

Be ambitious.

See how Insight can
accelerate your organization.

We help clients drive digital transformation

Modern Workplace

Create a productive, flexible and secure workplace.

Intelligent Edge

Gather and utilize data in the most efficient way possible to enable real-time decision-making and affect pivotal outcomes.

Modern Apps

Create new product experiences and transform legacy applications to drive increased value.

Data and AI

Leverage analytics and AI to transform operations and user experiences.

Modern Infrastructure

Architect and modernize multicloud and networking solutions to drive transformation.

Cybersecurity

Mitigate risks and secure assets.

Our services

Consulting Services

Create competitive advantage and improve operations by aligning business goals to IT and product strategies.

Hardware, Software and Lifecycle Services

Simplify supply chain and streamline costs across the global hardware and software lifecycle.

Managed Services

Eliminate business disruption and strategically align resources.

Modern Workplace

We help you modernize essential workplace products, platforms and workflows to create an environment for secure productivity and flexibility.

- Elevate employee and user experiences.
- Increase return on workplace technology investments.
- Better protect users and business data to reduce risk.
- Boost collaboration, productivity and mobile capabilities.
- Simplify IT management.

Insight delivers

- Assessments and strategy engagements
- End-user compute, IT service architecture and design
- Comprehensive device lifecycle services (DaaS, Managed Endpoint, warehousing, MMS, etc.)
- Solution PoCs and implementations
- End-user adoption and training advisory
- Security and identity access solutions
- Workplace services for enterprise and end-user support

Success across industries

Developed multi-architecture Cisco EA to **streamline licensing management and reduce costs**

[Learn more →](#)

Managing 25,000 desktops and laptops and thousands of mobile devices deployed for remote workers

[Learn more →](#)

Providing Device Lifecycle Services (imaging, mobility, PCs, break-fix) leveraging automation and custom integrations

[Learn more →](#)

Supporting via multiple Managed Services: Managed Endpoint, Managed O365, Managed SharePoint, Managed Data Center

[Learn more →](#)

Delivered PoCs with Insight Global Finance and Apple Financial Services to validate feasibility

[Learn more →](#)

Modern Apps

We modernize and build business applications using repeatable methodologies and an agile, user-centric approach to help your business innovate, differentiate and grow.

- Future-proof critical business applications.
- Increase innovation and organizational agility.
- Accelerate business growth and product sales.
- Optimize operations and increase productivity.
- Deliver fresh customer experiences.

Insight delivers

- Assessments and digital strategies
- Microservice application architectures, integrations and code refactoring
- Multicloud and low-code/no-code applications
- UX/UI testing and research
- Conversational agents
- Immersive technology (VR/AR/MR) solutions
- Cloud-native web, desktop and mobile apps
- Business process automation
- Change and training

Success across industries

Built interactive and cross-platform 3D app for children's hospital patient families with a native language chatbot

[Learn more →](#)

Developed Virtual Reality (VR) solution for cardiac procedure training using Microsoft HoloLens® 2 and Dynamics 365® Guides software

[Learn more →](#)

Created Agile framework for global design system to align brand guidelines with web and native user interface components

[Learn more →](#)

Designed a Retail as a Service (RaaS) offering ready to be commercialized and resold to other businesses

[Learn more →](#)

Developed chatbot solution to improve customer experience and increase visibility for internal teams to drive enhancements

[Learn more →](#)

Modern Infrastructure

We architect and deliver modern infrastructure solutions, management and support spanning cloud and data center platforms, modern networks and the edge to enable your digital transformation.

- Build a scalable foundation for innovation.
- Increase agility, resiliency and flexibility.
- Improve visibility and control of data assets.
- Deliver better user and customer experiences.
- Enable purposeful digital transformation.

Insight delivers

- Architecture, deployment and management of modern platforms
- Cloud, storage, data protection, networks, automation, virtualization, converged/hyperconverged
- Platform migration and consolidation
- Cloud enablement, management and cost analysis/optimization
- Workload discovery and alignment
- DevOps support

Success across industries

Implemented automation practice for Windows®, VMware® and Linux® systems, beginning with demos in the Research & Innovation Hubs
[Learn more →](#)

Analyzed assets with SnapStart discovery engine and modernized infrastructure to improve security, agility and disaster recovery
[Learn more →](#)

Developed a three-year Red Hat consumption plan with financial modelling with ongoing services to evolve DevOps and IT operations
[Learn more →](#)

Designed and built new colocation-based data center and relocated 600 VMs, 45 workloads and 100 physical servers
[Learn more →](#)

Delivering a five-year contract encompassing Global Service Desk, Global Managed Services, Microsoft EA, infrastructure and devices
[Learn more →](#)

Intelligent Edge

We architect and deliver edge solutions spanning network, compute, storage and AI/ML to drive business value and deliver ongoing support for the Internet of Things (IoT).

