

WORLD SAVVY

Current Offerings

WHO WE ARE

World Savvy is a leading national education nonprofit working to transform teaching, learning, and culture in K-12 public education so all students can learn, work, and thrive in our rapidly changing world as globally competent citizens.

WHAT WE DO

We partner with schools to support globally competent instruction, co-create future-ready learning environments, and empower students as changemakers.

COMPREHENSIVE SCHOOL PARTNERSHIPS

The Comprehensive School Partnership is a multi-year collaborative journey combining engaging frameworks and dynamic professional learning with the power of 1:1 coaching to embed global competence into teaching, learning, and school culture. Tailored to meet the needs of each school, a variety of customizable plans are offered.

LEADING FOR GLOBAL COMPETENCE COHORTS

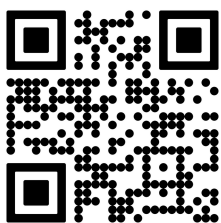

Our Leading for Global Competence cohort program supports school and district leaders in reimagining education through visionary leadership. Utilizing our frameworks and resources, we provide leaders with the space, time, and thought partnership necessary to plan for action and embed global competence across your school or district.

PROFILE OF A GRADUATE

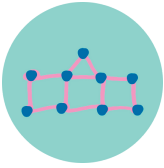

The Profile of a Graduate includes design and implementation of a future-ready graduate profile that centers global competence and guides the work of everyone in a school or district. We help districts to scaffold relevant learning experiences that develop the skills and dispositions young people need to thrive in a diverse, complex, ever-changing world.

COMPREHENSIVE SCHOOL PARTNERSHIPS

Content:

A Comprehensive School Partnership supports whole school transformation and typically includes the following each year:

- Launch Workshop
- Additional Professional Learning Opportunities
- One-on-One Educator Coaching
- Administrator Workshops
- School Level Showcase Support
- Curriculum Development Support

Timing and Delivery:

Our multi-year partnerships are designed collaboratively with district and school leaders. The ideal partnership length is 3 years.

LEADING FOR GLOBAL COMPETENCE COHORTS

Content:

Leading for Global Competence provides participants with concrete action plans for identifying needs and finding practical solutions to challenges in their learning community. Gain critical skills for tough conversations and lasting change within a supportive cohort of peers, shaping the future of learning in your district. Designed to launch deep work, these cohorts can be followed by a Comprehensive School Partnership.

Timing and Delivery:

Eight hours of professional learning. Cohorts can meet in-person or virtually for four 2-hour sessions. Some asynchronous work will be required between sessions (5-10 hours total).

PROFILE OF A GRADUATE

Content:

World Savvy engages district and school leaders as well as community members in an inclusive process that provides the space and time to wrestle with some essential questions around the kind of students they want to graduate, the skills and dispositions they want young people to have, and how leadership might build on strengths already present. We then support the design of a Profile of a Graduate and identify steps to deeply implement this plan across the school or district.

Timing and Delivery:

The initial phase requires 8 hours of professional development over a 12-week span - virtual, in person, or hybrid - as well as the use of tools designed by World Savvy to gather community input. The second phase requires approximately 10 hours, preferably in person.
