Federally Compliant Lighting Solutions

K-12 Schools & Academic Facilities

As a U.S.-based lighting manufacturer and a leader in energy-efficient lighting solutions, IKIO offers a full suite of project services and advanced building lighting automation.

With their state-of-the-art manufacturing facility in Batesville, BAA & BABAA compliant products, and 30+ years of industry expertise, they have successfully commissioned 6,000+ athletic luminaires and 2,000+ lighting projects across K-12 schools and academic institutions so far, helping their clients achieve energy savings of up to 691,200 kWh/Yr.

AEPA Awarded Vendor

Streamlined Solutions, Greater Savings!

Expertise in Grants & Incentives
to Maximize Funding Opportunities

Manufacturer-Direct Pricing
Without Compromising Quality

Trusted Domestic Partner Network
for Seamless Procurement

Tailored Lighting Solutions
to Meet Your Unique Needs

By partnering with a certified AEPA vendor like IKIO, you gain fast procurement, pre-negotiated pricing, expert funding guidance, and access to a trusted supplier network—saving time and maximizing cost efficiency.

4^{Step} Turnkey Solution

Experience effortlessness and efficiency in project completion like never before!

Step-1

Site Assessment & Project Scoping

- Expert-led site investigation and project scoping.
- In-depth analysis of existing lighting systems and energy usage.
- Comprehensive report generation using tools like Snapcount.

Step-2

Strategic Proposal with Customized Solutions

- Fixture selection & project visualization through advanced BIM models.
- Quantity estimation and lead time planning.
- Tailored proposal, including detailed product specifications and expert-recommended solutions.

Step-3

Final Quality Check & Direct Delivery

- Inventory undergoes Final Quality Check (FQC) before dispatch.
- Real-time updates by dedicated personnel throughout the process.
- Hassle-free, on-schedule delivery with no middlemen involved.

Step-4

Installation & Project Completion

- Professional installation by certified, trained technicians.
- Rigorous post-installation checks to verify performance standards.
- Final client feedback collected to ensure satisfaction.

IKIO Lights Up RFMA 2025!

IKIO had a successful presence at RFMA 2025 at Mandalay Bay, Las Vegas, connecting with industry professionals and showcasing its 360° lighting solutions for restaurant facilities.

Attendees met Chris T., Simran Kaur, and Robert (Bob) Tortorello, who shared insights on custom interior lighting, safety, landscape, photometrics, and installation—helping clients optimize energy efficiency and reduce costs.

Missed RFMA 2025?

No worries IKIO will be heading to more industry events this March!

Connect with their team and explore advanced lighting and automation solutions designed to enhance efficiency and performance in different industries!

Upcoming Events

➤ **SPECS Show 2025**
March 9-11 | Grapevine, TX

➤ **Facilities Maintenance Expo**
March 13 | Carmel, IN

➤ **NAESCO Federal Market Workshop**

March 13 | Washington, DC

IKIO Scales Up!

Expands to 150,000 sq. ft. in Batesville Industrial Park, Indiana

IKIO is taking a huge step forward with the expansion of their U.S. manufacturing footprint to 150,000 sq. ft. at Batesville Industrial Park, Indiana.

[Learn More About IKIO's Expansion](#)

Boosting American Manufacturing

Expanding domestic production capacity to support federal and commercial projects with efficiency and compliance.

Creating Local Job Opportunities

Providing new career opportunities in advanced manufacturing & contributing to local economic development.

Strengthening U.S. Supply Chain Resilience

Enhancing domestic sourcing, reducing dependencies on third parties, and ensuring faster lead times for clients.

Next-Gen Manufacturing at IKIO's New Facility

In-House Powder Coating System

Unmatched durability & finish control

CNC-Driven Drilling & Taping

High-precision fixture fabrication

Semi-Automated Assembly Line

Scalable & efficient operations

Advanced Photogoniometer Testing

Compliance & performance validation

High-Speed SMT Lines

Powering the future of LED technology
