severe weather conditions, salt water, sand, road dirt, most acids, alcohol, alkaline, ammonia, petroleum distillates and common environmental pollutants.

Standard Colors*

white green brown black beige gray redwood royal blue light blue

* Exact representation of slat colors in printing is difficult. Please refer to actual color samples for final matching.
* Special colors are available upon request. Minimum quantities apply.
* Made in the USA

ASTM
"Meets ASTM3000 and ASTM3000M specifications"

Materials
All except Hedgelink® are extruded from High Density Prime Polyethylene, color pigments and ultra violet (UV) inhibitors, specifically designed to retard the harmful effects of the sun and lengthen the life of the product.

Maintenance
Cleaning of most surface contaminants is quickly accomplished with plain water.

Wind Load Disclaimer
Seller/Manufacturer will not be responsible for fence damage resulting from wind load conditions due to insufficient structural support.

Limited Warranty
PDS® Fence Products carry an extensive, pro-rata warranty against breakage and material degradation under normal conditions.

WHAT SIZE PDS® FENCE SLATS WILL WORK IN YOUR CHAIN LINK FENCE?

The PDS® Fence products are available in a variety of Fence Privacy Slats (Inserts), which fit in different sizes of chain link fencing. We have Fence Slats that fit into the following diamond sizes: 1-3/4", 2", 2-1/4", 2-3/8" and 3-1/2" x 5".

Before you order Fence Slats, you must first determine the size of the "diamond" on your fence. This is done by measuring the inside dimensions diagonally in both directions. (See Photos Above)

Please note: The wire gauge (thickness), will affect the fit of our Fence Slats. Each product in this brochure includes a chart to show what size Fence Slat needs to be ordered for the various diamonds and gauge combinations available in the marketplace.

Above is a measurement of a 2" Chain Link Diamond.

BEAM CLAY®

Chain Link Fence Slats

BOTTOM LOCK

Bottom Lock utilizes our innovative bottom locking channel system providing a "snap-in" locking effect for security and deters vandalism at an affordable price.

Design: Bottom-Lock Slats are flat and tubular in shape, with two "legs" inside the rigid, hollow body of the slat, for extra durability.

Installation Instructions:

Step 1 Insert locking channel horizontally in first full diamond at bottom of fence with open side facing up.

Step 2 Insert vertical slats with beveled/notched end downward. Slat engages and interlocks with bottom rail.

Step 3 Push the vertical slat into the horizontal channel to lock in place.

Standard Heights: 4, 5, 6, 7, 8, 10 and 12 feet. Special heights available upon request.

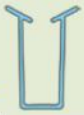

Wind Load and Privacy Factor: Approximately 75%.

Bottom-Locking Channel: 10 feet provided in each bag.

Slat Length: 3½" shorter than the overall height of fence.

Warranty: 25 years pro-rata.

SLAT PROFILE: 

LOCKING CHANNEL: 

Slat Type	Slat Width	Mesh Size	Wire Gauge	Slats Per Bag
Bottom Lock 2"	1 3/32"	2"	8, 9 or 11	82
Bottom Lock 2¼"	1¼"	2¼" or 2⅜"	11½ or 12½	78
Bottom Lock 1¾"	7/8"	1¾"	8, 9 or 11	100
*Bottom Lock 1¾"	7/8"	2"	6	100

*Choosing this option will signifigantly decrease the privacy factor.

TOP LOCK

Top Lock utilizes a top-locking mechanism located near the top of the slats for easy installation and to ensure a clean, straight edge, enhancing its appearance.

Design: Top-Lock Slats are flat and tubular in shape, with circular, notched-out holes located near the top of the slat.

Installation Instructions:

Step 1 No need to kneel, simply insert the slats vertically from top to bottom, keeping the locking holes on top.

Step 2 Thread the flexible locking channel horizontally through the notched holes in the slats. These holes are elliptical to ensure they always stay open for fast and easy threading.

Step 3 For extra security, insert a pop-rivet through locking channel and one slat.

Standard Heights: 4, 5, 6, 7, 8, 10 & 12 feet. Special heights available upon request.

Wind Load and Privacy Factor: Approximately 75%.

Top-Locking Channel: 10 feet provided in each bag.

Slat Length: 2" shorter than the overall height of fence.

Warranty: 25 years pro-rata.

SLAT PROFILE: 

Slat Type	Slat Width	Mesh Size	Wire Gauge	Slats Per Bag
Top Lock 2"	1 3/32"	2"	8, 9 or 11	82
Top Lock 2¼"	1¼"	2¼" or 2⅜"	11½ or 12½	78
Top Lock 1¾"	7/8"	1¾"	8, 9 or 11	100
*Top Lock 1¾"	7/8"	2"	6	100

*Choosing this option will signifigantly decrease the privacy factor.

BEAM CLAY®

Chain Link Fence Slats

WINGED SLAT® (Extra-Privacy)

With the proven quality and durability of our standard slats, plus unique flexible "wings" for extra screening and security, Winged Slats® are self-locking - no locking channels are needed!

Design: Our innovative Winged Slat has a rigid, flat-tubular body, with two "legs" inside the rigid, hollow body of the slat for extra support and durability. Flexible and resilient wing portions are positioned on each side of the slat body. Serrations are added to the wings for easier installation and locking power.

Installation Instructions: Insert vertical slats with angle cut end downward. Winged portion interlocks with chain link knuckles.

Standard Heights: 4, 5, 6, 7 and 8 feet.

Important: For Fence heights higher than 8 feet, we strongly advise **NOT** to double-stack Winged Slats®. If you double-stack, you will be at risk of the Winged Slats® not all giving the same visual appearance or giving the same privacy effect on the top and bottom portions of the Fence.

Wind Load and Privacy Factor: Approximately 90%. (Based on wire/mesh used - stretch tension)

Slat Length: 2" shorter than the overall height of fence.

Warranty: 25 years pro-rata.

SLAT PROFILE:

Slat Type	Slat Width	Mesh Size	Wire Gauge	Slats Per Bag
Winged Slat®	1⅜"	2"	9 only	82

FINLINK® (Extra-Privacy)

The FinLink® slat offers extra screening and security with a unique configuration of (3) three privacy fins.

Design: Our unique innovative design includes a rigid, flat tubular body, with a "leg" inside the rigid, hollow body of the slat for extra support. Three flexible fins (two on one side and one on the other) are positioned on the sides of the slat body. The FinLink® fins are not serrated, thus providing a smooth finished look.

Installation Instructions:

Step 1 Insert locking channel horizontally in first full diamond at bottom of fence with open side facing up.

Step 2 Insert vertical slats with bevel end downward.

Step 3 Push the vertical slat into the horizontal channel until the slat touches the bottom of channel.

Standard Heights: 4, 5, 6, 7 and 8 feet.

Wind Load and Privacy Factor: Approximately 90%.

Bottom-Locking Channel: 10 feet provided in each bag.

Slat Length: 3½" shorter than the overall height of fence.

Warranty: 25 years pro-rata.

SLAT PROFILE:

Slat Type	Slat Width	Mesh Size	Wire Gauge	Slats Per Bag
FinLink®	1⅜"	2", 2¼" or 2⅜"	11	82

BEAM CLAY®

WHOLESALE PRICE LIST

Chain Link Fence Slats

LITELINK®

LiteLink® is a single wall "M" shaped slat that gives visual screening and color enhancement at our most affordable price. It also uses our innovative Bottom-Locking Channel system.

Design: Compact and lightweight, LiteLink®'s unique shape enables the slat to self stack. It comes packaged in a box (2" x 5" x Slat Length), making it easy to ship and efficient to store.

Installation Instructions:

Step 1 Insert locking channel horizontally in first full diamond at bottom of fence with open side facing up.

Step 2 Insert vertical slats with interlocking tab downward. Slat engages and interlocks with bottom rail.

Step 3 Push the vertical slat into the horizontal channel to lock in place.

Standard Heights: 4, 5, 6, 7, 8, 10 and 12 feet. Special heights available upon request.

Wind Load and Privacy Factor: Approximately 75%.

Slat Length: 3½" shorter than the overall height of fence.

Warranty: 7 years pro-rata.

SLAT PROFILE:

Slat Type	Slat Width	Mesh Size	Wire Gauge	Slats Per Box
LiteLink®	1¼"	2", 2¼" or 2⅜"	9, 11 or 11½	82

HEDGELINK® (Extra-Privacy)

HedgeLink® is our most premium and unique chain link fence enhancement product, which creates a natural green hedge look that requires no maintenance and offers almost complete privacy.

Design: The HedgeLink® core is made with a strong, rigid 16-gauge galvanized, braided wire. Blue Spruce colored 3-mil PVC needles are embossed for an extra plush effect.

Installation Instructions: Requires no locking device or tools and installs much like our Winged Slats®. Insert HedgeLink® slats vertically top to bottom, keeping the green needles facing up, while revolving the slat clockwise with your fingers for easier installation.

Standard Heights: 4, 5, 6, 7, and 8 feet.

Wind Load and Privacy Factor: Approximately 95%.

Fence Sizes: For most Chain Link Fence sizes. Not intended for use with mini-mesh or 3½" x 5" fence fabric.

Features: UV stabilized to protect against the harmful rays of the sun. Flame retardant.

Note: Do not mix HedgeLink® with any other manufacturer's hedge product – color shades are different.

Warranty: 10 years pro-rata.

Slat Type	Mesh Size	Wire Gauge	Slats Per Box	Approx. Coverage Per Box
HedgeLink®	2", 2¼" or 2⅜"	9, 11 or 11½	82	10 linear ft

BEAM CLAY®

Custom Ball Netting—Baseball / Softball

WHOLESALE PRICE LIST
EFFECTIVE: AUGUST 1, 2022

BALL NETTING

Protective and boundary netting is used to protect players, spectators, scoreboards, buildings and other structures in and around the ball park. The netting is customized to fit your needs and is completely weather-treated. Netting is either finished with black reinforced double sewn reinforced vinyl edging with brass grommets every 18" or a rope border. The reinforced edging provides the net with added strength while keeping the net's shape. Reinforced double stitched vinyl also gives the net a sharp appearance. Rope border offers a simple easy installation.

VINYL BORDER

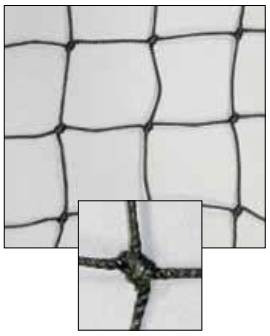

ROPE BORDER
Simple, easy installation.

#12 Knotted UHMPE Dyneema

Major league professional backstop netting provides maximum protection with maximum viewing. This strong netting is only 1.4 mm with a 94% visibility rate. Twisted knotted Dyneema is an ultra high molecular weight polyethylene (UHMPE). Material is treated for maximum UV and weather resistance. Netting perimeter is finished with a 1/4" solid braid sewn rope border. Rope border has 1,500 lb break strength.

1-3/4" SQ Mesh	**#26012**	**$1.39/SF**
Medium weight, 308 lb break strength; 94% visibility		
#42 Knotted HDPE, Black 1/34"sq. with Rope Border	**#26142**	**95¢/SF**

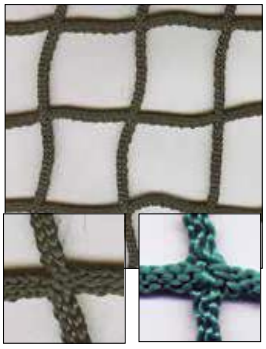

Knotless Polypropylene HTPP

This Premium high tenacity Polypropylene (Pylon) netting offers the most longevity and durability. Pylon netting is ideal for high impact backstop and protective screen applications. Outdoor netting is extruded through the fibers for maximum weather and UV resistance. Choose from black or dark green. Netting can be finished with a rope or vinyl border. A rope border offers a simple and easy installation. Double sewn reinforced vinyl edging with brass grommets every 18" provides the netting with added strength while keeping the nets shape.

3.0 mm; 1-3/4" SQ Mesh
Medium Weight, 250 lb break strength

Black, Sewn Rope Border	22260R	76¢/SF
Black, Vinyl Border with Grommets	22260	76¢/SF
Dark Green, Vinyl Border w/Grommets	22261	76¢/SF

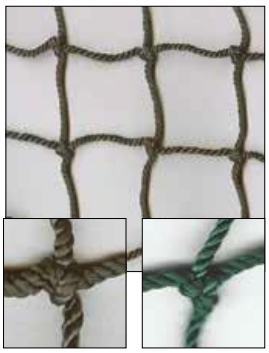

Twisted Knotted Nylon

This high tensile strength black nylon netting is ideal for medium to high impact backstop and protective screen applications. Outdoor netting has been treated for UV and weather resistance. Netting is finished with rope looped thru openings (not sewn) with corners tied with plastic ties which allows for simple and easy installation.

1-3/4" SQ Mesh with Rope Border

LIGHT WEIGHT		
#21 Black 237 lb. break strength	36099A	54¢/SF

BEAM CLAY®

FieldPro Net Systems

FIELDPRO™ NET SYSTEM

ALUMINUM POLES WITH ROPE BORDER NETTING ATTACHED TO 1/4" STEEL CABLE WITH PULLEY SYSTEM TO RAISE & LOWER NET

Custom FieldPro™ Net Systems
In today's congested sports complexes with multi-use fields in close proximity to each other, keeping balls within the confines of the field is important. Stop wasting time chasing missed shots or errant passes during practice and games. Ensure safety of the athletes, coaches, and spectators alike on adjacent fields and tracks. **FieldPro™ Net Systems** offer ultimate design flexibility to suit all perimeter netting needs.

Six Different Heights and Pole Styles
10' Straight Pole with multi-sport net is ideal for use as a Lacrosse and Field Hockey backstop net. The net is clipped at the top and bottom of each pole.

15', 20', 30', and 40' Straight Pole comes with a hoist system allowing quick and easy lowering/removal of the net after the game, season, or before a big storm. Reinstalling the net is a snap - all from ground level with no need for a ladder.

20' Offset Pole provides 3' of offset which is ideal for use around the perimeter of soccer and baseball/softball fields. It's also an added measure of safety from ricocheting balls.

Basic Features and Recommendations
- Pole spacing should not exceed 20'
- Net systems should be set back at least 25' from playing field
- Pulley system to raise/lower net (excludes 10' poles)
- Ground sleeves and caps facilitate installation and allow for system removal
- Corrosion-resistant hardware included
- Specify preferred pole color when ordering
- Made in the USA
- Ships via common Carrier
- Call for pricing and details

Call us we will work to solve any netting problem. From indoor and outdoor requirements, to pole and structure support, we have the solution for your athletic field or facility.

