

EPIC System®

Education Paging & Intercom Communications

The EPIC (Education Paging & Intercom Communications) System® by Audio Enhancement® is a simple, interactive web-based application with an easy-to-use interface that was built to tailor schoolwide communication to any school. Either via the EPIC Kiosk or the EPIC mobile app, administration-approved users can customize bells and announcements down to an individual classroom level, customize digital signage throughout the campus with clocks, announcements, emergency notifications, images, ticker tape messages, and next bell alerts, and intuitively script event specific communication pipelines, digital signage, and bells.

Key Features

SAFE Integration

- Prerecord emergency instructions
- 3rd Party API and Sensor integration keeps tabs on doors throughout facilities with EPIC's total campus overview map
- View dynamic security camera streams across the district when/while SAFE Alerts are active
- Active headcounts and live map updates during school emergencies

Intercom, Bells, and Notifications

- Customize paging and bell zones throughout the school
- Easily select and page multiple zones and classrooms at the same time
- Deliver announcements, prerecorded notifications, and customizable bell sounds to chosen zones on a schedule or on the fly

Classroom Audio Systems

- Links with classroom audio to distribute voices through the classroom
