

**The ESU Coordinating Council is pleased to partner with Wyebot, Inc. under a Special Buy Contract. We are happy to offer the Wyebot Wireless Intelligence Platform (WIP) to our members.**

Wyebot's Wireless Intelligence Platform (WIP) was created by industry expert WiFi specialists to create WiFi assurance for Education and other verticals where wireless communication is critical to everyday operations. 1:1 computing and IoT is commonplace in Education today, without reliable wireless communications, testing, lesson plans, etc... can be greatly impacted.

Wyebot's Wireless Intelligence Platform analyzes, optimizes and using the patented AI-based engine, automatically provides problems and solution identification resulting in a 90% reduction in mean time to problem resolution, a 50% reduction WiFi problem tickets, and reduction in onsite problem-solving visits by up to 80%. The Wyebot team has been in WiFi over 15 years and has developed a plug and play solution to solve a complex problem of WiFi assurance.
