

At Blink Charging, we're not just an innovator; we're a driving force in the EV charging industry as owners and operators. With a presence in 27 countries, and 85,000+ chargers worldwide, we stand out by providing the ultimate charging solutions tailored to diverse needs, from airports to governments, fleets, and everyday commuters. Our commitment to sustainability is unwavering as we listen, learn, and lead the industry towards a more reliable and eco-friendly future.

AEPA is a multi-state nonprofit organization uniting educational agencies nationwide. Serving the interests of schools and agencies, AEPA facilitates equal purchasing opportunities by addressing current and future purchasing needs. This impactful organization caters to the requirements of 25 million students across the nation.

Through the AEPA contract, Blink has been chosen as an EV charging provider by various educational agencies. This includes Green River Regional Educational Cooperative, Cooperative Purchasing Connection, EducationPlus, Council of Educational Purchasing Consortia, InterMountain Education Service District (IMESD), and Wilson Education Center.

Cutting-Edge Technology