Pole	Pole Description	Net	Net Description
FN-10	10' tall straight 2⅜" OD heavy-walled aluminum pole	FN-A	#36 knotted multi-sport UV treated nylon net with 1¾" sq. mesh and ¼" rope border

BallStopper Systems

WHOLESALE PRICE LIST
EFFECTIVE: JANUARY 1, 2022

20’ - 40’ BALLSTOPPER SYSTEMS

Aluminum Straight Posts with Rope Border Netting Attached to 1/4 “Steel Cables With Pulley System to Raise & Lower Net

- Semi-permanent design allows netting to be easily lowered in the event of high winds or when not in use.
- 1-1/2" sq. #420 Knotless Nylon net mesh for baseball, softball & lacrosse, 4” square mesh for football and soccer. Dyneema net upgrade available.
- Post dimensions range from 4"-8" diameter straight 20'-40' high out-of-ground aluminum uprights install into provided ground sleeves
- Pulley system to lower and raise nets (black standard - other colors available)
- Synthetic UV-treated netting has permanently attached vinyl-coated galvanized steel cable across top, which reduces “net sag”
- System heights range from standard 20' high - also available in 25', 30',35' or 40'
- Mill finish standard on posts (custom powder-coating also available for an additional cost)

Select STRAIGHT POSTS Model:

EFFECTIVE: JANUARY 1, 2022

20’ - 40’ BALLSTOPPER SYSTEMS

Aluminum Straight Posts with Rope Border Netting Attached to 1/4 “Steel Cables With Pulley System to Raise & Lower Net

- Semi-permanent design allows netting to be easily lowered in the event of high winds or when not in use.
- 1-1/2" sq. #420 Knotless Nylon net mesh stops all size sport balls, except golf balls. Dyneema net upgrade available.
- Pulley system to lower and raise nets
- Synthetic UV-treated netting has permanently attached coated galvanized steel cable across top, which reduces “net sag”
- Standard upright is 20' high - also available in 25', 30', 35' or 40' heights
- Uprights range from 4" to 8" in diameter and feature a 3' offset to be installed out of field of play
- Offset post design eliminates ball contact with the uprights, preventing deflection
- Installation requires ground sleeve
- Mill finish standard on posts (custom powder-coating also available for an additional cost)
- Typically sold in 20' sections.

- Low cost
- Requires minimum storage space
- Creates an enclosed ball field with HR marker

In-Ground Grand Slam Fencing™ Accessories *Socket Kit Includes*

FEATURES :
- 12” long PVC socket (quantity varies per kit)
- Top cap to cover socket when not in use
- Tool to set sockets

BENEFITS:
- Easy to install/stays put for easy reinstallation
- Gives extra stability
- Allows for quick removal of fence for mowing or events

8' High Foul Pole Kit Includes

(not available for above ground fencing)

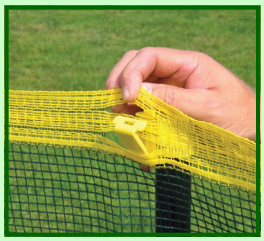

FEATURES:
- Gives the outfield that finished look
- Fits all portable or temporary fences

BENEFITS:
- Two 8' yellow foam foul poles
- Two PVC reinforcing foul poles (attach to fence end poles)
- Two ground sockets
- Six 19" yellow tie wraps for attachment

IN-GROUND Grand Slam Fencing™ IS EASY TO SET UP AND TAKE DOWN

1. Insert poles through 3 loops woven into fence fabric.

2. Attach fence fabric to top cap with easy open/close latch.

3. Mark and drill holes for poles with optional 18" auger.

4. Place poles and sockets in holes. Fence is ready for use!

5. When you take down fence, roll up with poles in place. Takes minutes!

BEAM CLAY®

WHOLESALE PRICE LIST

Grand Slam Fencing™ Portable Safety Fencing

Above-Ground Grand Slam Fencing™ *(patent pending)*

FOR SYNTHETIC TURF & CROWD CONTROL

Portable fencing that can be used on synthetic turf, asphalt, concrete and natural turf too! No holes required!

ALL OF THE GREAT Features OF IN-GROUND GSF *(except no sockets or foul poles):*

- Durable, yet soft and easy-to-handle
- Quick and easy to set up and take down
- Available in red, blue and green, all with yellow home run marker
- Standard: poles at 10' intervals
- Optional: poles at 5' intervals
- Weighting for each pole to stand up to wind and prevent tipping

Benefits of above-ground Grand Slam Fencing:

- An attractive, durable and cost-effective solution for baseball/softball, and perimeter and crowd control needs
- Lightweight, making installation and removal quick and easy – no barriers to move and minimal storage space required!
- A fraction of the cost compared to other aboveground barrier options
- Perfect for any event including festivals, trade shows and sports games where drilling holes is not an option or not preferred

WHAT TO EXPECT:

• AGGSF will move when players impact the fence. Poles will bend and base weights will move.
• AGGSF will also move or blow over from strong winds. Adjustments to pull fence taut or to upright poles will be needed if the fence remains on the field for the season.
• AGGSF is durable, but not indestructible – regular bending of poles and strain on 4-way bases fitting (e.g. bending of fence to retrieve balls instead of walking around fence) will eventually result in breakage. Replacement parts are available for purchase. Minimizing wear-and-tear on fence parts will lengthen the life of AGGSF.

(not recommended for use during 30 MPH winds or greater)

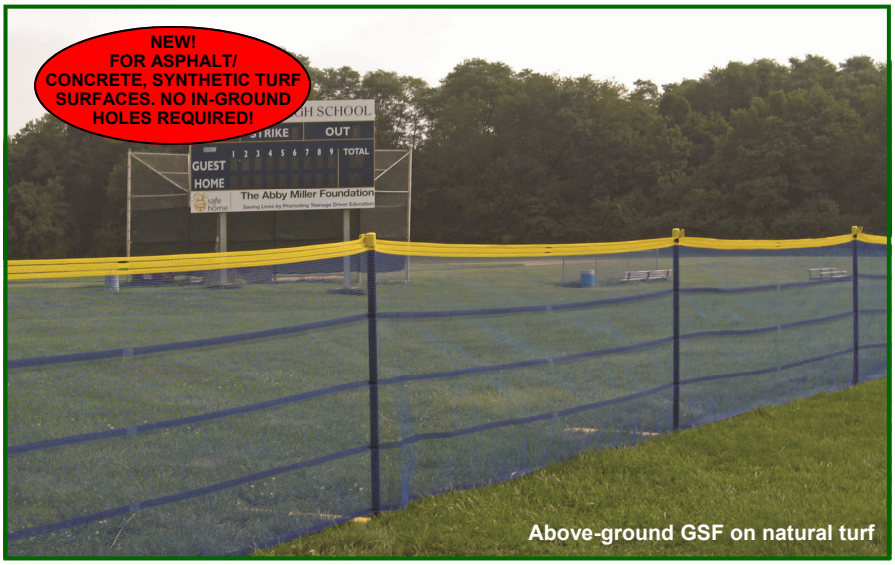

ABOVE-GROUND GSF FEATURE

Weighted base keeps fence in place

Kit sizes & components, see page 4

Above-ground GSF on natural turf

Above-ground GSF on synthetic turf

Above-ground GSF for crowd control

BEAM CLAY®

WHOLESALE PRICE LIST

Grand Slam Fencing™ Portable Safety Fencing

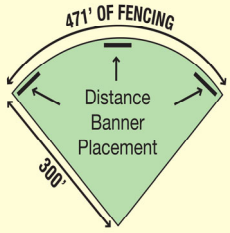

Grand Slam Fencing™ One-piece Fencing Kits

FOR BASEBALL, SOFTBALL & LITTLE LEAGUE POPULAR FIELD SIZES/DESIGNS

Benefits:
- No gaps in fence
- Clean continuous look

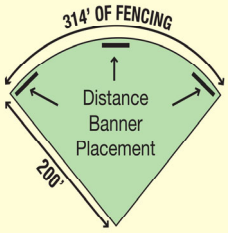

PREMIUM AND CUSTOM ONE-PIECE KITS AVAILABLE

300' LAYOUT

Baseball & Men's Softball Kit
300' HR Distance

200' LAYOUT

Softball & Little League Kit
200' HR Distance

DISTANCE BANNERS FOR ONE-PIECE KI TS

Distance banner available as 200 or 300

Distance Banner Colors

2 Green with yellow numerals	2 Blue with white numerals	2 Red with white numerals

Grand Slam Fencing™ Standard Length Kits

Benefits:
- Easier handling of smaller sections
- Can design with overlap/gap in sections for ball retrieval
- Design flexibility–can change outfield distance by adding or eliminating sections

For 300' home run distance (baseball) you can use 500' of fencing.
Recommended kits:
- 2 each 150' fence kits
- 2 each 100' fence kits

Extra fencing allows for extension beyond foul line for overlap

300' LAYOUT

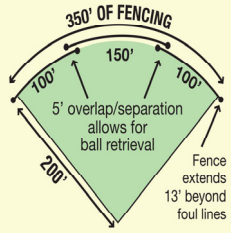

Common field designs using our standard length kits.

To calculate the fencing needed for foul-pole to foul-pole, multiply the home run distance by 1.57. (200' home run distance x 1.57 = 314' of fencing)

For 200' home run distance (softball & little league) you need a minimum 314' of fencing.
Recommended kits:
- 1 each 150' fence kits
- 2 each 100' fence kits

Extra fencing allows for extension beyond foul line or overlap.

200' LAYOUT

BEAM CLAY®

Enduro Portable Safety Fencing

WHOLESALE PRICE LIST
EFFECTIVE: AUGUST 1, 2022

4' HIGH ENDURO FENCING with Yellow Top Tape

- REVOLUTIONARY
- FLEXIBLE
- SIMPLE INSTALLATION
- PORTABLE
- DURABLE POLE POCKETS
- LOOKS GREAT

Sets a new standard for Simplicity, Durability & Appearance.
Simply slide the poles through the permanent vinyl pockets in the mesh fencing and drive the **SmartPole** into the turf with a rubber mallet. You're done—no ropes, ties, clips, hooks, etc. The vinyl pockets, spaced every 10 ft., create an attachment to the pole that is uniform top to bottom for excellent durability and appearance. Steel pilot hole tool is included for hard ground. Optional ground sockets available.

ENDURO FENCING PACKAGES

Includes revolutionary **Enduro** polyethylene mesh fencing material w/permanent vinyl pole pockets, two white **SmartPole** anchor poles and Heavy-duty Smart flex poles and pilot hole tool. Specify Color: Dark Green, Red or Blue fencing.

Cleat Cleaners

WHOLESALE PRICE LIST
EFFECTIVE: JULY 1, 2022

CLEAT CLEANERS

CLEAT CLEANER NO HANDLE	**#ACC**	**$30.44/ea.**
CLEAT CLEANER WITH HANDLE	**#ACCB**	**$30.44/ea.**

- Durable all-rubber construction
- 84 spikes for removing mud from cleats
- Perfect for use outside a locker room, near a team bench or on the backside of a pitcher's mound
- Can be mounted to treated wood and buried for permanent installation
- Available with or without handle

SOFTSWIPE® CLEAT CLEANER

Especially designed to clean sport cleats: Football, Soccer, Baseball, Lacrosse, Rugby, etc. 12" rubber molded discs. The handle makes for easy transporting to sidelines and out on the field during practice or games. Color Orange.

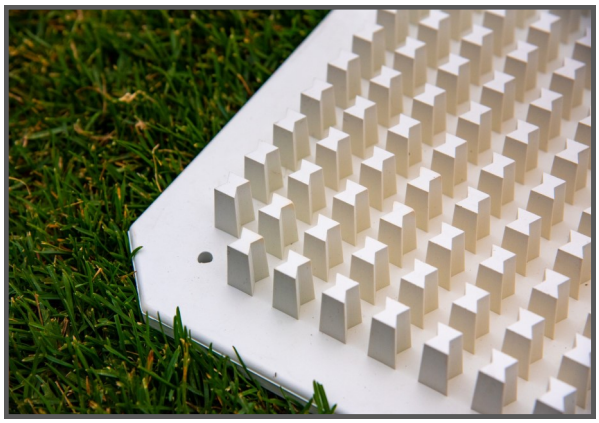

#SOFTSWIPE	**$39.95/ea.**

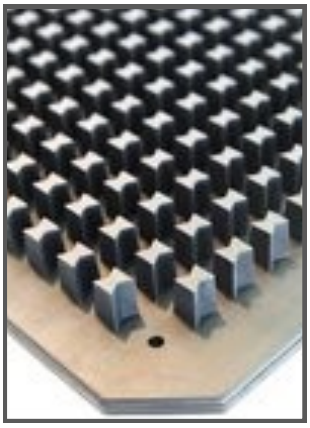

SHOE BRUSH

For use at clubhouse entrance. Two foam plastic blocks with blue plastic bristles on steel frame with steel scraper bar. Eliminate dirt, mud, sand, snow and slush from being tracked into the clubhouse. (6 lbs.)

#4042414 –Blue	**$76.95/ea.**
#4042514 - Replacement Brush (two per Cleat Brush) each	**$15.95/ea.**
#4042501—Replacement Handle each	**$14.95ea.**

Heavy-Duty Bulldog Cleat Cleaner

2nd Edition Bulldog Cleat and Spike Cleaner still features a larger base surface but is made with more flexible natural rubber cleat cleaning spikes - 178 spikes. The spikes have an innovative bow-tie design to get more debris of the bottom of the athletic shoes. Four pre-drilled holes in the corners of the cleat and spike cleaner make installation easier. Cleaner can be mounted to a block of wood, buried in the ground, laid on the turf or

BEAM CLAY®

Baseball Rubbing Mud & Drying Agent

WHOLESALE PRICE LIST
EFFECTIVE: JANUARY 1, 2022

DRI-BALL® Within 30 seconds turn any water-soaked ball into a perfectly dry ball! **DRI-BALL®** is quick and easy to use for games and practice! For baseball, softball, football, soccer, tennis, volleyball or any other sport with a ball that gets damp, wet or even soaking wet!

- Simply place the ball into an air-tight container with the **DRI-BALL®** compound.
- Shake the container - 30 seconds later, remove your ball and it will be completely dry and ready to use, and without any residue.
- **DRI-BALL®** also extends the life of balls, which reduces replacement costs.

One **DRI-BALL** kit contains 2 (1¼ lb.) packages of the **DRI-BALL** compound.

One to two kits should last one season, including practices: **DB-KIT** **$75/Kit**

- For baseball after wet practices, place 8-10 balls in 3-gallon container with 1 package of **DRI-BALL**. Shake for 30 seconds. All of the balls will be dry, will not rot, and will not get heavy. The entire kit should last for a 25-game season if you use **DRI-BALL** 2 to 3 days per week and keep **DRI-BALL** containers air-tight at all times.
- For football & soccer, dunk muddy balls into water to wash off mud. Place in 5-gallon container with 1 package of **DRI-BALL** and shake for 30 seconds. Your ball will be clean and dry! Nothing else is this easy! Keep **DRI-BALL** air-tight at all times.

PARTAC PEAT CORPORATION

Your "One-Stop" Source for America's Leading Golf Surfaces & Supplies!

