

CLEAR Connect™

Communication & Learning Enhancement Application with Real-time translation

Language barriers are one of the biggest challenges in today's diverse classrooms. To overcome this, Audio Enhancement® developed CLEAR (Communication & Learning Enhancement Application with Real-Time Translation) Connect™ – a real-time translation and transcription tool that integrates with classroom audio.

CLEAR Connect delivers real time:

Translation and transcription of teacher instruction.

Text and audio support to reinforce learning.

Assistance for English Language Learners (ELLs), students with ADHD, and those with auditory processing challenges.

My students are getting the bigger picture and understanding more about assignments because of CLEAR Connect.”
-Ms. Pomeroy, Granite, UT