- Improve decision-making and business intelligence.
- Increase responsiveness to customer and market demands.
- Optimize operational processes and gain predictive capabilities.
- Create new revenue streams and drive differentiation.
- Scale and expand business operations to new areas.

Insight delivers

- Use case development
- Edge solution architecture and design
- Modernization and environment preparation
- Deployment and implementation
- Testing and optimization of new and existing edge solutions
- Monitoring and management
- Cloud-to-edge integration
- IoT evaluation, implementation, management and support

Success across industries

Leveraged security camera data for AI/ML workloads, delivering from design and configuration through warehousing and warranty

[Learn more →](#)

Designed and implemented IoT framework to automate temperature scanning using thermal cameras and Insight Connected Platform™

[Learn more →](#)

Implemented new wireless network infrastructure to support supply chain automation and autonomous forklift performance

[Learn more →](#)

Secured 50,000+ IoT devices and other endpoints with a highly automated, role-based access control solution

[Learn more →](#)

Developed IoT solution leveraging data science and predictive modeling to improve productivity and reduce costs

[Learn more →](#)

Data and AI

We modernize data platforms and architectures and build data analytics and AI solutions that transform your business operations and user experiences.

- Enable scalability at velocity.
- Increase visibility and data-driven decision-making.
- Optimize resources and costs via new operational efficiencies.
- Grow revenue and delight customers with new offerings.
- Improve competitive stance.

Insight delivers

- Modern data platforms, cloud and infrastructure
- Data, AI and ML solution use case development, design and implementation
- Business intelligence and advanced data analytics
- Natural language solutions
- Data and analytics estate development/re-development and unification
- Big data, data lakes and warehousing
- Automation
- Security and governance for data and AI solutions

Success across industries

Securely migrated from SAP® Big Data Service to Azure® HDInsight to improve scalability and reduce costs by nearly 80%

[Learn more →](#)

Built a single back-end, multichannel conversational agent that integrates with Facebook, Twitter and Alexa

[Learn more →](#)

Migrated an on-premises data environment to a SQL pool in Azure Synapse Analytics to improve performance and cost-efficiency

[Learn more →](#)

Designed and implemented a cloud-based, scalable enterprise Data Management Platform (DMP) to replace complex on-premises system

[Learn more →](#)

Refactored and migrated 14 databases and 800+ users to a Delta Lake data hub with Databricks® and Synapse SQL Pools spokes

[Learn more →](#)

Cybersecurity

We help you navigate security and compliance complexity associated with dispersed workforces, platforms, edge and IoT to mitigate risk and improve security posture.

- Improve threat detection, containment and neutralization.
- Enhance visibility and context with fewer manual inputs.
- Alleviate security teams through simpler security management.
- Implement governance and maintain compliance.
- Better manage and mitigate organizational risk.

Insight delivers

- Security framework implementation (SASE, Zero Trust, software-defined)
- Alignment with industry best practices
- Penetration testing
- Security operations and security strategy
- Ransomware readiness and response services
- Network segmentation and access control
- Governance, risk and compliance
- Cross-platform security
- Managed Security

Success across industries

Remediated following a ransomware attack, restoring all backup data and saving the client \$1.8 million in ransom payment

[Learn more →](#)

Implemented Microsoft Sentinel™ SIEM solution with ongoing cloud and Managed Security services to improve security and cost control

[Learn more →](#)

Migrated to a new disaster recovery colocation facility to ensure regulatory compliance and meet strict DHS requirements

[Learn more →](#)

Defined a new security and identity management policy with microsegmentation capabilities and performed data classification

[Learn more →](#)

Delivered PoC and implemented firewall to secure 20,000+ endpoints and consolidate infrastructure for \$1.4 million in cost savings

[Learn more →](#)