CONTROL THATCH · PROMOTE HEALTHY TURF · FAST GERMINATION · SMOOTH PLAYING SURFACES

HEAT TREATED

✦ **PARTAC® Premium Golf Course Top-Dressing** controls thatch while building the best growing medium and playing surfaces on golf course greens! ***Heat treated*** and composed of ***uniform particles***, PARTAC® Premium Golf Course Top-Dressing restores the natural, beneficial bacterial action that breaks down thatch and helps prevent turf diseases, while maintaining the ideal balance for water retention and drainage.

✦ **Our Heat Process Does More Than Kill Weed Seeds!** It destroys insects, diseases and nematodes, while binding the sand, silt and clay in soil into ***water stable aggregates*** that hold their shape under moisture and compaction. Our heat treatment is a ***pasteurization*** process which retains beneficial bacteria without making our mixes hydrophobic. Our heat process ***dries*** the mixture so that particles this small can be screened to eliminate oversize and undersize particles which plug up pore spaces and to give you the most effective top-dressing without leaving debris to be raked off! PARTAC® Premium Golf Course Top-Dressing comes dry and spreads with ease. Plus, PARTAC® Premium Golf Course Top-Dressing weighs less, giving you ***more top-dressing per ton!***

✦ Available in bulk or 50 lb. bags.

TOP-DRESSINGS

CALL 800-247-2326 OR 908-637-4191

PARTAC® PREMIUM GOLF COURSE TOP-DRESSING

Our Premium Mix for traditional greens; approximately 75% sand by analysis (by volume: 50% sand and 50% our special composted mix of rich, uniform sandy loam and reed-sedge peat); weight approximately 1,700 lbs. per cubic yard; high sand content yet a superb growing medium rich in beneficial bacteria - the ideal topdressing for traditional greens!

Specifications	
Mechanical Analysis (By Weight)	Sand.....70-80% Silt.....5-15% Clay.....3-8%
Uniform Particles	80% Between .25mm and 1mm
Sand Sieve Analysis	2mm or greater.....0 .25mm-1 mm.....70-80% Smaller than .25mm.....Max 20%
Organic Content	8-12%
Aggregation	50-70% Water Stable Aggregation by the Yoder Test with 15-25% Primary Material
Porosity	Total 40-50% @ 40cm of water Air-filled 20-30%
Infiltration Rate	5-8 inches per hour
Weight	60-70 lbs./cu. ft.
pH	7.0-7.2
Heat Treated for Weeds, Insects, Diseases, and Nematodes	

PARTAC® PREMIUM HIGH-SAND MIX TOP-DRESSING

Recommended for USGA-type high-sand greens; 80% sand, 20% reed-sedge peat by volume; approximately 93% sand by analysis; weight approx. 2,300 lbs. per cubic yard.

Specifications	
Particle Size:	
Gravel	Greater than 3mm.....0
Fine Gravel	2-3mm.....0
Very Coarse Sand	1-2mm.....Max. 5% above 1mm
Coarse Sand	.5-1mm.....Min. 80% between .25 &1mm
Medium Sand	.25-.5mm.....Min. 80% between .25 & 1mm
Fine Sand	.1-.25mm.....Max. 15% below .25mm
Very Fine Sand	.05-.1mm.....Max. 1% below .1mm
Silt	.002-.05mm.....Less than 5%
Clay	Less than .002-.05mm.....Less than 5%
Porosity	Total 35-50% at 40 cm of water Air-Filled 20-30%
Infiltration Rate	10-20 inches per hour at 40 cm of water
Weight	80-90lbs./cu. ft.
pH	5.5-6.5
Heat Treated for Weeds, Insects, Diseases and Nematodes

PARTAC®

Cart / Walking Path Mixes & Stabilizer®

WHOLESALE PRICE LIST: F.O.B. GREAT MEADOWS, NJ
EFFECTIVE: JUNE 1, 2022

PARTAC®
NATURAL
PATHWAY & GOLF CART PATH MIXES

Use near greens (instead of macadam or concrete) for firm, smooth surfaces with great drainage that stop rather than bounce golf balls!

Available in 3/16" minus Burgundy Red, Grey, Tan or White crushed stone with either a 20% **Beam Clay® Binder** for smoother surface, or a 5% **Beam Clay® Binder** for a somewhat crunchier surface, or with Stabilizer® a natural organic binder "**Stabilized**" for an even firmer, yet more resilient surface—each with excellent drainage and resistance to erosion. Excellent natural surfaces for walking paths, jogging trails, driveways, or patios.

Also, the effect is subtle. The surface looks like natural aggregate. Upon further inspection you notice the aggregate holds together. **The Path when wet, is stable.** These binders will not transform the aggregate into concrete- you can still feel the crunch of the gravel under foot. It simply makes an aggregate stronger where you want a natural, rugged appearance, but you also want better performance. **Easy to maintain:** Recommended maintenance is to scarify and roll each spring. Otherwise, drag mat as needed to maintain smooth surface. Recommended depth is 1" - 3" depending on your base. If poorly draining soil, stabilize base first with 3/4" minus road stone.

		BULK/TON		50 LB. BAG Up to 50/pallet
3/16" Burgundy Red Cart / Pathway Mix				
One cubic yard weighs approximately 2,700 lbs., plus add 20% for compaction. Each 1" compacted requires approximately 5 tons per 1,000 square feet.

PALLET & COVER CHARGES: $6.50/PALLET. #NJ-PALLET				

STABILIZER® - A colorless, odorless natural glue that binds sand & aggregates together producing firm yet well-draining surfaces. The natural way to provide excellent moisture control, dust control, and erosion prevention for golf cart paths, tee approaches, sand trap bases, edges and banks.

For cart paths uniformly work in 1 lb. or more every 10-20 sq. ft. (3" deep), wet and roll; or blend 15-17 lbs. of Stabilizer® per ton of crushed aggregate screenings, wet and roll.

For sand trap bases, edges, and banks uniformly blend 20-25 lbs. Stabilizer® and 3 lbs. STALOK® G400 into each 1 ton of 1/8" minus aggregate, make into a slurry, spread 2" deep, roll and/or tamp.

To firm existing trap sands uniformly work in 1 lb. Stabilizer® every 5 sq. ft. (4" deep), or blend 10 lbs. into each 1 ton of sand.
40 lb. bags - up to 50/pallet.

		Per Lb.	Per Bag
F.O.B. AZ - 40 lb. Bags (up to 50/pallet)	STAB-AZ-BAG	$3.25/lb.	$130

Rubber Curbing

Product Specifications

Product Description:

1. Material: compression molded composite of the 100% recycled rubber and polyurethane prepolymer

2. Physical properties of the rubber composite:
   a) Density 0.6 oz/cu in (ASTM C642)
   b) Durometer Hardness 65A ± 7 (ASTM D2240)
   c) Tensile Strength* minimum 125 psi (ASTM D412)
      (* main structural areas)
   d) Compression deformation 10% at 70psi, 68°F (ASTM D575)
   e) Brittleness at Low temperature: -40°F (ASTM D746)
   f) Freeze and thaw when exposed (ASTM C672)
      to deicing chemicals no loss after 50 cycles
   g) Coefficient of thermal expansion: 8 x10^{-5} in/in/°F (ASTM C531)
   h) Weathering 70 hours at 158°F (ASTM D573)
      - hardness retained 100% (± 5%)
      - compressive strength 100% (± 5%)
      - tensile strength 100% (± 5%)
      - elongation retained 100% (± 5%)

3. Available models:
   a) 4”W x 4”H x 72”L with weight of 30 lbs.
   b) 4”W x 6”H x 72”L with weight of 45 lbs.
   c) 4”W x 8”H x 72”L with weight of 70 lbs.
   d) 3”W x 4”H x 72”L with weight of 20 lbs.
   e) 3”W x 4”H x 48”L with weight of 13 lbs.

4. Finishing color: dark brown

Installation methods:

a) with 2 spikes 18” long x 3/8” diameter provided for each 4” high piece
b) with 2 spikes 24” long x 3/8” diameter provided for each 6” high or 8” high piece

Note: The mounting holes can be closed after installation with the rubber plugs 1-1/8 diameter and ¾” long, supplied with the product.

Components:

a) 100% recycled rubber from car and truck tires (NR, SBR)
b) polyurethane prepolymer for rubber granules
c) brown pigment

GOLF COURSE PRODUCTS

WHOLESALE PRICE LIST: F.O.B. GREAT MEADOWS, NJ
EFFECTIVE: JUNE 1, 2022

U.S. GOLF HOLE TARGETS™

#TARGETS1	1 Set of 18 Targets (Tournament Supply)	**$75 set**

TARGET CUPS

While U.S. Golf Hole Targets fit all standard cups, these white molded plastic cups are designed to fit perfectly with **Targets** to prevent golfers who use their putter to remove balls from cup from accidentally displacing the **Target**.

#TARCUPS-1	1 cup	**$45 each**

TARGET CUP-SETTERS

White molded plastic cup-setters engineered to fit perfectly with **Targets** to prevent "sticking" and to provide more
equalized downward force than traditional cup-setters to better level turf around the golf hole.

#TARSTR	1 per Box	**$45 each**

PARTAC®

Golf Course Greens Sand Drags

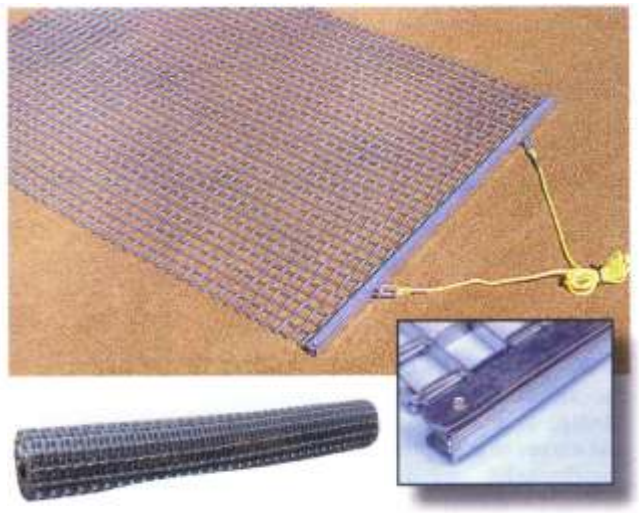

WHOLESALE PRICE LIST
EFFECTIVE: JANUARY 1, 2022

FLEXIBLE TURF & INFIELD DRAG MATS, STANDARD-DUTY 3/8" x .046" galvanized steel with Rope & Handle. Red spacers are placed in the two corners that do not have the attachment. The mat can roll up from left to right with the drag attachment bar on the right. Great for working aerification cores into turf. Convenient for transporting to multiple infields since they roll up. Custom sizes available. Mats are generally rolled and a cardboard sleeve is placed over each end for shipping with additional cardboard around the middle to place shipping labels.

Most Popular Sizes: From PA plant allow 2-3 weeks lead time. Most popular sizes normally in stock from NJ.

		NJ PLANT #	NJ PLANT	PA PLANT

PARTAC®
Synthetic Golf & Landscape Turf

WHOLESALE PRICE LIST
EFFECTIVE: JULY 1, 2022

SYNTHETIC GOLF TURF

A perfect golf practice facility needs to perform authentically and consistently - our turf does just that. Practice your drive or perfect your aim anytime of the year — there's no downtime for regular maintenance. Whether you're practicing or playing, our synthetic turf performs so closely to natural grass, you may not notice the difference.

100% polyethylene, polypropylene or nylon with 1mm rubber backing (for a firmer feel), 5mm foam-rubber backing (for a softer cushion), or unitary backing. Adjust speed by adding more sand infill. Can be installed outdoors or indoors on a compacted aggregate base or on concrete or asphalt. Comes in 12' or 15' wide rolls. 10' minimum order length. Various options for fringe areas.

POLY PUTT 36 - 36 oz. POLYETHYLENE PILE, 2 lbs./sf dry 20/40 or 30/50 sand recommended 15' wide stock rolls, Golf Green, SilverBack™ polyurethane	PP-PL95215WSB	$2.35/sf
POLY PUTT 48 - 48 oz. TEXTURIZED POLYETHYLENE PILE, 2 lbs./sf dry 20/40 or 30/50 sand recommended 15' wide stock rolls, Verde/Olive, SilverBack™ polyurethane	PP-PL93615WSB	$4.95/sf
POLY PRO PUTT 35 - 35 oz. TEXTURIZED POLYPROPYLENE PILE, 2 lbs./sf dry 20/40 or 30/50 sand recommended 15' wide stock rolls, Field/Apple, SilverBack™ polyurethane	PPP-PL96515WSB	$2.55/sf
EAGLE PUTT - 30 oz. POLYPRO PILE, 2 lbs./sf dry 20/40 or 30/50 sand recommended 15' wide stock rolls, Spring Green, SilverBack™ polyurethane	EP-PL7715SB	$2.95/sf
PUTT ONE - 25 oz. NYLON PILE, No infill 15' wide stock rolls, Turf Green or Verde, 5mm foam	PO-PL30615W5MM	$4.85/sf
PERFECT PUTT - 48 oz. NYLON PILE, 2-3 lbs./sf dry 70 mesh sand or smaller sand recommended 15' wide stock rolls, Turf Green, 1mm Rubber	PP-PL30715W1MMR	$5.35/sf
TRUE PUTT - 36 oz. NYLON PILE, 2 lbs./sf dry 20/40 or 30/50 sand recommended 15' Wide stock rolls, Turf Green or Verde, 1mm rubber	TP-PL30815W1MMR	$4.55/sf

PLEASE NOTE: Synthetic Turf is normally rolled face out. No charge to "reverse roll" cut pieces with turf faced in—which makes it easier to install—doesn't need to be flipped over.

There is a $2 per linear foot charge (**#CPTCUT**) to cut the width (there is a 1/4" tolerance) and/or pre-trim (**#CPTTRIM**) the scrim fabric along edge with a $100 minimum charge. Pre-trimming scrim can be done on site with scissors.

If gluing to concrete, use Robert's 6700 glue from Home Depot if 65° or warmer, Turf Claw™ if 55°+, or Nordot 34-G if 50°+. If installing over compacted aggregate, you need to spike perimeter and tape (12" w) & glue seams. Turf Claw™ can be shipped with your turf order. Check current pricing for tape & glue per quantity needed. If installing over macadam, be sure glue is compatible with macadam or loose lay with 2-3 lbs. sand to weigh the turf down, plus tape & glue seams. If gluing SilverBack™ polyurethane backing, make sure glue is polyurethane compatible.

For Batting Tunnels, all the above with foam backing are heavy enough to not be glued or spiked, but adding 2-3 lbs. sand per square foot is recommended for more weight to prevent shifting.

