

The Fastest and Safest Way to Share Data with EdTech Vendors

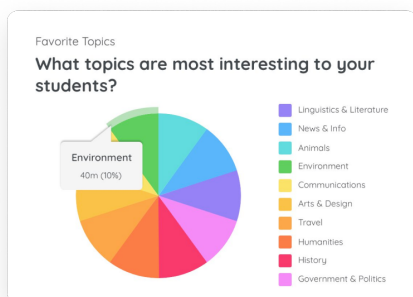

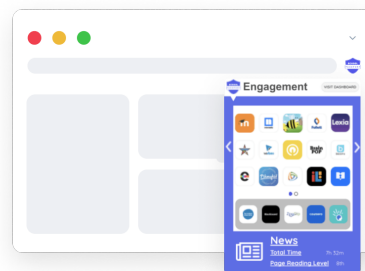

Engagement:
New Data – New Insights – Better Decisions

Engagement empowers districts with new data from across the digital landscape to provide new insights on how students engage and make better decisions to optimize resources and improve student outcomes.

Add the Chrome Extension

School Passport Engagement's patented technology measures when students are actually reading and engaged with high accuracy, and calculates the reading level and subject area of every webpage. One click in the browser provides a fully customizable launcher to all school provisioned applications.

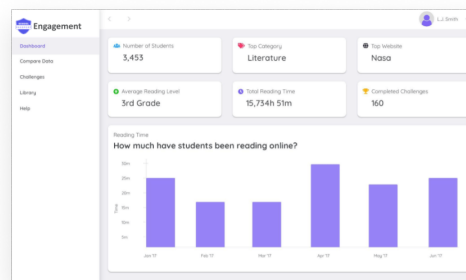

Track Stats

Educators can assign and monitor learning across the web by reading level, subject area, or website. Students get rewarded for learning and engaging in content that interest them.

Instant Insight

School leaders can instantly see how learning is being accomplished on all devices. Educator designed visualizations simplify thousands of data points. Drill down to a specific student by the minute.

Engagement & Analytics

School Passport Engagement ...

- provides new data and new insights that enable you to make better decisions.
- maximizes the value to help you save money on edtech apps and leverages resources on the internet.
- shows you new data about activity across apps and websites, creating new insights on useful tools, allowing you to make better decisions.
