

LIGHTING THAT BRINGS THE GAME TO LIFE

Made for every play, every performance. Designed to meet the diverse demands of athletic fields, our solutions deliver outstanding performance, seamless compliance, and effortless installation.

LATEST SPOTLIGHT

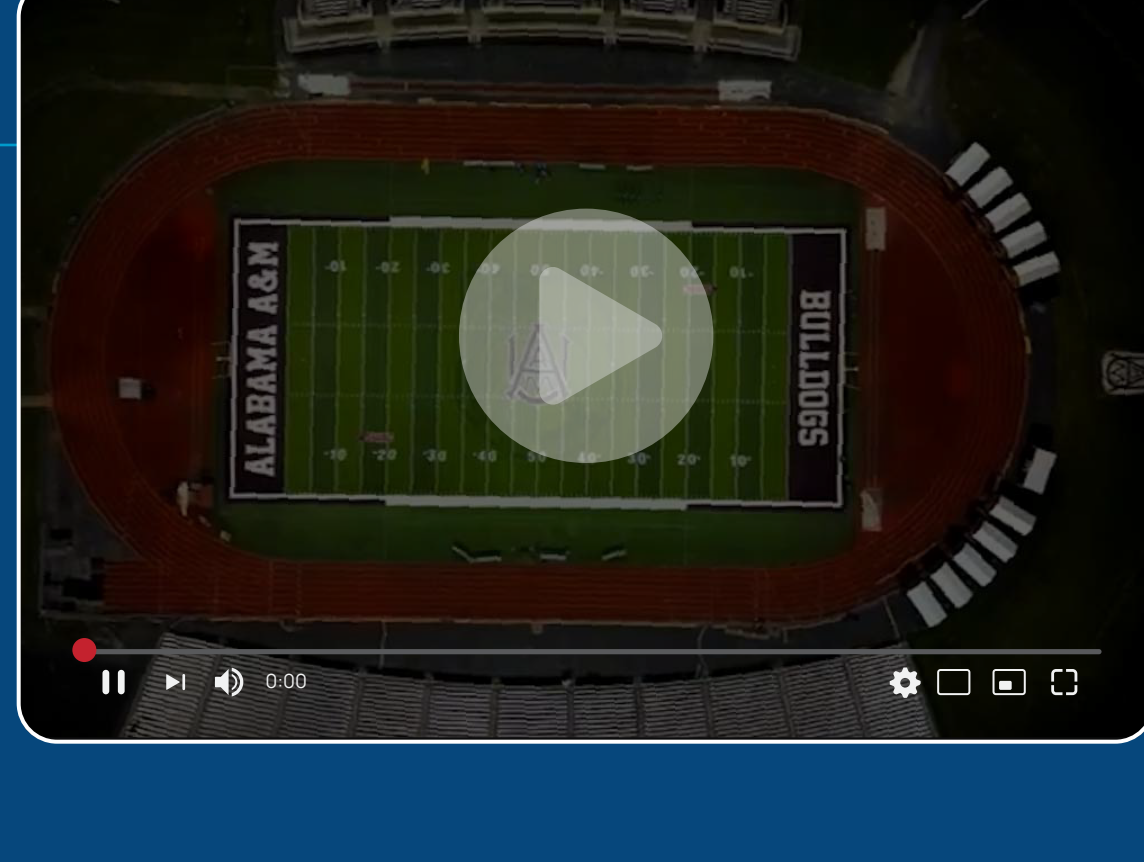

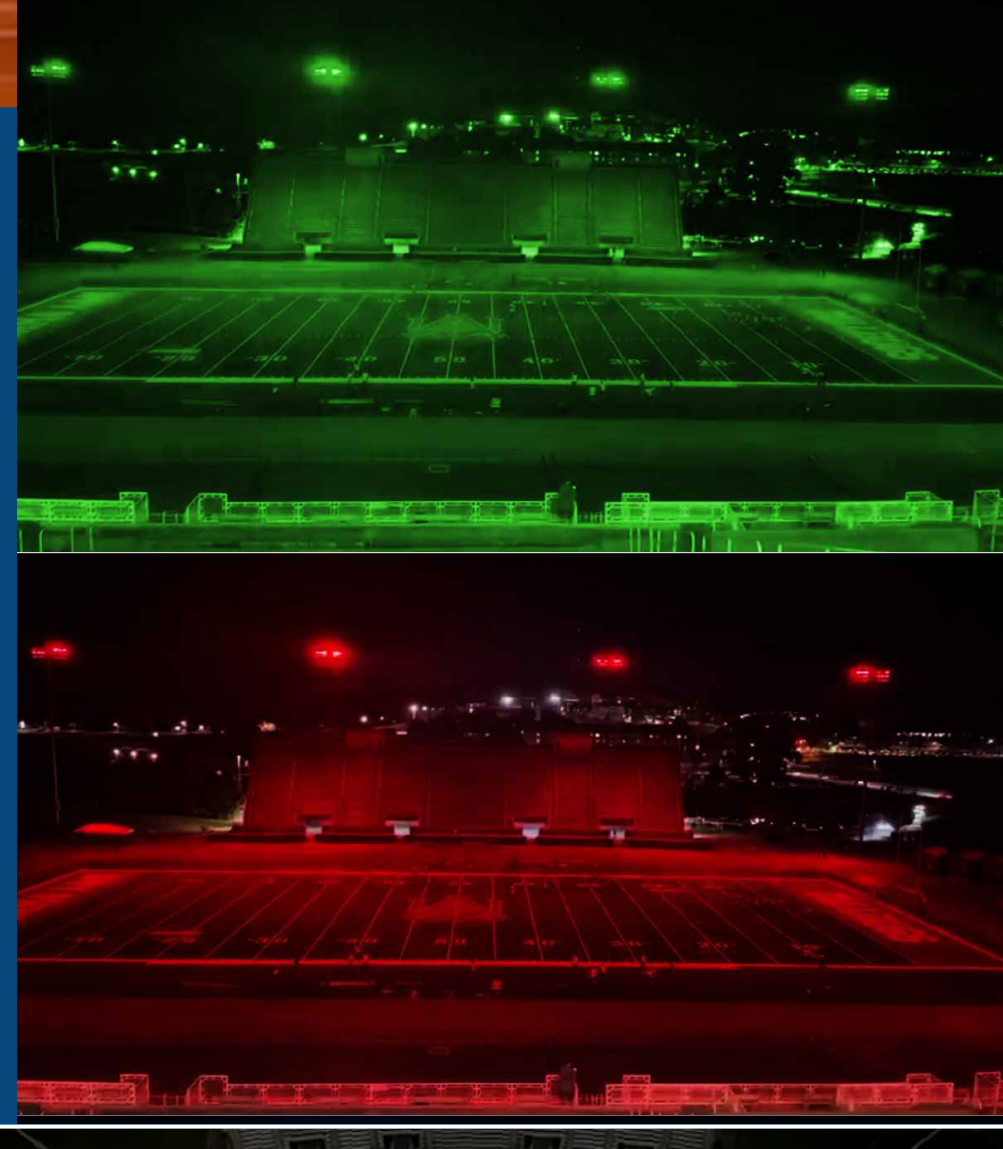

Louis Crews Stadium A&M University, Alabama

Bringing modern technology to timeless traditions, lighting designed to energize the game, the fans, and the community.

A new light that honors history. OLM brilliance ensures glare-free play that meets NCAA standards, while DMX scenes spark suspense, amplify halftime, and celebrate victory. The result? Nights that feel larger than life, where tradition and innovation unite.

Beyond illumination, its electrifying game energy, makes every night, every event memorable.

Powered by Trusted Lighting Technology

Innovation that fuels the game and connects the crowd.

» OLM (Optimum Light Management)

Light stays on the field only, no glare, no spill into the stands.

» Integrix Systems

Compact, integrated wiring box enables tool-free, retrofit-ready installs.

» Flexi-Driver

Ground-level driver, no lifts, cuts service time and costs, boosting reliability.

» DMX Control

Lights follow the action, shifting scenes from play to show to celebration.

The IKIO Advantage

Lighting that's engineered to exceed expectations:

Over 30 years of specialized expertise in athletic and academic lighting

NFHS-certified field layouts ensuring compliance with national safety and performance standards

Comprehensive ASHRAE Level 1 & 2 audits to streamline funding approvals and maximize rebate eligibility

Certified rebate-eligible products including DLC, BAA, BABA, and Energy Star, making upgrades cost-effective

Fixtures rigorously tested for surge protection, wind resistance, and features low EPA designs for structural ease

Extensive warranties up to 25 years, protecting your investment

Your Turnkey Lighting Journey Made Simple

STEP 1

Site Assessment & Scoping

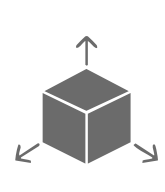

Expert-led site walk with clear analysis of lighting, energy, and SnapCount reports.

STEP 2

Tailored Proposal & Planning

Custom proposals with BIM previews, accurate estimates, and expert-recommended solutions.

STEP 3

Quality Check & Delivery

Final quality checks, real-time updates, and on-time direct delivery guaranteed.

STEP 4

Installation & Completion

Certified installation, post-performance checks, and client feedback for satisfaction.

Let's Light Up the Field Together

Discover AEPA-approved lighting solutions that simplify upgrades across schools, colleges, and public facilities.

Partner with IKIO now for energy efficiency, performance, and peace of mind.