GOLF TURF

POLY PUTT 36

36 OZ. POLYURETHANE PILE

Secondary Backing:	SilverBack™ Polyurethane
Pile Height:	1”
Roll Width:	15’ Untrimmed
Perforated:	No, Custom only
Color:	Golf Green
Shipping Weight:	64 oz. per sq yard
Infill:	2 lbs./sf dry 20/40 mesh silica sand recommended

Applications:
When properly infilled with sand, this putting surface will hold golf shots from any distance. Very popular turf for par 3 facilities. This product can be installed outdoors on concrete, asphalt, or a compacted aggregate base or indoors on concrete.

These specifications are standard and may vary slightly due to manufacturing tolerances.

GOLF TURF

POLY PUTT 48

48 OZ. TEXTURIZED POLYETHYLENE PILE

Secondary Backing:	SilverBack™ Polyurethane
Pile Height:	3/8”
Roll Width:	15’
Perforated:	No, Custom only
Color:	Verde / Olive
Shipping Weight:	75 oz. per sq yard
Infill:	2 lbs./sf dry 20/40 mesh silica sand recommended

Applications:
Poly Putt 48 is your polyethylene putting green of choice. It has a thicker, denser design with a 3/8 inch pile height and color of Verde/Olive. This design allows for a smoother ball roll and better control.

These specifications are standard and may vary slightly due to manufacturing tolerances

GOLF TURF

EAGLE PUTT

30 OZ. POLYPROPYLENE PILE

Secondary Backing:	Silverback™ Polyurethane
Pile Height:	9/16” (+/- 1/8”)
Roll Width:	15’ Untrimmed
Perforated:	No, Custom only
Color:	Spring Green
Shipping Weight:	57 oz. per square yard
Infill:	2-3 lbs./sf dry 20/40 mesh silica sand recommended.

Applications:
This is our entry level putting surface. Multi colored yarn gives you the most authentic look. Performs best with sand infill and is designed to hold short shots while providing a true roll. Built to give the golfer a speed of 10 on the stimp meter, this product is ideal for any golf application. Perfect for putting and chip shots from 30 yards or less (if
infilled with 2-3 pounds of sand per square foot). Can be installed outdoors on concrete, asphalt, or a compacted aggregate base or indoors on concrete.

These specifications are standard and may vary slightly due to manufacturing tolerances.

GOLF TURF

PUTT ONE

25 OZ. TEXTURIZED NYLON PILE

Secondary Backing:	5mm Foam (with or without scrim)
Pile Height:	1/4" (+/- 1/8"), overall height approx. 1/2"
Roll Width:	15' Untrimmed
Perforated:	No, Custom only
Colors:	Turf Green or Verde (multi-shade)
Shipping Weight:	107 oz. per square yard
Recommended Infill:	No Infill

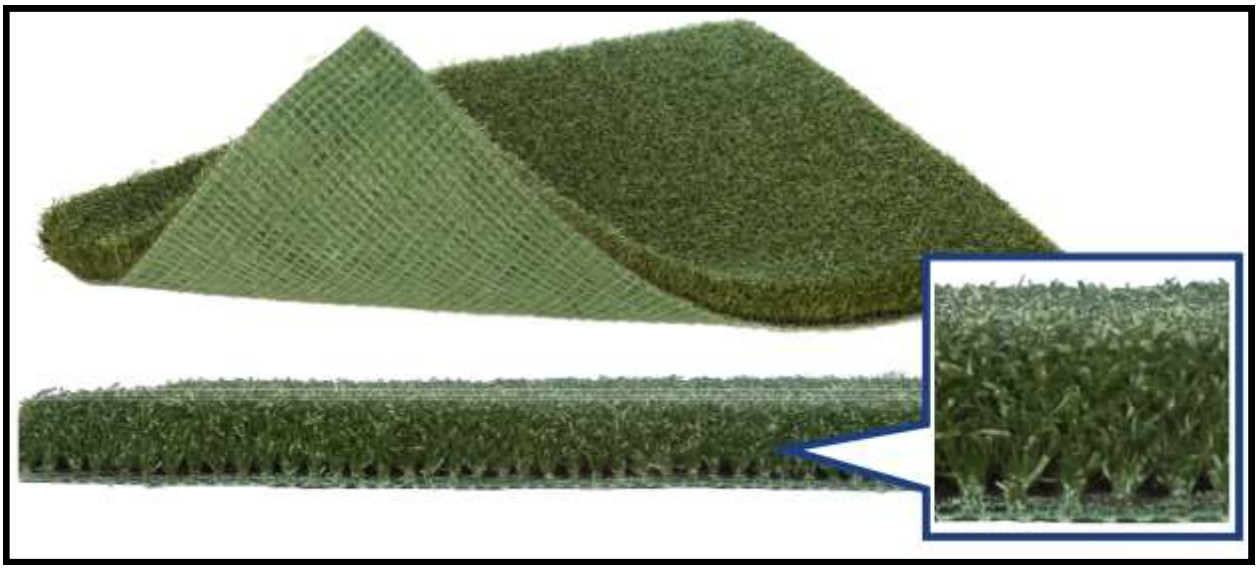

Applications:
This is an excellent putting surface that provides a very realistic roll with natural speed. This is also a great product for use on undulated surfaces and portable applications. Using foam back with scrim is ideal for glue down on flat surfaces, using the foam without scrim is perfect for undulated surfaces. The speed of the green will depend on the installation method. The ideal product for putting and short chip shots.

Use foam back with scrim for gluing to concrete or asphalt; use foam without scrim for installing over crushed aggregate. Can be installed outdoors on concrete, asphalt, or a compacted aggregate base or indoors on concrete.

These specifications are standard and may vary slightly due to manufacturing tolerances.

GOLF TURF

FRINGE TURF 941

52 OZ. POLYETHYLENE WITH TEXTURIZED POLYPROPYLENE PILE

Secondary Backing:	Silverback™ Polyurethane
Pile Height:	1-1/2”
Roll Width:	15’ Untrimmed
Color Available:	Field/Olive with Olive/Tan Thatch
Perforated:	Yes
Shipping Weight:	79 oz. per square yard
Infill:	2 lbs./sf dry 20/40 or 30/50 sand recommended

Application:

This is an excellent landscape product that offers thatch, which provides added body, reducing the amount of infill needed. The four color blend of this surface provides a truly authentic look and feel that resembles a natural lawn. This product can be used for landscapes, pet areas, fringes, and much more. This product can be installed indoors or outdoors on concrete or a compacted aggregate base.

These specifications are standard and may vary slightly due to manufacturing tolerances.

BEAM CLAY®

Typar® Geotextile Fabrics

WHOLESALE PRICE LIST: F.O.B. GREAT MEADOWS, NJ
EFFECTIVE: JULY 1, 2022

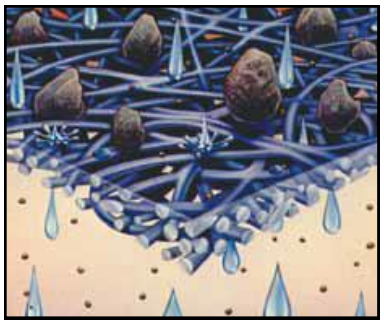

TYPAR® GEOTEXTILE FABRICS	SHIP WEIGHT	F.O.B., NJ Single Rolls		F.O.B., TN (Avail. In Tri-Packs ONLY)	
TYPAR® 3151, 3201, 3301 Grey					

Lightweight non-woven geo-textiles, thermally spunbonded from polypropylene, designed for separating playing surfaces from coarse drainage bases, **when water flow is a primary function**.

TYPAR® 3151 GREY(3 ROLLS/PACK) 1.6 oz./sq. yd. Our thinnest and most porous fabric, especially recommended for covering drainage base of baseball and softball infields to let fines pass through rather than plug fabric. Cover with at least 2" of sand before installing infield mix to prevent blinding fabric during installation and to provide a warning layer for the future: should the infield be deeply scarified or rototilled, the sand layer will be hit before catching the fabric.

60" (5') x 300' (SINGLES ONLY) ***167sy, 1,500 SF***	23 lbs.	3151G-60X300-NJ	$150/Roll	3151G-60X300-TN	$125/Roll
151"(12'7") x 300' ***419sy, 3,750 SF***	62 lbs.	3151G-151x300-NJ	$365/Roll	3151G-151x300-TN	$315/Roll

TYPAR® 3201 GREY (3 ROLLS/PACK)
1.9 oz./sq. yd.

36" (3') x 300' ***100sy***	17 lbs.	3201G-36x300-NJ	$105/Roll	3201G-36x300-TN	$85/Roll
48" (4') x 300' ***133sy***	21 lbs.	3201G-48x300-NJ	$135/Roll	3201G-48x300-TN	$115/Roll
75" (6'3") x 300' ***208sy***	32 lbs.	3201G-75x300-NJ	$205/Roll	3201G-75x300-TN	$175/Roll

TYPAR® BIOBARRIER is a long-term vertical root control system that consists of time-release nodules of trifluralin herbicide permanently bonded onto a permeable geotextile fabric. When strategically placed into the soil, it prevents damage from root encroachment into valuable surfaces long-term **(minimum of 15 years)** without harming trees or nearby landscaping.

TYPAR® BIOBARRIER is also a long-term horizontal weed control system. Placed on the ground like a landscape fabric and covered with up to two inches of stone, mulch or other cover material, the trifluralin in BioBarrier is slowly released from the nodules. The constant release of trifluralin from BioBarrier creates a narrow (approx. 2 inches) zone on either side of the fabric. Bio Barrier is effective because the zone of trifluralin extends into the stone, mulch or other cover material. Since weeds are unable to develop a strong root system in the presence of trifluralin, they are unable to survive when their roots reach the zone. Allow 4-6" overlap at seams. BioBarrier is more effective long-term **(minimum 10 years)** than any landscape fabric available.

BEAM CLAY®

WHOLESALE PRICE LIST
EFFECTIVE: JULY 1, 2022

SOL-Aer® Winter Turf Blanket

SOL-Aer® Winter Turf Blanket

Silver Lace Coated or Uncoated Basic White

Introducing the next generation of winter turf protection. Combining a revolutionary non-woven co-polymer fabric with a proven heat-absorbing silver lace coating, SOL-Aer Turf Blankets provide improved insulation for winter-weary grass root systems.

With its ground-breaking non-woven co-polymer fabric and proven heat absorbing/reflection lace coating **SOL-Aer Winter Turf Blanket** is the best turf protector ever.

Fabric: A unique Non-Woven material that is composed of bi-component fibers: A polypropylene core sheathed in polyethylene means strength and durability, plus superior nighttime insulation.

Silver Lace Coating: Combines with good sunlight penetration to increase daylight warming and decrease nighttime cooling. Same lace coating as on competitive Radiant product.

Fusion Welded Seams: Eliminates sewing and allows this super tough fabric to be moved and walked on without damage.

Light One-Piece Construction: Easy to hand cut without fraying, making for easier installation, removal and storage.

Mark-On Surface: Allows magic marker coding for precise positioning relative to other panels, sprinklers, goal posts, etc.

Insect Barrier: Light, water, & air penetrate through, but this tighter-than-woven material disallows insects from burrowing thru.

CHOOSE THE RIGHT CONFIGURATION FOR YOUR FIELD:
CHOICE 1. Silver Lace Coated or Uncoated Basic White
CHOICE 2. No Edging or Vipol® Edging with Grommets

SOL-Aer™ Winter Turf Blanket with Silver Lace Coating

SOL-Aer Turf Blanket with Vipol® Edging & #4 Grommets Installed All Around on Uncoated White Non-Woven or Silver Lace Coated

ADDITIONAL FEATURES and BENEFITS

Vipol Edging adds strength and breathability.

Non-woven fabric provides additional thermal insulation.

Provides frost protection and moisture retention.

Promotes earlier and more rapid germination and greening.

Standard Sizes: 10'x20', 20'x50', 50'x60' 60'x90', 70'x90', 90'x90', 80'x110'

Round top flat stakes included.

Custom sizes and cuts are readily available.

With its ground-breaking non-woven co-polymer fabric and proven heat absorbing/reflection lace coating SOL-Aer Winter Turf Blanket is the best turf protector ever.

TURF DEFENDER® TURF BLANKETS #3311WW

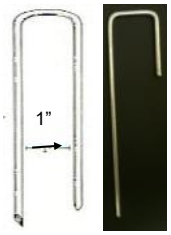

Woven (3 oz./sq. yd.) white polypropylene turf blankets with 4 ply double stitched hem on all sides and heavy-duty brass grommets every 5'. These ultra high strength turf blankets are designed for those open areas traditionally more exposed to high winds. With all four edges finished, **Turf Defender® Turf Blankets** are the strongest in the industry, effectively protecting turf from the winter elements and allowing for an earlier green-up. Sod staples and storage bag for labeling included. **8-year** pro-rated warranty for manufacturing defects and UV-resistance. F.O.B., PA

BEAM CLAY®

WHOLESALE PRICE LIST
EFFECTIVE: JULY 1, 2022

SOL-Aer® Winter Turf Blanket

SOL-Aer® Winter Turf Blanket

Silver Lace Coated or Uncoated Basic White

Introducing the next generation of winter turf protection. Combining a revolutionary non-woven co-polymer fabric with a proven heat-absorbing silver lace coating, SOL-Aer Turf Blankets provide improved insulation for winter-weary grass root systems.

With its ground-breaking non-woven co-polymer fabric and proven heat absorbing/reflection lace coating **SOL-Aer Winter Turf Blanket** is the best turf protector ever.

Fabric: A unique Non-Woven material that is composed of bi-component fibers: A polypropylene core sheathed in polyethylene means strength and durability, plus superior nighttime insulation.

Silver Lace Coating: Combines with good sunlight penetration to increase daylight warming and decrease nighttime cooling. Same lace coating as on competitive Radiant product.

Fusion Welded Seams: Eliminates sewing and allows this super tough fabric to be moved and walked on without damage.

Light One-Piece Construction: Easy to hand cut without fraying, making for easier installation, removal and storage.

Mark-On Surface: Allows magic marker coding for precise positioning relative to other panels, sprinklers, goal posts, etc.

Insect Barrier: Light, water, & air penetrate through, but this tighter-than-woven material disallows insects from burrowing thru.

CHOOSE THE RIGHT CONFIGURATION FOR YOUR FIELD:
CHOICE 1. Silver Lace Coated or Uncoated Basic White
CHOICE 2. No Edging or Vipol® Edging with Grommets

SOL-Aer™ Winter Turf Blanket with Silver Lace Coating

SOL-Aer Turf Blanket with Vipol® Edging & #4 Grommets Installed All Around on Uncoated White Non-Woven or Silver Lace Coated

ADDITIONAL FEATURES and BENEFITS

Vipol Edging adds strength and breathability.

Non-woven fabric provides additional thermal insulation.

Provides frost protection and moisture retention.

Promotes earlier and more rapid germination and greening.

Standard Sizes: 10'x20', 20'x50', 50'x60' 60'x90', 70'x90', 90'x90', 80'x110'

Round top flat stakes included.

Custom sizes and cuts are readily available.

