

# METALWORKING PROJECT KIT

**Midwest**  
Technology Products

The ultimate project for your metalworking class. Introduce your students to sheet metal fabrication with these tool box project kits. Using a set of basic plans, students will experience cutting and bending metal, as well as spot welding or use of pop rivets. Students can personalize their tool box by painting it or leaving it unfinished.

Kits sold in quantities of 6 or 24. Each tool box kit includes hardware, hinge, handle, corners, draw bolt or hasp, plans and detailed instructions. **Galvanized sheet metal required, sold separately.**
