A SIMPLE PROCESS

Technology Buyback Services

Contract: 023E

Quote

Send us a list of your stuff. We buy Apple, Google, and Windows devices. Device type, configurations, ballpark quantities, and date when they're available is all we need to get started.

Audit

Once the devices arrive at our facility the data is securely wiped and all markings that identify your institution are removed. Your devices then undergo comprehensive testing and inspection.

Get Paid!

Choose to receive either a check, wire transfer, or have us apply the credit to a technology vendor you are purchasing your next device deployment through.

Logistics

Next we'll arrange either White Glove packing and haul away, or send transit safe packaging and return labels to your school. There's never any shipping expense for you.

Review

We then send our serialized audit report and review it with you to answer any questions or concerns you may have. The report contains audit notes including verification of secure wipe status.

Let's get started today!

Just send us the device information or contact us for a quick consultation, and we'll get a quote prepared for you.

- Device Model And Type
- Device Configuration (Processor, Ram, Storage Capacity)
- Ballpark Quantity
- Date The Devices Will Be Available For Us To Purchase
