

# Making Google Workspace Accessible for Every Nebraska Student

GrackleDocs, a proud partner of the Nebraska ESUCC Cooperative Purchasing program, is dedicated to ensuring digital accessibility for all. As Nebraska schools increasingly rely on Google Workspace, we provide a seamless solution to create and share accessible content, empowering every student to learn without barriers.

Educators create countless documents, presentations, and spreadsheets every day. But ensuring all of that content is accessible to students with disabilities? That's where things get complicated. Meeting accessibility standards shouldn't mean spending hours fixing documents manually or learning complex technical requirements.

## Grackle Workspace

Grackle Workspace is an all-in-one accessibility plug-in for Google Workspace. It integrates directly into your existing workflow, making it easy to identify and fix accessibility issues with just a few clicks. With GrackleDocs, you can ensure your content is compliant with WCAG, PDF/UA, and Section 508 standards, right from within the Google apps you use every day.

ADA Title II

### Grackle for Google Docs:

- 22 automated checks
- One-click conversion to tagged PDF
- Simple table and reading order adjustments

### Grackle for Google Sheets:

- 13 automated checks
- Convert to accessible HTML
- Automatic table detection and naming

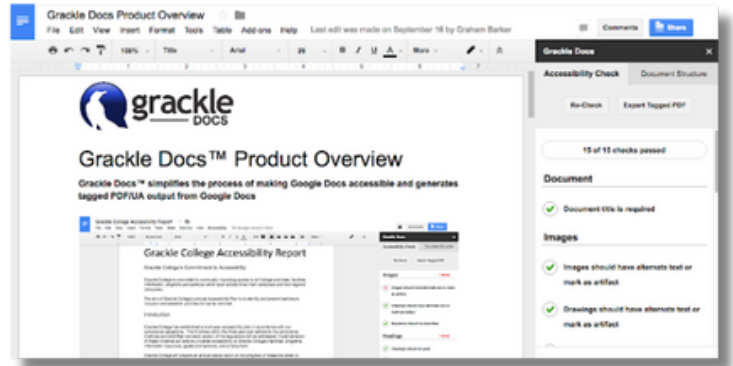

### Grackle for Google Slides:

- 16 automated checks
- Checks for titles, empty slides, color contrast
- Simple table tagging

## Effortless Accessibility, Seamless Integration

- Install the Grackle Workspace add-on from the Google Workspace Marketplace.
- Run the accessibility checker to instantly identify any issues in your document, sheet, or slide.
- Follow the guided steps to fix any errors and export your content to an accessible format like tagged PDF or accessible HTML.

## Why GrackleDocs?

### GrackleDocs is more than just a tool.

It's a complete solution for digital accessibility in your school.

We help you:

- Overcome the complexity of accessibility standards with automated checks and clear, actionable recommendations.
- Save time and resources by eliminating the need for manual remediation and external tools.
- Reduce the risk of non-compliance with accessibility regulations by ensuring your content meets global standards.
- Empower your educators with easy-to-use tools that integrate seamlessly into their existing workflow.
- Ensure consistent accessibility across all your Google Workspace content.