With its ground-breaking non-woven co-polymer fabric and proven heat absorbing/reflection lace coating SOL-Aer Winter Turf Blanket is the best turf protector ever.

BEAM CLAY®

Aer-Flo Bench Zone® Sideline Turf Covers

WHOLESALE PRICE LIST
EFFECTIVE: JULY 1, 2022

BENCH ZONE™
SIDELINE TURF PROTECTORS
CLEATS CANNOT PENETRATE

But rain, sports drinks, sweat, etc. drain thru and are **not absorbed and retained** like in other mats that **TRIPLE IN WEIGHT** and **EMIT ODORS** in storage.

SIMPLY HOSE OFF TO CLEAN FOR STORAGE.

Fabric is the latest generation of PVC-Polyester – VIPOL™ Matrix Material – that is non-absorbent, tough, and durable. Air and sunlight can penetrate so this bench tarp can be left down for longer periods without damaging the grass. Much lighter in weight, easier to install and remove and store in 80% less space than competitive products. All edges are folded, internally reinforced, and double-stitched. Grommets are installed every 18".

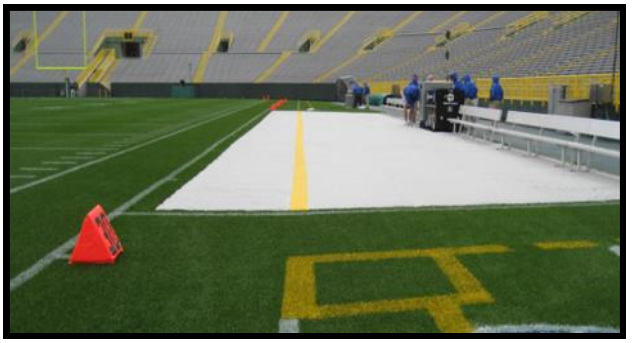

HELPS PROTECT PLAYERS
& GROUNDS CREW AGAINST MRSA.

SPECS: Fabric: Vipol™ Matrix Material
Stock sizes: 15' deep x 50', 75', 100', 125', and 150' long.
Fastest shipping times in the industry.
Standard color: Light Grey
Custom colors and sizes are readily available for quick shipment.
3 year factory prorated warranty

All sizes made with Vipol™ Matrix Material

TESTIMONIAL

I wanted to take the opportunity to let you know how satisfied we are at Purdue University with your new sideline cover. This new sideline cover has held up better than I imagined. The three customized colors that distinctly mark the coaches and players areas really help our coaching staff keep order on the bench. The permeability of the material helps keep the cover cleaner than any other sideline cover we have used in the past.

I would recommend your sideline cover to any school or team for their use in their stadium. I've been the stadium director at Purdue University for over 20+ years and I can say with confidence that your sideline cover is the "Best" we have used.

Sincerely,
BOB HALAS, Director of Outdoor Athletic Facilities, PURDUE UNIVERSITY

Our sharp multi-color images will outlast other processes. Eliminates the historic problems of digital printing, like weathering, premature fading, scuffing, and unsightly white mesh backside color. Images will last outdoors as long as the fabric, something rarely true with digital imprinting. Also highly spike, cleat, and racquet resistant. Our thick, individually-applied, double coating process literally bonds the image into the vinyl and completely masks the underlying fabric color, so image colors are vivid and true.

Chroma-Bond imprinting is available on our vinyl-surfaced windscreen, cover, padding & sign products.

FEWER COSTLY PENALTIES & LOST TIMEOUTS
Gives special teams an exact location to ORGANIZE and CALL PLAYS before entering the game.

Constructed of cleat-proof industrial matrix fabric with a 3' square for each special team player, plus the front section for captain and coach. Entire edge is vinyl wrapped with internal steel chain weighting, making mat WIND-PROOF and easy to install without stakes. Just lay in on turf or over sideline turf protector.

Easily folds and travels with team to away games!

SPECS: Fabric: Vipol™ Matrix Material
Standard color: Light Grey with 3" wide screened-on yellow stripes and yellow vinyl edging.

TESTIMONIALS

Our coaches feel the Huddle Zone™ Mat's convenience has saved them time, giving our kids a central location to meet before going out on the field. It has been easy to maintain and travel with. It also keeps our special teams area clear for our players to meet.
GARY JOSEPH, Head Football Coach, KATY HS; Katy, TX

Each player on our punt team is assigned a box and knows to be in it on 3rd down. It enables us coaches to have players ready if we choose to punt and may have saved us a timeout or penalty. We give some credit to the Huddle Zone™ Mat for one of our better special teams performances this season.
GREG MANTHEI, Special Teams Coordinator, DULLES HS; Sugarland, TX

9' x 15' Mat with gold stripes **#HZ** **$535**

BEAM CLAY®

PolyPro Turf Protection for Concerts, Graduations & Special Events

WHOLESALE PRICE LIST
EFFECTIVE: JULY 1, 2022

PolyPro Turf Protection for Concerts, Graduations & Special Events

Allows field use for non-athletic events.

Heat-fused top side will stand up to chairs, tables and foot traffic.

Features / Benefits:

100% polypropylene blanket-style protection
— Protects turf from trash, gum and other debris
— Provides flat, uniform surface for chairs and shoes with heels
— Allows air and water to pass through

Heat-tempered on top side
— Protects against high traffic wear and tear, even with cleats

Heather Gray color
— Will not absorb heat like dark colors

Custom lengths up to 250', Velcro attachments (for connecting rolls) grommets for staking down are available.

15 oz./sq. yd., 14' wide x 150' long	PolyPro14X150	$2,775/Roll

Roller for easy handling and storage.

Weight: 12 lb./LF

34' and 40' lengths shipped in two sections and joined in the field (hardware provided)

28" O.D. x 13'	SR28X13	$425/ea.
28" O.D. x 20'	SR28X20	$650/ea.
28" O.D. x 34'	SR28X34	$1,050/ea.
28" O.D. x 40'	SR28X40	$1,225/ea.

BEAM CLAY®

WHOLESALE PRICE LIST
EFFECTIVE: JULY 1, 2022

EnkamatPlus and Enkamat Flatback—Turf Protection for Concerts, Graduations & Special Events

EnkamatPlus

EnkamatPlus is an innovative product that provides maximum protection for natural turf fields in some of the most high traffic areas — the sidelines during football and soccer games and around the batting cages and fungo areas for baseball practices. What makes this product work so well is that it it won t crush or suffocate the grass. The open structure of the mat allows rain (and other liquids) to flow through, the grass blades to remain intact, and protects the field from unwanted down time. It is perfect for multi-use and professionally maintained fields.

Made of a tough polyester fabric bonded to a special constructed three-dimensional nylon core, EnkamatPlus is the solution for keeping grass healthy and green. This flexible, open matting is the most effective protection you ll find to replace old-style tarps and polyester blankets.

Installing EnkamatPlus couldn't be easier — it can be rolled out and rolled up within minutes. After the game the rolls can be easily stored in an equipment room or outdoor storage area and are reusable season after season.

When asked if he would recommend EnkamatPlus to his colleagues Ross Kurcab, Turf Manager of the Denver Broncos replied, Absolutely! It simply protects the grass better. It is softer for the players and easy to deploy. Any added expense would be saved in the first year from little or no grass repair.

16'W x 150'L Rolls, 430 lbs.	#205663	**$3,195/Roll**
8'W x 150'L Rolls, 215 lbs.	#205647	**$2,125/Roll**

EnkamatPlus provides protection for the sideline areas and can withstand the pounding of cleats, heavy equipment, chairs, and thousands of dancing feet.

"When they rolled it up, we were amazed. The grass looked brand new. It really worked like a champ."
— Larry Hawkins
Asheville Tourist
General Manager

EnkamatPlus protects the field in any vulnerable area.

Enkamat Flatback

Enkamat Flatback is an alternative for field protection during non-athletic events. It can be used alone or as part of a protective flooring system. It is installed with the flat, two-dimensional side up to provide a smooth, even surface for plywood, geotextile fabric, or chairs to be placed directly on top. Equipment can be moved on and off the field with no damage to the turf.

15'W x 150'L Rolls, 235 lbs.	#181999	**$4,650/Roll**

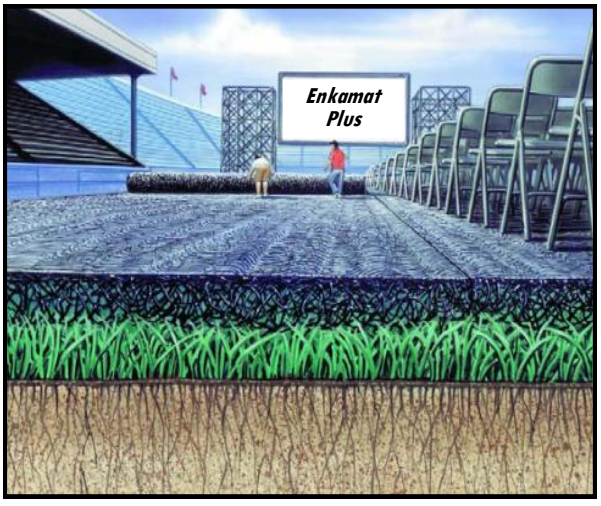

Enkamat Flatback being unrolled before a rock concert.

Concerts & Social Events

Professional and non-professional athletic fields are being used more often for concerts and other social gatherings. EnkamatPlus and Enkamat Flatback can be your cushion of safety. The products have a Class A Fire Rating and a smooth, walkable surface. Typically Enkamat Flatback is used 5-6 layers high under stage supports.

Thousands of feet hoppin to the beat won't crush EnkamatPlus & Enkamat Flatback. This strong, yet flexible structure springs back into shape under incredible weight. In fact, when the same matrix is used in construction applications heavy vehicles drive on it all the time. So what s to worry about a mob of energetic teenagers or some beefed-up linemen?

BEAM CLAY®

Synthetic Turf - Home Plate Circle Halo Kits

WHOLESALE PRICE LIST
EFFECTIVE: JULY 1, 2022

HOME PLATE CIRCLE - ARTIFICIAL TURF HALO KITS

Made from **PREMIUM 36 oz.** Artificial Turf. Pre-cut to fit a 13' radius from back point of home plate. Must be glued to concrete or asphalt. All seams are cut to fit like a puzzle. Only the outside edges get trimmed or tucked in dirt. Can usually be installed by grounds crew. Comes with or without a foam-rubber backing. Foam-rubber backing provides more cushioning but is somewhat more difficult to install. Kits come 5' or 10' deep, with or without wings.

HALO KITS WITH SILVERBACK™ POLYURETHANE BACKING

		GREEN		COLORS
5' Halo Kit, no wings, weight 400 lbs.	KIT#4U	$6,195	KIT#4UC	$6,795

BEAM CLAY®

Synthetic Turf - For Baseball & Softball

WHOLESALE PRICE LIST
EFFECTIVE: JULY 1, 2022

SYNTHETIC TURF FOR BASEBALL & SOFTBALL

Ideal for batting tunnels, dugouts, bullpens, walkways, coaching boxes and locker rooms. 100% polypropylene, with 1mm rubber backing (for a firmer feel, especially for loose lay applications), 5mm foam-rubber backing (for a softer cushion), SilverBack™ polyurethane backing. Can be installed outdoors or indoors on a compacted aggregate base or on concrete. 15'' wide rolls. 10' minimum order length.

BASEBALL 36 PREMIUM - 36 OZ. POLYPRO PILE

The same premium grade of turf that our batting practice mats are made of. Great for any use you may have without getting into stadium grade products. 36 oz. pile, 15' wide stock in spring green (lighter multi-shade green) or pine (darker solid green). Available in 17 additional colors.

PL70515W5MM	15' wide, spring green or pine, 5mm foam	$4.50/SF
PL70515WSB	15' wide, spring green or pine, SilverBack™ polyurethane	$3.25/SF
PL70515W1MM	15' wide, pine or clay, 1 mm rubber	$3.25/SF
PL70515WC5MM	15' wide, clay, red, white, blue, orange, yellow, black, tan, or brown, 5mm foam	$4.85/SF
PL70515WCSB	15' wide, clay, red, white, blue, orange, yellow, black, tan or brown SilverBack™ polyurethane	$3.65/SF
PL705L15WC5MM	15' wide, purple, vegas gold, crimson, maroon, silver, navy, light blue, or carolina blue 5mm foam	$4.85/SF
PL705L15WCSB	15' wide, purple, vegas gold, crimson, maroon, silver, navy, light blue, or carolina blue SilverBack™ polyurethane	$3.65/SF

PL 705 is shorter and has a more crinkly texture. PL705L has longer straighter blades.

BASEBALL 42 PREMIUM - 42 OZ. POLYPRO PILE

Needs 2-3 pounds of sand infill per square foot if not glued to concrete.

PL70715WC1MM	15' wide stock, pine or clay, 1mm rubber 15,000 SF min or 5000 SF + $2,500 setup fee	CALL FOR PRICE

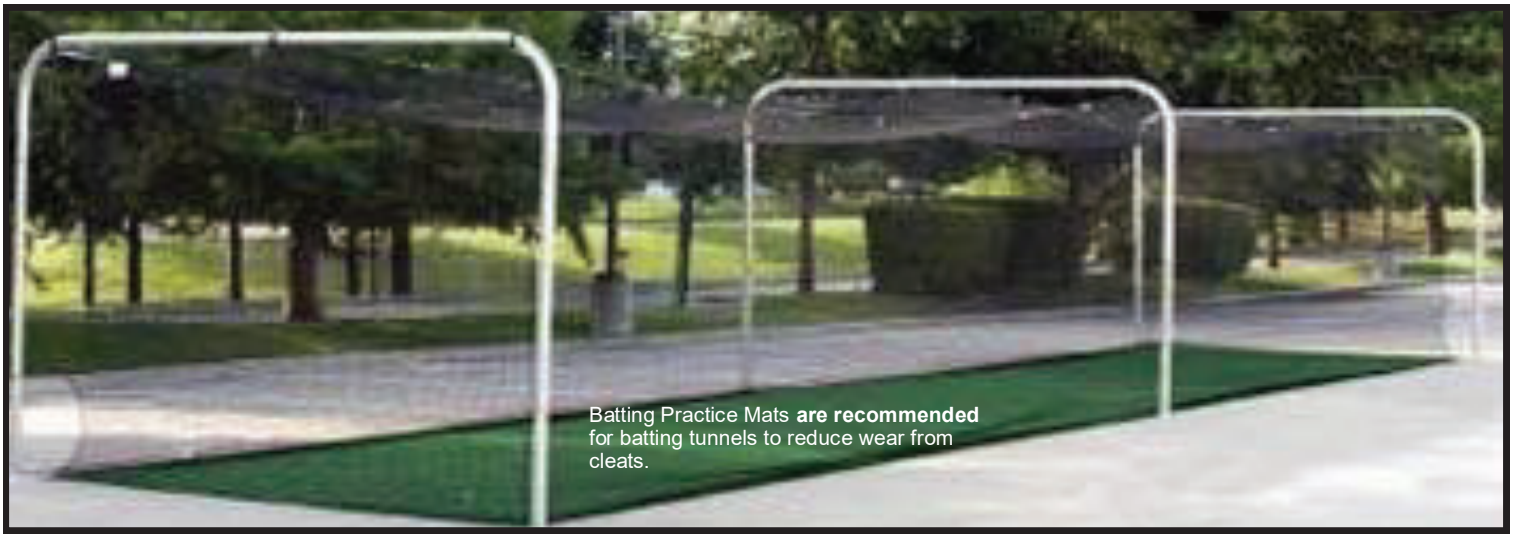

BASEBALL 36 with 5mm foam and BASEBALL 42 with 1mm rubber backing have the same feel. BASEBALL 42 is thicker not taller. Both provide excellent resistance to spikes.

PLEASE NOTE: Synthetic Turf is normally rolled face out. No charge to "reverse roll" cut pieces with turf faced in—which makes it easier to install—doesn't need to be flipped over.

There is a $2 per linear foot charge (**#CPTCUT**) to cut the width (there is a 1/4" tolerance) and/or pre-trim (**#CPTTRIM**) the scrim fabric along edge with a $100 minimum charge. Pre-trimming scrim can be done on site with scissors.

If gluing to concrete, use Robert's 6700 glue from Home Depot if 65° or warmer, Turf Claw™ if 55°+, or Nordot 34-G if 50°+. If installing over compacted aggregate, you need to spike perimeter and tape (12" w) & glue seams. Turf Claw™ can be shipped with your turf order. Check current pricing for tape & glue per quantity needed. If installing over macadam, be sure glue is compatible with macadam or loose lay with 2-3 lbs. sand to weigh the turf down, plus tape & glue seams. If gluing SilverBack™ polyurethane backing, make sure glue is polyurethane compatible.

For Batting Tunnels, all the above with foam backing are heavy enough to not be glued or spiked, but adding 2-3 lbs. sand per square foot is recommended for more weight to prevent shifting.

Batting Practice Mats **are recommended** for batting tunnels to reduce wear from cleats.

AT74515W5MM	45 oz. polypropylene & nylon pile, 15' wide, field green, 1/4" higher pile, no rubber infill, 5mm foam	**$5.50/SF**
AT74515WC5MM	45 oz. polypropylene & nylon pile, 15' wide, red, white, blue or black, 1/4" higher pile, no sand rubber infill, 5mm foam	**$6.35/SF**
AT74515WSB	45 oz. polypropylene & nylon pile, 15' wide, field green, 1/4" higher pile, no rubber infill, SilverBack™ polyurethane	**$4.05/SF**

BATTING TUNNEL TURF

PL35712W5MM	24 oz. polypropylene pile, 15' wide, pine green, 5mm foam	**$3.65/SF**
PL35712W5MM	24 oz. polypropylene pile, 15' wide, pine green, 3mm foam	**$3.25/SF**
PL35712WSB	24 oz. polypropylene pile, 15' wide, pine green, SilverBack™ polyurethane	**$2.25/SF**

Blending polyethylene and polypropylene gives excellent durability and wear resistance. An ideal choice for batting tunnels and indoor facilities over concrete. Use of stance mats recommended for batting tunnels.

PLEASE NOTE: Synthetic Turf is normally rolled face out. No charge to "reverse roll" cut pieces with turf faced in—which makes it easier to install—doesn't need to be flipped over.

There is a $2 per linear foot charge (**#CPTCUT**) to cut the width (there is a 1/4" tolerance) and/or pre-trim (**#CPTTRIM**) the scrim fabric along edge with a $100 minimum charge. Pre-trimming scrim can be done on site with scissors.

If gluing to concrete, use Robert's 6700 glue from Home Depot if 65° or warmer, Turf Claw™ if 55°+, or Nordot 34-G if 50°+. If installing over compacted aggregate, you need to spike perimeter and tape (12" w) & glue seams. Turf Claw™ can be shipped with your turf order. Check current pricing for tape & glue per quantity needed. If installing over macadam, be sure glue is compatible with macadam or loose lay with 2-3 lbs. sand to weigh the turf down, plus tape & glue seams. If gluing SilverBack™ polyurethane backing, make sure glue is polyurethane compatible.

For Batting Tunnels, all the above with foam backing are heavy enough to not be glued or spiked, but adding 2-3 lbs. sand per square foot is recommended for more weight to prevent shifting.

Batting Practice Mats **are recommended** for batting tunnels to reduce wear from cleats.

Roll Width:	15’ Untrimmed
Perforated:	No, Custom Only
Color:	Pine (Darker Solid green) & Clay

Applications:
The ideal mid range putting green or indoor sport facility product. If used for putting green or indoor sports facility, this turf will need 2-3 pounds of sand infill per square foot. Can be installed outdoors on a compacted aggregate base or indoors on concrete.

These specifications are standard and may vary slightly due to manufacturing tolerances.

Synthetic Turf - For Baseball, Football, Soccer & Other Sports

Outdoor Athletic Field Turf

STADIUM 67
For Baseball, Softball, Football, Soccer & Other Sports

PRODUCT DATA SHEET

Yarn Type:	40 oz. Polyethylene Parallel Slit-film Pile
Shipping Weight:	67oz per sq yard
Secondary Backing:	SilverBack™ polyurethane
Pile Height:	2” (+/- 1/8”)
Roll Width:	15’ Untrimmed
Perforated:	Yes
9 Colors:	Field Green, Clay, Red, White, Blue, Yellow, Orange or Black

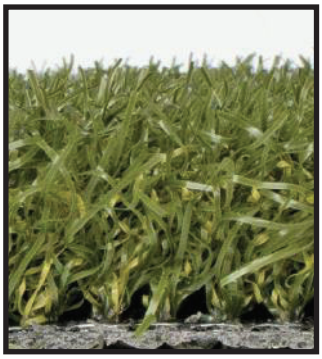

Applications:
This product is our premium athletic field product that has been tried and tested in the toughest conditions. Features the longest lasting fiber available, which makes it ideal for indoor and outdoor athletic fields. 1 pound of sand infill and 3-4 pounds of rubber infill per square foot. It is also a premium play-ground surface. This product can be installed outdoors on concrete, asphalt, or a compacted aggregate base or indoors on concrete.

These specifications are standard and may vary slightly due to manufacturing tolerances.

Arena Turf

56 oz. Arena Turf
PRODUCT DATA SHEET

Secondary Backing:	SilverBack™ polyurethane
Yarn Type:	56 oz. Nylon with Texturized Nylon Pile
Pile Height:	1 1/8”
Roll Width:	15’ Untrimmed
Perforated:	No, Custom Only
Color:	Forest/Olive
Shipping Weight:	85 oz per sq yard

Applications: Excellent all around product indoor or outdoor that offers thatch, which provides added body, reducing the amount of infill needed. The three color blend of this surface provides a truly authentic look and feel that resembles a natural lawn. This product can be installed outdoors on concrete, asphalt, or a compacted aggregate base or indoors on concrete.

These specifications are standard and may vary slightly due to manufacturing tolerances.

Arena Turf

40 OZ. ARENA TURF

PRODUCT DATA SHEET

Yarn Type:	40 oz. Polypropylene and Nylon Pile
Shipping Weight:	122 oz per sq yard
Secondary Backing:	5mm Foam w/Scrim
Pile Height:	24/32”
Roll Width:	15’ Untrimmed
Perforated:	No, Custom Only
Color:	15’ Field Green, Red, White, Blue, Black, Silver with optional 4” white line on the side of the roll or in the middle of the roll

Applications:
The Arena products can be used for multiple applications. Ideal for indoor arenas—indoor soccer, arena football, etc. Basically any high traffic area that needs heavy turf & will see heavy abuse. Also things like indoor training, agility, track, infield practice and so on. It does not require infill, has the 5mm foam back but still looks “grass like” which is what so many centers like to re-create.

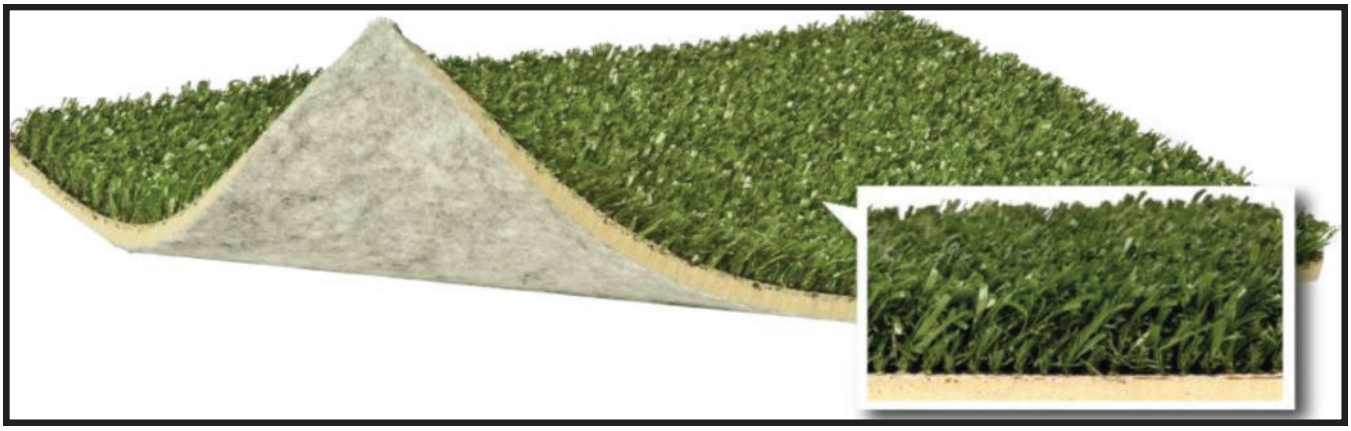

This product can be installed outdoors on concrete, asphalt, or a compacted aggregate base or indoors on concrete.

60 oz. Arena Turf, same construction but with 1/4” Higher Pile.

These specifications are standard and may vary slightly due to manufacturing tolerances.

Arena Turf

45 OZ. ARENA TURF

PRODUCT DATA SHEET

Yarn Type:	64% Polyethylene Slit-Film, 36% Texturized Nylon
Shipping Weight:	72 oz per sq yard—SilverBack 165 oz per sq yard—Foam
Secondary Backing:	SilverBack™ Polyurethane or 5mm Polyurethane Foam w/fleece
Pile Height:	3/4”
Roll Width:	15’
Perforated:	No, Custom Only
Colors:	Field Green, Red, White, FLA Blue, Yellow or Black

Applications:
The Arena products can be used for multiple applications. Ideal for indoor arenas—indoor soccer, arena football, etc. Basically any high traffic area that needs heavy turf & will see heavy abuse. Also things like indoor training, agility, track, infield practice and so on. It does not require infill, has the 5mm foam back but still looks “grass like” which is what so many centers like to re-create. This gives you the true ball roll of a traditional nylon field, with the softness of the new generation rubber-filled turf. No rubber infill makes maintenance easier, and up to 10% cooler. These systems can also be portable with added 4” velcro.

This product can be installed outdoors on concrete, asphalt, or a compacted aggregate base or indoors on concrete.

These specifications are standard and may vary slightly due to manufacturing tolerances.

Go Groomer Go™

About the Go Groomer Go™
The **Go Groomer Go™** is the only synthetic turf maintenance equipment that features four light synthetic straight-line brushes and a single row of spring loaded grooming tines which are used as needed and designed to rejuvenate a turf's rubber, rubber sand or silica infill and playing surface.

Designed and engineered to avoid being overly aggressive when grooming Soccer, Football, Baseball, Lacrosse, Rugby, Field Hockey and many other synthetic turf fields and surfaces - both indoor and outdoor!

With over 20 years of industry experience, the **Go Groomer Go™** synthetic turf groomer along with the **Inline Safety Magnet**, our synthetic turf magnet, improve the quality and safety of a playing surface while decreasing maintenance and lowering risk management.

Why the Go Groomer Go™

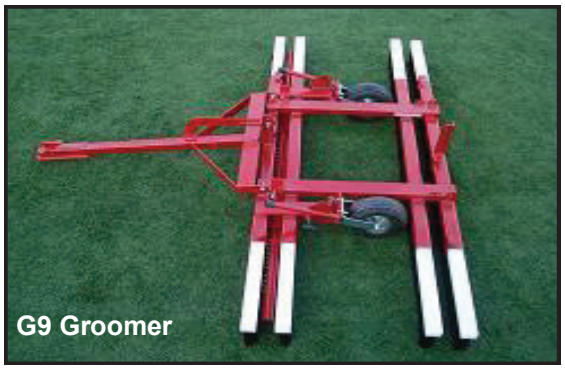

- Extends Playability and Decreases Maintenance
- Spring Loaded Tines Elevate Infill Compaction
- Prevents Rubber Granules From Traveling to Sidelines
- Optional use of Spring Loaded Tines
- The Only Synthetic Turf Maintenance Equipment
- Needed for Proper Grooming
- Lowers Risk Management
- Decreases Wear Patterns
- Increases Eye Appeal
- Improves the Playing Field
- Helps Level Rubber Granule Infill
- Keeps Grass Blades at 12:00
- Repairs Ghost Markings
- Maximize Fiber Lifespan

G4 Groomer

Features unique to the Go Groomer Go™

- Easy Storage
- Never-Flat Airless Tires
- Adjustable Pin Settings
- Multiple Brush Settings
- Hardened Steel Construction
- Patented Design Pd
- Optional Use of Spring Loaded Tines
- Expandable Width
- Multiple Tine Setting
- Inline Safety Magnet can be used while grooming
- No Expensive, Greasy or Oily Motors
- Welded Frame
- Tow Hitch Fits All Vehicles
- Reversible Tow Hitch
- No Wiring
- Soft Extra Long Bristles
- Rooster Tail Broadcasting of Rubber Granules
- Tines Operate Safely Between Brushes
- UV Resistant Brushes Never Rust or Rot
- No Expensive Hydraulic System

G30 Inline Safety Magnet

Even the best maintained synthetic fields have potential dangers from unwanted foreign debris hidden within the surface infill. While the **Go Groomer Go™** properly grooms a synthetic turf field, the **G30 Inline Safety Magnet** goes the extra step to insure that hidden dangers, which are unseen by the naked eye, are properly removed. Best of all, the Inline Safety Magnet is compatible with all 3 **Go Groomer Go™** models and can be used while simultaneously grooming a synthetic field.

With the **G30 Inline Safety Magnet**, risk management is drastically lowered by improving the safety of the playing surface for those who utilize the synthetic turf facility.

Debris picked up by the Inline Safety Magnet on a high school's multipurpose synthetic field

Debris picked up by the Inline Safety Magnet on a university's soccer stadium field

CALL FOR PRICE

Debris is easily and safely removed from the G30 Inline Safety Magnet

The **G30 Inline Safety Magnet** is not only a synthetic turf magnet, it is also the magnet you can't afford not to have. Time and time again the results of using the **G30 Inline Safety Magnet** on a synthetic turf field are astonishing. Some of the items picked up by the magnet are small but numerous such as hair pins and bobby pins. However, other items, which are much more dangerous are screws, nails, bolts, wires, earrings and other sharp, skin piercing objects (some of which are rusted). These times easily find their way onto the playing surface and into the synthetic infill but are just as easily removed by the **G30 Inline Safety Magnet**. Removing such items will drastically decrease the unlimited potential dangers and liabilities that could ensue as a result of an injury.

Every Synthetic Surface deserves a

BEAM CLAY®

Synthetic Golf Turf

WHOLESALE PRICE LIST
EFFECTIVE: JULY 1, 2022

SYNTHETIC GOLF TURF

A perfect golf practice facility needs to perform authentically and consistently - our turf does just that. Practice your drive or perfect your aim anytime of the year — there's no downtime for regular maintenance. Whether you're practicing or playing, our synthetic turf performs so closely to natural grass, you may not notice the difference.

100% polyethylene, polypropylene or nylon with 1mm rubber backing (for a firmer feel), 5mm foam-rubber backing (for a softer cushion), or unitary backing. Adjust speed by adding more sand infill. Can be installed outdoors or indoors on a compacted aggregate base or on concrete or asphalt. Comes in 12' or 15' wide rolls. 10' minimum order length. Various options for fringe areas.

POLY PUTT 36 - 36 oz. POLYETHYLENE PILE, 2 lbs./sf dry 20/40 or 30/50 sand recommended 15' wide stock rolls, Golf Green, SilverBack™ polyurethane	PP-PL95215WSB	$2.35/sf
POLY PUTT 48 - 48 oz. TEXTURIZED POLYETHYLENE PILE, 2 lbs./sf dry 20/40 or 30/50 sand recommended 15' wide stock rolls, Verde/Olive, SilverBack™ polyurethane	PP-PL93615WSB	$4.95/sf
POLY PRO PUTT 35 - 35 oz. TEXTURIZED POLYPROPYLENE PILE, 2 lbs./sf dry 20/40 or 30/50 sand recommended 15' wide stock rolls, Field/Apple, SilverBack™ polyurethane	PPP-PL96515WSB	$2.55/sf
EAGLE PUTT - 30 oz. POLYPRO PILE, 2 lbs./sf dry 20/40 or 30/50 sand recommended 15' wide stock rolls, Spring Green, SilverBack™ polyurethane	EP-PL7715SB	$2.95/sf
PUTT ONE - 25 oz. NYLON PILE, No infill 15' wide stock rolls, Turf Green or Verde, 5mm foam	PO-PL30615W5MM	$4.85/sf
PERFECT PUTT - 48 oz. NYLON PILE, 2-3 lbs./sf dry 70 mesh sand or smaller sand recommended 15' wide stock rolls, Turf Green, 1mm Rubber	PP-PL30715W1MMR	$5.35/sf
TRUE PUTT - 36 oz. NYLON PILE, 2 lbs./sf dry 20/40 or 30/50 sand recommended 15' Wide stock rolls, Turf Green or Verde, 1mm rubber	TP-PL30815W1MMR	$4.55/sf

PLEASE NOTE: Synthetic Turf is normally rolled face out. No charge to "reverse roll" cut pieces with turf faced in—which makes it easier to install—doesn't need to be flipped over.

There is a $2 per linear foot charge (**#CPTCUT**) to cut the width (there is a 1/4" tolerance) and/or pre-trim (**#CPTTRIM**) the scrim fabric along edge with a $100 minimum charge. Pre-trimming scrim can be done on site with scissors.

If gluing to concrete, use Robert's 6700 glue from Home Depot if 65° or warmer, Turf Claw™ if 55°+, or Nordot 34-G if 50°+. If installing over compacted aggregate, you need to spike perimeter and tape (12" w) & glue seams. Turf Claw™ can be shipped with your turf order. Check current pricing for tape & glue per quantity needed. If installing over macadam, be sure glue is compatible with macadam or loose lay with 2-3 lbs. sand to weigh the turf down, plus tape & glue seams. If gluing SilverBack™ polyurethane backing, make sure glue is polyurethane compatible.

For Batting Tunnels, all the above with foam backing are heavy enough to not be glued or spiked, but adding 2-3 lbs. sand per square foot is recommended for more weight to prevent shifting.

Golf Turf

Poly Putt 36

36 OZ. POLYURETHANE PILE

Secondary Backing:	SilverBack™ Polyurethane
Pile Height:	1”
Roll Width:	15’ Untrimmed
Perforated:	No, Custom only
Color:	Golf Green
Shipping Weight:	64 oz. per sq yard
Infill:	2 lbs./sf dry 20/40 mesh silica sand recommended

Applications:
When properly infilled with sand, this putting surface will hold golf shots from any distance. Very popular turf for par 3 facilities. This product can be installed outdoors on concrete, asphalt, or a compacted aggregate base or indoors on concrete.

These specifications are standard and may vary slightly due to manufacturing tolerances.

Golf Turf

Poly Putt 48

48 OZ. TEXTURIZED POLYETHYLENE PILE

Secondary Backing:	SilverBack™ Polyurethane
Pile Height:	3/8”
Roll Width:	15’
Perforated:	No, Custom only
Color:	Verde / Olive
Shipping Weight:	75 oz. per sq yard
Infill:	2 lbs./sf dry 20/40 mesh silica sand recommended

Applications:
Poly Putt 48 is your polyethylene putting green of choice. It has a thicker, denser design with a 3/8 inch pile height and color of Verde/Olive. This design allows for a smoother ball roll and better control.

These specifications are standard and may vary slightly due to manufacturing tolerances

Golf Turf

Eagle Putt

30 OZ. POLYPROPYLENE PILE

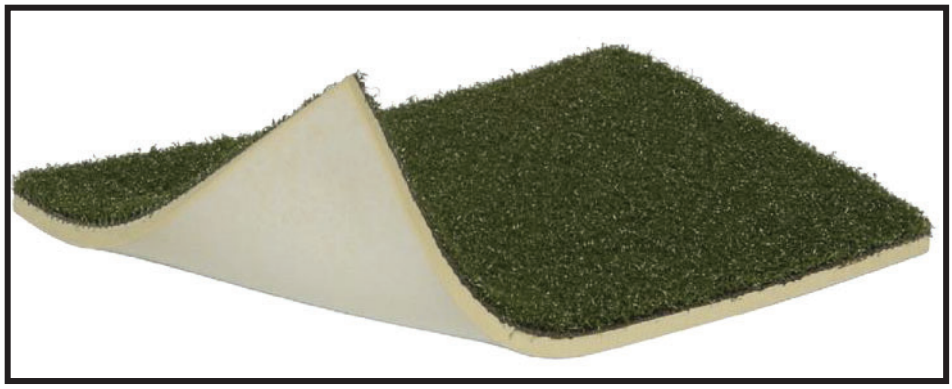

Secondary Backing:	Silverback™ Polyurethane
Pile Height:	9/16” (+/- 1/8”)
Roll Width:	15’ Untrimmed
Perforated:	No, Custom only
Color:	Spring Green
Shipping Weight:	57 oz. per square yard
Infill:	2-3 lbs./sf dry 20/40 mesh silica sand recommended.

Applications:
This is our entry level putting surface. Multi colored yarn gives you the most authentic look. Performs best with sand infill and is designed to hold short shots while providing a true roll. Built to give the golfer a speed of 10 on the stimp meter, this product is ideal for any golf application. Perfect for putting and chip shots from 30 yards or less (if
infilled with 2-3 pounds of sand per square foot). Can be installed outdoors on concrete, asphalt, or a compacted aggregate base or indoors on concrete.

These specifications are standard and may vary slightly due to manufacturing tolerances.

GOLF TURF

PUTT ONE

25 OZ. TEXTURIZED NYLON PILE

Secondary Backing:	5mm Foam (with or without scrim)
Pile Height:	1/4" (+/- 1/8"), overall height approx. 1/2"
Roll Width:	15' Untrimmed
Perforated:	No, Custom only
Colors:	Turf Green or Verde (multi-shade)
Shipping Weight:	107 oz. per square yard
Recommended Infill:	No Infill

Applications:
This is an excellent putting surface that provides a very realistic roll with natural speed. This is also a great product for use on undulated surfaces and portable applications. Using foam back with scrim is ideal for glue down on flat surfaces, using the foam without scrim is perfect for undulated surfaces. The speed of the green will depend on the installation method. The ideal product for putting and short chip shots.

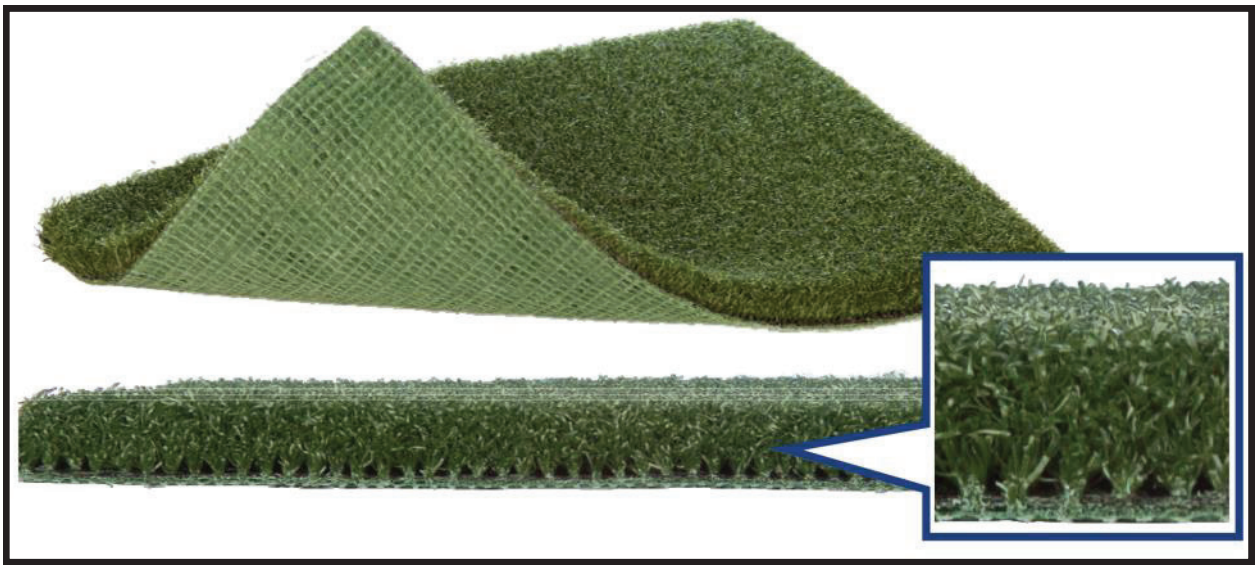

Use foam back with scrim for gluing to concrete or asphalt; use foam without scrim for installing over crushed aggregate. Can be installed outdoors on concrete, asphalt, or a compacted aggregate base or indoors on concrete.

These specifications are standard and may vary slightly due to manufacturing tolerances.

BEAM CLAY®

Synthetic Turf for Bocce Courts

WHOLESALE PRICE LIST
EFFECTIVE: JULY 1, 2022

BOCCE TURF™ - SYNTHETIC TURF FOR BOCCE COURTS

Can be installed over crushed aggregate base (3/4" minus) or glued to concrete or asphalt. Tape and glue needed for seams, if installing over crushed aggregate. 1/2" of fine stone dust recommended over crushed aggregate base for a smooth compacted surface. Permeable turf not recommended—can cause wash out in base. Perimeter drainage best—weep holes in frame if above ground at surface of turf, perimeter drains if below ground (3/4-1" plastic pipe at both sides of center line or at corners connected to drain will work. Foam backing recommended—helps lessen bounce and helps prevent dimples forming in the aggregate base. Scrim over foam backing recommended for glue down, without scrim over aggregate base (less curling). Turf (over aggregate base) can be nailed to pressure treated 2x4's installed vertically around perimeter and/or a bounce board can be added to frame to hold turf down to prevent edges from curling—up but not so tightly to prevent drainage unless there are weep holes. Perforated not recommended — can cause wash out in base and uneven play.

Here are some guidelines for choosing turf:

Most Popular - Bocce 25 oz. Nylon and 24 oz. Polypro with shorter and denser fibers and 5mm foam backing are the most popular, followed by 36 oz. Polypro and 36 oz. Nylon.

Bounce - 5mm foam backing gives less bounce. 1mm rubber gives more bounce. Bounce has a lot to do with the face of the turf as well: more turf in the face (greater pile height and density) will cushion the bounce more. Adding round sand will decrease bounce. Adding angular or sub-angular sand will increase bounce.

Speed - 24 oz. Polypro is the fastest surface, followed by 36 oz. Polypro. Speed can be increased by adding either sand and adjusted on any except 24 oz. Polypro, which is too dense and short. Adding up to 2 lbs. sand per square foot allows you to get the speed and bounce you prefer.

Memory - Nylon turf DOES NOT have "memory" Polypropylene does. What this means is if you walk on Polypropylene turf every day for a year or more, eventually it will mat down. It "remembers" being mashed down and eventually doesn't come back up. However, Nylon turf will look the same after each use — it doesn't remember being mashed down and goes back to its original state after each use. However, this come with a price. Nylon is more expensive.

25 oz. NYLON stadium grade synthetic turf with 5mm foam backing with or without scrim in Turf Green or Verde. No infill. 15' Stock Rolls	PL30615W5MM	$4.85/sf
36 oz. NYLON stadium grade synthetic turf with 1mm rubber backing in Turf Green or Verde. 15' Stock Rolls	PL30815W1MM	$4.55/sf
48 oz. NYLON stadium grade synthetic turf with 1mm rubber backing in Turf Green, 2-3 lbs./sf dry 70 mesh sand or smaller sand recommended. 15' Stock Rolls	PL30715W1MM	$5.35/sf
24 oz. POLYPROPYLENE synthetic turf with 5mm foam backing with or without scrim - Pine Green. 15' Stock Rolls	PL35715W5MM	$3.65/sf
24 oz. POLYPROPYLENE synthetic turf with SilverBack™ Polyurethane, Pine Green. 15' Stock Rolls	PL35715WSB	$2.25/sf
36 oz. POLYPROPYLENE synthetic turf. Available in 14 colors.		
15' wide, spring green or pine, 5mm foam	PL70515W5MM	$4.50/SF
15' wide, spring green or pine, SilverBack™ polyurethane	PL70515WSB	$3.25/SF
15' wide, pine or clay, 1 mm rubber	PL70515W1MM	$3.25/SF
15' wide, clay, red, white, blue, orange, yellow, black, tan, or brown, 5mm foam	PL70515WC5MM	$4.85/SF
15' wide, clay, red, white, blue, orange, yellow, black, tan or brown SilverBack™ polyurethane	PL70515WCSB	$3.65/SF
15' wide, purple, vegas gold, crimson, maroon, silver, navy, light blue, or carolina blue 5mm foam	PL705L15WC5MM	$4.85/SF
15' wide, purple, vegas gold, crimson, maroon, silver, navy, light blue, or carolina blue SilverBack™ polyurethane	PL705L15WCSB	$3.65/SF

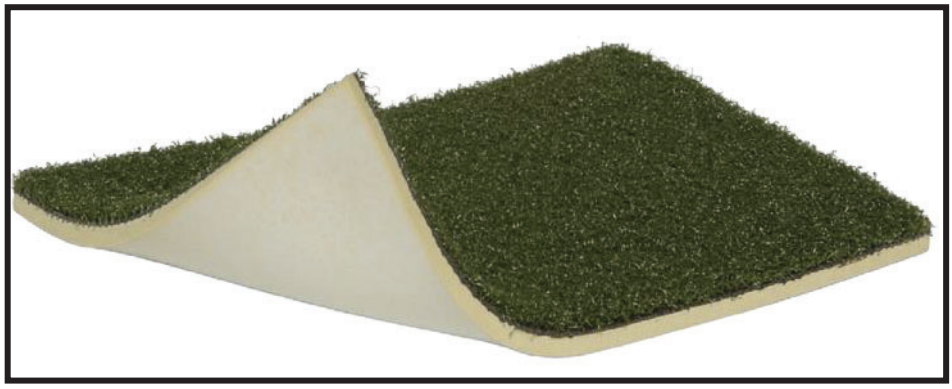

PLEASE NOTE: Synthetic Turf is normally rolled face out. No charge to "reverse roll" cut pieces with turf faced in—which makes it easier to install—doesn't need to be flipped over.

There is a $2 per linear foot charge (**#CPTCUT**) to cut the width (there is a 1/4" tolerance) and/or pre-trim (**#CPTTRIM**) the scrim fabric along edge with a $100 minimum charge. Pre-trimming scrim can be done on site with scissors.

If gluing to concrete, use Robert's 6700 glue from Home Depot if 65° or warmer, Turf Claw™ if 55°+, or Nordot 34-G if 50°+. If installing over compacted aggregate, you need to spike perimeter and tape (12" w) & glue seams. Turf Claw™ can be shipped with your turf order. Check current pricing for tape & glue per quantity needed. If installing over macadam, be sure glue is compatible with macadam or loose lay with 2-3 lbs. sand to weigh the turf down, plus tape & glue seams. If gluing SilverBack™ polyurethane backing, make sure glue is polyurethane compatible.

INSTALLING BOCCE TURF™ ON CONCRETE

Floor Preparation

Concrete should be cured, clean and dry. Concrete shall be free of paint, dirt, grease, oil curing or parting agents, and other contaminants, including sealers, that may interfere with the bonding of the adhesive. Whenever a powdery or porous surface is encountered, a primer compatible with the adhesive shall be used to provide a suitable surface for the glue-down installation. Patching of cracks and depressions shall be made with an appropriate and compatible latex or polymer fortified patching compound. Do not exceed manufacturer's recommendations for patch thickness. Large patched areas must be primed.

Recommended Glues

Nordot 34G for 50°F and up. Buy direct from Synthetic Surfaces Inc. at 908-233-6803.

Turf Claw for 55°F and up available shipped with turf.

Robert's 6700 Indoor/Outdoor for over 60°F available at Home Depot or Lowes.

Turf Installation

Unroll in place to be sure fit is correct.

Roll up section at one end and apply glue to concrete. Unroll over glue.

Roll up from other end. Apply glue to concrete. Unroll over glue.

Roll with 100 pound roller. Re-roll 5-6 hours later.

Cure times will vary and will be affected if overnight temperatures drop below 60°F.

Make sure glue has 24 hours to dry by covering with plastic if wet weather is projected within 24 hours.

General Maintenance

OUTDOOR USE

Sweep the synthetic turf as needed frequently with a broom to remove surface soil, and hose down occasionally with water. Do not use a rotary brush machine.

INDOOR USE

Vacuum the grass like carpeting as you would any other type of carpeting to pick up surface soil.

STAIN REMOVAL

Synthetic turf is resistant to stains. However, spills do occur, and the resulting stains should be removed as soon as possible. In most cases, they can be removed with either detergent suds or a solvent-based cleaning agent. Follow the **STAIN REMOVAL CHART** for specifics.

Stain Removal Chart

WATER-BORNE AND MISCELLANEOUS STAINS

Acid, Alcohol, Animal Urine, Alkali, Blood, Coffee, Tea, Cola, Soot, Chocolate, Dye, Glue, Fruit Juice, Ice Cream, Latex Paint, Milk, Mustard, Rust, Water Colors

REMEDY

Sponge with detergent suds and cold water. This method will be effective even after 24 hours. Note: It is important to use just enough fluid to irrigate solid particles out of fabric. Too much fluid will leave a "ring." Clean from outside of stain in toward center so as not to leave a ring.

PERSISTANT STAINS	REMEDY
Chewing Gum	Spray with Freon Aerosol and Scrape
Crayon	Sponge with dry cleaning solvent
Nail Polish	Sponge with acetone.
Lipstick	Sponge with dry cleaning solvent
Metal Polish	Sponge with dry cleaning solvent
Furniture Stain	Sponge with dry cleaning solvent
Tar	Scrape Excess, Sponge with dry Cleaning Solvent
Oil Paints	Blot Immediately, Sponge with turpentine or paint remover. Blot with detergent and water. Re-sponge with cold water to remove detergent

EMULSIFIED STAINS	REMEDY
Cosmetics, Ink, Shoe Polish	Sponge with detergent and cold water. Apply solvent. Clean solvent residue with soap and water. Re-sponge with cold water to remove detergent

Note: in some cases it may be necessary to repeat any of the above procedures to insure thorough cleaning

BEAM CLAY®
Synthetic Turf for Tennis Courts

WHOLESALE PRICE LIST
EFFECTIVE: JULY 1, 2022

TENNIS TURF™ - SYNTHETIC TURF FOR TENNIS COURTS

A perfect tennis court needs to perform authentically and consistently—our turf does just that. Tennis turf is designed to act like natural grass, reducing the risk of injury to your joints and giving you a fun, reliable court.

Can be installed over crushed aggregate base (3/4" minus) or glued to concrete or asphalt. Tape and glue needed for seams, if installing over crushed aggregate. 1/2" of fine stone dust recommended over crushed aggregate base for a smooth compacted surface. Perforated turf not recommended—can cause wash out in base. Perimeter drainage best.

24 oz. Polypropylene, 15' wide, pine green or clay, SilverBack™ Polyurethane 2" White Lines Available.	**PL35715WSB**	**$2.25/sf**
36 oz. POLYPROPYLENE artificial turf. Available in 14 colors.		
15' wide, pine or spring green, SilverBack™ Polyurethane	**PL70515WSB**	**$4.50/sf**
15' wide, clay, red, white, blue, orange, yellow, black, tan or brown SilverBack™ Polyurethane	**PL70515WCSB**	**$4.85/sf**

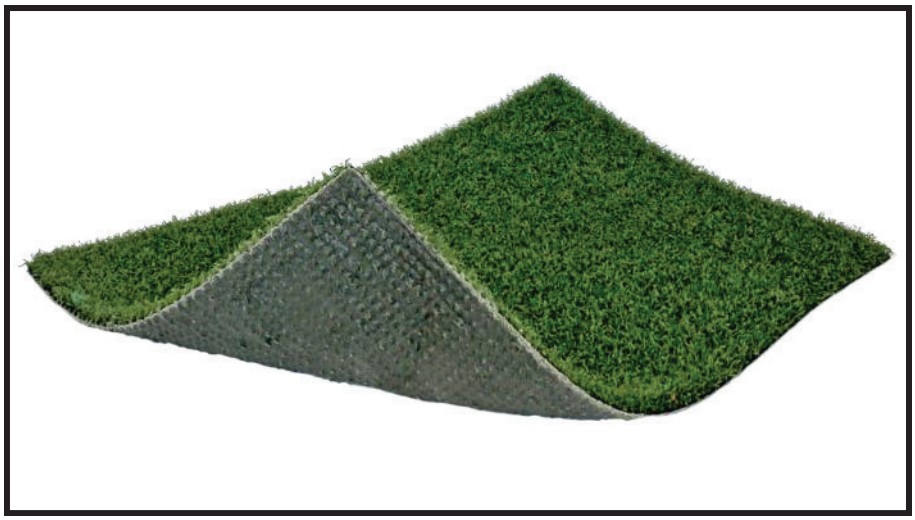

PLEASE NOTE: Synthetic Turf is normally rolled face out. No charge to "reverse roll" cut pieces with turf faced in—which makes it easier to install—doesn't need to be flipped over.

There is a $2 per linear foot charge (**#CPTCUT**) to cut the width (there is a 1/4" tolerance) and/or pre-trim (**#CPTTRIM**) the scrim fabric along edge with a $100 minimum charge. Pre-trimming scrim can be done on site with scissors.

If gluing to concrete, use Robert's 6700 glue from Home Depot if 65° or warmer, Turf Claw™ if 55°+, or Nordot 34-G if 50°+. If installing over compacted aggregate, you need to spike perimeter and tape (12" w) & glue seams. Turf Claw™ can be shipped with your turf order. Check current pricing for tape & glue per quantity needed. If installing over macadam, be sure glue is compatible with macadam or loose lay with 2-3 lbs. sand to weigh the turf down, plus tape & glue seams. If gluing SilverBack™ polyurethane backing, make sure glue is polyurethane compatible.

BEAM CLAY®

Synthetic Turf for Landscaping, Playgrounds & Pet Areas

WHOLESALE PRICE LIST
EFFECTIVE: JULY 1, 2022

SYNTHETIC TURF FOR LANDSCAPING, PLAYGROUNDS OR PETS

Can be installed over crushed aggregate base (3/4" minus) or glued to concrete or asphalt.

56 oz. Fresh Grass #PL959-CSTM Nylon, 1-1/8" pile, 15' wide, forest/olive, perforated, SilverBack™ polyurethane. Not recommended for pets.	**$5.25/sf**
60 oz. Playground Turf #PL929-CSTM Polyethylene w/texturized polypropylene, 1-1/4" pile, 15' wide, field green, perforated, SilverBack™ polyurethane. **Our most popular turf for playgrounds.**	**$4.35/sf**
#PL929C-CSTM Colors: red, white, blue, yellow, black	**$4.95/sf**
55 oz. Landscape Turf #PL921-CSTM Polyethylene w/texturized polypropylene, 1-3/4" pile, 15' wide, field or olive, perforated, SilverBack™ polyurethane.	**$3.65/sf**
71 oz. Fresh Grass #PL906-CSTM Texturized polyethylene, 1-3/4" pile, 15' wide, field green or olive, perforated, SilverBack™ polyurethane.	**$4.75/sf**
62 oz. Pet Turf #PL928-CSTM Polyethylene w/texturized polypropylene, 7/8" pile, 15' wide, forest/olive, perforated, SilverBack™ polyurethane.	**$4.55/sf**

PLEASE NOTE:

- Synthetic Turf is normally rolled face out. No charge to "reverse roll" cut pieces with turf faced in—which makes it easier to install—doesn't need to be flipped over.
- There is a $2 per linear foot charge (**#CPTCUT**) to cut the width (there is a 1/4" tolerance) and/or pre-trim (**#CPTTRIM**) the scrim fabric along edge with a $100 minimum charge. Pre-trimming scrim can be done on site with scissors.
- If gluing to concrete, use Robert's 6700 glue from Home Depot if 65° or warmer, Turf Claw™ if 55°+, or Nordot 34-G if 50°+.
- If installing over compacted aggregate, you need to spike perimeter and tape (12" w) & glue seams.
- Turf Claw™ can be shipped with your turf order. Check current pricing for tape & glue per quantity needed.
- If installing over macadam, be sure glue is compatible with macadam or loose lay with 2-3 lbs. sand to weigh the turf down, plus tape & glue seams.
- If gluing SilverBack™ polyurethane backing, make sure glue is polyurethane compatible.
- 1 mm rubber backing does not expand or contract as much as other backings and is especially used for loose lay applications.
- Scrim on foam backing keeps the foam from cracking when stored rolled up in warehouse.
- Scrim will not curl if gluing down but will curl if installing over crushed aggregate without securing the perimeter.
- Use foam back with scrim for gluing to concrete or asphalt. Use foam without scrim for installing over crushed aggregate unless securing perimeter.

Landscaping/Fringes/Playgrounds

56 oz. Nylon Fresh Grass

PRODUCT DATA SHEET

Primary/Yarn:	Nylon
Secondary/Thatch Yarn:	Nylon
Yarn Cross Section:	Nylon; Textured Nylon
Pile Height:	1-1/8”
Roll Width:	12’ Untrimmed
Perforated:	Optional
Recommended Infill:	2-3 lbs. silica sand
Color:	Forest/Olive
Shipping Weight:	83 oz per sq yard

Applications:
This is an excellent landscape/multi-purpose product that offers thatch, which provides added body, reducing the amount of infill needed. The three color blend of this surface provides a truly authentic look and feel that resembles a natural lawn. This product can be installed outdoors or indoors over concrete, asphalt, or compacted aggregate base. Not recommended for pets. Nylon will retain urine odor.

These specifications are standard and may vary slightly due to manufacturing tolerances.

Application:	

This is an excellent landscape product that offers thatch, which provides added body, reducing the amount of infill needed. The four color blend of this surface provides a truly authentic look and feel that resembles a natural lawn. This product can be used for landscapes, pet areas, fringes, and much more. This product can be installed indoors or outdoors on concrete or a compacted aggregate base.

These specifications are standard and may vary slightly due to manufacturing tolerances.

BEAM CLAY®
Synthetic Turf for Landscaping, Playgrounds & Pet Areas

Landscaping/Fringes/Playgrounds or Pets Turf

Landscape Turf 960

78 OZ. POLYETHYLENE WITH TEXTURIZED POLYETHYLENE PILE

Secondary Backing:	Silverback™ Polyurethane
Pile Height:	1-9/16”
Roll Width:	15’ Untrimmed
Color Available:	Field/Olive with Field/Jute Thatch
Perforated:	Yes
Shipping Weight:	105 oz. per square yard
Infill:	2 lbs./sf dry 20/40 or 30/50 sand recommended

Application:

This is an excellent landscape/multipurpose product that offers thatch, which provides added body, reducing the amount of infill needed, and silver ion for antimicrobial and anti-bacterial. The two color blend of this surface provides a truly authentic look and feel that resembles a natural lawn. This product can be used for landscapes, playgrounds, pet areas, fringes, indoor arenas, training facilities and much more. This product can be installed indoors or outdoors on concrete or a compacted aggregate base.

These specifications are standard and may vary slightly due to manufacturing tolerances.
